<i>Preface</i> .....	<i>xv</i>

## Part I Food and obesity

<b>1 Lipid metabolism: its role in energy regulation and obesity</b> .....	<b>3</b>
<i>M. Leonhardt and W. Langhans, ETH Zürich, Switzerland</i>	
1.1 Introduction .....	3
1.2 Lipid metabolism: from digestion and synthesis to storage .....	4
1.3 Adipose tissue .....	5
1.4 <i>De novo</i> lipogenesis .....	9
1.5 Future trends .....	16
1.6 References .....	17
<b>2 Hunger and satiety: relation to body weight control</b> .....	<b>28</b>
<i>H. F. J. Hendriks, G. C. M. Bakker, W. J. Pasman, A. Stafleu and W. A. M. Blom, TNO Quality of Life, The Netherlands</i>	
2.1 Introduction .....	28
2.2 Factors influencing satiety and satiation .....	29
2.3 The impact of different food components on satiety .....	32
2.4 The need for biomarkers of satiety .....	35
2.5 Developing new biomarkers .....	36

2.6	Future trends.....	37
2.7	References.....	38
<b>3</b>	<b>Glycaemic control, insulin resistance and obesity</b> .....	<b>43</b>
	<i>I. Aeberli and M. Zimmermann, ETH Zürich, Switzerland</i>	
3.1	Introduction.....	43
3.2	The glycaemic index of foods and its effect on insulin response and glycaemia.....	44
3.3	The effect of food processing on the glycaemic index ....	46
3.4	The glycaemic load.....	48
3.5	Association of glycaemic response with satiety and food intake .....	48
3.6	Carbohydrate type, glycaemic response and weight control.....	50
3.7	Future trends.....	52
3.8	Sources of further information and advice.....	53
3.9	References.....	54
<b>4</b>	<b>Controlling lipogenesis and thermogenesis and the use of ergogenic aids for weight control</b> .....	<b>58</b>
	<i>A. Palou and M. L. Bonet, University of the Balearic Islands, Spain</i>	
4.1	Introduction.....	58
4.2	Overview of nutrition and thermogenesis .....	59
4.3	Overview of nutrition and lipogenesis .....	65
4.4	Nutrition and development of lean body mass and body fat mass .....	68
4.5	Using food and food components to control lipogenesis and thermogenesis .....	71
4.6	Using ergogenic aids for weight control.....	84
4.7	Future trends.....	87
4.8	Sources of further information and advice.....	89
4.9	References.....	90
<b>5</b>	<b>Food ingredients implicated in obesity: sugars and sweeteners</b> .....	<b>104</b>
	<i>G. H. Anderson, T. Akhavan and R. Mendelson, University of Toronto, Canada</i>	
5.1	Introduction.....	104
5.2	Definition of sugars and alternative sweeteners .....	105
5.3	Sugars and alternative sweeteners: role in obesity .....	106
5.4	Conclusion.....	120
5.5	Implications and recommendations.....	121

5.6	Future trends.....	121
5.7	References.....	122

## Part II Ingredients from grains, fruits and vegetables for weight control

<b>6</b>	<b><math>\beta</math>-Glucans.....</b>	<b>131</b>
	<i>J.-A. Nazare, M. Laville Centre de Recherche en Nutrition Humaine Rhône Alpes, France, C. G. Biliaderis, A. Lazaridou, Aristotle University, Thessaloniki, Greece, G. Önning, Lund University, Sweden, M. Salmenkallio-Marttila, VTT, Finland and A. Triantafyllou, Ceba Foods, Sweden</i>	
6.1	Introduction.....	131
6.2	Sources of $\beta$ -glucans.....	131
6.3	$\beta$ -Glucan structure and related properties.....	133
6.4	Effects of $\beta$ -glucans on lipid metabolism.....	135
6.5	Effects of $\beta$ -glucans on energy and carbohydrate metabolism.....	138
6.6	$\beta$ -Glucans and weight control.....	140
6.7	$\beta$ -Glucans in the regulation of satiety and acceptance by consumers.....	141
6.8	Use of $\beta$ -glucans in food products.....	143
6.9	Future trends.....	145
6.10	Acknowledgements.....	145
6.11	References.....	145
<b>7</b>	<b>Non-digestible oligosaccharides.....</b>	<b>153</b>
	<i>N. M. Delzenne, P. D. Cani, E. Delmée and A. M. Neyrinck, Université catholique de Louvain, Belgium</i>	
7.1	Introduction.....	153
7.2	Dietary fibres and food intake.....	153
7.3	Sources and properties of non-digestible oligosaccharides.....	155
7.4	Effect of non-digestible oligosaccharides on glucose and lipid metabolism: a phenomenon linked to a decrease in food intake.....	158
7.5	Non-digestible oligosaccharides, food intake and weight control: a key role for gastro-intestinal peptides.....	160
7.6	The role of glucagon-like peptide-1 in the improvement of food intake, fat development and diabetic state by non-digestible oligosaccharides.....	164
7.7	Relevance of non-digestible oligosaccharide effects in human studies.....	165
7.8	Conclusions and future trends.....	167
7.9	References.....	168

<b>8</b>	<b>Resistant starch</b> .....	174
	<i>A. M. Birkett, National Starch Food Innovation, USA and I. L. Brown, University of Colorado Health Sciences Center, Denver, Colorado, USA</i>	
8.1	Introduction.....	174
8.2	Background.....	175
8.3	Role of resistant starch in weight management.....	182
8.4	Increasing the resistant starch content of foods .....	189
8.5	Sources of further information and advice.....	192
8.6	Future trends.....	192
8.7	Conclusion.....	193
8.8	References.....	193
<b>9</b>	<b>Modified carbohydrates with lower glycemic index</b> .....	198
	<i>B. R. Hamaker, G. Zhang and M. Venkatachalam, Purdue University, USA</i>	
9.1	Introduction.....	198
9.2	Methods of producing carbohydrates with lower glycemic index.....	200
9.3	Slow-digestion and digestion-resistant characteristics of raw starch .....	200
9.4	Starch structural modification.....	203
9.5	Influence of other food components .....	207
9.6	Future trends.....	212
9.7	References.....	213
<b>10</b>	<b>Novel ingredients for weight loss: new developments</b> .....	218
	<i>J. D. Stowell, Danisco Sweeteners, UK</i>	
10.1	Introduction.....	218
10.2	Criteria for a successful new ingredient for weight loss ...	220
10.3	(-)-Hydroxycitric acid .....	222
10.4	<i>Hoodia gordonii</i> .....	225
10.5	Other (potential) weight loss ingredients .....	228
10.6	Future trends.....	230
10.7	References.....	231

### Part III Dairy ingredients and lipids for weight control

<b>11</b>	<b>Dietary and supplemental calcium and its role in weight loss: weighing the evidence</b> .....	237
	<i>G. Gerstner, Jungbunzlauer Ladenburg GmbH, Germany and M. de Vrese, Federal Research Center for Nutrition and Food, Germany</i>	
11.1	Introduction: role of dietary and supplementary calcium in weight control .....	237

11.2	Determining the role of calcium in weight control . . . . .	238
11.3	Mechanisms: calcium and the regulation of energy metabolism . . . . .	245
11.4	Dietary versus supplementary calcium and weight control . . . . .	247
11.5	Using calcium in functional food products . . . . .	248
11.6	Conclusions and future trends . . . . .	256
11.7	Sources of further information and advice . . . . .	257
11.8	References . . . . .	258
<b>12</b>	<b>Conjugated fatty acids, body composition and weight control . . . . .</b>	<b>263</b>
	<i>J. L. Sebedio, UMR, 1019, INRA-Université d'Auvergne, France</i>	
12.1	Introduction . . . . .	263
12.2	Sources of conjugated linoleic acid and estimated daily intake . . . . .	264
12.3	Effect of conjugated linoleic acid on body composition . . . . .	267
12.4	Safety issues . . . . .	272
12.5	Conclusions: conjugated linoleic acid and functional foods . . . . .	275
12.6	References . . . . .	276
<b>13</b>	<b>Omega-3 fatty acids and other polyunsaturated fatty acids and weight control . . . . .</b>	<b>281</b>
	<i>M. Sörhede Winzell and B. Åhrén, Lund University, Sweden</i>	
13.1	Introduction . . . . .	281
13.2	Determining the role of omega-3 fatty acids and other polyunsaturated fatty acids in weight control . . . . .	282
13.3	Effects of omega-3 fatty acids and other polyunsaturated fatty acids on energy metabolism and other factors connected to weight control . . . . .	289
13.4	Producing omega-3 polyunsaturated fatty acids . . . . .	294
13.5	Omega-3 and other polyunsaturated fatty acids in functional food products . . . . .	295
13.6	Future trends . . . . .	295
13.7	Sources of further information and advice . . . . .	297
13.8	Acknowledgements . . . . .	297
13.9	References . . . . .	298
<b>14</b>	<b>Medium-chain and structured triglycerides: their role in weight control . . . . .</b>	<b>305</b>
	<i>I. Rudkowska and P. J. H. Jones, University of Manitoba, Canada</i>	
14.1	Introduction: medium-chain triglycerides and weight control . . . . .	305

x Contents

14.2	Metabolic effects of medium-chain triglycerides related to weight control.....	307
14.3	Effects of structured lipids related to weight control.....	317
14.4	Producing oils and using medium-chain triglycerides.....	318
14.5	Future trends.....	321
14.6	Sources of further information and advice.....	322
14.7	References.....	323
<b>15</b>	<b><i>Trans-free oils and fats</i></b> .....	<b>326</b>
	<i>E. Flöter and G. van Duijn, Unilever Research and Development Vlaardingen, The Netherlands</i>	
15.1	Introduction.....	326
15.2	Requirements for <i>trans</i> -free fat compositions.....	333
15.3	Production of <i>trans</i> -free fats and their application.....	335
15.4	Implementation of <i>trans</i> -free fats in manufacturing and the supply chain.....	341
15.5	Future trends.....	342
15.6	Conclusions.....	342
15.7	References.....	343
	<i>Index</i> .....	<b>345</b>
