|-----------------------------------------------------------------------------------------------|-----------|
| Vorwort .....                                                                                 | IX        |
| Preface .....                                                                                 | XI        |
| <b>I Bericht und Schlussfolgerungen .....</b>                                                 | <b>1</b>  |
| 1 Einleitung .....                                                                            | 1         |
| 2 Allgemeine und lebensmitteltechnologische Aspekte .....                                     | 1         |
| 3 Gesundheitliche Aspekte thermischer Behandlung<br>von Lebensmitteln .....                   | 2         |
| 4 Fazit .....                                                                                 | 6         |
| 5 Forschungsbedarf .....                                                                      | 6         |
| <b>II Report and Conclusions .....</b>                                                        | <b>9</b>  |
| 1 Foreword .....                                                                              | 9         |
| 2 General and Food Technological Aspects .....                                                | 9         |
| 3 Health Aspects of Thermal Food Processing .....                                             | 10        |
| 4 Conclusions .....                                                                           | 13        |
| 5 Research Needs .....                                                                        | 14        |
| <b>III Contributions .....</b>                                                                | <b>17</b> |
