

# SINKHOLES and SUBSIDENCE

**Karst and Cavernous Rocks in  
Engineering and Construction**

**Tony Waltham, Fred Bell  
and Martin Culshaw**

 Springer

 PRAXIS

# Contents

<b>Preface</b> . . . . .	xi
<b>Contributors</b> . . . . .	xiii
<b>List of figures</b> . . . . .	xv
<b>List of tables</b> . . . . .	xxv
<b>List of boxes</b> . . . . .	xxvii
<b>Glossary</b> . . . . .	xxix
<b>1 Rocks, dissolution and karst</b> . . . . .	1
1.1 Limestone lithologies . . . . .	2
1.2 Limestone and dissolution . . . . .	5
1.2.1 Cavernous ground . . . . .	7
1.3 Karst landforms development by dissolution . . . . .	9
1.4 Climatic influence on limestone karst . . . . .	10
1.4.1 Types of limestone karst landscape . . . . .	12
1.5 Dolomite and its sinkholes . . . . .	15
1.6 Chalk and its sinkholes . . . . .	16
1.7 Evaporite rocks and their sinkholes . . . . .	18
1.7.1 Dissolution and sinkholes on gypsum and anhydrite . . . . .	19
1.7.2 Dissolution and sinkholes on salt . . . . .	21
1.8 Man's influence on dissolution and sinkholes . . . . .	21

<b>2</b>	<b>Sinkhole classification and nomenclature</b> . . . . .	25
2.1	Sinkholes and dolines . . . . .	25
2.2	Classification of sinkholes . . . . .	26
2.3	Solution sinkholes and solution dolines . . . . .	29
2.3.1	Solution dolines and engineering . . . . .	35
2.3.2	Solution dolines on salt . . . . .	37
2.3.3	Solution dolines on gypsum . . . . .	40
2.4	Collapse and caprock sinkholes . . . . .	41
2.5	Subsidence, suffosion and dropout sinkholes . . . . .	43
2.6	Buried sinkholes . . . . .	44
2.7	Karst types and sinkhole distribution . . . . .	44
2.7.1	Sinkholes in the engineering classification of karst . . . . .	45
<b>3</b>	<b>Rock failure in collapse and caprock sinkholes</b> . . . . .	49
3.1	Karstic collapse. . . . .	49
3.2	Collapse of cave chambers . . . . .	50
3.2.1	Cave roof breakdown by bed failure. . . . .	52
3.2.2	Stable arch development in cave roofs . . . . .	55
3.2.3	Breakdown processes . . . . .	56
3.3	Collapse sinkholes . . . . .	58
3.3.1	Collapse sinkholes in limestones. . . . .	58
3.3.2	Tiankengs . . . . .	64
3.3.3	Collapse sinkholes in chalk . . . . .	66
3.3.4	Collapse sinkholes in gypsum . . . . .	67
3.4	Caprock sinkholes . . . . .	70
3.4.1	Caprock sinkholes over limestone. . . . .	70
3.4.2	Caprock sinkholes over gypsum. . . . .	75
3.4.3	Caprock sinkholes over salt . . . . .	78
3.5	Breccia pipes . . . . .	80
3.6	The collapse geohazard. . . . .	83
<b>4</b>	<b>Soil failure in subsidence sinkholes</b> . . . . .	85
4.1	Subsidence sinkhole morphology. . . . .	85
4.2	Types of subsidence sinkholes . . . . .	92
4.3	Dropout sinkholes . . . . .	95
4.3.1	Growth and failure of soil cavities . . . . .	98
4.3.2	Evolution of subsidence sinkholes. . . . .	101
4.4	Spatial distribution of subsidence sinkholes. . . . .	103
4.4.1	Subsidence sinkholes related to cover thickness. . . . .	107
4.5	The subsidence sinkhole geohazard . . . . .	108
<b>5</b>	<b>Buried sinkholes and rockhead features</b> . . . . .	111
5.1	Buried sinkhole morphology . . . . .	112
5.1.1	Compaction and suffosion in buried sinkholes . . . . .	118

5.2	Buried sinkholes as engineering hazards . . . . .	120
5.3	Buried sinkholes and soil pipes in chalk . . . . .	125
<b>6</b>	<b>Sinkholes in insoluble rocks . . . . .</b>	<b>129</b>
6.1	Lava tubes . . . . .	129
6.1.1	Lava tube stability . . . . .	132
6.1.2	Engineering failures related to lava sinkholes . . . . .	136
6.2	Sinkholes in other forms of pseudokarst . . . . .	137
<b>7</b>	<b>Rock failure under imposed load over caves . . . . .</b>	<b>141</b>
7.1	Recorded collapse sinkholes induced by loading . . . . .	142
7.2	Bearing capacity of cave roofs . . . . .	144
7.2.1	Integrity of loaded rock arches . . . . .	145
7.2.2	Modelling the failure of cave roofs under load . . . . .	146
7.2.3	Punching failure of cave roofs . . . . .	149
7.3	Safe cover thickness over caves . . . . .	151
7.4	Existing structures over caves . . . . .	154
<b>8</b>	<b>Sinkholes induced by engineering works . . . . .</b>	<b>157</b>
8.1	Sinkholes induced by increased water input . . . . .	159
8.1.1	Sinkholes caused by reservoir impoundment . . . . .	164
8.2	Sinkholes induced by water table decline . . . . .	165
8.2.1	Sinkholes induced by groundwater abstraction . . . . .	166
8.2.2	Sinkholes induced by de-watering . . . . .	170
8.3	Sinkholes induced by ground disturbance . . . . .	176
8.4	The avoidable geohazard of induced sinkholes . . . . .	177
<b>9</b>	<b>Ground investigation in sinkhole terrains . . . . .</b>	<b>181</b>
9.1	Preliminary stages . . . . .	182
9.2	Ground investigation fieldwork . . . . .	184
9.3	Ground-based geophysical surveys . . . . .	185
9.3.1	Geophysical methods . . . . .	186
9.3.2	Surface seismic surveys . . . . .	189
9.3.3	Electrical resistivity surveys . . . . .	190
9.3.4	Electromagnetic conductivity surveys . . . . .	191
9.3.5	Ground penetrating radar . . . . .	192
9.3.6	Microgravity surveys . . . . .	193
9.3.7	Magnetic surveys . . . . .	194
9.3.8	Cross-hole tomography . . . . .	195
9.4	Airborne and satellite remote sensing . . . . .	198
9.5	Direct investigations . . . . .	199
9.5.1	Soil probing . . . . .	200
9.5.2	Rock probing and boring . . . . .	203

<b>10 Hazard and risk assessment of sinkholes</b> . . . . .	205
10.1 Hazard and risk . . . . .	205
10.2 Risk management . . . . .	206
10.3 Karst hazard analysis . . . . .	209
10.3.1 Parameters in sinkhole hazard assessment . . . . .	212
10.3.2 Sinkhole hazard assessment in South Africa . . . . .	215
10.4 Hazard maps and land-use planning . . . . .	218
10.5 Legislation in response to sinkhole hazards . . . . .	221
10.6 Sinkholes and insurance . . . . .	223
<b>11 Prevention and remediation of sinkholes</b> . . . . .	227
11.1 Soil treatment as sinkhole prevention . . . . .	227
11.1.1 Grouting in karst . . . . .	228
11.1.2 Compaction grouting over cavernous karst . . . . .	229
11.1.3 Soil stabilisation for sinkhole limitation . . . . .	231
11.2 Sinkhole remediation . . . . .	233
11.2.1 Repairs to large sinkhole failures . . . . .	235
11.3 Landfills in sinkhole karst . . . . .	239
11.3.1 Sinkholes as pollution sources . . . . .	241
11.3.2 Landfill within sinkholes . . . . .	241
<b>12 Construction in sinkhole terrains</b> . . . . .	245
12.1 Construction on soil over karst . . . . .	245
12.1.1 Control of drainage . . . . .	246
12.1.2 Foundations within the soil over pinnacled bedrock . . . . .	247
12.1.3 Extended foundations on rafts and mattresses . . . . .	248
12.1.4 Sinkhole flooding . . . . .	251
12.2 Roads and railways on karst . . . . .	253
12.2.1 Geogrid as a sinkhole defence . . . . .	255
12.3 Foundations on karst bedrock . . . . .	257
12.3.1 Driven piles and pin piles . . . . .	261
12.3.2 Bored piles and caissons . . . . .	264
12.3.3 Proof testing for piles in karst . . . . .	265
12.4 Tunnels through cavernous ground . . . . .	266
12.5 Dam construction in sinkhole karst . . . . .	268
<b>13 Case studies</b> . . . . .	271
#1 Remediation of a sinkhole over gypsum at Ripon, U.K. . . . .	272
#2 Collapse sinkhole at Dishman Lane, Kentucky . . . . .	277
#3 Caves and sinkholes in motorway construction, Slovenia . . . . .	283
#4 Road built over Sung Gul lava tube, Korea . . . . .	289
#5 Karst collapse prevention along Shui-Nan Highway, China . . . . .	293
#6 Construction over a cave in Huntsville, Alabama . . . . .	299
#7 Sinkhole destruction of Corporate Plaza, Pennsylvania . . . . .	304
#8 Subsidence over a chalk pipe at Chalfont St. Peter, U.K. . . . .	309

#9	Geophysical investigations of sinkholes in chalk, U.K. . . . .	313
#10	Detection of caves by microgravity geophysics, Bahamas. . . . .	317
#11	Sinkholes and subsidence over salt at Wink, Texas. . . . .	321
#12	Subsidence over buried karst at Centurion, South Africa. . . . .	326
#13	Agriculture on sinkhole karst on gypsum, Lithuania . . . . .	331
#14	Sinkhole remediation over Weeks Island salt, Louisiana . . . . .	336
#15	Hazard assessment on dolomite at Simunye, South Africa . . . . .	341
#16	Ground investigation in covered karst at Tournai, Belgium . . . . .	347
