

SECOND EDITION

# IMMUNOLOGY

## FOR MEDICAL STUDENTS

**Roderick Nairn • Matthew Helbert**

**Learn key immunology principles efficiently...**

- complete contents of the book online
- 330 essential, easy-to-follow, downloadable illustrations
- Integration Links to related bonus content online
- all relevant scientific and clinical knowledge
- detailed clinical cases
- technical boxes for key scientific advances
- end-of-chapter learning points for review
- glossary of all key terms

# CONTENTS

## SECTION 1 Introduction

1. Introduction to the Immune System
2. Basic Concepts and Components of the Immune System
  - Innate immunity, 7*
  - Adaptive immunity, 8*
  - Components of the immune system, 9*
  - Active and passive immunity, 11*
  - Phases of an immune response, 12*

## SECTION 2 Antigen-Recognition Molecules

3. Introduction to Antigen Recognition
  - Antigen-recognition molecules, 16*
4. Antigens and Antibody Structure
  - Antigens, 19*
  - Antibodies, 20*
5. Antibody–Antigen Interaction
  - The antigen-binding site of antibodies, 26*
  - Diagnostic tests for antibody or antigen, 27*
6. Antibody Diversity
  - Immunoglobulin genes, 34*
  - Immunoglobulin classes, 38*
  - Allelic exclusion, 40*
7. The T-cell Receptor
  - Biochemical characterization and relationship to immunoglobulin, 44*
  - Generation of diversity of the T-cell-receptor genes, 45*
  - Recognition of Antigen, 46*
  - Other accessory molecules involved in T-cell function, 46*
8. Major Histocompatibility Complex
  - Genetic organization, 50*
  - Regulation of gene expression, 50*
  - Structure of the major histocompatibility complex gene products, 51*
  - Restriction of antigen recognition, 53*
  - Population advantages of polymorphism in the major histocompatibility complex ("heterozygote advantage"), 56*
  - Disease correlations, 56*
9. Review of Antigen Recognition
  - Important structural features, 58*
  - Generation of diversity, 60*

## SECTION 3 Physiology

10. Antigen Processing and Presentation
  - Pathways of antigen processing, 62*
  - Mechanisms of antigen processing, 63*
  - Evasion of processing pathways by pathogens, 66*
11. Lymphocyte Activation
  - Antigen receptors, 69*
  - Signaling events, 71*
  - Amplification through signaling pathways, 73*
  - Response, 74*
12. Hematopoiesis
  - The three major stages of hematopoiesis, 78*
  - Lymphoid cells, 78*
  - Myeloid cells, 80*
13. The Organs and Tissues of the Immune System
  - Primary and secondary lymphoid organs, 84*
  - Lymphocyte recirculation trafficking and homing, 89*
14. B-Cell Development
  - Early B lymphocyte development, 96*
  - The transition from immature to mature B cell, 98*
  - The mature B cell, 102*
  - Continued selection of B cells in lymphoid follicles, 103*
  - Thyus-independent antigens, 104*
  - The B-cell repertoire and human development, 104*
15. T-Cell Development
  - The thymus, 108*
  - The periphery: naive T-cell activation by antigen, 112*
16. Cell–Cell Interaction in Generating Effector Lymphocytes
  - Generation of stimulated (or primed) B and T cells, 120*
  - Generation of effector cells, 121*
  - Providing the most appropriate immune response for a given pathogen, 123*
17. Immunologic Memory
  - Long-term immunologic memory, 129*
  - Lymphocyte homeostasis, 131*
  - Apoptosis, 133*
18. A Brief Review of Immune Physiology
  - The integrated immune system: connections between the adaptive and innate responses, 136*

# CONTENTS

## SECTION 4 Innate Immunity

19. **Constitutive Defenses Including Complement** 140  
*Barriers to infection, 140*  
*Extracellular molecules of the innate immune system, 141*
20. **Phagocytes** 151  
*Phagocytic cell types, 151*  
*Phagocyte production, 152*  
*Phagocyte recruitment, 152*  
*Receptors on phagocytes, 153*  
*Actions of phagocytes, 155*  
*Phagocyte defects, 157*  
*Molecular recognition by the innate and adaptive immune systems, 157*
21. **Killing in the Immune System** 161  
*Response to parasite worms, 161*  
*Mast cells, 161*  
*Natural killer cells, 164*  
*Intracellular mechanisms of apoptosis, 167*
22. **Inflammation** 171  
*Types of inflammation, 171*  
*Cytokine network in inflammation, 172*  
*"Overzealous" inflammation, 173*
23. **Cytokines in the Immune System** 180  
*Introduction, 180*  
*Definitions and some general notes about cytokines, 180*  
*Cytokine receptors and signaling molecules, 181*  
*A review of some of the roles of cytokines in immune responses, 183*

## SECTION 5 Immune System in Health and Disease

24. **Infections and Vaccines** 188  
*How organisms evade the immune response, 188*  
*Mechanisms of immunity, 188*  
*Types of vaccine, 189*  
*Vaccine schedules, 191*
25. **Hypersensitivity Reactions** 196  
*Types of triggers for hypersensitivity, 196*  
*Types of hypersensitivity reaction, 197*  
*Diagnosis and treatment of hypersensitivity, 198*

26. **Immediate Hypersensitivity (Type I): Allergy** 202  
*Definitions, 202*  
*Allergen, 202*  
*Degranulating cells, 203*  
*Antibody, 203*  
 *$T_H2$  cells, 203*  
*Predisposition to allergy, 204*  
*Mediators of early phase, 206*  
*Mediators of late phase, 206*  
*Treatment, 207*
27. **How Autoimmune Disease Develops** 214  
*Some autoimmunity is normal, 214*  
*The initiation of autoimmune disease, 215*  
*A reminder about T-cell tolerance, 216*  
*The breakdown of T-cell tolerance, 217*  
*Tests for autoimmune disease, 218*
28. **Antibody-Mediated Hypersensitivity (Type II)** 227  
*Immune-mediated hemolysis, 227*  
*Type II hypersensitivity and antibodies that affect cell function, 230*
29. **Immune Complex Disease (Type III Hypersensitivity)** 236  
*Antigens in immune complexes, 236*  
*Antibodies in immune complexes, 237*  
*Clearance of immune complexes, 237*  
*Mechanisms of inflammation in immune complex disease, 238*  
*Immune complex disease in the kidney, 239*  
*Treatment of immune complex disease, 240*
30. **Delayed Hypersensitivity (Type IV)** 244  
*Delayed hypersensitivity reactions are driven by  $T_H1$  cells, 244*  
*Type IV hypersensitivity disease, 244*  
*Some hypersensitivity reactions are driven by mixed mechanisms, 248*
31. **Primary Immunodeficiency** 252  
*Significance of immunodeficiency, 252*  
*Infections provide clues to the type of immunodeficiency, 252*  
*Causes of primary immunodeficiency, 253*  
*Diagnosis, 254*  
*Treatment, 255*
32. **Secondary Immunodeficiency** 260  
*HIV infection, 260*  
*Other secondary immunodeficiencies, 265*

# CONTENTS

## 33. Transplantation

*Transplantation terminology, 269*  
*Solid organ transplantation, 269*  
*Stem cell transplant, 271*  
*Tissue-typing techniques, 272*  
*Immunosuppressive drugs, 273*  
*Xenotransplantation, 273*

## 34. Tumor Immunology

*Lymphoid tumors, 279*  
*Immunity to tumors, 282*

269

## 35. Monoclonal Antibodies and Recombinant Cytokines

*Monoclonal antibodies, 288*  
*Recombinant cytokines, 292*

288

## 36. Review of Immunity in Health and Disease

294

279
