1 Introduction	1
2 Early Online and Multiplayer Games	5
2.1 Defining Networked and Multiplayer Games	5
2.2 Early Multiplayer Games	6
2.2.1 <i>PLATO</i>	8
2.2.2 <i>MultiUser Dungeons</i>	8
2.2.3 <i>Arcade Games</i>	9
2.2.4 <i>Hosted Online Games</i>	11
2.3 Multiplayer Network Games	12
2.3.1 <i>DOOM – Networked First-Person Shooters Arrive</i>	12
References	14
3 Recent Online and Multiplayer Games	15
3.1 Communication Architectures	15
3.2 The Evolution of Online Games	17
3.2.1 <i>FPS Games</i>	18
3.2.2 <i>Massively Multiplayer Games</i>	21
3.2.3 <i>RTS Games</i>	22
3.2.4 <i>Sports Games</i>	24
3.3 Summary of Growth of Online Games	27
3.4 The Evolution of Online Game Platforms	29
3.4.1 <i>PCs</i>	29
3.4.2 <i>Game Consoles</i>	29
3.4.3 <i>Handheld Game Consoles</i>	30
3.4.4 <i>Summary</i>	32
3.5 Context of Computer Games	32
3.5.1 <i>Physical Reality</i>	32
3.5.2 <i>Telepresence</i>	33
3.5.3 <i>Augmented Reality</i>	34
3.5.4 <i>Distributed Virtual Environments</i>	39
References	39
4 Basic Internet Architecture	41
4.1 IP Networks as seen from the Edge	42
4.1.1 <i>Endpoints and Addressing</i>	43

4.1.2	<i>Layered Transport Services</i>	44
4.1.3	<i>Unicast, Broadcast and Multicast</i>	46
4.2	Connectivity and Routing	47
4.2.1	<i>Hierarchy and Aggregation</i>	49
4.2.2	<i>Routing Protocols</i>	51
4.2.3	<i>Per-hop Packet Transport</i>	55
4.3	Address Management	60
4.3.1	<i>Address Delegation and Assignment</i>	60
4.3.2	<i>Network Address Translation</i>	61
4.3.3	<i>Dynamic Host Configuration Protocol</i>	64
4.3.4	<i>Domain Name System</i>	66
	References	67
5	Network Latency, Jitter and Loss	69
5.1	The Relevance of Latency, Jitter and Loss	69
5.2	Sources of Latency, Jitter and Loss in the Network	70
5.2.1	<i>Propagation Delay and the Laws of Physics</i>	71
5.2.2	<i>Serialisation</i>	71
5.2.3	<i>Queuing Delays</i>	72
5.2.4	<i>Sources of Jitter in the Network</i>	73
5.2.5	<i>Sources of Packet Loss in the Network</i>	74
5.3	Network Control of Lag, Jitter and Loss	75
5.3.1	<i>Preferential IP Layer Queuing and Scheduling</i>	76
5.3.2	<i>Link Layer Support for Packet Prioritisation</i>	77
5.3.3	<i>Where to Place and Trust Traffic Classification</i>	78
5.4	Measuring Network Conditions	79
	References	81
6	Latency Compensation Techniques	83
6.1	The Need for Latency Compensation	83
6.2	Prediction	86
6.2.1	<i>Player Prediction</i>	87
6.2.2	<i>Opponent Prediction</i>	89
6.2.3	<i>Prediction Summary</i>	92
6.3	Time Manipulation	93
6.3.1	<i>Time Delay</i>	93
6.3.2	<i>Time Warp</i>	94
6.3.3	<i>Data compression</i>	96
6.4	Visual Tricks	97
6.5	Latency Compensation and Cheating	98
	References	98
7	Playability versus Network Conditions and Cheats	101
7.1	Measuring Player Tolerance for Network Disruptions	101
7.1.1	<i>Empirical Research</i>	102
7.1.2	<i>Sources of Error and Uncertainty</i>	105
7.1.3	<i>Considerations for Creating Artificial Network Conditions</i>	107

7.2 Communication Models, Cheats and Cheat-Mitigation	108
7.2.1 <i>Classifying and Naming Methods of Cheating</i>	109
7.2.2 <i>Server-side Cheats</i>	109
7.2.3 <i>Client-side Cheats</i>	111
7.2.4 <i>Network-layer Cheats</i>	115
7.2.5 <i>Cheat-mitigation</i>	116
