CHAPTER 1

Introduction to Microbiology

Part I: The Role of the Microbiology Laboratory in the Diagnosis of Infectious Diseases: Guidelines to Practice and Management

INTRODUCTION

Outline of the Book 2

The World of Infectious Disease 2

THE TRIAD OF INFECTIOUS DISEASE

The Infectious Agent 3

Classes of Infectious Agents 3

Interactions Between Hosts and Infectious Agents 4

Purpose of Infectious Agents in Nature 4

Virulence 4

The Environment 5

The Infected Host 5

Innate Humoral (Noncellular) Defenses 6

Innate Cellular Defenses 7

Types of Inflammation 7

Adaptive Immunologic Cellular Defenses 7

Adaptive Immunologic Noncellular (Humoral) Defenses 8

Clinical Signs and Symptoms of Infection 8

Indirect Effects of Infectious Agents on Humans 9

PHASES OF THE DIAGNOSTIC CYCLE

Preanalytic Phase 10

Specimen Collection 10

Specimen Transport 14

Specimen Receipt and Preliminary Observations 14

Criteria for Rejection of Specimens 14

Cost-Effective Approaches in the Preanalytic Phase 15

Analytic Phase 15

Microscopic Examination 15

Processing Specimens 27

Interpretation of Cultures 33

Procedures for Preliminary Identification of Bacterial Isolates 38

Identification of Organisms Other Than Bacteria 39

Testing of Susceptibility to Antimicrobial Agents 39

Cost-Effective Approaches in the Analytic Phase 39

Postanalytic Phase 43

Reporting Results 43

Interactions With Epidemiologists 44

Analysis of Results 44

Maintenance of Samples and Records 44

ADMINISTRATIVE ASPECTS OF THE MICROBIOLOGY LABORATORY

Government Regulations 45

Risk Management 47

Laboratory Safety 47

General Safety Rules and Regulations 47

Routine Safety Precautions 48

Biologic Agents 50

Universal Precautions 51

Shipping of Specimens and Etiologic Agents 55

Nonbiologic Hazards 56

Bioterrorism 58

Quality Assurance 58

Quality Control 59

Components of a Quality Control Program 60

Monitoring Laboratory Equipment 60

Monitoring Culture Media, Reagents, and Supplies 61

CHAPTER 2

Introduction to Microbiology

Part II: Guidelines for the Collection, Transport, Processing, Analysis, and Reporting of Cultures from Specific Specimen Sources

INFECTIONS OF THE RESPIRATORY TRACT

Infections of the Upper Respiratory Tract 71

Indigenous Flora 71

Pharyngitis 72

Infections of the Oral Cavity Other Than Pharyngitis 73

Infections of the Nasopharynx and Nasopharyngeal Cultures 74

Otitis Media and Sinusitis 74

Epiglottitis 74

Laryngitis 74

Other Infections of the Upper Respiratory Tract 74

Infections of the Lower Respiratory Tract 75

Tracheobronchitis 75

Bronchiolitis 75

Pneumonia 75

Chronic Pneumonia 76

Empyema 76

Pneumonia in Special Populations 76

Collection of Specimens for the Diagnosis of Lower Respiratory Infection 76

Laboratory Diagnosis of Pneumonia 78

INFECTIONS OF THE GASTROINTESTINAL TRACT

Lower Intestinal Infections	79
Clinical Symptoms	79
Collection of Fecal Specimens	81
Epidemiologic Considerations in the Evaluation of Patients With Gastroenteritis	81
Upper Intestinal Infections	81
Clinical Symptoms	81
Obtaining Specimens From the Upper Gastrointestinal Tract	82

URINARY TRACT INFECTIONS

Clinical Signs and Symptoms	82
Host Factors	83
Collection of Urine Samples for Culture	83
Midstream Urine Specimens	83
Other Voided Urine Specimens	84
Catheter Collections	85
Suprapubic Aspiration	85
Culture of Urine Specimens	85
Screening Tests for Urinary Tract Infection	86
Screening Tests for Bacteriuria	86
Screening Tests for Pyuria	86

INFECTIONS OF THE GENITAL TRACT

Sexually Transmitted Infections	87
Urethritis and Cervicitis	87
Genital Ulcer Disease	88
Genital Infections Transmitted by Nonsexual Means	88
Vaginitis and Vaginosis	88
Infections of the Upper Female Genital Tract	89
Systemic Complications of Genital Infections	89
Diagnosis of Genital Tract Infections	89
Diagnosis of Urethritis, Cervicitis, and Vaginitis	89
Diagnosis of Genital Ulcer Disease and Venereal Warts	90
Collection of Genital Specimens	90

INFECTIONS OF THE BONES AND JOINTS

Clinical Presentation	91
Diagnosis of Infections of the Bones and Joints	91

INFECTIONS OF THE CENTRAL NERVOUS SYSTEM

Meningitis	92
Encephalitis and Brain Abscess	93
Diagnosis of Central Nervous System Infections	93
Collection of Specimens	93
Assessing the Inflammatory Response and Microscopic Techniques	93
Direct Detection of Antigen and Nucleic Acid	94
Serologic Diagnosis	95
Diagnosis by Culture	95

WOUNDS, ABSCESES, AND CELLULITIS

Clinical Presentation	95
Diagnosis of Wound Infections, Abscesses, and Cellulitis	95
Collection of Specimens	95
Microscopic Examination of Specimens	96
Culture	96

EYE INFECTIONS

Clinical Presentation	96
Conjunctivitis	96
Keratitis	97
Uveitis and Endophthalmitis	97

Diagnosis of Eye Infections	97
Collection of Specimens	97
Microscopic Examination	97
Culture	97

INFECTIONS OF THE BLOOD

Clinical Presentation and Pathogenesis	97
Bacteremia and Septicemia	97
Types of Bacteremia	97
Intravascular Infection	98
Catheter-Associated Bacteremia and Sepsis	100
Collection of Blood Cultures	100
Contamination With Skin Flora	100
Number and Timing of Cultures	101
Culture Media	101
Systems for Processing Blood Cultures	102
Manual Blood Culture Systems	102
Lysis-Centrifugation Blood Culture System	103
Automated and Computerized Blood Culture Systems	103
Comparative Studies	104
Special Considerations	105
Fastidious Organisms and Endocarditis	105
Catheter-Associated Bacteremia and Sepsis	105
Tissues and Biopsies	105

CHAPTER 3

Laboratory Diagnosis by Immunologic Methods

ANTIGENS AND ANTIBODIES: BASIC DEFINITIONS

112

MONOCLONAL ANTIBODIES

113

TYPES OF ANTIGEN-ANTIBODY REACTIONS USED IN DIAGNOSTIC SEROLOGY

114

Precipitin Reactions	114
Complement Fixation and Hemagglutination Inhibition	116
Agglutination Reactions	116

SOLID-PHASE IMMUNOASSAY METHODS

119

Enzyme Immunoassays for Antibody Detection	119
Enzyme Immunoassay Antibody Capture Methods for IgM Detection	122
Enzyme Immunoassays for Antigen Detection	122

IMMUNOFLOUORESCENCE TECHNIQUES

125

Immunofluorescence Techniques for Antigen Detection	125
Immunofluorescence Techniques for Antibody Detection	125

CHAPTER 4

Molecular Microbiology

NUCLEIC ACIDS—THE BASICS OF DNA AND RNA

133

Structure of DNA	133
Structure of RNA	134
Function of DNA—Information Storage	135
Function of RNA—Information Transfer	135
Reading (Transcription) and Interpretation (Translation) of the Genetic Code	135

SIGNAL-AMPLIFICATION METHODS

Nucleic-Acid Probes

Clinical Applications

Hybrid Capture

Clinical Applications

Branched DNA

Clinical Applications

In Situ Hybridization

Clinical Applications

NUCLEIC-ACID AMPLIFICATION

Basics of the Polymerase Chain Reaction

Clinical Applications

Other Methods of Nucleic-Acid Amplification

Clinical Applications

Modifications of PCR

RT-PCR

Clinical Applications

Broad-Range PCR

Clinical Applications

Multiplex PCR

Clinical Applications

Nested PCR

Clinical Applications

POSTAMPLIFICATION ANALYSIS

Traditional Methods of Detection

Gel Electrophoresis/Southern Blot Analysis

Enzymatic Detection of Amplified Products

Clinical Applications

Reverse Hybridization

Clinical Applications

DNA Sequencing

Traditional DNA Sequencing

Clinical Applications

Sequencing by Synthesis (Pyrosequencing)

Clinical Applications

Microarray Analysis

Clinical Applications

REAL-TIME NUCLEIC-ACID AMPLIFICATION

Methods of Detecting the Products of Real-Time Amplification

SYBR Green

Hybridization Probes

Clinical Applications

STRAIN TYPING

Non-Amplification-Based Typing

Pulsed-Field Gel Electrophoresis

Amplification-Based Typing

PCR-RFLP

Rep-PCR

Clinical Applications of Microbial Typing

CONCLUSION

CHAPTER 5

Medical Bacteriology: Taxonomy, Morphology, Physiology, and Virulence

TAXONOMY: CLASSIFICATION, NOMENCLATURE, AND IDENTIFICATION OF BACTERIA

195

Carbon Dioxide

195

Oxygen

195

Nitrogen

195

Growth Factors

196

Kinetics of Bacterial Cell Growth

196

General Bacterial Metabolism and Energy Generation

196

Fermentation

196

Utilization of Pyruvate

198

BACTERIAL VIRULENCE FACTORS AND PATHOGENICITY

200

Definitions and Concepts

200

Requirements for Pathogenicity

203

Virulence Factors of Microorganisms

204

Adhesins

204

Aggressins

204

Exotoxins and Endotoxins

205

Bacterial Superantigens

207

CHAPTER 6

The Enterobacteriaceae

CHARACTERISTICS FOR PRESUMPTIVE IDENTIFICATION

213

Screening Characteristics

213

Carbohydrate Utilization

213

Cytochrome Oxidase Activity

215

Nitrate Reduction

216

CULTURE MEDIA USED FOR DETECTION OF CARBOHYDRATE FERMENTATION

216

Use of Kligler Iron Agar and Triple Sugar Iron Agar

216

Biochemical Principles

217

SELECTION OF PRIMARY ISOLATION MEDIA

218

Chemicals and Compounds Used in Selective Media

219

Selective Isolation Media

221

Highly Selective Isolation Media Used Primarily for Gastrointestinal Specimens	222
Enrichment Media	222
Guidelines for Choosing Selective Isolation Media	222

DIFFERENTIAL IDENTIFICATION

CHARACTERISTICS	223
Indole Production	224
Methyl Red Test	224
Voges-Proskauer Test	225
Citrate Utilization	225
Urease Production	225
Decarboxylation of Lysine, Ornithine, and Arginine	225
Phenylalanine Deaminase Production	226
Hydrogen Sulfide Production	226
Motility	227

TAXONOMY OF THE ENTEROBACTERIACEAE	228
Classification of <i>Enterobacteriaceae</i> by Tribes	228
Key Identification Characteristics for the Most Common Species	228
Tribe <i>Escherichieae</i>	235
Tribe <i>Edwardsiellae</i>	250
Tribe <i>Salmonellae</i>	251
Tribe <i>Citrobacterae</i>	258
Tribe <i>Klebsiellae</i>	259
Tribe <i>Proteeae</i>	267
Tribe <i>Yersinieae</i>	269
Tribe <i>Erwinieae</i>	274
Miscellaneous New Genera of <i>Enterobacteriaceae</i>	274
Identification Characteristics of Newer <i>Enterobacteriaceae</i>	277
Clinical Significance of Newer <i>Enterobacteriaceae</i>	277

QUICK SCREENING METHODS FOR RAPID IDENTIFICATION	282
Commercial Screening Kits	282
Chromogenic Agar Media	283

CLASSIC IDENTIFICATION SYSTEMS	284
Checkerboard Matrix	284
Branching Flow Diagrams	284
Computer-Aided Schemes	285

NUMERIC CODING SYSTEMS	285
Reading Octal Codes in Numeric Code Registers	286
Estimated Frequency of Occurrence	287
Calculation of Likelihood	287
Resolving Discrepancies	287

PACKAGED KIT IDENTIFICATION SYSTEMS	287
Overview of Packaged Systems	287
Specific Identification Systems	289
API 20E	289
BBL Crystal Enteric/Nonfermenter ID System	289
RapID onE System	289
Enterotube II	290
Micro-ID	291
Biolog GN2 Microplate	291
MicroScan System	291
Sensititre System	291

SEMI-AUTOMATED AND AUTOMATED IDENTIFICATION SYSTEMS	292
MicroScan Walkaway	292
Vitek System	292
Sensititre Gram-Negative AutoIdentification System	293
The Phoenix System	293
The OmniLog ID System	293

CHAPTER 7

The Nonfermentative Gram-Negative Bacilli

Part I: Metabolism of the Nonfermenters

FERMENTATIVE AND OXIDATIVE METABOLISM	309
The Embden-Meyerhof-Parnas Pathway	309
The Entner-Doudoroff Pathway	311
The Warburg-Dickens Hexose Monophosphate Pathway	312
INITIAL CLUES THAT AN UNKNOWN ISOLATE IS A NONFERMENTER	312
Lack of Evidence for Glucose Fermentation	312
Positive Cytochrome Oxidase Reaction	312
Failure to Grow on MacConkey Agar	313
TESTS USED IN THE IDENTIFICATION OF NONFERMENTERS	313
Utilization of Glucose	313
Motility	313
Pigment Production	314
Hydrolysis of Urea	314
Nitrate Reduction	315
Denitrification of Nitrates and Nitrites	315
Indole Production	315
Decarboxylation	315
Esculin Hydrolysis	315
Flagella Stains	315
Leifson Method	315
Ryu Method	316
Wet-Mount Technique	316
Flagellar Morphology	316

Part II: Taxonomy, Biochemical Characteristics, and Clinical Significance of Medically Important Genera of Nonfermenters

ORGANISMS THAT ARE MOTILE WITH POLAR FLAGELLA	316
<i>Pseudomonas</i>	316
Family <i>Pseudomonadaceae</i>	317
Genus <i>Pseudomonas</i> —rRNA Group I	317
Family <i>Burkholderiaceae</i>	323
rRNA Group II	323
Genus <i>Burkholderia</i> — <i>Pseudomallei</i> Group	323
Genus <i>Ralstonia</i> and Genus <i>Cupriavidus</i>	328
Genus <i>Pandoraea</i>	329
Genus <i>Inquilinus</i>	331
Genus <i>Lautropia</i>	331

Family Comamonadaceae	331
rRNA Group III	331
Acidovorans Group	331
Facilis-Delafieldii Group	332
Family Caulobacteraceae	332
rRNA Group IV	332
Brevundimonas-Diminuta Group	332
Family Xanthomonadaceae	332
rRNA Group V	332
Genus Stenotrophomonas	332
Family Sphingomonadaceae	334
Genus Sphingomonas	334
Family Oceanospirillaceae	334
Genus Balneatrix	334
Family Oxalobacteraceae	334
Genus Massilia	334
Genus Herbaspirillum	334
Family Alteromonadaceae	336
Genus Shewanella—Hydrogen Sulfide-Producing Group	336
Genus Alishewanella—Halophilic Group	337
Family Halomonadaceae	337
Genus Halomonas	337
Family Methylobacteriaceae	337
Genus Methylobacterium	337
Genus Roseomonas	338
Unnamed Species	339
Laribacter hongkongensis	339
ORGANISMS THAT ARE MOTILE WITH PERITRICHIOUS FLAGELLA	340
Family Alcaligenaceae	340
Genus Alcaligenes	340
Genus Achromobacter	340
Genus Bordetella	343
Genus Kerstersia	344
Genus Oligella	344
Family Rhizobiaceae	344
Genus Rhizobium (Formerly Agrobacterium)	344
Family Brucellaceae	345
Genus Ochrobactrum	345
ORGANISMS THAT ARE NONMOTILE AND OXIDASE-POSITIVE	345
Family Flavobacteriaceae	345
Chryseobacterium, Empedobacter, and Unnamed CDC Groups	346
Weekseila and Bergeyella	348
Genus Myroides	348
Family Sphingobacteriaceae	348
Sphingobacterium and Pedobacter	348
Family Moraxellaceae	349
Genus Moraxella	349
Genus Psychrobacter and CDC EO Groups	350
Family Neisseriaceae	353
Genus Neisseria	353
Gilardi Rod Group 1	353
ORGANISMS THAT ARE NONMOTILE AND OXIDASE-NEGATIVE	353
Genus Acinetobacter	353
CDC Group NO-1	355
Bordetella holmesii (CDC Group NO-2)	355
CDC Group EO-5	355

Part III: Approach to Recovery and Identification of Nonfermenters	
LEVELS OF SERVICE IN IDENTIFICATION OF NONFERMENTERS	355
GUIDELINES FOR RECOVERY OF NONFERMENTERS	356
IDENTIFICATION OF MOST COMMON SPECIES	356
Pseudomonas aeruginosa	356
Acinetobacter baumannii	357
Stenotrophomonas maltophilia	357
METHODS FOR IDENTIFICATION USING CONVENTIONAL TESTS	357
Weyant (CDC), Gilardi, and Pickett Identification Schemes	358
Practical Approach to Identification of Nonfermenters	358
Computer-Aided Schemes	359
COMMERCIAL KIT SYSTEMS	359
The Oxi/Ferm Tube	359
The API 20E System	362
The API 20NE System	362
The Remel N/F System	362
The Crystal Enteric/Nonfermenter System	367
The RapID NF Plus System	367
The Biolog System	373
AUTOMATED IDENTIFICATION SYSTEMS	373
The Vitek Legacy System	373
The Vitek 2 System	374
The Microscan Walkaway-96, Walkaway-40, and Autoscan-4 Systems	375
The Sensititre AP80 System	375
The Phoenix System	375
SELECTION OF A SYSTEM	375

CHAPTER 8

Curved Gram-Negative Bacilli and Oxidase-Positive Fermenters: *Campylobacteraceae* and *Vibrionaceae*

Part I: Curved Rods: Campylobacter, Wolinella, Arcobacter Helicobacter, and Related Bacteria	
HISTORICAL BACKGROUND	393
CLASSIFICATION OF CAMPYLOBACTER AND RELATED TAXA	393
Campylobacter Species	395
Campylobacter jejuni Subsp. jejuni	395
Other Campylobacter Species	398
Former Wolinella and Bacteroides Species Included in the Family Campylobacteraceae	402
Genus Arcobacter	403
Genus Helicobacter	403
H. pylori	404
Other Medically Important Helicobacter Species	404
Nonhuman Helicobacter Species	405
Other Microaerophilic Gram-Negative Bacilli	405

DEFINITIVE IDENTIFICATION OF CAMPYLOBACTERS AND RELATED BACTERIA

Rapid Identification of Campylobacters From Colonies and From Stool Specimens	406
Nonculture Tests	406
Direct Detection Methods	407
Culture and Isolation of <i>Helicobacter pylori</i>	407
Specimens for Recovery of <i>H. pylori</i>	407
Isolation Procedure	407
Identification of <i>H. pylori</i>	407
Biopsy Urease Test (CLO Test)	408
Noninvasive Tests To Diagnose <i>H. pylori</i> Infection	408
Accuracy of Invasive and Noninvasive Tests To Diagnose <i>H. pylori</i> Infection	408
Enterohepatic Helicobacters	408

Part II: The Families Vibrionaceae and Aeromonadaceae

PHYLOGENY OF THE VIBRIONACEAE	408
Genus <i>Vibrio</i>	408
Taxonomy	409
Description and Associated Clinical Syndromes of <i>Vibrio</i>	
Species of Human Importance	409
Methods for Laboratory Isolation of <i>Vibrios</i>	414
Biochemical Characterization and Laboratory Identification of <i>Vibrio</i> Species	416

GENERA LISTONELLA, PHOTOBACTERIUM AND SHEWANELLA

AEROMONAS AND PLESIOMONAS

Genus <i>Aeromonas</i>	417
Taxonomy	419
Clinical Significance	419
<i>Aeromonas</i> Species in Medicinal Leeches	420
Laboratory Recovery of <i>Aeromonas</i> Species From Clinical Specimens	420
Laboratory Identification of <i>Aeromonas</i> Species	420
Genus <i>Plesiomonas</i>	422
Laboratory Isolation and Identification	422

GENUS CHROMOBACTERIUM

CHAPTER 9

Miscellaneous Fastidious Gram-Negative Bacilli

HAEMOPHILUS SPECIES	431
Taxonomy of <i>Haemophilus</i> and Related Organisms	431
<i>Haemophilus influenzae</i>	433
<i>Haemophilus influenzae</i> Type B Vaccines	433
Infections Caused by <i>Haemophilus</i> Species	435
Meningitis	435
Epiglottitis	439
Otitis Media	439
Sinusitis	440
Bronchitis and Chronic Obstructive Pulmonary Disease	440
Pneumonia	440
Bacteremia and Infectious Complications of Bacteremia	441
Endocarditis	441
Urogenital, Maternal, and Perinatal Infections	441
Ocular Infections	442
Brazilian Purpuric Fever	442
Miscellaneous <i>Haemophilus influenzae</i> Infections	443

<i>Haemophilus parainfluenzae</i>	443
<i>Haemophilus aphrophilus</i> and <i>Haemophilus paraphrophilus</i>	444
Other <i>Haemophilus</i> Species	444
<i>Haemophilus ducreyi</i>	444
Laboratory Diagnosis of <i>Haemophilus</i> Infections	444
Direct Examination of Clinical Specimens	444
Culture of <i>Haemophilus</i> Species	445
Identification of <i>Haemophilus</i> Species	446
Laboratory Diagnosis of <i>Haemophilus ducreyi</i> Infection	449
Antimicrobial Susceptibility of <i>Haemophilus</i> Species	451
ACTINOBACILLUS SPECIES	452
<i>Actinobacillus actinomycetemcomitans</i>	452
Clinical Significance	452
Cultural Characteristics and Identification	453
Antimicrobial Susceptibility	455
<i>Actinobacillus ureae</i>	455
<i>Actinobacillus hominis</i>	458
Animal Species in the Genus <i>Actinobacillus</i>	458

PASTEURELLA AND MANNHEIMIA

SPECIES	458
Taxonomy and Characteristics of the Genus <i>Pasteurella</i>	458
<i>Pasteurella multocida</i>	459
Clinical Significance and Virulence	459
Cultural Characteristics and Identification	462
Antimicrobial Susceptibility	464
Other <i>Pasteurella</i> Species Isolated From Human Infections	465
<i>Pasteurella pneumotropica</i> ("Actinobacillus pneumotropica")	465
<i>Pasteurella aerogenes</i> ("Actinobacillus aerogenes")	465
<i>Pasteurella dagmatis</i>	465
<i>Pasteurella canis</i> and <i>Pasteurella stomatis</i>	466
<i>Pasteurella bettyae</i>	466
<i>Pasteurella caballi</i>	466
<i>Pasteurella gallinarum</i>	466
<i>Mannheimia</i> Species (Formerly the "<i>Pasteurella haemolytica</i>/<i>Pasteurella granulomatis</i>" Complex)	467

CARDIOBACTERIUM HOMINIS	467
Taxonomy	467
Clinical Significance	468
Cultural Characteristics and Identification	468
Antimicrobial Susceptibility	468

EIKENELLA CORRODENS	470
Taxonomy and Virulence	470
Clinical Significance	470
Cultural Characteristics and Identification	471
Antimicrobial Susceptibility	471

KINGELLA AND SUTTONELLA SPECIES	472
Taxonomy	472
Clinical Significance	472
Cultural Characteristics and Identification	473
Antimicrobial Susceptibility	474

HUMAN CAPNOCYTOPHAGA SPECIES	474
Taxonomy	474
Clinical Significance	474
Cultural Characteristics and Identification	475
Antimicrobial Susceptibility	475

CANINE CAPNOCYTOPHAGA SPECIES	477
Taxonomy	477
Clinical Significance	477
Cultural Characteristics and Identification	477
Antimicrobial Susceptibility	478

DYSGONOMONAS SPECIES	479	Isolation and Identification of <i>Bordetella</i> Species	517
CDC GROUPS EF-4A AND EF-4B	479	Specimens and Culture Media	517
SIMONSIELLA SPECIES	481	Direct Fluorescent Antibody Test	518
STREPTOBACILLUS MONILIFORMIS	481	Cultural Characteristics and Identification	519
Taxonomy	481	New Technologies for Detection and Identification of <i>Bordetella pertussis</i>	519
Clinical Significance	481	Serologic Tests for Diagnosis of Pertussis	521
Cultural Characteristics and Identification	481	Treatment of Pertussis	522
Antimicrobial Susceptibility	482	Antimicrobial Susceptibility Testing of <i>Bordetella</i> Species	522
BRUCELLA SPECIES	482	CHAPTER 10	
Epidemiology of Brucellosis	482	<i>Legionella</i>	
Taxonomy of <i>Brucella</i> Species	484	TAXONOMY AND CHARACTERISTICS OF THE GENUS LEGIONELLA	550
Virulence of <i>Brucella</i> Species	484	CLINICAL AND PATHOLOGIC SPECTRUM OF LEGIONELLOSIS	551
Clinical Spectrum of Brucellosis	486	Predisposing Factors	552
Serologic Diagnosis of Brucellosis	486	Pathology and Pathogenesis	552
Isolation and Cultural Characteristics	488	EPIDEMIOLOGIC AND ECOLOGIC ASPECTS OF LEGIONELLOSIS	553
Identification of <i>Brucella</i> Species	488	Incidence	553
Treatment of Brucellosis	490	<i>Legionellaceae</i> in the Environment	553
FRANCISELLA TULARENSIS	491	Natural Habitats	553
Epidemiology of Tularemia	491	Man-Made (Artificial) Aquatic Habitats	554
History and Taxonomy	491	Legionellosis in Travelers	554
Virulence of <i>F. tularensis</i>	492	Nosocomial Outbreaks of Legionellosis	555
Clinical Spectrum of Tularemia	493	LABORATORY DIAGNOSIS	555
Isolation and Cultural Characteristics	494	Selection, Collection, and Transport of Clinical Specimens	555
Serologic Diagnosis of Tularemia	495	Direct Examination of Clinical Specimens	556
Treatment of Tularemia	495	Gross Examination and Microscopic Examination of Stained Materials	556
BARTONELLA SPECIES	497	Microscopic Examination of Stained Materials	556
Taxonomy and Epidemiology of <i>Bartonella</i> Species	497	Direct Fluorescent Antibody (DFA) Procedure	556
Clinical Significance of <i>Bartonella</i> Species	499	Antigen Detection in Urine and Body Fluids	557
Oroya Fever and Verruga Peruana	500	DETECTION OF LEGIONELLA IN CLINICAL SPECIMENS	557
"Classical" and "Urban" Trench Fever	500	Isolation of <i>Legionella</i> Species From Clinical Specimens	557
Bacillary Angiomatosis	501	Biopsy, Surgical Removal, and Autopsy Tissue	557
Peliosis	501	Pleural Fluid and Transtracheal Aspirates	557
Fever and Bacteremia	502	Acid-Wash Decontamination Procedure for Sputum and Other Contaminated Specimens	557
Endocarditis	502	Blood Cultures	557
Cat-Scratch Disease (CSD)	503	Identification of <i>Legionella</i> Species	558
Miscellaneous Infections	504	Antimicrobial Susceptibility and Treatment	558
Detection, Isolation, and Identification of <i>Bartonella</i> Species	505	Serum Indirect Immunofluorescent Antibody Test	560
Specimen Types	505	Molecular Diagnosis	560
Culture	505	ENVIRONMENTAL MICROBIOLOGY STUDIES	561
Gram Stain and Colony Morphology	505	Isolation of <i>Legionella</i> From Environmental Samples	561
Identification Methods	505	Typing of <i>Legionella</i> Isolates	561
Serologic Diagnosis of <i>Bartonella</i> Infections	507	CHAPTER 11	
In Vitro Antimicrobial Susceptibility	509	<i>Neisseria</i> Species and <i>Moraxella catarrhalis</i>	
AFIPIA SPECIES	510	TAXONOMY OF THE FAMILY NEISSERIACEAE AND THE FAMILY MORAXELLACEAE	568
Taxonomy and Clinical Significance	510	GENERAL CHARACTERISTICS OF THE GENUS NEISSERIA	569
Isolation and Identification	510		
Antimicrobial Susceptibility	510		
BORDETELLA SPECIES	510		
Background and Taxonomy of <i>Bordetella</i> Species	510		
Epidemiology of Pertussis	512		
Clinical Significance of <i>Bordetella pertussis</i>	512		
Pertussis Vaccines	513		
Clinical Significance of Other <i>Bordetella</i> Species	516		
<i>Bordetella parapertussis</i>	516		
<i>Bordetella bronchiseptica</i>	516		
<i>Bordetella hinzii</i>	517		
<i>Bordetella holmesii</i>	517		
<i>Bordetella trematum</i>	517		

CLINICAL SIGNIFICANCE OF NEISSERIA SPECIES

<i>Neisseria gonorrhoeae</i>	570
Epidemiology	570
Infections Caused by <i>N. gonorrhoeae</i>	573
<i>Neisseria meningitidis</i>	578
Epidemiology	578
Infections Caused by <i>N. meningitidis</i>	580
Meningococcal Prophylaxis and Meningococcal Vaccines	582
Other <i>Neisseria</i> Species	584

CLINICAL SIGNIFICANCE OF MORAXELLA CATARRHALIS

ISOLATION OF NEISSERIA SPECIES

<i>Neisseria gonorrhoeae</i>	588
Direct Gram-Stained Smears	588
Specimen Collection	588
Specimen Transport	589
Selective Culture Media: Inoculation and Incubation	590
<i>Neisseria meningitidis</i>	591
Laboratory Safety	591
Direct Gram-Stained Smears and Direct Capsular Antigen Tests	591
Specimen Collection and Transport	591
Isolation and Incubation	591

IDENTIFICATION OF NEISSERIA SPECIES

Colony Morphology	592
Gram Stain and Oxidase Test	593
Superoxol Test	593
Differentiation of Other Organisms on Selective Media	593
Presumptive Criteria for Identification of <i>N. gonorrhoeae</i>	593
Identification Tests for <i>Neisseria</i> Species	593
Carbohydrate-Utilization Tests	594
Conventional CTA Carbohydrates	594
Rapid Carbohydrate-Utilization Test	594
RIM- <i>Neisseria</i> Test (Rapid Identification Method- <i>Neisseria</i>)	594
Other Carbohydrate-Utilization Methods	594
Chromogenic Enzyme Substrate Tests	594
Gonochek II	595
BactiCard <i>Neisseria</i>	595
Immunologic Methods for Culture Confirmation of <i>N. gonorrhoeae</i>	596
Direct Fluorescent Monoclonal Antibody Test	596
Coagglutination Tests	596
GonoGen II Test	596
Multitest Identification Systems	597
DNA Probe Test for Culture Confirmation of <i>N. gonorrhoeae</i>	597
Nucleic Acid Hybridization and Amplification Tests for <i>N. gonorrhoeae</i>	597
Molecular Methods for Detection of <i>N. meningitidis</i>	599

CULTURAL CHARACTERISTICS OF NEISSERIA SPECIES

<i>Neisseria gonorrhoeae</i>	600
<i>Neisseria meningitidis</i>	602
Other <i>Neisseria</i> Species	603
<i>Neisseria lactamica</i>	603
<i>Neisseria cinerea</i>	603
<i>Neisseria flavescens</i>	603
<i>Neisseria subflava</i> Biovars, <i>Neisseria mucosa</i> , and <i>Neisseria sicca</i>	603
<i>Neisseria polysaccharea</i>	604
<i>Neisseria elongata</i> Subspecies	604
<i>Neisseria gonorrhoeae</i> Subspecies <i>kochii</i> (" <i>Neisseria kochii</i> ")	604
Atypical and Non-Human <i>Neisseria</i> Species	604

CULTURAL CHARACTERISTICS AND IDENTIFICATION OF MORAXELLA CATARRHALIS

ANTIMICROBIAL SUSCEPTIBILITY OF NEISSERIA SPECIES

<i>Neisseria gonorrhoeae</i>	605
<i>Neisseria meningitidis</i>	607

ANTIMICROBIAL SUSCEPTIBILITY OF MORAXELLA CATARRHALIS

608

CHAPTER 12

Gram-Positive Cocci

Part I: Staphylococci and Related Gram-Positive Cocci

TAXONOMY OF STAPHYLOCOCCI AND RELATED GRAM-POSITIVE COCCI

624

CLINICAL SIGNIFICANCE OF STAPHYLOCOCCI AND RELATED GRAM-POSITIVE COCCI

625

<i>Staphylococcus aureus</i> Subsp. <i>aureus</i>	625
Coagulase-Negative Staphylococci	638
<i>Staphylococcus epidermidis</i>	638
<i>Staphylococcus saprophyticus</i> Subsp. <i>saprophyticus</i>	641
Other Coagulase-Negative Staphylococci	642
<i>Micrococcus</i> Species and Related Genera	642
<i>Rothia mucilaginosa</i>	642

ISOLATION AND PRELIMINARY

DIFFERENTIATION OF STAPHYLOCOCCI AND RELATED GRAM-POSITIVE COCCI

643

Direct Gram-Stained Smears	643
Isolation From Clinical Specimens	643
Colony Morphology	643
The Catalase Test	644
Methods for Differentiating Micrococci and Staphylococci	644
Fermentation of Glucose	644
Susceptibility to Lysozyme	645
Production of Acid From Glycerol in the Presence of Erythromycin	645
Susceptibility to Furazolidone	645
Modified Oxidase Test	645
Susceptibility to Bacitracin	645

IDENTIFICATION OF STAPHYLOCOCCUS AUREUS

645

Slide Coagulase Test	645
Tube Coagulase Test	646
Alternative Coagulase Test Procedures	646
Latex Agglutination	646
Passive Hemagglutination	646
Additional Confirmatory Tests	647
Deoxyribonuclease (DNase) Test	647
Thermostable Endonuclease Test	648
Mannitol Fermentation	648
Other Methods for Identification of <i>Staphylococcus aureus</i>	648
Rapid Tests for Detection of Methicillin Resistance	648
Differentiation of Coagulase-Positive Staphylococci of Veterinary Origin	648

IDENTIFICATION OF COAGULASE-NEGATIVE STAPHYLOCOCCI

Conventional Identification Methods	649
Production of Phosphatase for Identification of <i>Staphylococcus epidermidis</i>	650
Pyrrolidonyl Arylamidase Activity	650
Susceptibility to Polymyxin B	652
Ornithine Decarboxylase Test (ODC)	652
Urease Production	655
Acetoin Production	655
Susceptibility to Deferoxamine	655
Susceptibility to Novobiocin for Identification of <i>Staphylococcus saprophyticus</i>	655
Commercial Identification Systems	655
RapiDEC Staph	656
API Staph-IDENT	656
API Staph	656
API ID32 Staph	656
Vitek Gram-Positive Identification (GPI) Card	657
MicroScan Rapid Pos Combo Panel	657
MicroScan Pos ID Panel	657
BBL Crystal Gram-Positive (GP) Identification System	657
Staf-Sistem 18-R	658
Staph-Zym	658
Microbact Staphylococcal 12S	658
Microbial Identification System	658
Biolog Microplate Identification System	658
Molecular Identification and Typing Methods for Staphylococci	658
Identification of <i>Micrococcus</i> and Related Species	661
Identification of <i>Rothia mucilaginosa</i>	661
LABORATORY APPROACH TO THE IDENTIFICATION OF STAPHYLOCOCCI	661

CHAPTER 13

Gram-Positive Cocci

Part II: Streptococci, Enterococci, and the "Streptococcus-Like" Bacteria

GENERAL CHARACTERISTICS OF THE STREPTOCOCCI	674
GROUP A β -HEMOLYTIC STREPTOCOCCI (STREPTOCOCCUS PYOGENES)	676
Virulence Factors	676
Clinical Significance	679
GROUP B β -HEMOLYTIC STREPTOCOCCI (STREPTOCOCCUS AGALACTIAE)	683
Virulence Factors	683
Clinical Significance	684
GROUP C AND GROUP G β -HEMOLYTIC STREPTOCOCCI	688
GROUP F β -HEMOLYTIC STREPTOCOCCI	689
OTHER STREPTOCOCCI IN THE "PYOGENIC COCCI" GROUP	689
STREPTOCOCCUS PNEUMONIAE	689
Virulence Factors	689
Pneumococcal Vaccines	690
Clinical Significance	691

VIRIDANS STREPTOCOCCI	693
THE ANGINOSUS GROUP: STREPTOCOCCUS ANGINOSUS, STREPTOCOCCUS CONSTELLATUS, AND STREPTOCOCCUS INTERMEDIUS	695
GROUP D STREPTOCOCCI: THE "STREPTOCOCCUS BOVIS/STREPTOCOCCUS EQUINUS COMPLEX" AND RELATED SPECIES	697
STREPTOCOCCUS SUIS	698
OTHER VIRIDANS STREPTOCOCCI ISOLATED FROM ANIMALS	700
MISCELLANEOUS STREPTOCOCCI	700
ENTEROCOCCUS SPECIES	700
Taxonomy	700
Virulence Factors	701
Clinical Significance	701
Genus <i>Melissococcus</i>	704
THE "STREPTOCOCCUS-LIKE" BACTERIA	704
<i>Abiotrophia</i> and <i>Granulicatella</i> Species	704
<i>Aerococcus</i> and <i>Helcococcus</i> Species	705
<i>Leuconostoc</i> Species	706
<i>Pediococcus</i> and <i>Tetragenococcus</i> Species	706
<i>Gemella</i> Species	707
<i>Vagococcus</i> Species	707
<i>Alloiooccus</i> Species	708
<i>Globicatella</i> Species	708
<i>Facklamia</i> Species	708
<i>Dolosigranulum</i> , <i>Ignavigranum</i> , and <i>Dolosicoccus</i> Species	709
<i>Eremococcus</i> Species	709
Genus <i>Lactococcus</i>	709
ISOLATION AND IDENTIFICATION OF STREPTOCOCCI AND "STREPTOCOCCUS-LIKE" BACTERIA	709
Direct Gram-Stained Smears	709
Culture Media	710
Hemolysis on Blood Agar	710
Nonculture, Direct Detection Techniques for Group A β -Hemolytic Streptococci in Pharyngeal Specimens	711
Nonculture, Direct Detection Techniques for Group B β -Hemolytic Streptococci and <i>Streptococcus pneumoniae</i>	712
Colony Morphology and Catalase Testing	713
Recognition and Preliminary Characterization of Streptococci and the "Streptococcus-Like" Bacteria	713
Presumptive Identification of Streptococci	715
Susceptibility to Bacitracin	715
Susceptibility to Sulfamethoxazole-Trimethoprim (SXT)	715
CAMP Test and Pigment Production	717
Hydrolysis of Sodium Hippurate	717
Bile-Esculin Test	717
Salt-Tolerance Test (6.5% NaCl Broth)	717
Leucine Aminopeptidase (LAP) Test	718
Pyrrolidonyl Arylamidase (PYR) Test	718
Susceptibility to Optochin	718
Bile-Solubility Test	718
Commercial Presumptive Identification Tests	718

Serologic Identification of β-Hemolytic Streptococci	718	Epidemiology of Anthrax	776
Capillary Precipitin Test	718	Virulence Factors of <i>B. anthracis</i>	777
Coagglutination	718	Clinical Presentations of Anthrax	777
Latex Agglutination	719	Treatment of Anthrax	778
Serologic Identification of <i>Streptococcus pneumoniae</i>	719	Prevention of Anthrax	778
Biochemical Characteristics for Identification of Groupable Streptococci	719	<i>Bacillus cereus</i>	778
Identification of the Viridans Streptococci	719	Virulence Factors of <i>B. cereus</i>	778
Sanguis Group	722	<i>B. cereus</i> Gastroenteritis	779
Mitis Group	722	Opportunistic <i>Bacillus</i> Species Infections	779
Mutans Group	722	Bacteremia and Endocarditis	779
Salivarius Group	722	Infections in Compromised Hosts	780
Anginosus Group	725	Ocular Infections	780
Bovis Group	726	Musculoskeletal Infections	780
Identification of <i>Streptococcus suis</i> and Other Streptococci Isolated From Animals	726	Nosocomial Infections	780
Identification of <i>Enterococcus</i> Species	726	Laboratory Safety, Specimen Collection, and Processing	781
Identification of <i>Abiotrophia</i> and <i>Granulicatella</i> Species	731	Isolation and Identification of <i>Bacillus</i> Species: The “<i>Bacillus cereus</i> Group”: <i>B. anthracis</i>, <i>B. cereus</i>, <i>B. thuringiensis</i>, and <i>B. mycoides</i>	781
Identification of <i>Aerococcus</i> and <i>Helcococcus</i> Species	731	Antimicrobial Susceptibility of <i>Bacillus</i> Species	783
Identification of <i>Leuconostoc</i>, <i>Pediococcus</i>, and <i>Tetragenococcus</i> Species	734	CORYNEBACTERIUM SPECIES	783
Identification of <i>Gemella</i> Species	736	Introduction and Taxonomy	783
Identification of <i>Vagococcus</i> Species	736	Identification of <i>Corynebacterium</i> Species and the Coryneform Bacteria	785
Identification of <i>Alloiococcus</i>, <i>Globicatella</i>, <i>Facklamia</i>, <i>Dolosigranulum</i>, <i>Ignavigranum</i>, and <i>Dolosicoccus</i> Species	738	Antimicrobial Susceptibility Testing of <i>Corynebacterium</i> Species and the Coryneform Bacteria	797
Identification of <i>Lactococcus</i> Species	742	Members of the Genus <i>Corynebacterium</i> Isolated From Humans	797
Commercially Available Systems for Identification of Streptococci, Enterococci, and Selected “Streptococcus-Like” Bacteria	742	<i>Corynebacterium amycolatum</i>	798
API Rapid Strep	743	<i>Corynebacterium diphtheriae</i>	803
BBL Crystal Gram-Positive Identification System	743	<i>Corynebacterium jeikeium</i>	807
Rapid ID 32 Strep	744	<i>Corynebacterium pseudodiphtheriticum</i>	808
Rapid STR	744	<i>Corynebacterium striatum</i>	808
Vitek Gram-Positive Identification (GPI) Card	744	<i>Corynebacterium urealyticum</i>	808
Microscan Gram-Positive Breakpoint Combo Panel	745	<i>Corynebacterium</i> Species Associated With Animals	809
		<i>Corynebacterium</i> Species Isolated From Foods and the Environment	810
CHAPTER 14		OTHER CORYNEFORM BACTERIA	810
Aerobic and Facultative Gram-Positive Bacilli		<i>Actinobaculum</i> Species	810
LISTERIA SPECIES AND LISTERIA MONOCYTOGENES	766	<i>Actinomyces</i> Species Isolated From Humans	811
Taxonomy of the Genus <i>Listeria</i>	766	<i>Actinomyces</i> Species Isolated From Animals	817
Virulence Factors of <i>L. monocytogenes</i>	768	<i>Arcanobacterium</i> Species	817
Epidemiology of <i>L. monocytogenes</i>	768	<i>Arthrobacter</i> Species	823
Clinical Significance of <i>L. monocytogenes</i>	768	<i>Brevibacterium</i> Species	823
Isolation of <i>L. monocytogenes</i> From Clinical Specimens	770	<i>Cellulomonas</i> , <i>Cellulosimicrobium</i> , and <i>Oerskovia</i> Species	826
Identification of <i>Listeria</i> Species	770	<i>Dermabacter</i> Species	828
Antimicrobial Susceptibility and Treatment of <i>Listeria</i> Infections	773	<i>Exiguobacterium</i> Species	828
Pathogenicity of Other <i>Listeria</i> Species	773	<i>Leifsonia</i> Species	830
ERYSIPLOTHRIX SPECIES: ERYSIPELOTHRIX RHUSIOPATHIAE AND ERYSIPELOTHRIX TONSILLARUM	773	<i>Microbacterium</i> (<i>Aureobacterium</i>) Species	830
Taxonomy of the Genus <i>Erysipelothrix</i>	773	<i>Rothia</i> and “ <i>Rothia</i> -Like” Species (CDC Group 4)	832
Virulence Factors of <i>E. rhusiopathiae</i>	774	<i>Turicella</i> Species	834
Clinical Significance of <i>E. rhusiopathiae</i>	774	GARDNERELLA VAGINALIS	834
Isolation and Identification of <i>E. rhusiopathiae</i>	775	Taxonomy and Cellular Morphology	834
Antimicrobial Susceptibility of <i>E. rhusiopathiae</i>	775	Virulence Factors of <i>G. vaginalis</i>	835
BACILLUS SPECIES AND RELATED GENERA	775	Clinical Significance of <i>G. vaginalis</i>	835
Taxonomy and the Taxonomic Dissection of the Genus <i>Bacillus</i>	775	Isolation and Identification	836
<i>Bacillus anthracis</i>	776	Antimicrobial Susceptibility	838
		LACTOBACILLUS SPECIES	838
		Taxonomy and Epidemiology	838
		Clinical Significance	839
		Isolation and Identification	840
		Antimicrobial Susceptibility	840

CHAPTER 15

Aerobic Actinomycetes

INTRODUCTION, CLASSIFICATION, AND TAXONOMY 858

THE NOCARDIOFORM GROUP 860

<i>Nocardia</i>	860
Epidemiology, Pathology, and Pathogenesis	861
Clinical Disease	862
<i>Rhodococcus</i>	863
Epidemiology, Pathology, and Pathogenesis	863
Clinical Disease	863
Other Nocardioform Bacteria	863

THE MADUROMYCETES AND THERMOMONOSPORAS 864

<i>Actinomadura</i>	864
Epidemiology	864
Clinical Disease and Pathology	864
<i>Nocardiosis</i>	864

THE STREPTOMYCETES 865

<i>Streptomyces</i>	865
---------------------	-----

THERMOPHILIC ACTINOMYCETES 865

MISCELLANEOUS ACTINOMYCETES 865

<i>Oerskovia</i>	865
<i>Dermatophilus</i>	865
<i>Tropheryma whippelii</i>	865
History and Taxonomy	865
Ecology	866
Clinical Disease and Pathology	866

LABORATORY DIAGNOSIS OF INFECTIONS CAUSED BY AEROBIC ACTINOMYCETES 866

Primary Isolation	866
Differentiation of <i>Nocardia</i> From Other Genera of Aerobic Actinomycetes	867
Identification of Thermophilic Actinomycetes	871
Identification of <i>Tropheryma whippelii</i>	871
In Vitro Susceptibility of <i>Nocardia</i> and Related Bacteria to Antimicrobial Agents and Therapy of Infections	871

CHAPTER 16

The Anaerobic Bacteria

RELATIONSHIPS OF BACTERIA TO OXYGEN 878

Oxygen Tolerance	879
Oxidation-Reduction Potential	879

HABITATS 880

TAXONOMIC CLASSIFICATION AND NOMENCLATURE 880

HUMAN INFECTIONS 887

ISOLATION OF ANAEROBIC BACTERIA 890

Selection of Specimens for Culture	890
Collection and Transport of Specimens	891
Anaerobic Blood Culture (Summary of Guidelines for Traditional Broth and Instrumented Systems)	891
Direct Examination of Clinical Materials	892
Selection and Use of Media	893

ANAEROBIC SYSTEMS FOR THE CULTIVATION OF ANAEROBIC BACTERIA 895

Anaerobic Jar Techniques	895
Use of the Anaerobic Glove Box	897
The Roll-Streak System	897
Anaerobic Disposable Plastic Bags	898
Use of the Anaerobic Holding Jar	898

INCUBATION OF CULTURES 898

INSPECTION AND SUBCULTURE OF COLONIES 900

AEROTOLERANCE TESTS 900

PRELIMINARY REPORTING OF RESULTS 901

DETERMINATION OF CULTURAL AND BIOCHEMICAL CHARACTERISTICS FOR DIFFERENTIATION OF ANAEROBIC ISOLATES 901

Presumptive Identification	901
Use of Differential Agar Media	901
Presumptive Plates	902
Antimicrobial Susceptibility Plates	904
Characterization of Anaerobes Using Conventional Biochemical Tests in Large Tubes	904
Alternative Procedures	905
The Nagler Test and the CAMP Test for <i>C. perfringens</i>	905
Packaged Microsystems	905
Commercial Packaged Kits for Identification of Anaerobes After 4 Hours of Incubation	905

DETERMINATION OF METABOLIC PRODUCTS BY GAS-LIQUID CHROMATOGRAPHY 906

Identification of Volatile Fatty Acids	906
Analysis of Nonvolatile Acids	908
Gas-Liquid Chromatography Controls	909

IDENTIFICATION OF ANAEROBIC BACTERIA 909

Anaerobic Gram-Negative Non-Spore-Forming Bacilli	912
Classification and Nomenclature	912
Presumptive or Preliminary Group Identification of <i>Bacteroides</i> , <i>Prevotella</i> , <i>Porphyromonas</i> , and <i>Fusobacterium</i>	913
Identification of the Anaerobic Cocci	924
Identification of the Anaerobic Non-Spore-Forming Gram-Positive Bacilli	927
<i>Propionibacterium</i> Species	927
<i>Bifidobacterium</i> Species	927
<i>Lactobacillus</i> Species	930
<i>Actinomyces</i> Species	930
<i>Eubacterium</i> Species	930
<i>Mobiluncus</i> and Bacterial Vaginosis	931
Additional Genera and Species of Anaerobic Non-Spore-Forming Gram-Positive Bacilli	931
Identification of <i>Clostridium</i> Species	931
Histotoxic <i>Clostridia</i> Involved in Clostridial Myonecrosis or Gas Gangrene	932
Miscellaneous <i>Clostridia</i> in Other Clinical Settings	935
<i>Clostridium difficile</i> -Associated Intestinal Disease	936
Botulism	937
Tetanus	938

ANTIMICROBIAL SUSCEPTIBILITY TESTING OF ANAEROBIC BACTERIA

Methods for Antimicrobial Susceptibility Testing of Anaerobes

939

939

CHAPTER 17

Antimicrobial Susceptibility Testing

HISTORICAL INTRODUCTION

946

BACTERIAL RESISTANCE TO ANTIMICROBIAL AGENTS

947

Mechanistic Variables

947

Mechanisms of Resistance

949

Transport of Antimicrobial Agents Across the Cell Wall and Cell Membranes

949

Antibiotics That Interfere With Formation of Bacterial Cell Walls:

The β -Lactam and Glycopeptide Antibiotics

955

Antimicrobial Agents That Do Not Exert Their Effect on Cell Walls

961

Interactions Among Resistance Mechanisms

963

LABORATORY GUIDANCE OF ANTIMICROBIAL THERAPY

963

TESTS FOR DETERMINING INHIBITORY

ACTIVITY OF ANTIMICROBIAL AGENTS

968

Indications

968

Choice of Test

968

Selection of Antimicrobial Agents

970

Standardization

970

Growth Medium

970

pH

1014

Pseudomonas aeruginosa, *Burkholderia cepacia*, and

Stenotrophomonas maltophilia in Patients With Cystic Fibrosis

1014

Direct Susceptibility Testing

1014

CHAPTER 18

Mycoplasmas and Ureaplasmas

TAXONOMY OF MYCOPLASMAS AND UREAPLASMAS

1023

VIRULENCE FACTORS OF HUMAN MYCOPLASMAS

1026

CLINICAL SIGNIFICANCE OF THE HUMAN MYCOPLASMAS

1027

Mycoplasma pneumoniae

1027

Mycoplasma hominis and *Ureaplasma urealyticum*

1028

Mycoplasma genitalium

1033

Mycoplasma fermentans

1034

Mycoplasma penetrans

1037

Mycoplasma pirum

1038

Mycoplasma primatum

1039

Mycoplasma spermatophilum

1039

Human Infections Due to *Mycoplasma* Species of Animal Origin

1039

Hemotropic *Mycoplasma* Species

1039

CULTURE OF HUMAN MYCOPLASMAS FROM CLINICAL SPECIMENS

1040

General Considerations

1040

Specimen Collection

1041

Transport Media

1041

Media for Culture of Mycoplasmas

1041

Isolation and Identification of *Mycoplasma pneumoniae*

1042

Noncultural Detection of *Mycoplasma pneumoniae*

1043

Isolation and Identification of the Genital Mycoplasmas

1044

Noncultural Detection of the Genital Mycoplasmas	1045		
Commercial Mycoplasma Culture Systems	1047		
Isolation of Mycoplasmas on Routine Culture Media	1048		
SEROLOGIC TESTS FOR DIAGNOSIS OF MYCOPLASMA PNEUMONIAE INFECTIONS	1048		
SEROLOGIC TESTS FOR GENITAL MYCOPLASMAS	1050		
ANTIMICROBIAL SUSCEPTIBILITY AND TREATMENT OF MYCOPLASMA INFECTIONS	1051		
DIAGNOSIS AND TREATMENT OF HEMOTROPHIC MYCOPLASMA INFECTIONS IN ANIMALS	1054		
CHAPTER 19			
Mycobacteria			
TRENDS IN CLINICAL TUBERCULOSIS	1065		
Worldwide Increase in the Incidence of Tuberculosis	1065		
Impact of Coinfection With HIV and <i>Mycobacterium tuberculosis</i>	1066		
Persons at Risk for Tuberculosis	1066		
Rapidly Progressive Disease	1066		
Implementation of More Aggressive Infection Control and Epidemiologic Measures	1067		
TRENDS IN THE LABORATORY DIAGNOSIS OF TUBERCULOSIS	1067		
Use of Molecular Techniques	1067		
Use of Automated Instruments	1067		
Use of Broth Culture Media	1067		
Inoculation of Clinical Specimens to Agar-Based Culture Media	1067		
Use of <i>p</i> -nitro-acetylamino-hydroxypropiphenone (NAP)	1068		
Applications of Gas-Liquid Chromatography, High-Performance Liquid Chromatography, and Mass Spectrometry	1068		
Use of the Lysis-Centrifugation System Blood Culture Tube	1068		
THE CLINICAL LABORATORY	1068		
Optimizing the Detection and Identification of Mycobacteria	1068		
Laboratory Safety	1068		
SPECIMEN COLLECTION	1069		
Respiratory Specimens	1069		
Blood Cultures	1069		
Stool Specimens	1070		
Miscellaneous "Sterile" Specimens	1070		
LABORATORY APPROACH TO THE RECOVERY AND IDENTIFICATION OF MYCOBACTERIA	1071		
Specimen Preparation	1072		
Digestion and Decontamination	1072		
Centrifugation	1074		
Bone Marrow and Biopsy Specimens	1074		
Miscellaneous Liquid Specimens	1075		
Staining of Acid-Fast Bacilli	1075		
CULTURE OF SPECIMENS FOR RECOVERY OF MYCOBACTERIA	1077		
Culture Media	1077		
Nonselective Culture Media for Recovery of Mycobacteria	1077		
Media of Cohen and Middlebrook	1078		
Selective Media	1078		
Incubation	1079		
		RAPID METHODS FOR ESTABLISHING A DIAGNOSIS	1079

		SUMMARY	1117

CHAPTER 20

Spirochetal Infections

TAXONOMY	1126
TREPONEMA	1126
<i>Treponema pallidum</i> Subspecies <i>pallidum</i>	1126
Incubation Period	1127
Primary Syphilis	1127
Secondary Syphilis	1127
Latent Syphilis	1127
Late Syphilis	1127
Epidemiology	1128
Immunity	1129
<i>Treponema pallidum</i> Subspecies <i>pertenue</i>	1129
<i>Treponema pallidum</i> Subspecies <i>endemicum</i>	1130
<i>Treponema carateum</i>	1130
Laboratory Diagnosis of Treponemal Infections	1130
Serologic Tests	1131
Innovations: Provisional and Investigative Tests	1133
BORRELIA	1134
Relapsing Fever	1134
Epidemiology	1134
Clinical Disease	1135
Laboratory Diagnosis	1135
Lyme Disease	1135
Epidemiology	1137
Clinical Disease	1139
Laboratory Diagnosis	1140
LEPTOSPIRA	1143
Leptospirosis	1144
Epidemiology	1144
Clinical Disease	1144
Laboratory Diagnosis	1144
SPIRILLUM MINOR (RAT-BITE FEVER)	1146

CHAPTER 21

Mycology

PATIENTS AT RISK FOR FUNGAL INFECTIONS	1153
General Signs and Symptoms Suggesting Fungal Infection	1153
CLINICAL CATEGORIZATION OF FUNGAL INFECTIONS	1153
Common Mycologic Terms	1155
LABORATORY APPROACH TO THE DIAGNOSIS OF FUNGAL INFECTIONS	1156
Specimen Collection and Transport	1158
Specimen Processing	1160
Direct Examination	1160
Preparation of Mounts for Study	1162
Selection and Inoculation of Culture Media	1162
Incubation of Fungal Cultures	1165
LABORATORY APPROACH TO THE PRESUMPTIVE IDENTIFICATION OF FUNGAL ISOLATES	1166
Extent of Laboratory Genus/Species Identification	1166
Genus and Species Identification of the Major Groups of Fungi	1168
<i>Zygomycetes</i> Species and Zygomycosis	1168
Histopathology of Infections Caused by the <i>Zygomycetes</i>	1171

HYALINE MOLDS AND HYALOHYPHOMYCOSIS

Aspergillus Species and Aspergillosis	1174
Laboratory Presentation	1174
Colony Morphology	1174
Microscopic Features	1174
<i>Aspergillus fumigatus</i>	1175
<i>Aspergillus flavus</i>	1175
<i>Aspergillus niger</i>	1175
<i>Aspergillus terreus</i>	1176
<i>Aspergillus nidulans</i>	1177
Histopathology	1177
Diagnosis Using Nonculture Techniques	1179
Additional Rapidly Growing Hyaline Molds	1181
Colony Characteristics	1181
Genera of Hyaline Filamentous Molds Producing Conidia in Chains	1181
<i>Penicillium</i> Species	1181
<i>Paecilomyces</i> Species	1182
<i>Scopulariopsis</i> Species	1182
Identification of Hyaline Molds Producing Conidia in Clusters	1182
<i>Acremonium</i> Species	1182
<i>Fusarium</i> species	1183
<i>Gliocladium</i> Species	1183
<i>Trichoderma</i> Species	1184
Identification of the Genera of Hyalohyphomycetes	
Producing Conidia Singly	1184
<i>Scedosporium</i> Species	1185
<i>Chrysosporium</i> Species	1186
<i>Sepedonium</i> Species	1186
<i>Beauveria</i> Species	1187
IDENTIFICATION OF THE DERMATOPHYTES	1187
Identification of <i>Microsporum</i> Species	1189
<i>Microsporum canis</i>	1189
<i>Microsporum gypsum</i>	1190
<i>Microsporum nanum</i>	1190
Identification of <i>Trichophyton</i> Species	1190
<i>Trichophyton mentagrophytes</i>	1190
<i>Trichophyton rubrum</i>	1190
<i>Trichophyton tonsurans</i>	1191
<i>Trichophyton verrucosum</i>	1191
<i>Epidermophyton floccosum</i>	1192
Diagnosis by Nonculture Techniques	1192
THE DIMORPHIC FUNGI	1192
<i>Blastomyces dermatitidis</i> and Blastomycosis	1194
Laboratory Presentation	1196
Diagnosis Using Nonculture Techniques	1197
<i>Coccidioides immitis</i> and Coccidioidomycosis	1199
Laboratory Presentation	1199
<i>Histoplasma capsulatum</i> and Histoplasmosis	1199
Laboratory Presentation	1200
Diagnosis Using Nonculture Techniques	1202
<i>Sporothrix schenckii</i> and Sporotrichosis	1203
Laboratory Presentation	1203
Diagnosis Using Nonculture Techniques	1203
<i>Paracoccidioides immitis</i> and Paracoccidioidomycosis	1203
Laboratory Presentation	1206
Diagnosis Using Nonculture Techniques	1206
DEMATIACEOUS FUNGI	1208
Agents of Phaeohyphomycosis	1208
Laboratory Presentation	1208

Macroconidia With Transverse and Longitudinal Septa (Muriform)	1208
<i>Alternaria</i> Species	1209
<i>Ulocladium</i> Species	1209
<i>Stemphylium</i> Species	1210
<i>Epicoccum</i> Species	1210
Macroconidia With Transverse Septa	1210
<i>Bipolaris</i> Species	1210
<i>Drechslera</i> Species	1210
<i>Curvularia</i> Species	1210
<i>Exserohilum</i> Species	1210
Macroconidia Borne Singly or Via Special Conidiation	1210
<i>Nigrospora</i> Species	1211
<i>Phoma</i> Species	1211
<i>Chaetomium</i> Species	1211

AGENTS OF CHROMOMYCOSIS

AND MYCETOMA	1211
<i>Cladophialophora (Cladosporium) carrionii</i>	1214
<i>Phialophora verrucosum</i>	1215
<i>Phialophora richardsiae</i>	1215
<i>Fonsecaea pedrosoi</i>	1215
<i>Exophiala jeanselmei</i>	1216

THE LABORATORY IDENTIFICATION OF YEASTS

Germ Tube	1216
Cornmeal Agar Preparations	1218
Growth Patterns of Yeasts on Cornmeal Agar	1219
CHROMagar	1219
<i>Candida albicans</i>	1219
<i>Candida tropicalis</i>	1220
<i>Candida parapsilosis</i>	1220
<i>Candida kefyr (pseudotropicalis)</i>	1220
Other Emerging Pathogenic <i>Candida</i> Species	1220
<i>Candida</i> Species and Candidiasis	1221
Species That Produce True Hyphae	1221
Species That Fail to Produce True Hyphae	1224
Cryptococcosis and <i>Cryptococcus neoformans</i>	1224
Diagnosis by Nonculture Methods	1226
Miscellaneous Non-Hyphae-Forming Yeasts of Medical Importance	1226
<i>Candida (Torulopsis) glabrata</i>	1226
<i>Rhodotorula</i> Species	1226
<i>Saccharomyces</i> Species	1226
<i>Hansenula anomala</i>	1228
<i>Malassezia furfur</i>	1228
Laboratory Identification of "Black Yeasts"	1229
<i>Aureobasidium pullulans</i>	1229
<i>Phaeoanellomyces werneckii</i>	1229
Packaged Yeast-Identification Systems	1230
Antifungal Susceptibility Testing	1230

SEROLOGIC DIAGNOSIS OF FUNGAL DISEASES

1232

CHAPTER 22

Parasitology

RISK AND PREVENTION OF PARASITIC INFECTIONS

1247

CLINICAL MANIFESTATIONS OF PARASITIC DISEASE

1247

COLLECTION, TRANSPORT, AND PROCESSING OF SPECIMENS

1248

Fecal Specimens	1248
Preservation of Clinical Specimens	1249
Visual Examination	1249
Processing Fresh Stool Specimens for Ova and Parasite Examination	1249
Examination of Intestinal Specimens Other Than Stool	1253
Examination of Extraintestinal Specimens	1254
Sputum	1254
Urine and Body Fluids	1254
Tissue Biopsies and Aspirates	1254
Corneal Scrapings or Biopsy	1254
Muscle Biopsy	1254
Blood	1254

IDENTIFICATION AND DIFFERENTIATION OF PARASITES

1255

Life Cycles of Human Parasites	1256
---------------------------------------	------

INTESTINAL PROTOZOA

1256

The Intestinal Amoebae	1258
Amebiasis and <i>Entamoeba histolytica</i>	1258
<i>Entamoeba histolytica</i> versus <i>Entamoeba coli</i>	1260
Serologic Diagnosis of Amebiasis	1260
Nonpathogenic <i>Entamoeba histolytica</i> : <i>Entamoeba dispar</i>	1261
Other Intestinal Amoebae	1262
Protozoa of Uncertain Classification	1262

Intestinal Flagellates	1263
-------------------------------	------

<i>Giardia lamblia</i>	1263
Other Intestinal Flagellates	1266

Ciliates: <i>Balantidium coli</i>	1267
--	------

Coccidia	1267
-----------------	------

<i>Cryptosporidium parvum</i>	1267
<i>Cyclospora cayentanensis</i>	1270
<i>Isospora belli</i>	1271
<i>Sarcocystis</i> Species	1271

Phylum <i>Microsporium</i>: <i>Microsporidium</i> Species	1272
--	------

NEMATODES

1273

Ascariasis and <i>Ascaris lumbricoides</i>	1274
Trichuriasis and <i>Trichuris trichiura</i> (Whipworm)	1274
<i>Enterobius vermicularis</i>	1275
Hookworms	1276
Strongyloidiasis and <i>Strongyloides stercoralis</i>	1279
<i>Trichostrongylus</i> Species	1279
<i>Capillaria philippinensis</i>	1280

CESTODES

1281

<i>Taenia solium</i> and <i>Taenia saginata</i>	1282
<i>Diphyllobothrium latum</i>: The Giant Fish Tapeworm	1284
<i>Hymenolepis</i> Species	1285
<i>Dipylidium caninum</i>	1286

TREMATODES

1286

Schistosomes	1287
<i>Fasciola hepatica</i> and <i>Fasciolopsis buski</i>	1288
<i>Clonorchis sinensis</i>	1290
<i>Paragonimus westermani</i>	1292

BLOOD AND TISSUE PARASITES

1292

Malaria	1294
Babesia	1298
Hemoflagellates: <i>Leishmania</i> Species and <i>Trypanosoma</i> Species	1298
Leishmaniasis and <i>Leishmania</i> Species	1299
Trypanosomiasis	1299

Filarial Nematodes and Filariasis	1303	Cytomegalovirus	1358
<i>Onchocerciasis</i> and <i>Onchocerca volvulus</i>	1305	Epstein-Barr Virus	1359
Dracunculiasis	1306	Varicella-Zoster Virus	1359
Dirofilariasis	1306	Human Herpesviruses-6 and -7	1359
Tissue Protozoan Infections	1306	Human Herpesvirus-8	1360
<i>Toxoplasma gondii</i>	1306	B Virus	1360
<i>Pneumocystis carinii</i>	1311	Adenoviruses	1360
Miscellaneous Larval Tissue Parasite Infections	1311	Poxviruses	1361
Trichinosis	1312	Papovaviruses	1361
Visceral Larval Migrants	1312	Papillomaviruses	1362
Cutaneous Larva Migrants— <i>Toxocara</i>	1314	Polyomaviruses	1364
Anisakiasis	1314	Parvoviruses	1364
Gnathostomiasis	1315	Hepatitis Viruses	1364
Angiostrongyliasis	1315	Hepatitis A Virus	1365
Echinococcosis (Hydatid Disease)	1315	Hepatitis B Virus	1365
<i>Multiceps</i> Species—Coenurosis	1316	Hepatitis C Virus	1365
Sparganosis: <i>Spirometra mansonoides</i>	1316	Hepatitis D Virus	1366
SEROLOGIC DIAGNOSIS OF PARASITIC INFECTIONS	1318	Hepatitis E Virus	1366
DRUGS COMMONLY USED IN THE TREATMENT OF PARASITIC DISEASES	1321	Prion Diseases (Transmissible Spongiform Encephalopathies)	1366
CHAPTER 23		CLINICAL CLASSIFICATION OF VIRAL INFECTIONS	1367
Diagnosis of Infections Caused by Viruses, <i>Chlamydia</i>, <i>Rickettsia</i>, and Related Organisms		DIAGNOSIS OF VIRAL INFECTIONS	1367
INTRODUCTION	1329	Collection of Specimens for Diagnosis	1369
Historical Review	1329	Transportation and Storage of Specimens	1373
Evolution of Cell-Culture Techniques	1329	Isolation of Viruses in Culture	1373
Evolution of Diagnostic Virology Services	1329	Preparation and Maintenance of Cell Cultures	1373
Levels of Service	1330	Contamination of Cell Cultures	1375
TAXONOMY AND NOMENCLATURE	1330	Technical Aspects of Cell Culture	1377
CLINICAL MANIFESTATIONS OF VIRAL INFECTIONS	1333	Selection of Cell Cultures for Isolation of Viruses	1380
Orthomyxoviruses	1335	Inoculation and Incubation of Cell Cultures	1380
Paramyxoviruses	1342	Detection of Virus and Provisional Identification	1381
Parainfluenza Viruses	1342	Cytopathic Effect	1381
Mumps Virus	1344	Hemagglutination and Hemadsorption	1383
Measles Virus	1344	Light Microscopy	1387
Respiratory Syncytial Virus	1344	Electron Microscopy	1387
Other Paramyxoviruses	1344	Biochemical Differentiation	1387
Picornaviruses	1344	Cell Association	1389
Rhabdoviruses	1345	Detection of Viral Antigens	1389
Arenaviruses	1346	Artifacts and Non-Virus-Induced Changes	1389
Filoviruses	1346	Definitive Identification of Isolates	1390
Togaviruses	1347	Storage of Viral Isolates	1391
Bunyaviruses	1348	Summary of Detection and Identification of Viruses in Culture	1391
California Encephalitis Viruses	1348	DIRECT DETECTION OF VIRUSES IN CLINICAL SPECIMENS	1392
Hantaviruses	1348	Light Microscopic Detection of Inclusions	1392
Human Gastroenteritis Viruses	1349	Electron Microscopic Detection of Viral Particles	1393
Rotaviruses	1350	Immunologic Detection of Viral Antigen	1393
Caliciviruses	1350	Respiratory Viruses	1393
Astroviruses	1350	Herpes Group Viruses	1393
Enteric Adenoviruses	1350	Other Viruses	1394
Coronaviruses	1350	Molecular Techniques	1394
Coltivirus	1351	Human Immunodeficiency Virus	1394
Retroviruses	1351	Hepatitis C Virus	1395
Herpesviruses	1356	Hepatitis B Virus	1396
Herpes Simplex Virus	1356	Human Papillomaviruses	1396
		Parvovirus B19	1396
		West Nile Virus	1396
		Herpes Simplex Virus	1396
		Cytomegalovirus	1397
		Enteroviruses	1397

SARS Coronavirus	1397
Other Viral Infections	1397
Selection of Tests for Rapid Diagnosis	1397

SEROLOGIC DIAGNOSIS OF VIRAL INFECTIONS

Human Immunodeficiency Virus	1397
Hepatitis B Virus and Epstein-Barr Virus	1398
Hepatitis A Virus	1399
Hepatitis C Virus	1401
Parvovirus	1401
Herpes Simplex Virus	1402
Varicella-Zoster Virus	1402
Cytomegalovirus	1402
West Nile Virus	1402
Rubella	1402
SARS Coronavirus	1402
Anti-IgM Antibodies	1402
Miscellaneous Serologic Procedures	1403
Diagnosis of Other Viral Infections	1403
Antiviral Susceptibility Testing	1403

INFECTIONS WITH CHLAMYDIA SPECIES

<i>Chlamydia trachomatis</i>	1403
Clinical Features and Epidemiology	1403
Collection of Specimens	1403
Isolation of <i>Chlamydia trachomatis</i> in Cell Culture	1405
Direct Detection of <i>Chlamydia trachomatis</i> in Clinical Specimens	1405
Serologic Diagnosis	1406
Other Methods for Diagnosis	1406
Diagnosis of Sexual Abuse	1406
<i>Chlamydia psittaci</i>	1406
<i>Chlamydia pneumoniae</i>	1406

INFECTIONS WITH RICKETTSIA, COXIELLA, EHRLICHIA, AND ANAPLASMA

<i>Rickettsia</i> and <i>Coxiella</i>	1407
Clinical Features and Epidemiology	1407
Collection of Specimens	1408
Isolation of <i>Rickettsia</i> and <i>Coxiella</i> in Culture	1408
Direct Detection of Antigen and Nucleic Acid in Clinical Specimens	1409
Serologic Diagnosis	1409
<i>Ehrlichia</i> and <i>Anaplasma</i> Species	1409
