

The book cover features a dark blue background with a white curved line sweeping across the top. On the left, there is a vertical strip with a collage of images: a globe, a person's face, and a close-up of a hand. The title 'EDUCATIONAL RESEARCH' is prominently displayed in large white letters, with 'AN INTRODUCTION' in smaller blue letters below it. The authors' names are listed at the bottom in white. A small blue oval with white text indicates it is the eighth edition.

Pearson International Edition

# EDUCATIONAL RESEARCH

AN INTRODUCTION

EIGHTH  
EDITION

MEREDITH D. GALL  
JOYCE P. GALL  
WALTER R. BORG

# CONTENTS

*Preface*      xxvii

*About the Authors*      xxxi

---

## **PART I: Introduction**

1

<b>1. The Nature of Educational Research</b>	2
Contributions of Research to Knowledge about Education	3
Description	3
Prediction	4
Improvement	5
Explanation	6
Uses of Theory	8
Approaches to Theory Development	8
Example of Theory Testing	9
Application of Research to Educational Practice	10
Limitations of Research Knowledge	12
The Importance of Basic Research	14
Funding for Educational Research	15
Epistemological Issues in Educational Research	15
Positivism and Postpositivism	15
Constructivism	21
Objective and Constructed Realities	23
Cases and Populations	24
Numerical and Verbal Representations of Social Reality	26
Mechanical, Interpretive, and Structural Views of Causation	28
Postmodernism	30
Quantitative and Qualitative Research	31
Mixed-Methods Research	32
A Definition of Research	34
Learning How to Do Educational Research	36
Self-Check Test	37

---

**PART II: Planning a Research Study**

39

**2. The Research Process: From Proposal to Final Report** 40

Introduction 41

Identifying a Research Problem 41

Reading the Research Literature 42

Doing Theory-Based Research 44

Example of Theory-Based Research 44

Advantages of Theory-Based Research 45

Replicating and Extending Previous Research 45

Working on a Team Project 48

Preparing a Research Proposal 49

Introductory Section 49

Research Hypotheses in Quantitative Research 50

Research Hypotheses in Qualitative Research 51

Research Questions and Purposes 52

Literature Review Section 53

Research Design Section 53

Research Methods Section 54

Data Analysis Section 54

Protection of Human Subjects Section 55

Time Line Section 55

Conducting a Pilot Study 56

Using the Proposal in Writing the Dissertation 56

Format 58

Front Matter 58

Introductory Chapter 59

Literature Review Chapter 59

Research Method Chapter 61

Results Chapter 61

Discussion Chapter 62

Back Matter 63

Preparing a Journal Article 63

Preparing a Paper for a Professional Meeting 65

Recommendations for Planning and Reporting Research 66

Self-Check Test 67

<b>3. Ethics and Site Relations in Educational Research</b>	<b>68</b>
The Importance of Ethics and Site Relations in Educational Research	68
Typical Aspects of Educational Research That May Raise Ethical Concerns	69
Planning and Design of Research	70
Researcher Qualifications	70
Conflict of Interest	70
Neglect of Important Topics	70
Research Methodology	71
Control Group Experience	71
Use of Deception	71
Use of Tests	72
Termination of Treatment Conditions	73
Data Collection and Analysis	73
Reporting of Research	74
Authorship	74
Plagiarism	75
Partial or Dual Publication	75
Formal Regulation of Research Ethics	76
Statements of Ethical Principles	76
Government Regulations	76
Ethical Standards of the American Educational Research Association	76
Ethical Principles of the American Psychological Association	78
Institutional Review Boards' Role in Ensuring Research Ethics	78
The Design and Purpose of an IRB	78
Examples of Research Situations That Call for IRB Review	79
Criteria for IRB Approval of a Research Project	80
Assessment of the Risk–Benefit Ratio	80
Selection of Participants	81
Obtaining Informed Consent	82
Maintenance of Privacy and Confidentiality	84
Treatment of Vulnerable Populations	86
Site Relations in Educational Research	87
Location of a Research Site	87
Securing Permission and Cooperation	88
Building a Relationship with the Site	90
Dealing with Human Relations Issues	91
Recommendations for Ensuring That a Research Study Is Ethical, Legal, and Harmonious	92
Self-Check Test	93

<b>4. Reviewing the Literature</b>	95
Purposes of a Literature Review	96
Major Steps in a Literature Review	98
Searching Preliminary Sources	99
Types of Documents Indexed by Preliminary Sources	99
Content and Coverage of Online Preliminary Sources	100
Popular Online Preliminary Sources	100
Search Strategies in Using Preliminary Sources	103
Displaying Records in Preliminary Sources	105
Using Secondary Sources	107
Reading Primary Sources	110
Classifying Primary Sources	111
Critical Evaluation of Research Studies	111
Synthesizing the Findings of Your Literature Review	112
Synthesizing Quantitative Research Findings	114
The Narrative Review	115
Vote Counting	115
The Chi-Square Method	115
Meta-Analysis and Effect Size	116
Synthesizing Qualitative Research Findings	118
Recommendations for Reviewing Research Literature	121
Self-Check Test	121

---

## **PART III: Research Methods**

123

### **5. Statistical Techniques**

124

The Use of Statistics in Educational Research	125
Example of Statistical Analysis in a Research Study	125
The Need for Judgment in Statistical Analysis	126
Acquiring Statistical Expertise	128
Types of Scores	129
Continuous Scores	129
Age and Grade Equivalents	130
Standard Scores	131
Rank Scores	131
Categories	132
Descriptive Statistics	132
Measures of Central Tendency	133

Mean, Median, and Mode	134
Skewness	134
Categorical Data	135
Measures of Variability	135
Standard Deviation	135
Normal Curve	135
Other Measures of Variability	136
Correlational Statistics	137
Inferential Statistics	137
Generalizing from a Sample to a Population	137
The Null Hypothesis	138
Tests of Statistical Significance	138
Levels of Statistical Significance	139
Type I and Type II Errors	139
Interpretation of Significance Tests	140
Alpha and Probability Values	140
Misinterpretation of $p$ Values	140
Criticisms of Significance Tests	142
Types of Significance Tests	142
Statistical Power Analysis	142
Supplements to Significance Tests	146
Confidence Limits	146
Replication of Research Results	148
Effect Size	149
Psychometric Statistics	150
Problems in Statistical Analysis	151
The Need for Exploratory Data Analysis	151
Stem-and-Leaf Displays	152
Advantages of Stem-and-Leaf Displays	154
Graphical Displays	155
Missing Data	156
The Unit of Statistical Analysis	158
Multilevel Analysis	159
Processing Statistical Data	160
Computer Hardware	160
Computer Software	161
Computer Consultants	161
Checking Data Analyses for Accuracy	162
Storing Research Data	162

Recommendations for Doing Statistical Analyses	163
Self-Check Test	163
<b>6. Selecting a Sample</b>	165
Sampling Logic in Research	166
Sampling in Quantitative Research	166
Defining the Population of Interest	166
Target and Accessible Populations	166
Inferential Leaps from a Sample to a Population	168
Determining Population Validity	169
Types of Probability Sampling	170
Simple Random Sampling	170
Systematic Random Sampling	172
Stratified Random Sampling	173
Cluster Sampling	173
Example of Sampling a Phenomenon Rather Than Individuals	174
Nonprobability Sampling	174
Convenience Sampling	175
Determining Sample Size for a Quantitative Research Study	176
Sampling in Qualitative Research	177
Rationale of Purposeful Sampling	178
Applying Replication Logic	178
Types of Purposeful Sampling	180
Strategies to Select Cases Representing a Key Characteristic	180
Strategies Reflecting a Conceptual Rationale	183
Emergent Strategies	184
Strategy Lacking a Rationale	185
Determining the Number of Cases for a Qualitative Research Study	185
Volunteers in Research Samples	186
Characteristics of Research Volunteers	186
Volunteers in Research Requiring Parental Consent	187
Checking Volunteer Characteristics	188
Improving the Rate of Volunteering	189
Recommendations for Selecting a Research Sample	190
Self-Check Test	190
<b>7. Collecting Research Data with Tests and Self-Report Measures</b>	192
Use of Tests and Self-Report Measures in Educational Research	193
Characteristics of a Good Test in Research	194
Criteria for Judging the Quality of Tests	194

Objectivity	194
Standard Conditions of Administration and Scoring	194
Standards for Interpretation	195
Fairness	195
Test Validity	195
Evidence from Test Content	196
Evidence from Response Processes	197
Evidence from Internal Structure	197
Evidence from Relationship to Other Variables	198
Evidence from Consequences of Testing	199
Test Reliability	200
Types of Test Reliability	201
Use of Generalizability Theory	203
Standard Error of Measurement	203
Use of Item Response Theory	204
Approaches to Measurement	208
Standardized versus Locally Constructed Tests	208
Referenced Test Scores	209
Norm-Referenced Measurement	209
Criterion-Referenced Measurement	210
Individual-Referenced Measurement	211
Computer-Based Testing	212
Use of Computers in Test Development	212
Use of Computers in Test Administration, Scoring, and Interpretation	212
Individual versus Group Testing	213
Types of Tests and Self-Report Measures	213
Measures of Performance	214
Intelligence Tests	214
Aptitude Tests	214
Achievement Tests	214
Diagnostic Tests	215
Performance Assessment	215
Measures of Personal Characteristics	218
Personality Inventories	218
Projective Techniques	218
Measures of Specific Personality Traits	219
Measures of Self-Concept	219
Measures of Learning Styles and Habits	219

Attitude Scales	220
Measures of Vocational Interest	220
Obtaining Information about Tests and Self-Report Measures	220
Searching Preliminary and Secondary Sources	221
Reading the Test Manual	221
Examining the Test Itself	221
Contacting the Test Developer	222
Using Tests or Self-Report Measures in a Research Project	222
Developing Your Own Test	222
Dealing with Resistance to Tests	222
Testing in Field Sites	223
Gaining the Cooperation of Test-Takers	224
Recommendations for Using Tests and Self-Report Measures in Research	225
Self-Check Test	225
 <b>8. Collecting Research Data with Questionnaires and Interviews</b>	
	227
Questionnaires and Interviews as Data-Collection Methods	228
Selecting between Questionnaires and Interviews	228
Validity and Reliability Issues	229
Survey Research	230
Steps in Constructing and Administering a Research Questionnaire	230
Step 1: Defining Research Objectives	230
Step 2: Selecting a Sample	232
Step 3: Designing the Questionnaire	233
Anonymity of Respondents	233
Item Form	233
Use of Questionnaires in the Measurement of Attitudes	235
Web Questionnaires	236
Step 4: Pilot-Testing the Questionnaire	236
Step 5: Precontacting the Sample	237
Step 6: Writing a Cover Letter	237
Step 7: Following Up with Nonrespondents	240
Step 8: Analyzing Questionnaire Data	241
Steps in Preparing and Conducting Research Interviews	243
Step 1: Defining the Purpose of the Interview	243
Key Informant Interviews	243
Survey Interviews	244
Focus Group Interviews	244

Step 2: Selecting a Sample	245
Step 3: Designing the Interview Format	245
Interview Formats in Quantitative Research	246
Interview Formats in Qualitative Research	247
Telephone Interviews	247
Computer-Assisted Telephone Interviews	248
Web Interviews	249
Step 4: Developing Questions	249
Step 5: Selecting and Training Interviewers	250
Distinctive Respondents	250
Respondents as Interviewers	252
Training of Interviewers	252
Step 6: Pilot-Testing the Interview	253
Step 7: Conducting the Interview	254
Interviewing Tasks	254
Recording Interview Data	256
Step 8: Analyzing Interview Data	257
Recommendations for Using a Questionnaire or an Interview Guide to Collect Research Data	259
Self-Check Test	260
<b>9. Collecting Research Data through Observation and Content Analysis</b>	<b>262</b>
Forms of Observation and Content Analysis	263
Reactive Observation in Quantitative Research	264
Defining Observational Variables	264
Types of Observational Variables	266
Recording and Analyzing Observations	266
Types of Recording Procedures	266
Selecting an Observation Recording Procedure	269
Standard Observation Forms	270
Audio and Video Recording	270
Use of Computers and Other Electronic Devices	271
Selecting and Training Observers	271
Determining Observer Agreement	272
Reducing Observer Effects	273
Types of Observer Effects	273
Reactive Observation in Qualitative Research	275
Purpose of Observation in Qualitative Research	276
Defining the Observer Role	277

Preparing for Observation	278
Determining the Focus of Observation	278
Gaining Entry into the Field Setting	280
Recording Observations	281
What Field Notes Should Include	281
Dealing with Observer Effects	283
Analyzing Qualitative Observational Data	284
Nonreactive Observation in Quantitative Research	284
Use of Unobtrusive Measures	284
Potential Limitations of Unobtrusive Measures	285
Nonreactive Observation in Qualitative Research	286
Content Analysis of Documents and Other Communication Media	287
Content Analysis in Quantitative Research	288
Steps in Content Analysis	288
Analysis of Documents and Records in Qualitative Observation	291
Recommendations for Using Observational and Content-Analysis Methods	294
Self-Check Test	295

---

## **PART IV: Quantitative Research Design**

297

### **10. Nonexperimental Research: Descriptive and Causal-Comparative Designs**

298

#### **Introduction**

299

    An Example from Medical Research 299

#### **Descriptive Research Designs**

300

    The Purpose of Descriptive Research 300

    Measurement in Descriptive Research 301

    Statistics in Descriptive Research 301

    Description of a Sample at One Point in Time 302

    Longitudinal Description of a Sample 302

        Trend Studies 303

        Cohort Studies 303

        Panel Studies 304

        Cross-Sectional Studies 305

#### **Causal-Comparative Research Designs**

306

    The Study of Cause-and-Effect Relationships 306

    Example of a Causal-Comparative Research Study 307

Planning a Causal-Comparative Study	311
Statement of the Research Problem	311
Selecting Comparison Groups	312
Data Collection	314
Data Analysis	315
Statistical Analysis: The <i>t</i> Test	315
The <i>t</i> Test for the Difference between Means	315
The <i>t</i> Test for a Single Mean	317
Statistical Analysis: Analysis of Variance	318
Comparison of More Than Two Means	318
Analysis of Covariance	320
Multivariate Analysis of Variance	321
Tests for the Difference between Variances	324
Statistical Analysis: Nonparametric Tests	325
Advantages and Disadvantages of Nonparametric Tests	325
The Chi-Square Test	325
Other Nonparametric Tests	327
Interpretation of Causal-Comparative Findings	328
Recommendations for Doing Descriptive and Causal-Comparative Research	329
Self-Check Test	329
<b>11. Nonexperimental Research: Correlational Designs</b>	<b>331</b>
The Nature of Correlation	332
Types of Scattergrams	332
Positive Correlation	332
Negative Correlation	333
Absence of Correlation	334
The Mathematics of Correlation	334
Correlational Research Design	335
Correlation and Causality	335
Advantages and Uses of Correlational Research	336
Planning a Causal Relationship Study	337
Basic Research Design	337
The Problem	337
Selection of Research Participants	338
Data Collection	338
Data Analysis	339
Problems of Interpretation	340
Limitations of Causal Relationship Studies	341

Planning a Prediction Study	341
Types of Prediction Studies	341
Basic Research Design	342
The Problem	342
Selection of Research Participants	343
Data Collection	343
Data Analysis	344
Statistical Factors in Prediction Research	346
Group Prediction	346
Shrinkage	346
Bivariate Correlational Statistics	347
Product-Moment Correlation Coefficient	347
Correlation Ratio	347
Adjustments to Correlation Coefficients	350
Correction for Attenuation	350
Correction for Restriction in Range	350
Part and Partial Correlation	351
Multivariate Correlational Statistics	352
Multiple Regression	353
A Research Example	353
Steps in a Multiple Regression Analysis	356
Multiple Correlation Coefficient	358
Coefficient of Determination	359
The Mathematics of Multiple Regression	359
Types of Multiple Regression	360
Cautions in Using Multiple Regression	361
Hierarchical Linear Modeling	361
Path Analysis	363
Steps in Path Analysis	364
Path Analysis Models	366
The Mathematics of Path Analysis	367
Path Analysis and Theory Testing	368
Factor Analysis	368
Factor Loadings and Factor Scores	369
Types of Factor Analysis	370
Structural Equation Modeling	371
Differential Analysis	373
Subgroup Analysis in Causal Relationship Studies	373
Moderator Variables in Prediction Studies	374

Interpretation of Correlation Coefficients	375
Statistical Significance of Correlation Coefficients	375
Interpreting the Magnitude of Correlation Coefficients	375
Recommendations for Doing Correlational Research	377
Self-Check Test	377

## **12. Experimental Research: Designs, Part 1** 379

Introduction	379
Terminology in Experimental Design	381
Validity Problems in Experiments	381
Internal Validity of Experiments	383
External Validity of Experiments	388
Population Validity	389
Ecological Validity	390
Representative Design	392
Issues in Designing Experiments	394
Experimenter Bias	394
Treatment Fidelity	395
Strong versus Weak Experimental Treatments	396
Random Assignment in Experiments	397
Single-Group Designs	402
The One-Shot Case Study	402
One-Group Pretest-Posttest Design	402
Time-Series Design	404
Control-Group Designs with Random Assignment	404
Pretest-Posttest Control-Group Design	405
Posttest-Only Control-Group Design	409
One-Variable Multiple-Condition Design	412
Recommendations for Doing Experiments	413
Self-Check Test	413

## **13. Experimental Research: Designs, Part 2** 415

Quasi-Experimental Designs	416
Static-Group Comparison Design	416
Nonequivalent Control-Group Design	416
Factorial Designs	418
Two-Factor Experiments	418
Example of a Two-Factor Experiment	418

Solomon Four-Group Design	421
Example of a Solomon Four-Group Experiment	421
Variations in Factorial Experiments	423
Three-Factor Experiments	423
Manipulability of Independent Variables	424
Fixed and Random Factors	425
Assignment of Participants to Multiple Treatments	426
Single-Case Designs	426
Example of a Single-Case Experiment	427
General Design Considerations	430
Reliable Observation	430
Repeated Measurement	431
Description of Experimental Conditions	431
Baseline and Treatment Stability	431
Length of Baseline and Treatment Phases	432
A-B-A Designs	432
A-B Design	432
A-B-A and A-B-A-B Designs	432
Multiple-Baseline Designs	433
Example of a Multiple-Baseline Experiment	433
Statistical Analysis of Single-Case Data	435
External Validity of Single-Case Designs	437
Other Experimental Designs	437
Measurement of Change	438
Gain Scores	438
Statistical Analysis of Change	440
Multiple Regression	440
Analysis of Covariance and <i>t</i> Tests	440
Analysis of Variance for Repeated Measures	440
Recommendations for Doing Experiments	443
Self-Check Test	443

---

## PART V: Approaches to Qualitative Research

445

### 14. Case Study Research 446

Importance of Case Study in Qualitative Research	447
Characteristics of Case Studies	447
Study of Particular Instances	447
In-Depth Study of the Case	448

Study of a Phenomenon in Its Real-Life Context	449
Representation of Emic and Etic Perspectives	450
Purposes of Case Studies	451
Description	451
Explanation	452
Evaluation	453
Designing a Case Study	453
Formulating a Research Problem	455
Selecting a Case	456
Defining the Role of the Case Study Researcher	457
Gaining Entry	458
Addressing Ethical Issues	459
Collecting Case Study Data	460
Personal Involvement in the Data-Collection Process	461
Analyzing Data during Data Collection	463
Ending Data Collection	465
Analyzing Case Study Data	465
Interpretational Analysis	466
Segmenting the Database	466
Developing Categories	467
Coding Segments	468
Grouping Category Segments	468
Drawing Conclusions	469
Structural Analysis	471
Reflective Analysis	472
Ensuring the Quality and Rigor of Qualitative Research	473
Strategies to Meet Users' Needs	474
Strategies to Ensure Thorough Data Collection	474
Strategies Reflecting Sound Research Design	475
Positivist Conceptions of the Validity and Reliability of Case Study Research	476
Determining the Applicability of Case Study Findings	477
Reporting a Case Study	478
Finalizing Definition of the Case	479
Reflective Reporting	480
Analytic Reporting	482
Advantages and Disadvantages of Case Study Research	484
Recommendations for Doing Case Studies	485
Self-Check Test	486

<b>15. Qualitative Research Traditions</b>	<b>488</b>
Qualitative Research Traditions in Educational Research	489
The Characteristics of Qualitative Research Traditions	490
Traditions Involving Investigation of Lived Experience	492
Cognitive Psychology	492
A Study of Differences in the Knowledge Structures of Experts and Novices	493
Phenomenology	495
Phenomenographic Research	497
Life History Research	498
Traditions Involving Investigation of Society and Culture	500
Ethnography	500
Phenomena Studied by Ethnographers	503
Doing an Ethnographic Study	503
Issues Facing Ethnography	508
Cultural Studies and Critical-Theory Research	509
Assumptions of the Cultural Studies Tradition	509
Methods of Inquiry	512
Focus on Issues Relevant to Education	513
Theory Building in Cultural Studies	514
Strengths and Weaknesses of Cultural Studies	517
Ethnomethodology	518
Traditions Involving Investigation of Language and Communication	519
Hermeneutics	520
Semiotics	522
Structuralism and Poststructuralism	523
Recommendations for Designing a Study Based on a Qualitative Research Tradition	526
Self-Check Test	526
 <b>16. Historical Research</b>	 <b>528</b>
Importance of Historical Research in Education	529
Subject Matter of Historical Research	530
Impact of Historical Research on Education	530
A Subject in the Curriculum	530
A Foundation for Developing New Knowledge and Policies Related to Education	531
A Variable Affecting the Validity of Research Findings	532
A Basis for Evaluating Educational Programs	532
A Tool in Planning the Future	532

Historiography and the Stages of Historical Research	533
Defining a Problem for Historical Research	534
Studying Historical Sources	536
Formulating a Search Plan	536
Searching Preliminary Sources	536
Reading Secondary Sources	537
Studying Primary Sources	537
Recording Information from Historical Sources	539
Recording and Analyzing Quantitative Data	540
Evaluation of Historical Sources	540
External Criticism	541
Internal Criticism	542
Interpretation in Historical Research	543
Use of Concepts to Interpret Historical Information	543
Historians as Interpreters	544
Causal Inference in Historical Research	546
Generalizability of Historical Evidence	547
Writing a Historical Research Report	548
Examples of Historical Research in Education	549
A Micropolitical Perspective on the Education of Mexican Americans in a South Texas Community	549
Politics and the Pendulum: A Historical Analysis of Whole Language	551
Expanding Political Opportunities	552
Shared Cognitions	552
Mobilization of Indigent Organization Resources	552
Shifting Response of Other Organized Groups to the Movement	553
Recommendations for Doing Historical Research	554
Self-Check Test	554

---

## **PART VI: Applications of Research**

557

### **17. Evaluation Research**

The Role of Evaluation in Education	559
Relationship between Evaluation and Research	559
Steps in Program Evaluation	560
Clarifying the Reasons for an Evaluation	561
Selecting an Evaluation Model	561

Example of Collaborative Evaluation	562
Identifying Stakeholders	562
Deciding What Is to Be Evaluated	563
Program Goals	563
Program Resources and Procedures	563
Program Management	564
Program Outcomes	565
Identifying Evaluation Questions	565
Developing an Evaluation Design and Time Line	566
Collecting and Analyzing Evaluation Data	567
Reporting Evaluation Results	568
Criteria for Effective Evaluation Research	569
Program Evaluation Standards	569
Personnel Evaluation Standards	572
Other Standards for Educational Evaluation	572
Quantitative Approaches to Evaluation	573
Evaluation of the Individual	573
Objectives-Based Evaluation	573
Needs Assessment	575
Example of Needs Assessment	576
Limitations of Needs Assessment	578
Context–Input–Process–Product (CIPP) Evaluation	579
Qualitative Approaches to Evaluation	580
Responsive Evaluation	581
Example of Responsive Evaluation	581
Emergent Design	582
Fourth-Generation Evaluation	583
Quasi-Legal Models of Evaluation	583
Adversary Evaluation	583
Judicial Evaluation	585
Expertise-Based Evaluation	586
Educational Connoisseurship and Criticism	586
Example of Expertise-Based Evaluation	587
Empowerment Evaluation	588
Example of Empowerment Evaluation	588
Educational Research and Development	589
R&D Model	589

Formative and Summative Evaluation	590
Example of R&D Evaluation	592
Recommendations for Doing an Evaluation Research Study or an R&D Evaluation	594
Self-Check Test	595
<b>18. Action Research</b>	<b>597</b>
Characteristics of Action Research	597
Purposes for Conducting Action Research	599
Personal Purposes for Action Research	599
Professional Purposes for Action Research	599
Political Purposes for Action Research	600
Cyclical Nature of Action Research	600
Focus on Data Collection and Analysis as a Basis for Action	603
Focus on Reflection	604
Stages of Action Research	606
Selecting a Focus	606
Taking Action	607
Collecting Data	607
Analyzing and Interpreting the Data	607
Continuing or Modifying Action	607
Reflection	608
Reporting Action Research	608
Credibility and Trustworthiness of Action Research	609
Outcome Validity	610
Process Validity	610
Democratic Validity	610
Catalytic Validity	611
Dialogic Validity	611
Reducing Discrepancies between Practitioners' Espoused Theories and Theories-in-Action	612
Practitioner–Academic Collaboration	612
Ethical Issues in Action Research	613
Recommendations for Doing Action Research	614
Self-Check Test	614
<i>Self-Check Test Answers</i>	<b>616</b>

<b>APPENDIX A</b>	<i>Questions for Evaluating Quantitative Research Reports</i>	618
<b>APPENDIX B</b>	<i>Questions for Evaluating Qualitative Research Reports</i>	622
<b>APPENDIX C</b>	<i>Preliminary and Secondary Sources: Tests and Self-Report Measures</i>	626
<b>APPENDIX D</b>	<i>Preliminary and Secondary Sources on the History of Education</i>	629
	<i>Glossary</i>	632
	<i>Author Index</i>	659
	<i>Subject Index</i>	666
