Contents

Preface XIII

List of Contributors XVII

1	The Physics and Modeling of Biofunctionalized Nanoelectromechanical Systems	1
	<i>Mark R. Paul and Jerry E. Solomon</i>	
1.1	Introduction	1
1.2	The Stochastic Dynamics of Micro- and Nanoscale Oscillators in Fluid	4
1.2.1	Fluid Dynamics at Small Scales	4
1.2.2	An Exact Approach to Determine the Stochastic Dynamics of Arrays of Cantilevers of Arbitrary Geometry in Fluid	8
1.2.3	An Approximate Model for Long and Slender Cantilevers in Fluid	11
1.2.4	The Stochastic Dynamics of a Fluid-coupled Array of (BIO)NEMS Cantilevers	16
1.3	The Physics Describing the Kinetics of Target Analyte Capture on the Oscillator	19
1.4	Detecting Noise in Noise: Signal-processing Challenges	24
1.5	Concluding Remarks	25
	Acknowledgments	26
	References	26
2	Mathematical and Computational Modeling: Towards the Development and Application of Nanodevices for Drug Delivery	29
	<i>John P. Sinek, Hermann B. Frieboes, Balakrishnan Sivaraman, Sandeep Sanga, and Vittorio Cristini</i>	
2.1	Introduction	29
2.2	RES Avoidance	30
2.2.1	A Statistical Model of Nanovector Surface Coverage	31
2.2.2	Modeling the Forces Mediating Protein Approach and Binding	35
2.3	Tumoral Vasculature and Hemodynamics	35

2.3.1	An Invasion Percolation Model of Vasculogenesis and Hemodynamics	37
2.3.2	Flow Simulations Using Anderson and Chaplain's Model	40
2.3.3	Particle Dynamics within the Tumoral Vasculature	45
2.4	Receptor–Ligand-mediated Binding	47
2.4.1	Bell's Deterministic Model	49
2.4.2	A Stochastic Model	52
2.5	Intratumoral and Cellular Drug Kinetics and Pharmacodynamics	54
2.5.1	A Two-Dimensional Model of Chemotherapy	55
2.5.2	Refinements of the Model	57
2.6	Conclusion	61
	References	62

3 Nanolithography: Towards Fabrication of Nanodevices for Life Sciences 67

Johnpeter Ndiangui Ngunjiri, Jie-Ren Li, and Jayne Carol Garno

3.1	Introduction: Engineering Surfaces at the Nanoscale	67
3.2	Immobilization of Biomolecules for Surface Assays	69
3.2.1	Strategies for Linking Proteins to Surfaces	69
3.2.1.1	Electrostatic Immobilization	70
3.2.1.2	Covalent Immobilization	70
3.2.1.3	Molecular Recognition and Specific Interactions	71
3.2.1.4	Nonspecific Physical Adsorption to Surfaces	71
3.2.2	SAM Chemistry	74
3.3	Methods for Nanolithography with Proteins	76
3.3.1	Bias-induced Nanolithography of SAMs	78
3.3.2	Force-induced Nanolithography of SAMs	82
3.3.3	DPN of SAMs and Proteins	87
3.3.4	Latex Particle Lithography with Proteins	91
3.4	Detection of Protein Binding at the Nanoscale	94
3.5	Future Directions	96
3.5.1	Advantages of Nanoscale Detection	96
3.5.2	Development of Cantilever Arrays	97
3.5.3	Concluding Remarks	101
	References	101

4 Microcantilever-based Nanodevices in the Life Sciences 109

Horacio D. Espinosa, Keun-Ho Kim, and Nicolaie Moldovan

4.1	Introduction	109
4.2	Microcantilevers	111
4.2.1	Microfabrication of Miniaturized Probes	112
4.2.2	Cantilever Probes for Nanopatterning	116
4.2.3	Elastomeric AFM Probes	121
4.2.4	Monolithically Fabricated Conductive Diamond Probes	122
4.3	Cantilevers with Integrated Micro- and Nanofluidics	126

4.3.1	Apertured Pyramidal Tips	126
4.3.2	Open-channel Cantilevered Microspotters	128
4.3.3	Closed-channel Cantilevered Nanopipettes	133
4.3.4	Micromachined Hypodermic Needle Arrays	136
4.3.5	NFPs	137
4.4	Applications	141
4.4.1	Patterning of DNA	141
4.4.2	Patterning of Proteins	142
4.4.3	Patterning of Viruses	143
4.5	Conclusions and Outlook	143
	References	144
5	Nanobioelectronics	150
	<i>Ross Rinaldi and Giuseppe Maruccio</i>	
5.1	Introduction	150
5.2	Bio-self-assembly and Motivation	150
5.3	Fundamentals of the Bio-building Blocks	153
5.3.1	DNA	153
5.3.2	Proteins	154
5.4	Interconnection, Self-assembly and Device Implementation	155
5.4.1	Interconnecting Molecules	157
5.4.2	Delivering Molecules	158
5.5	Devices Based on DNA and DNA Bases	160
5.5.1	Charge Transfer in DNA	161
5.5.2	DNA Conductivity	164
5.5.2.1	Near-ohmic Behavior (Activated Hopping Conductor)	164
5.5.2.2	Semiconducting (Bandgap) Behavior	168
5.5.2.3	Insulating Behavior	169
5.5.2.4	Discussion of DNA Conductivity	170
5.5.2.5	Other Applications of DNA in Molecular Electronics	173
5.6	Devices Based on Proteins	177
5.7	Conclusions	183
	Acknowledgments	183
	References	184
6	DNA Nanodevices: Prototypes and Applications	189
	<i>Friedrich C. Simmel</i>	
6.1	Introduction	189
6.2	DNA as a Material for Nanotechnology	189
6.2.1	Nanoscale Science	189
6.2.2	Biophysical and Biochemical Properties of Nucleic Acids	190
6.2.3	DNA Nanoconstruction	193
6.3	Simple DNA Devices	193
6.3.1	Conformational Changes Induced by Small Molecules and Ions	193
6.3.2	Hybridization-driven Devices	196

6.4	Towards Functional Devices	198
6.4.1	Walk and Roll	199
6.4.2	Interaction with Proteins	202
6.4.3	Information Processing	206
6.4.4	Switchable Networks and Hybrid Materials	207
6.5	Autonomous Behavior	209
6.5.1	Driving Devices with Chemical Reactions	209
6.5.2	Genetic Control	210
6.6	Conclusion	212
	Acknowledgments	213
	References	213
7	Towards the Realization of Nanobiosensors Based on G-protein-coupled Receptors	217
	<i>Cecilia Pennetta, Vladimir Akimov, Eleonora Alfinito, Lino Reggiani, Tatiana Gorojankina, Jasmina Minic, Edith Pajot-Augy, Marie-Annick Persuy, Roland Salesse, Ignacio Casuso, Abdelhamid Errachid, Gabriel Gomila, Oscar Ruiz, Josep Samitier, Yanxia Hou, Nicole Jaffrezic, Giorgio Ferrari, Laura Furnagalli, and Marco Sampietro</i>	
7.1	Introduction	217
7.2	Preparation and Immobilization of GPCRs on Functionalized Surfaces	220
7.3	Signal Techniques	221
7.4	Theoretical Approach	222
7.5	The Impedance Network Model	224
7.6	Equilibrium Fluctuations	231
7.7	Conclusions	235
	Acknowledgments	236
	References	236
8	Protein-based Nanotechnology: Kinesin–Microtubule-driven Systems for Bioanalytical Applications	241
	<i>William O. Hancock</i>	
8.1	Introduction	241
8.2	Kinesin and Microtubule Cell Biology and Biophysics	242
8.2.1	Kinesin Motility Assays	244
8.3	Theoretical Transport Issues for Device Integration	245
8.3.1	Diffusion versus Transport Times	247
8.4	Interaction of Motor Proteins and Filaments with Synthetic Surfaces	249
8.4.1	Motor Adsorption	249
8.4.2	Microtubule Immobilization	251
8.5	Controlling the Direction and Distance of Microscale Transport	252
8.5.1	Directing Kinesin-driven Microtubules	252
8.5.2	Movement in Enclosed Microchannels	255

8.5.3	Immobilized Microtubule Arrays	257
8.6	Cargo Attachment	259
8.6.1	Maximum Cargo Size	261
8.7	System Design Consideration	262
8.7.1	Protein Stability and Lifetime	262
8.7.2	Sample Introduction and Detection	264
8.7.3	Analyte Detection and Collection	265
8.8	Conclusion	265
	Acknowledgments	266
	References	266
9	Self-assembly and Bio-directed Approaches for Carbon Nanotubes: Towards Device Fabrication	272
	<i>Arianna Filoramo</i>	
9.1	Introduction	272
9.2	CNTs: Basic Features, Synthesis and Device Applications	274
9.2.1	Basic Features	274
9.2.2	Synthesis of Nanotubes	276
9.2.3	Device Applications	277
9.3	Fabrication of CNT Transistors and Self-assembly Approaches	278
9.4	<i>In situ</i> CVD Growth	280
9.5	Selective Deposition of CNTs by SAM-assisted Techniques	281
9.5.1	Methodology and Key Parameters	282
9.5.2	Performance of CNTFETs Fabricated by the SAM Method	288
9.6	DNA-directed Self-assembly	291
9.6.1	The Assembly of the Scaffold	292
9.6.2	Selective Attachment of the DNA Scaffold on the Surface Microscale Electrodes	294
9.6.3	Positioning of Nano-objects or Nanodevices on the Scaffold	295
9.6.4	Realization of Electrical Connections and Circuitry	298
9.6.5	Fabrication of DNA-directed CNT Devices	303
9.7	Conclusion	304
	References	305
10	Nanodevices for Biosensing: Design, Fabrication and Applications	317
	<i>Laura M. Lechuga, Kirill Zinoviev, Laura G. Carrascosa, and Miguel Moreno</i>	
10.1	Introduction	317
10.2	From Biosensor to Nanobiosensor Devices	318
10.2.1	Overview	318
10.2.2	Biological Functionalization of Nanobiosensors	320
10.3	Nanophotonic Biosensors	321
10.3.1	Overview	321
10.3.2	Integrated Mach–Zehnder Interferometer (MZI) Nanodevice	322
10.3.2.1	Design and Fabrication	323
10.3.2.2	Characterization and Applications	325

10.3.3	Integration in Microsystems	329
10.4	Nanomechanical Biosensors	330
10.4.1	Overview	330
10.4.2	Working Principle	330
10.4.3	Detection Systems	332
10.4.4	Design of a Standard Microcantilever Sensor	333
10.4.4.1	Fabrication of a Standard Microcantilever Sensor	334
10.4.4.2	Optical Waveguide Microcantilever: Design and Fabrication	337
10.4.4.2.1	Principle of Operation and Theoretical Analysis	338
10.4.4.2.2	Fabrication and Characterization	339
10.4.5	Biosensing Applications of Nanomechanical Sensors	342
10.5	Conclusions and Future Goals	344
	Acknowledgments	344
	References	344
11	Fullerene-based Devices for Biological Applications	348
	<i>Ginka H. Sarova, Tatiana Da Ros, and Dirk M. Guldi</i>	
11.1	Introduction	348
11.2	Solubility	348
11.3	Toxicity	350
11.4	DNA Photocleavage	351
11.4.1	Photodynamic Therapy (PDT)	353
11.4.2	Fullerene-mediated Electron Transfer Across Membranes	358
11.4.3	Neuroprotective Activity via Radical Scavenging	362
11.4.4	Enzyme Inhibition and Antiviral Activity	367
11.4.5	Antibacterial Activity	369
11.4.6	Fullerenes as Nanodevices in Monoclonal Immunology	371
11.4.7	Fullerenes as Radiotracers	373
11.4.8	Fullerenes as Vectors	375
	Acknowledgments	376
	References	376
12	Nanotechnology for Biomedical Devices	386
	<i>Lars Montelius</i>	
12.1	Introduction	386
12.2	Nanotechnologies	388
12.2.1	Overview of Nanotechnologies and Nanotools	388
12.2.1.1	NIL	393
12.2.1.2	Other Lithography Techniques	393
12.2.1.3	Scanning Probes	395
12.3	Applications	397
12.3.1	Introduction	397
12.3.2	Biomedical Applications based on Nanostructured Passive Surfaces	397
12.3.2.1	Separation, Concentration and Enriching Structures	398

12.3.2.2	Molecular Motors Transported in Nanometer Channels	400
12.3.2.3	Topographical Structures, Cells and Guidance of Neurons	401
12.3.3	Biomedical Applications utilizing Active Nanostructured Surfaces	405
12.3.4	Protein Chips	409
12.3.5	Protein Interactions	412
12.3.6	Biomedical Applications using Nanowires	415
12.3.7	Biomedical Applications using Nanoparticles	416
12.3.8	Biomedical Applications using SPM Technology	416
12.3.8.1	Imaging of Biomolecules using SPM	418
12.3.8.2	Force Detection of Single Molecular Events	418
12.3.8.3	Cantilever-based Detection of Molecular Events	418
12.4	Discussion and Outlook	423
	Acknowledgments	424
