

# SHALLOW FLOWS

G.H. JIRKA

W.S.J. UIJTTEWAAL

## Table of contents

<i>Foreword</i>	XI
<i>Introduction</i>	
Shallow flows: a definition <i>G.H. Jirka &amp; W.S.J. Uijttewaal</i>	3
<i>Shallow jets, wakes and mixing layers</i>	
Hydrodynamic instability and transition to turbulence for quasi two-dimensional flows, 2D or not 2D? <i>J.-M. Chomaz, P. Billant &amp; F. Gallaire</i>	15
An experimental investigation of a boundary current instability <i>E. Thivolle-Cazat &amp; J. Sommeria</i>	23
Shallow turbulent wakes: linear stability analysis compared to experimental data <i>S.A. Socolofsky, C. von Carmer &amp; G.H. Jirka</i>	31
On coherent structures in shallow flows <i>M.S. Ghidaoui &amp; A.A. Kolyshkin</i>	39
Vortex formation in shallow flows <i>D. Rockwell, H. Fu, J.-C. Lin &amp; M. Ozgoren</i>	47
Vortex dipoles in a shallow water layer <i>D. Sous, N. Bonneton &amp; J. Sommeria</i>	57
Dipole formation by tidal flow in a channel <i>M.G. Wells &amp; G.J.F. van Heijst</i>	63
Starting jets in a double tank apparatus <i>V.H. Chu &amp; J.-B. Zhang</i>	71
Interaction of quasi-horizontal jets in bounded domains <i>I. Kanda &amp; P.F. Linden</i>	79
Quasi-two-dimensional turbulence in shallow fluid layers: the role of bottom friction and fluid layer depth <i>H.J.H. Clercx, M.L. Zoetewij &amp; G.J.F. van Heijst</i>	87
Perturbing the inflow condition in shallow mixing layer experiments <i>B.C. van Prooijen, M. de Nijs &amp; W.S.J. Uijttewaal</i>	95
Influence of secondary motion in large-scale coherent vortical structures on the mass transport in a shallow turbulent wake flow <i>C.F. von Carmer, A.C. Rummel &amp; G.H. Jirka</i>	103
Transverse vibrations of a sphere at high combined mass-damping parameter <i>D. Mirauda &amp; M. Greco</i>	111
The junction vortex system: time-mean and instantaneous flow fields <i>M.R. Lawless, S.N. Lane &amp; J.L. Best</i>	117

## *Shallow stratified and rotating flows in ocean and atmosphere*

Quasi-two-dimensional flow structures in stratified and rotating turbulent flows <i>H.J.S. Fernando</i>	127
Rotating shallow water flow past an obstacle: numerical and laboratory experiments <i>G. Perret, M. Farge, A. Stegner, A. Azzalini &amp; K. Schneider</i>	137
Fine structure of stratified flow around uniformly moving 2D obstacles in a continuously stratified fluid <i>Y.D. Chashechkin, V.V. Mitkin &amp; R.N. Bardakov</i>	143
Coriolis effects in mesoscale shallow layer flows <i>J.C.R. Hunt, A. Orr, D. Cresswell &amp; A. Owinoh</i>	149
Organized structures in the atmospheric boundary layer <i>D. Etling &amp; S. Weinbrecht</i>	157
Formation of large-scale coherent structures in turbulent convection <i>T. Elperin, N. Kleeorin, I. Rogachevskii &amp; S. Zilitinkevich</i>	163
Transient adjustment of buoyancy-driven exchange flows over a descending barrier <i>A.J.S. Cuthbertson, P.A. Davies &amp; M.J. Coates</i>	171
Exchange flows through a long shallow channel <i>E.A. Cowen &amp; F.J. Rueda Valdivia</i>	179
Computation of non-hydrostatic internal waves over undular topography <i>R.J. Labeur &amp; J.D. Pietrzak</i>	187
Decomposition of current profiles into modes of the internal wave equation <i>B. Boehrer</i>	195
Aspects of oscillatory along-shelf flow in the vicinity of an isolated submarine canyon <i>D.L. Boyer, A.N. Srdic, S.A. Smirnov, D.B. Haidvogel &amp; J. Sommeria</i>	201
Long term morphodynamic equilibrium of tidal channels: theory and experiments <i>N. Tambroni, M. Bolla Pittaluga &amp; G. Seminara</i>	207
Tidal current computation in the <i>Mar Piccolo</i> (Taranto) <i>D. Malcangio &amp; M. Mossa</i>	217
Field and model studies of the nepheloid layer in coastal waters of the Great Barrier Reef, Australia <i>R. Brinkman, E. Wolanski &amp; S. Spagnol</i>	225

## *River and channel flows*

Complex shallow flows in civil and environmental engineering <i>H.J. de Vriend</i>	233
2D numerical model of unsteady river flow <i>J. Murillo, P. García-Navarro &amp; P. Brufau</i>	245
Transition process of coherent vortices in depth-varying unsteady compound open-channel flows <i>I. Nezu, M. Sanjou &amp; K. Goto</i>	251
Coherent flow structures in shallow gravel-bed rivers: an experimental and numerical study <i>S.N. Lane, R.J. Hardy &amp; C.J. Keylock</i>	259
Shear layers in partially vegetated channels: analogy to shallow water shear layers <i>B.L. White, M. Ghisalberti &amp; H.M. Nepf</i>	267
Characterisation of stem wake effects using PIV imagery <i>R.J. Schindler, S.N. Lane, C.J. Keylock &amp; P.S. Naden</i>	275

Coherent vortex structures in an open channel flow with sand ridges by DNS <i>S. Hayashi &amp; T. Ohmoto</i>	285
Direct numerical simulation of turbulent flow over a rough bed <i>K.M. Singh &amp; J.J.R. Williams</i>	293
Uniform flow computations in natural open channels <i>I. Aydin</i>	299
A multiple scales analysis of undular hydraulic jump in turbulent open channel flow <i>H. Steinrück &amp; W. Schneider</i>	305
Quasi-3D simulation of flow in sharp open-channel bends with horizontal and developed bed topography <i>K. Blanckaert, L. Glasson, H.R.A. Jagers &amp; C.J. Sloff</i>	307
Laboratory experiments of shallow free surface flows <i>R. Booij</i>	317
Flow structures in meander bends with recirculation <i>R.I. Ferguson &amp; D.R. Parsons</i>	325
Characteristics of flow and bed form in skewed open channel <i>T. Ishigaki &amp; A. Endo</i>	333
3-D numerical calculation of shallow free-surface flow in time-dependent stages from rectangular to compound channels <i>I. Nezu &amp; M. Sanjou</i>	339
Large-scale coherent structures in compound channels <i>D. Bousmar &amp; Y. Zech</i>	347
Free-surface oscillation in an open channel with spur dikes <i>T. Ohmoto &amp; R. Hirakawa</i>	355
Numerical simulation with a subgrid model: a case of a meandering channel with river training structures <i>S. Boonya-aroonnet &amp; Y. Shimizu</i>	361
Interaction between river mouth flow and marine structures: numerical and experimental investigation <i>F. Lalli, B. Gallina, M. Miozzi &amp; G.P. Romano</i>	369
Alternate bars of finite amplitude: spatial analysis <i>B. Federici &amp; M. Colombini</i>	379
Numerical experiments on the alternate bars considering the bank strength <i>C.-L. Jang &amp; Y. Shimizu</i>	387
 <i>Transport processes in shallow flows</i>	
Coherent vortices, Lagrangian particles and the marine ecosystem <i>C. Pasquero, A. Bracco &amp; A. Provenzale</i>	399
An experimental investigation of pollutant mixing and trapping in shallow coastal re-circulating flows <i>M.I. Yuce &amp; D. Chen</i>	413
PLIF visualisation of mass release in open channel flows with water depths from shallow to supershallow <i>F.E. Tang &amp; D. Chen</i>	421
3D transport of a passive pollutant for wind-driven flows in enclosed basins <i>M. Colombini &amp; A. Stocchino</i>	429

Godunov-type quadtree model of species dispersion in shallow flows <i>Q. Liang, A.G.L. Borthwick, P.H. Taylor &amp; J. Huang</i>	439
Dynamics of shear layers induced by hairpin packets in shallow free surface flows: implication for gas transfer <i>D. Hurther, E. Terray &amp; U. Lemmin</i>	449
The effect of heat release from a gas–liquid interface on turbulence structure in fully developed shallow water flows <i>L.I. Enstad, R. Nagaosa &amp; G. Alendal</i>	457
Hydro- and morphodynamic computations of laboratory experiments with periodic flow conditions in groin fields <i>M. Krebs &amp; U. Zanke</i>	463
Tracer experiments in the River Rhine: evaluation of the skewness of observed concentration distributions <i>A. van Mazijk &amp; E.J.M. Veling</i>	469
2-D particle tracking to determine transport characteristics in rivers with dead zones <i>V. Weitbrecht, W. Uijtewaal &amp; G.H. Jirka</i>	477
Tracer experiments in the Groyne fields of the River Elbe (Germany) <i>H.P. Kozerski, R. Schwartz &amp; T. Hintze</i>	485
Sediment-laden flows over fully-developed bedforms: first and second harmonics in a shallow, pseudo-2D turbulence environment <i>M.A. Verbanck</i>	491
Hydrodynamic control of sediment-water fluxes <i>A. Lorke, M. Schmid, B. Müller, M. Maerki &amp; A. Wüest</i>	497
Effect of bed roughness on suspended sediment: experimental and theoretical studies <i>B.S. Mazumder, K. Ghoshal &amp; D.C. Dalal</i>	503
Effects of secondary currents on suspended sediment transport in an open channel flow <i>T. Ohmoto, Z. Cui &amp; R. Hirakawa</i>	511
 <i>Numerical modeling and turbulence closure techniques for shallow flows</i>	
CFD simulation of two- and three-dimensional free-surface flows using a RANS solver <i>D.D. Apsley &amp; W. Hu</i>	519
Numerical accuracy in the solution of the shallow-water equations <i>P. Broomans, C. Vuik, A.E. Mynett &amp; J. Mooiman</i>	527
Numerical simulation of river flows in a Lagrangian reference frame <i>B.H. Devkota &amp; J. Imberger</i>	535
A mixing-length model for shallow turbulent wakes <i>P.K. Stansby</i>	541
A set of efficient numerical tools for floodplain modeling <i>P. Archambeau, B. Dewals, S. Erpicum, S. Detrembleur &amp; M. Pirotton</i>	549
Horizontal large eddy simulation applied to stratified tidal flows <i>A.C. Bijlsma, R.E. Uittenbogaard &amp; T. Blokland</i>	559
Three-dimensional and depth-averaged large eddy simulation of shallow water flows <i>C. Hinterberger, J. Fröhlich &amp; W. Rodi</i>	567
Subgrid-scale model for quasi-2D turbulence in shallow water <i>R.E. Uittenbogaard &amp; B. van Vossen</i>	575

Using 2D unstructured mesh for numerical simulation of free surface flow in meandering canal <i>S.R.S. Yazdi &amp; M.M.Z. Qomi</i>	583
Unstructured spectral/hp element methods for shallow water flows <i>C. Eskilsson, L. Bergdahl &amp; S.J. Sherwin</i>	593
Drying and wetting in finite element shallow-water flows <i>O. Bokhove &amp; D. Wirosoetisno</i>	601
Application of Kalman filter to finite element model of shallow flow analysis <i>H. Kiri, K. Takaki, H. Tanji &amp; T. Nakaya</i>	609
Godunov-type Boussinesq modeling of extreme wave run-up <i>B. Weston, P.H. Taylor, A.G.L. Borthwick &amp; A.C. Hunt</i>	615
Depth averaged model of open channel flows over an arbitrary surface <i>T. Hosoda</i>	623
Estimating traveling time of flat terrain by 2-dimensional overland flow model <i>D. Su &amp; X. Fang</i>	629
A simple model of a velocity distribution in accelerating/decelerating flows and its application to depth averaged flow model <i>S. Onda, T. Hosoda &amp; I. Kimura</i>	637
Complex flow around groynes, computations with Delft3D in combination with HLES <i>S.A.H. van Schijndel &amp; H.R.A. Jagers</i>	645
3D numerical analysis of unsteady flow structures around inclined spur dikes by means of a non-linear k- $\epsilon$ model <i>I. Kimura, T. Hosoda, S. Onda &amp; A. Tominaga</i>	651
Three-dimensional numerical analysis of turbulent wind-induced flows in the Lake Balaton (Hungary) <i>G. Ciruolo, G. Lipari, E. Napoli, J. Józsa &amp; T. Krámer</i>	661
<i>Author index</i>	671
