

# Beginning Ruby on Rails<sup>™</sup>

Steven Holzner, PhD

| Acknowledgments<br>Introduction                     | xi<br>xix            |
|---|----------------------|
| Chapter 1: Welcome to Ruby                          | 1                    |
| Installing Ruby and Rails                           | 1                    |
| Install Ruby and Rails on Windows                   | 1                    |
| Install Ruby and Rails in Mac OS X                  | 2                    |
| Install Ruby and Rails in Linux and Unix            | 2                    |
| Database System                                     | 3                    |
| Creating a First Web Application                    | 3                    |
| Getting Started with Ruby                           | 7                    |
| Checking the Ruby Documentation                     | 9                    |
| Working with Numbers in Ruby                        | 10                   |
| Working with Strings in Ruby                        | 11                   |
| Storing Data in Variables                           | 13                   |
| Creating Constants                                  | 15                   |
| Interpolating Variables in Double-Quoted Strings    | 15                   |
| Reading Text on the Command Line                    | 16                   |
| Creating Symbols in Ruby                            | 18<br>18             |
| Working with Operators                              | <del></del>          |
| Handling Operator Precedence                        | 21<br>21             |
| Working with Arrays                                 | 21                   |
| Using Two Array Indices                             | 2 <del>7</del><br>27 |
| Working with Bangas                                 | 29                   |
| Working with Ranges Summary                         | 31                   |
| Exercises   | 32                   |
| EXERCISES   | <b>52</b>            |
| Chapter 2: Conditionals, Loops, Methods, and Blocks | 33                   |
| It's All about Making Choices: the if Statement     | 33                   |
| Using else Clauses in if Statements                 | 34                   |
| Using elsif Clauses in if Statements                | 35                   |
| Using the unless Statement                          | 37                   |
| Using if and unless as Modifiers                    | 38                   |

| Using the case Statement                    | 39       |
|---|----------|
| Using Loops                                 | 41       |
| Using the while Loop                        | 42       |
| Using the until Loop                        | 42       |
| Using while and until as Modifiers          | 43       |
| Using the for Loop                          | 44       |
| Using the Ruby Iterators                    | 45       |
| Working with break, redo, and next in Loops | 48       |
| Using the retry Statement                   | 50       |
| Creating and Calling a Method               | 51       |
| Passing Arguments to a Method               | 52       |
| Passing a Variable Number of Arguments      | 53       |
| Returning a Value from a Method             | 54       |
| Returning Multiples Values from a Method    | 56       |
| Making Use of Scope                         | 57       |
| Working with Blocks                         | 58       |
| Passing Data to Blocks                      | 60       |
| Using BEGIN and END Blocks                  | 61       |
| Summary                                     | 61       |
| Exercises                                   | 62       |
|   | _        |
| Chapter 3: Classes and Objects              | 63       |
| All about Encapsulation                     | 63       |
| Creating a Class                            | 64       |
| Creating an Object                          | 66       |
| Using a Constructor to Configure Objects    | 67       |
| Understanding Ruby Attributes               | 68       |
| Creating Readable Attributes                | 68       |
| Creating Writable Attributes                | 69       |
| Creating Readable and Writable Attributes   | 71       |
| Basing One Class on Another                 | 72       |
| Understanding Ruby's Object Access          | 75       |
| Using Protected Access                      | 76       |
| Using Private Access                        | 78       |
| Overriding Methods                          | 79       |
| Creating Class Variables                    | 80       |
| Creating Class Methods                      | 82       |
| Creating Modules                            | 83       |
| Creating Mixins                             |          |
| 4. America mitalia                          | 85       |
| Summary<br>Exercises                        | 85<br>87 |

| Chapter 4: Welcome to Rails                    |     |
|--|-----|
| Putting Ruby on Rails                          | 89  |
| Creating the Application Framework             | 90  |
| Running the Application                        | 93  |
| Creating the Controller                        | 94  |
| Using the Rails Documentation                  | 94  |
| Testing the Controller                         | 95  |
| Creating an Action                             | 96  |
| Creating a View                                | 97  |
| Introducing Model-View-Controller Architecture | 100 |
| The Controller                                 | 101 |
| The View                                       | 101 |
| The Model                                      | 102 |
| Giving the View Something to Do                | 102 |
| Mixing Ruby Code and HTML Inside the View      | 105 |
| Passing Data from an Action to a View          | 108 |
| Escaping Sensitive Text                        | 111 |
| Adding a Second Action                         | 113 |
| Selecting Which View to Render                 | 116 |
| Rendering Any Template                         | 118 |
| Linking to Another Action                      | 118 |
| Summary  | 120 |
| Exercises                                      | 121 |
| Chapter 5: Building Simple Rails Applications  | 123 |
| Accessing Data the User Provides               | 123 |
| Reading Data from Text Fields                  | 123 |
| Reading Data from Checkboxes                   | 127 |
| Reading Data from Radio Buttons                | 130 |
| Reading Data from Select Controls              | 132 |
| Using Rails Shortcuts for HTML Controls        | 137 |
| Working with Models                            | 143 |
| Tying Controls to Models                       | 14! |
| Initializing Data in Controls                  | 15: |
| Storing Data in Sessions                       | 153 |
| Summary  | 157 |
| Exercises                                      | 157 |

| Chapter 6: Connecting to Databases       | 159 |
|--|-----|
| Tutorial on Databases                    | 159 |
| Creating a Data-Aware Rails Application  | 162 |
| Creating the Database                    | 162 |
| Configuring Database Access              | 165 |
| Creating the Controller and Model        | 167 |
| Naming the Model                         | 168 |
| Naming the Controller                    | 168 |
| Running the store Application            | 169 |
| Adding a Record to the store Application | 171 |
| Displaying a New Record                  | 175 |
| Using a Layout                           | 176 |
| Using a Stylesheet                       | 177 |
| Displaying Records                       | 178 |
| Adding Another Record                    | 180 |
| Editing Records                          | 182 |
| Beautifying the Display                  | 187 |
| Summary                                  | 189 |
| Exercises                                | 189 |
| Chapter 7: Working with Databases        | 191 |
| Displaying Items to the Customer         | 191 |
| Getting the Items for Sale               | 192 |
| Showing the Items for Sale               | 194 |
| Creating a Shopping Cart                 | 197 |
| Designing the Shopping Cart              | 197 |
| Creating the purchases Table             | 199 |
| Creating the Purchase Model              | 200 |
| Creating the Cart                        | 203 |
| Storing the Cart in a Session            | 205 |
| Handling a Purchase                      | 206 |
| Displaying the Cart                      | 209 |
| Combining Purchases in the Cart          | 213 |
| Clearing the Cart                        | 216 |
| Letting the User View the Cart Anytime   | 219 |
| Summary                                  | 221 |
| Exercises                                | 222 |

| Chapter 8: Validating and Testing                            | 223 |
|--|-----|
| Validating the Presence of Data                              | 223 |
| Validating if Data Is Numeric                                | 226 |
| Validating if Data Is Unique                                 | 229 |
| Creating the Validator Application                           | 231 |
| Validating the Format of Data                                | 233 |
| Validating against Inclusion in a List                       | 235 |
| Validating That the User Clicked a Checkbox                  | 238 |
| Validating Confirmation of Passwords                         | 240 |
| Validating Length of Text                                    | 243 |
| Writing Your Own Validate Method                             | 246 |
| Testing Your Model   | 248 |
| Using Equality Assertions                                    | 253 |
| Using General Assertions                                     | 254 |
| Using Different Records                                      | 255 |
| Testing Your Controller                                      | 256 |
| Summary  | 259 |
| Exercises  | 259 |
| Chapter 9: Controlling the Action with the Action Controller | 261 |
| Routing Refinements  | 261 |
| Creating Cookies   | 266 |
| Setting a Cookie   | 267 |
| Reading a Cookie   | 270 |
| Creating a Filter  | 273 |
| Logging in with Filters                                      | 278 |
| Using After Filters  | 285 |
| Rendering Text Directly                                      | 290 |
| Caching  | 292 |
| Summary  | 293 |
| Exercises  | 294 |
| Chapter 10: Getting the Big Picture with Views               | 295 |
| Creating XML   | 295 |
| Creating XML Attributes                                      | 300 |
| Using View Helpers   | 303 |
| Using View Pagination  | 309 |
| Using Partial Templates                                      | 315 |

| Passing Data to Partial Templates Summary | 317<br>320 |
|---|------------|
|   |            |
| Chapter 11: Ajax and Rails                | 321        |
| Using Ajax                                | 321        |
| Getting Access to Ajax Data               | 325        |
| Using XML and Ajax                        | 329        |
| Using HTML Controls and Ajax              | 334        |
| Performing Ajax Searches                  | 338        |
| Performing Visual Effects                 | 342        |
| Summary                                   | 344        |
| Exercises                                 | 345        |
| ppendix A: Answers to Exercises           | 347        |
| Index                                     | 363        |
