AND
Communication
Technologies

TIMOTHY K. SHIH & JASON C. HUNG

Future Directions in Distance Learning and Communication Technologies

Table of Contents

Prefacevii

Section I: Introduction

Chapter I

A Survey of Distance Education Challenges and Technologies 1

Timothy K. Shih, Tamkang University, Taiwan

*Jason C. Hung, Northern Taiwan Institute of Science and
Technology, Taiwan*

Jianhua Ma, Hosei University, Japan

Qun Jin, University of Aizu, Japan

Section II: Communication Technologies

Chapter II

**An E-Learning System Based on the Top-Down Method and the
Cellular Models27**

Norihiro Fujii, Hosei University, Japan

Shuichi Yukita, Hosei University, Japan

Nobuhiko Koike, Hosei University, Japan

*Tosiyasu L. Kumii, IT Institute of Kanazawa Institute of
Technology, Japan*

Chapter III

Privacy and Security in E-Learning52

George Yee, Institute for Information Technology, Canada

Yuefei Xu, Institute for Information Technology, Canada

Larry Korba, Institute for Information Technology, Canada

Khalil El-Khatib, Institute for Information Technology, Canada

Chapter IV

Bluetooth Scatternet Using an Ad Hoc Bridge Node Routing

Protocol for Outdoor Distance Education 76

Yao-Chung Chang, National Taitung University, Taiwan

M. T. Lin, National Dong Hwa University, Taiwan

Han-Chieh Chao, National Dong Hwa University, Taiwan

Jiann-Liang Chen, National Dong Hwa University, Taiwan

Chapter V

Ubiquitous Agent-Based Campus Information Providing System

for Cellular Phones94

Akio Koyama, Yamagata University, Japan

Leonard Barolli, Fukuoka Institute of Technology, Japan

Section III: Intelligent Technologies

Chapter VI

An XML-Based Approach to Multimedia Engineering for Distance

Learning 108

T. Arndt, Cleveland State University, USA

S. K. Chang, University of Pittsburgh, USA

A. Guercio, Kent State University, USA

P. Maresca, University of Naples Federico II, Italy

Chapter VII

Open Multi-Agent Systems for Collaborative Web-Based

Learning 138

Hongen Lu, La Trobe University, Australia

Chapter VIII

Concept Effect Model: An Effective Approach to Developing

Adaptive Hypermedia Systems 151

Gwo-Jen Hwang, National University of Tainan, Taiwan

Chapter IX

A Virtual Laboratory for Digital Signal Processing 171

Chyi-Ren Dow, Feng Chia University, Taiwan

Yi-Hsung Li, Feng Chia University, Taiwan

Jin-Yu Bai, Feng Chia University, Taiwan

Section IV: Educational Technologies

Chapter X

Interactive E-Learning 189

Claude Ghaoui, Liverpool John Moores University, UK

W. A. Janvier, Liverpool John Moores University, UK

Chapter XI

Using Ontology as Scaffolding for Authoring Teaching Materials 203

Jin-Tan Yang, National Kaohsiung Normal University, Taiwan

Pao Ta Yu, National Chung-Cheng University, Taiwan

Nian Shing Chen, National Sun-Yat-Sen University, Taiwan

Chun Yen Tsai, National Kaohsiung Normal University, Taiwan

Chi-Chin Lee, National Kaohsiung Normal University, Taiwan

Timothy K. Shih, Tamkang University, Taiwan

Chapter XII

The Next Generation of E-Learning: Strategies for Media Rich

Online Teaching and Engaged Learning 222

*Daniel Tiong Hok Tan, Nanyang Technological University,
Singapore*

Chye Seng Lee, Nanyang Technological University, Singapore

Wee Sen Goh, Nanyang Technological University, Singapore

Chapter XIII

A SCORM-Compliant U-Learning Grid by Employing CC/PP 243

Ching-Jung Liao, Chung Yuan Christian University, Taiwan

Jin-Tan Yang, National Kaohsiung Normal University, Taiwan

Chapter XIV

A Distance Learning System for Teaching the Writing of Chinese

Characters Over the Internet 254

K. T. Sun, National University of Tainan, Taiwan

D. S. Feng, National University of Tainan, Taiwan

Section V: Future Directions

Chapter XV

Future Directions of Multimedia Technologies in E-Learning 273

Timothy K. Shih, Tamkang University, Taiwan

Qing Li, University of Hong Kong, Hong Kong

*Jason C. Hung, Northern Taiwan Institute of Science and
Technology, Taiwan*
