Contents

Part I Introduction to Hematology 1

- Chapter 1 An Overview of Clinical Laboratory Hematology 1
- Chapter 2 Safety in the Hematology Laboratory 7
- Chapter 3 Specimen Collection 17
- Chapter 4 Care and Use of the Microscope 30
- Chapter 5 Quality Assurance 39

Part II Hematopoiesis 50

- Chapter 6 Morphology and Function of Cellular Components 50
- Chapter 7 Hematopoietic Theory 57
- Chapter 8 Erythrocyte Production and Destruction 77
- Chapter 9 Metabolism of the Erythrocyte 94
- Chapter 10 Hemoglobin Metabolism 105
- Chapter 11 Iron Metabolism 116
- Chapter 12 Leukopoiesis 124
- Chapter 13 Platelet Production, Structure, and Function 141

Part III Routine Laboratory Evaluation of Blood Cells 160

- Chapter 14 Routine Testing in Hematology 160
- Chapter 15 Examination of the Peripheral Blood Smear and Correlation with the Complete Blood Count 175
- Chapter 16 Bone Marrow Overview 193

Part IV Body Fluid Examination 205

- Chapter 17 Body Fluids in the Hematology Laboratory 205

Part V Erythrocyte Disorders 219

- Chapter 18 Anemias: Erythrocyte Disorders and Approach to Diagnosis 219
- Chapter 19 Disorders of Iron and Heme Metabolism 232
- Chapter 20 Anemias Caused by Defects of DNA Metabolism 248
- Chapter 21 Bone Marrow Failure 259
- Chapter 22 Introduction to Increased Destruction of Erythrocytes 271
- Chapter 23 Intracorporeal Defects Leading to Increased Erythrocyte Destruction 286
- Chapter 24 Extracorporeal Defects Leading to Increased Erythrocyte Destruction—Nonimmune Causes 311

- Chapter 25 Extracorporeal Defects Leading to Increased Erythrocyte Destruction—Immune Causes 325
Chapter 26 Hemoglobinopathies (Structural Defects in Hemoglobin) 333
Chapter 27 Thalassemias 355

Part VI Leukocyte Disorders 373

- Chapter 28 Morphologic and Distributive Leukocyte Disorders 373
Chapter 29 Introduction to Leukocyte Neoplasms 389
Chapter 30 Cytochemistry 398
Chapter 31 Cytogenetics 407
Chapter 32 Molecular Diagnostics in the Clinical Laboratory 424
Chapter 33 Flow Cytometric Analysis in Hematologic Disorders 451
Chapter 34 Myeloproliferative Disorders 471
Chapter 35 Myelodysplastic Syndromes 484
Chapter 36 Acute Leukemias 496
Chapter 37 Mature Lymphoid Neoplasms 506

Part VII Hematology in Selected Populations 541

- Chapter 38 Pediatric and Geriatric Hematology 526

Part VIII Cell Counting Automation 541

- Chapter 39 Automated Cell Counting Instrumentation and Point of Care Testing 541

Part IX Hemostasis and Thrombosis 571

- Chapter 40 Normal Hemostasis and Coagulation 571
Chapter 41 Hemorrhagic Coagulation Disorders 588
Chapter 42 Thrombosis Risk Testing 605
Chapter 43 Thrombocytopenia and Thrombocytosis 630
Chapter 44 Qualitative Disorders of Platelets and Vasculature 654
Chapter 45 Laboratory Evaluation of Hemostasis 670
Chapter 46 Monitoring Anticoagulant Therapy 700
Chapter 47 Coagulation Instrumentation 714

Appendix Material Safety Data Sheet 729

Answers 735

Glossary 749

Index 773
