

Nanomaterials for Medical Diagnosis and Therapy

Contents

Foreword VII

Preface XXI

List of Contributors XXVII

1	Nanotechnologies for Diagnosis – Present and Future	1
	<i>Gareth A. Hughes</i>	
1.1	Introduction to Patient Diagnostics	1
1.2	Nanotechnology and Patient Diagnostics	2
1.3	Optical	9
1.3.1	Fluorescence	9
1.3.2	Quantum Dots	11
1.3.3	Surface Plasmon Resonance (SPR), Nanoparticles and Nanoshells	14
1.3.4	Fiber Optic Biosensors	19
1.4	Electrical	19
1.4.1	Nanomaterials for Enhanced Electron Transfer	20
1.4.2	Electrochemical Biosensors	24
1.5	Magnetic	28
1.6	Mechanical	30
1.7	Imaging Diagnostics	33
1.8	Nanotechnology-enhanced Tools	34
1.8.1	Analytical Tools	35
1.8.2	Raman Spectroscopy	35
1.8.3	Mass Spectrometry	36
1.8.4	Genetics	37
1.8.5	Immunoassays	39
1.9	Nanotechnology and the Future of Patient Diagnostics	40
1.9.1	Multifunctional Platforms	40
1.9.2	Real-time Monitoring	40
1.9.3	Multiplexed Diagnostic Assays	40
1.9.4	Point-of-care Diagnostics	41
1.9.5	Regulations, Risks and Ethics	42
	References	44

2	Superparamagnetic Nanoparticles of Iron Oxides for Magnetic Resonance Imaging Applications	51
	<i>Jean-Marc Idee, Marc Port, Isabelle Raynal, Michel Schaefer, Bruno Bonnemain, Philippe Prigent, Philippe Robert, Caroline Robic, and Claire Corot</i>	
2.1	Introduction	51
2.2	Physicochemical Characteristics	53
2.2.1	Physicochemical Properties of the Crystal	54
2.2.2	Hydrodynamic Particle Size and Charge	54
2.3	Pharmacology and Metabolism	56
2.3.1	Role of Physicochemical Parameters	57
2.3.2	Mechanism and Consequences of Interaction with Macrophages	58
2.3.3	Pharmacokinetics	59
2.3.4	Nanoparticle Vectorization	60
2.4	Current Clinical Uses and Future Developments	61
2.4.1	Gastrointestinal Tract Imaging	61
2.4.2	Liver and Spleen Diseases	63
2.4.3	Lymph Node Metastases	64
2.4.4	Blood Pool Characteristics	66
2.4.5	Characterization of the Atheromatous Plaque	67
2.4.6	Other Potential Uses	68
2.4.6.1	Stroke	68
2.4.6.2	Cerebral Tumor Characterization	68
2.4.6.3	Multiple Sclerosis	69
2.4.6.4	Arthritis	70
2.4.6.5	Infection	70
2.4.6.6	Kidney Imaging	71
2.4.6.7	Acute Cardiac Transplant Rejection	72
2.4.6.8	<i>In Vivo</i> Monitoring of Cell Therapy	72
2.4.6.9	T-staging of Uterine Neoplasms	73
2.4.6.10	MRI-detectable Embolotherapy	73
2.5	Conclusion	75
	References	76
3	Carbon Nanotube-based Vectors for Delivering Immunotherapeutics and Drugs	85
	<i>Alberto Bianco, Wei Wu, Giorgia Pastorin, Cédric Klumpp, Lara Lacerda, Charalambos D. Partidos, Kostas Kostarelos, and Maurizio Prato</i>	
3.1	Introduction	85
3.2	Chemical Functionalization of CNTs	86
3.2.1	Noncovalent Functionalization	86
3.2.1.1	$\pi-\pi$ Stacking Interactions	86
3.2.1.2	Hydrophobic Interactions	88
3.2.2	Covalent Functionalization	89
3.2.2.1	Defect Functionalization	90
3.2.2.2	Sidewall Functionalization	91

3.3	CNTs in Diagnosis	96
3.3.1	CNTs in FETs	97
3.3.1.1	Fabrication	97
3.3.1.2	FET Biosensors	98
3.3.2	CNT-based Electrodes	100
3.3.2.1	Fabrication	101
3.3.2.2	Nanoelectrode Biosensors	102
3.4	CNT Cell Uptake	105
3.5	CNTs as Delivery Devices for Antigens and Adjuvants	107
3.5.1	Interaction of <i>f</i> -CNTs with CpG Motifs and Potentiation of their Immunostimulatory Activity	107
3.5.2	Presentation and Immunogenic Potential of Peptide Antigens Attached onto <i>f</i> -CNTs	109
3.6	CNTs for Drug Delivery	111
3.7	CNTs for Gene Transfer	115
3.7.1	Interaction with DNA and RNA	115
3.7.2	Delivery and Expression of Gene-encoding DNA and RNA	116
3.8	Health Impact of CNTs	118
3.8.1	Parameters of CNTs Related to Health Impact	119
3.8.1.1	Purity	119
3.8.1.2	Solvents	123
3.8.1.3	Surface of CNTs	123
3.8.1.4	Length	123
3.8.2	<i>In Vitro</i> Effect of CNTs	123
3.8.3	<i>In Vivo</i> Effects of CNTs	125
3.9	General Conclusions	127
	Acknowledgments	128
	References	128
4	Core–Shell Nanoparticles for Drug Delivery and Molecular Imaging	143
	<i>Sung Kyun Han, Ree Sun Kim, Jin Ho Lee, Giyoong Tae, Sun Hang Cho, and Soon Hong Yuk</i>	
4.1	Introduction	143
4.2	Core–shell Nanoparticles with a Lipid Core	145
4.3	Core–Shell Nanoparticles with a Polymeric Core	156
4.3.1	Hyaluronic Acid (HA)-functionalized PLGA Nanoparticles	157
4.3.2	Heparin-functionalized PLGA Nanoparticles	166
4.4	Core–shell Nanoparticles with a Metallic Core	174
4.5	Conclusions	181
	Acknowledgments	181
	References	182
5	Nanotechnologies for Targeted Delivery of Drugs	189
	<i>Pavel Brož and Patrick Hunziker</i>	
5.1	Introduction	189
5.2	Basic and Special Pharmacology	192

5.2.1	Outline	192
5.2.2	Basic Pharmacology	193
5.2.2.1	Absorption	193
5.2.2.2	Bioavailability	196
5.2.2.3	Distribution	197
5.2.2.4	Elimination	198
5.2.3	Special Pharmacology	201
5.2.3.1	Skin Epithelium	201
5.2.3.2	Mucosal Epithelium of the Respiratory Tract	202
5.2.3.3	Mucosal Epithelium of the Gastrointestinal Tract	202
5.2.3.4	Mononuclear Phagocyte System (MPS)	204
5.2.3.5	Endothelial Barrier	206
5.2.3.6	Cell Membrane	207
5.3	Strategies for Targeted Delivery – Observed in Nature	209
5.3.1	Outline	209
5.3.2	Bacteria	210
5.3.2.1	Host Invasion	210
5.3.2.2	Immune System Evasion	213
5.3.3	Viruses	215
5.3.3.1	Immune System Evasion	216
5.3.3.2	Host Cell Invasion	217
5.3.3.3	Viral Vectors for Therapeutic Applications	219
5.3.4	Prions	221
5.4	Strategies for Targeted Delivery – Designed by Man	223
5.4.1	Outline	223
5.4.2	Noninvasive Delivery Systems	223
5.4.2.1	Oral Delivery Systems	224
5.4.2.2	Transdermal Delivery Systems	224
5.4.2.3	Transmucosal Delivery Systems	225
5.4.3	Invasive Delivery Systems	225
5.4.4	Targeted Delivery to the Brain	226
5.4.5	Macrophage Targeting	228
5.4.6	Other Targets	230
5.5	Conclusion and Outlook	233
	References	234
6	Nanoporous and Nanosize Materials for Drug Delivery Systems	255
	<i>Yoshinobu Fukumori, Kanji Takada and Hirofumi Takeuchi</i>	
6.1	Introduction	255
6.2	Nanomaterials for Coating	256
6.2.1	Commercially Available Aqueous Polymeric Nanomaterials	257
6.2.2	Novel Terpolymer Nanoparticles for Coating	259
6.2.3	Core–shell Nanoparticles for Fine Particle Coating	260
6.2.4	Core–Shell Nanoparticles for Thermosensitively Drug-releasing Microcapsules	261

6.2.5	Chitosan Nanoparticles for Microparticle Coating	263
6.3	Materials for Nanoparticulate Therapy and Diagnosis	264
6.3.1	Inorganic Nanoparticles	265
6.3.2	Polymeric Nanoparticles	267
6.3.3	Other Case Studies	267
6.4	Nanoporous Materials as Drug Delivery System Carriers	270
6.4.1	Inorganic Calcium Compounds	270
6.4.2	Silastic Compounds	271
6.4.2.1	Nanoporous Silastic Materials for Solidifying Oily Drugs	271
6.4.2.2	Nanoporous Silastic Materials for Poorly Absorbable Drugs	275
6.4.2.3	Nanoporous Silica Materials for Controlled Release of Drugs	278
6.4.3	Carbon Nanotubes (CNTs)	280
6.4.3.1	CNTs for Oral Delivery of Protein Drug	280
6.4.3.2	CNTs for Intracellular Delivery of Protein	282
6.4.3.3	Toxicity of CNTs	284
6.4.3.4	Functionalized CNTs (<i>f</i> -CNTs) for Drug Delivery	285
6.4.3.5	<i>f</i> -CNTs for Gene Delivery	286
6.4.4	CNHs for Drug Delivery	286
6.5	Physicochemical Aspects of Porous Silastic Materials for Drug Delivery	287
6.5.1	Solid Dispersion Particles with Porous Silica	288
6.5.2	Mesoporous Silica	295
	References	299
7	NANOEGG® Technology for Drug Delivery	310
	<i>Yoko Yamaguchi and Rie Igarashi</i>	
7.1	Introduction	310
7.2	New Nanoparticles with a Core–Shell Structure: The NANOEGG System	311
7.2.1	Physicochemical Properties and Action of ATRA	311
7.2.2	NANOEGG Preparation and Characterization	314
7.2.3	Improved Lability of ATRA in the NANOEGG System	317
7.3	NANOEGG for Dermatological Aspects	319
7.3.1	Improved Irritation of ATRA in the NANOEGG System	320
7.3.2	Pharmacological Effects of the NANOEGG System	323
7.3.3	Expression of mRNA Heparin-binding Epidermal Growth Factor-like Growth Factor (HB-EGF) on Mouse Skin	325
7.3.4	Proliferation and Differentiation of Keratinocytes	326
7.3.5	Production of Hyaluronic Acid (HA) in the Epidermal Layer	328
7.3.6	Hyperpigmentation and Fine Wrinkle Improvements by NANOEGG Treatment on Animal Skin	330
7.3.7	Clinical Trials of Fine Wrinkles and Brown Spots on the Human Face	331
7.4	Why does NANOEGG Show the High Performance on the Improvement of Brown Spot and Wrinkles?	334

7.5	NANOEGG for Other Indications	335
7.6	NANOEGG for Other Drugs	338
7.7	Conclusion	338
	References	339
8	Polymeric Nanomaterials – Synthesis, Functionalization and Applications in Diagnosis and Therapy	342
	<i>Jutta Rieger, Christine Jérôme, Robert Jérôme, and Rachel Auzély-Velty</i>	
8.1	Introduction	342
8.2	Polymer Materials Used for the Synthesis of Nanoparticles	345
8.2.1	Natural Polymers	346
8.2.2	Degradable Synthetic Polymers	349
8.2.3	Nondegradable Synthetic Polymers	352
8.2.4	PEO	352
8.3	Preparation of Polymeric Nanoparticles	354
8.3.1	Preparation of Nanospheres from Preformed Polymers	354
8.3.1.1	Emulsion-evaporation	354
8.3.1.2	Salting-out	355
8.3.1.3	Emulsification-diffusion	356
8.3.1.4	Nanoprecipitation	356
8.3.2	Synthesis of Nanospheres by <i>In Situ</i> Polymerization	357
8.3.3	Preparation of Nanocapsules	358
8.4	Surface Functionalization	359
8.4.1	Functionalization with Biological (Macro)molecules	359
8.4.2	Functionalization with Specific Ligands: Specific Interaction through Biological Recognition	360
8.4.2.1	Mono- or Oligosaccharides (Carbohydrates)	360
8.4.2.2	Folate Receptor	361
8.4.2.3	Antibodies	362
8.4.2.4	Biotin	362
8.4.3	Strategies for Surface Modification	363
8.4.3.1	Adsorption on Preformed Nanoparticles	364
8.4.3.2	Functional Surfactants as Stabilizers and Surface Modifiers	366
8.4.3.3	Emulsion, Miniemulsion or Dispersion Polymerization	369
8.4.3.4	Covalent Linking of Functional Molecules to Preformed Nanoparticles	370
8.4.4	Analytical Techniques for Surface Modification	375
8.4.4.1	Physicochemical Techniques	376
8.4.4.2	Biological Assays/Methods	377
8.5	Applications	380
8.5.1	Drug Delivery Systems	380
8.5.1.1	Routes of Administration	380
8.5.1.2	Therapeutic Applications of Nanoparticles	382
8.5.1.3	Triggered Release	384

8.5.2	Diagnosis	388
8.5.2.1	Fluorescence Labeling of Polymeric Nanoparticles	388
8.5.2.2	Contrast Agents for MRI	392
8.5.2.3	Magnetic Nanoparticles for <i>In Vitro</i> Assays	393
8.5.2.4	Electron Dense Agents for Transmission Electron Microscopy (TEM)	396
8.5.2.5	Radiolabeled Nanoparticles	396
8.6	Conclusion and Perspectives	396
	References	397
9	Polymeric Nanoparticles for Drug Delivery	409
	<i>Paraskevi Kallinteri and Martin C. Garnett</i>	
9.1	Introduction: Application of Nanoparticles for Noncancer Applications	409
9.1.1	Physiological and Uptake of Particles	410
9.1.1.1	Routes of Tissue and Cellular Uptake of Particles	410
9.1.1.2	Uptake by Macrophages and Lymphoid Tissues	411
9.1.1.3	Mucosal-associated Lymphoid Tissues (MALT)	411
9.1.2	Routes of Delivery	412
9.1.2.1	Oral	412
9.1.2.2	Nasal	413
9.1.2.3	Pulmonary	413
9.1.2.4	Transdermal/Subcutaneous	414
9.2	Drug Delivery	415
9.2.1	Ocular Delivery	415
9.2.1.1	Anatomy of the Eye	415
9.2.1.2	Pathology	416
9.2.1.3	Drug Delivery	416
9.2.1.4	Tolerability	422
9.2.1.5	Future Prospects for Nanoparticles in Ocular Delivery	422
9.2.2	Macrophage-related Diseases	423
9.2.2.1	Leishmaniasis	423
9.2.2.2	Other Parasitic Infections	426
9.2.3	Antifungal	427
9.2.3.1	Treatment	427
9.2.3.2	Drug Delivery Systems	428
9.2.4	Tuberculosis	431
9.2.4.1	Physiology and Pathology	431
9.2.4.2	Treatment	431
9.2.4.3	Future Prospects	434
9.2.5	AIDS	434
9.2.5.1	Pathology	434
9.2.5.2	Treatment	434
9.2.5.3	Nanoparticle Delivery Systems	435
9.2.5.4	Vaccines and AIDS	439

9.2.6	Vaccines	441
9.2.6.1	Delivery Route	442
9.2.7	Diabetes	451
9.2.7.1	Treatment	451
9.2.7.2	Delivery Routes	452
9.3	Conclusions	460
	References	461
10	Solid Lipid and Polymeric Nanoparticles for Drug Delivery	471
	<i>José Luis Pedraz, Corka Orive, Manoli Igartua, Alicia R. Gascón, Rosa M. Hernández, María Angeles Solinis, and Amaia Esquisabel</i>	
10.1	Introduction	471
10.2	SLNs	472
10.2.1	Introduction	472
10.2.2	Composition	473
10.2.3	Production Processes	474
10.2.3.1	Preparation Techniques	474
10.2.3.2	Scaling-up, Sterilization and Drying	475
10.2.4	Drug Incorporation, Loading, Incorporation Efficiency, Nanoparticle Recovery and Drug Release	476
10.2.4.1	Drug Incorporation	476
10.2.4.2	Drug Loading	477
10.2.4.3	Determination of Nanoparticle Recovery and Drug Incorporation Efficiency	477
10.2.4.4	Drug Release	478
10.2.5	Related Structures and Stability	478
10.2.6	Analytical Characterization of SLNs	480
10.2.6.1	Particle Size	480
10.2.6.2	The ζ Potential	481
10.2.6.3	Crystallinity and Polymorphism and Colloidal Structures	481
10.2.7	Applications	481
10.2.7.1	Gene Therapy	482
10.2.7.2	Peptide and Protein Delivery	486
10.2.7.3	Low-soluble Drugs	488
10.2.7.4	Topical and Transdermal Administration	490
10.2.7.5	Cosmetic Applications for SLNs	491
10.3	Polymeric Nanoparticles	491
10.3.1	Introduction	491
10.3.2	Nanoparticle Preparation Methods	492
10.3.2.1	Nanoparticles Prepared by <i>In Situ</i> Polymerization of Monomers	492
10.3.2.2	Nanoparticles Prepared from Preformed Polymers	493
10.3.3	Characterization of Polymeric Nanoparticles	494
10.3.4	Pharmaceutical Applications of Nanoparticles	495
10.3.4.1	Protein Delivery	495

10.3.4.2 Protein Delivery by Mucosal Routes 496

10.3.4.3 Vaccine Adjuvants 498

References 499

11 Intelligent Hydrogels in Nanoscale Sensing and Drug Delivery

Applications 509

J. Zach Hilt

11.1 Introduction 509

11.2 Intelligent Hydrogels 510

11.2.1 Ionic Hydrogels 510

11.2.2 Temperature-responsive Hydrogels 510

11.2.3 Biohybrid Hydrogels 510

11.2.4 Imprinted Hydrogels 511

11.3 Sensor Applications 511

11.3.1 Actuation Detection 511

11.3.2 Optical Detection 513

11.3.3 Electrical Detection 517

11.4 Drug Delivery Applications 519

11.4.1 Micro/nanoscale Devices 520

11.4.2 Nanoscale Macromolecular Structures 520

11.5 Conclusions 522

References 522

12 Nanoshells for Drug Delivery 527

Melgerti M. De Villiers and Yuri Lvov

12.1 Introduction 527

12.2 Metallic Nanoshells 528

12.2.1 Synthesis of the Nanoshells 528

12.2.2 Application in Nanomedicine 530

12.3 Nanoshells Formed by Polyion E-LbL Self-assembly 532

12.3.1 Preparation of E-LbL Nanoshells 532

12.3.1.1 Proving the Nanoshells 535

12.3.1.2 Influence of the Core on Nanoshell Properties 538

12.3.1.3 Barrier Properties of E-LbL Assembled Nanoshells 539

12.3.2 Controlled Release of Active Pharmaceutical Ingredients Encapsulated by E-LbL Assembled Nanoshells 540

12.3.2.1 Nanoshell Permeability for Low-molecular-weight Compounds 542

12.3.2.2 Nanoshell Permeability for High-molecular-weight Compounds 543

12.3.3 E-LbL Assembled Nanoshells as Protective and Functional Barriers 545

12.3.4 Magnetic Nanoshells 548

12.3.5 Nano-organized Shells with Functions other than a Adjustable Diffusion Barrier 550

12.3.5.1 Colloidal Stabilization 550

12.3.5.2 Interpolyelectrolyte Complex Formation 550

12.3.5.3	Biomimetic Approach	551
12.4	Conclusion	552
