

Breeding, production recording, health and the evaluation of farm animals

PRO
Agria

EAAP publication No. 121, 2007
Kuopio, Finland
6-10 June, 2006

**Proceedings of the 35th
Biennial Session of ICAR**

Table of content

Preface	a
---------------	---

Session 1: Opening

Innovative uses of milk in human nutrition and health	3
<i>P. Jelen</i>	
Milk production, animal recording, dairy advisory services and cattle breeding in Finland	13
<i>J. Kyntäjä & S. Niskanen</i>	

Session 2.1. New strategies for milk recording and testing

Challenges in milk recording 2006	19
<i>N. Henning Nielsen</i>	
Milk recording as a decision support system for the commercial farmer – Ireland developments	23
<i>M. Burke</i>	
The use of monthly herd-test-day solutions of test-day model in dairy herd management web-tool, “Maitoisa”	29
<i>J. I. Nousiainen, M. Koivula & E.A. Mäntysaari</i>	
Renewed estimation method for 24-hour fat percentage in AM/PM milk recording scheme	31
<i>R.M.G. Roelofs, G. de Jong & A.P.W. de Roos</i>	
Use of daily milk weight to predict lactation and 24-hour yields	37
<i>K.J. Hand, D. Lazenby, F. Miglior, D.F. Kelton & M.A. Quist-Moyer</i>	
Screening for subclinical ketosis in dairy cattle by Fourier transform infrared spectrometry	41
<i>A.P.W. de Roos, H.J.C.M. van den Bijgaart, J. Hørlyk & G. de Jong</i>	
Calculation of the lactation performance from daily milk recording data	49
<i>N. Wirtz, A. Bünger, K. Kuwan, F. Reinhardt & R. Reents</i>	

Session 2.2.1: Performance recording for small ruminants

Taking into account functional traits in dairy sheep breeding programs through the French example	57
<i>F. Barillet, J.M. Astruc & G. Lagriffoul</i>	

AMNOS-mobile®: Exploiting handheld computers in efficient sheep recording	65
<i>Z. Abas, A.L. Symeonidis, A. Batzios, Z. Basdagianni, G. Banos, P.A. Mitkas, E. Sinapis & A. Pampoukidou</i>	
Effect of diet supplemented omega-3 fatty acid on goat milk composition and somatic cell count	71
<i>D. Kompan, J. Salobir & A. Orešnik</i>	

Session 2.2.2: Performance recording of buffaloes

Genetic gain of milk production in Egyptian buffalo as affected by population size, nucleus size and selection intensity in open nucleus breeding scheme	79
<i>S.A. Abdel-Salam, A.A. Nigm, Manal Elsayed, R.R. Sadek & A.S. Abdel-Aziz</i>	

Session 3.1: ID techniques

Rules and methodology used to certify cattle parentage in France	89
<i>J. Guerrier, L. Journaux, Y.M. Chatelin & H. Ledos</i>	
KvikKoen - From the barn to the cattle database	99
<i>J. Frandsen</i>	
Farmers can maintain their Cattle Identification Register data using WebElmer	105
<i>G. Karell & M. Ratola</i>	
The ear tag retention in bovine cattle	111
<i>R. Palva & M. Puonti</i>	
The use of electronic ear tags for sheep in France	115
<i>L. Marguin</i>	

Session 3.2: Management of recording and evaluation organisations

Report of the introduction of the ICAR Benchmarking Service: a service available to all international dairy herd recording agencies	123
<i>N. Petreny & K. Hand</i>	
Affordable way of calibrating milkmeters	127
<i>M. Capasso, M. Fioretti, L. Ranghino & A. Tondo</i>	
Milking machines control: the calibration of flussometer, pulsation curves recorder, and vacuumeter instruments with traceability of measurement	131
<i>S. Orlandini, M. Capasso, A. Fontana & A. Carducci</i>	
Composite traits and International genetic evaluation	137
<i>F. Canavesi, J. Pena, G. de Jong, S. Rensing, G. Pedersen Aamand & S. Mattalia</i>	

Innovation In New Zealand herd improvement practices: how Livestock Improvement is responding to a changing world	147
<i>S. Howse & B. Montgomerie</i>	

Session 3.3: Feeding strategies

NorFor™ - the new Nordic feed evaluation system for cattle	153
<i>A.H. Gustafsson, H. Volden, M. Mehlqvist, M. Larsen, G. Gudmundsson, J. Frandsen & O. Aaes</i>	
Artturi® - A portal for farmers and experts to improve silage production and utilization	159
<i>M. Rinne, J. Nousiainen, M. Hellämäki & J. Helminen</i>	
The effect of different levels of concentrates in dairy cattle rations in different stages of lactation on milk yield and physiological state of animals	163
<i>N.A. Solomakha & I.A. Porfiriev</i>	

Session 4: Presentations of the Reports of the ICAR Sub-Committees, Working Groups and Task Forces

Report of the ICAR Sub-Committee on Animal Identification	167
<i>R. Pauw</i>	
Report of ICAR Sub-Committee Interbull	173
<i>J.C. Mocquot, W.F. Fikse & J. Philipsson</i>	
Report of the ICAR Sub-Committee on Recording Devices	183
<i>U. Lauritsen</i>	
Report of the ICAR Working Group on Animal Data Recording	185
<i>F. Armitage</i>	
Report of the ICAR Working Group on Lactation Calculation Methods. A survey on milk recording strategies in dairy cattle	187
<i>F. Miglior, S. de Roos, Z. Liu, S. Mattalia, L.R. Schaeffer, A. Tondo & P. van Raden</i>	
Report of the ICAR Working Group on Milk Testing Laboratories	193
<i>O. Leray</i>	
Report of the ICAR Working Group on Type Conformation	197
<i>D. Hewitt</i>	
Report of the ICAR Working Group on Recording, Evaluation and Genetic Improvement of Functional Traits	199
<i>E. Strandberg</i>	
Report of the ICAR Working Group on Beef	201
<i>L. Journaux</i>	

Report of the ICAR Working Group on Artificial Insemination and Other Relevant Technologies	205
<i>A. Malafosse</i>	
Report of the ICAR Working Group on Milk Recording of Sheep	211
<i>J.M. Astruc, F. Barillet, M. Fioretti, D. Gabina, E. Gootwine, F.J. Romberg & S.R. Sanna</i>	
Report of the ICAR Working Group on Milk Recording of Goats	217
<i>D. Kompan & M. Klopčič</i>	
Report of the ICAR Task Force on DNA Analysis	229
<i>P. Ajmone Marsan</i>	

Session 5: New technologies

Perspectives for proactive Dairy Herd Management based on on-farm milk analysis and potential implications for future milk recording	237
<i>T. Asmussen & J.Y. Blom</i>	
DHI delivers leading edge technology	241
<i>J.S. Clay & P.A. Dukas</i>	
InCalf Fertility Focus Report – the new herd management tool for Australian dairy farmers and their advisers	247
<i>S. Little & D. Abernethy</i>	
Potential estimation of fatty acid content in cow milk by Mid-Infrared Spectrometry (MIR)	255
<i>H. Soyeurt, P. Dardenne, G. Lognay, C. Bertozzi, P. Mayeres & N. Gengler</i>	
Internet application “VeeManager”: Spider in the web of milk recording and herdbook registration	261
<i>E.J. van ‘t Land</i>	
Next-day results in bovine mastitis diagnostics using DNA technology and electronic reporting	265
<i>P. Bredbacka, L. Salmikivi & M.T. Koskinen</i>	

Workshop 1: Improving the health traits by recording and evaluation

Health recording, past and the future	271
<i>V. Rainio</i>	
Use of health data in genetic evaluation and breeding	275
<i>G.P. Aamand</i>	

Establishing a health monitoring system for cattle in Austria	283
<i>C. Egger-Danner, B. Fuerst-Waltl, W. Holzhaecker, R. Janacek, J. Lederer, M. Miesenberger, W. Obritzhauser & M. Winkler</i>	
Use of the Transition Cow Index™ as a Monitor of Herd Health1	289
<i>P. Giacomini & K. Nordlund</i>	

Workshop 2: Meeting of the ICAR Reference Laboratory Network

ICAR Analytical Quality Assurance strategy and prospectives for the network	297
<i>O. Leray</i>	
Policies of ICAR on milk analysis	303
<i>A. Rosati</i>	
Reference system – Principle and practise	309
<i>C. Raumgartner</i>	
Reference and calibration system for routine milk testing. Advantage, disadvantage and choice criteria	311
<i>O. Leray</i>	
Example of national reference system and centralized calibration. Unknown sample program in USA	319
<i>J. High</i>	
What is the required accuracy of a test related to genetic improvement	323
<i>J.B.M. Wilmink</i>	

Appendix 1: Yearly enquiry on the situation of milk recording in member countries. Results for the years 2003 and 2004

<i>Table 1. National milk production</i>	327
<i>Table 2. Position of milk recording</i>	331
<i>Table 3. Costs and financing</i>	336
<i>Table 4.1. All breeds together - All recorded cows</i>	340
<i>Table 4.2. All breeds together - Cows in herdbook</i>	344
<i>Table 4.3. Main breeds - All recorded cows</i>	347
<i>Table 4.4. Main breeds - Cows in herdbook</i>	360
