Springer Series in Reliability Engineering

B. S. Dhillon

Human Reliability and Error in Transportation Systems

Springer

Contents

1 **Introduction** 1
1.1 Background 1
1.2 Human Error in Transportation Systems Related Facts and Figures 1
1.3 Terms And Definitions 3
1.4 Useful Information on Human Reliability and Error in Transportation Systems 4
1.4.1 Journals 4
1.4.2 Conference Proceedings 5
1.4.3 Books 5
1.4.4 Technical Reports 6
1.4.5 Organizations 7
1.4.6 Data Sources 8
1.5 Scope of the Book 8
1.6 Problems 9
References 10

2 **Human Reliability and Error Basic Mathematical Concepts** 13
2.1 Introduction 13
2.2 Sets, Boolean Algebra Laws, Probability Definition, and Probability Properties 13
2.3 Useful Mathematical Definitions 16
2.3.1 Cumulative Distribution Function Type I 16
2.3.2 Probability Density Function Type I 17
2.3.3 Cumulative Distribution Function Type II 17
2.3.4 Probability Density Function Type II 17
2.3.5 Expected Value Type I 17
2.3.6 Expected Value Type II 18
2.3.7 Laplace Transform 18
2.3.8 Laplace Transform: Final-value Theorem 19

2.4 Solving First-order Differential Equations with Laplace Transforms 19
2.5 Probability Distributions 20
2.5.1 Binomial Distribution 20
2.5.2 Poisson Distribution 21
2.5.3 Exponential Distribution 22
2.5.4 Rayleigh Distribution 23
2.5.5 Weibull Distribution 23
2.5.6 Gamma Distribution 24
2.5.7 Log-normal Distribution 25
2.5.8 Normal Distribution 25
2.6 Problems 26
References 27

3 Introductory Human Factors 29
3.1 Introduction 29
3.2 Human Factors Objectives, Disciplines Contributing to Human Factors, and Human and Machine Characteristics 30
3.3 General Human Behaviors and Human Sensory Capabilities 31
3.4 Useful Human Factors-related Formulas 34
3.4.1 Formula I: Rest Period Estimation 34
3.4.2 Formula II: Maximum Safe Car Speed Estimation 35
3.4.3 Formula III: Inspector Performance Estimation 35
3.4.4 Formula IV: Character Height Estimation 35
3.4.5 Formula V: Brightness Contrast Estimation 36
3.4.6 Formula VI: Glare Constant Estimation 37
3.5 Human Factors Considerations in the System Design and Their Advantages 37
3.6 Human Factors Data Collection Sources, Data Documents, and Selective Data 38
3.7 Useful Human Factors Guidelines for System Design 39
3.8 Problems 40
References 41

4 Basic Human Reliability and Error Concepts 43
4.1 Introduction 43
4.2 Occupational Stressors and Human Performance Effectiveness 44
4.3 Human Error Occurrence Reasons, Ways, and Consequences 45
4.4 Human Error Classifications 46

4.5 Human Performance Reliability Function 47
4.5.1 Experimental Justification for Some Time to Human Error Statistical Distributions 48
4.5.2 Mean Time to Human Error 49
4.6 Human Reliability and Error Analysis Methods 50
4.6.1 Personnel Reliability Index Method 50
4.6.2 Man–Machine Systems Analysis 51
4.6.3 Cause and Effect Diagram (CAED) 52
4.6.4 Error-cause Removal Program (ECRP) 52
4.7 Problems 53
References 54

5 Methods for Performing Human Reliability and Error Analysis in Transportation Systems 57
5.1 Introduction 57
5.2 Probability Tree Method 57
5.3 Failure Modes and Effect Analysis (FMEA) 60
5.3.1 Steps for Performing FMEA 60
5.3.2 FMEA Benefits 62
5.4 Technics of Operation Review (TOR) 62
5.5 The Throughput Ratio Method 63
5.6 Fault Tree Analysis 64
5.6.1 Fault Tree Symbols 64
5.6.2 Steps for Performing Fault Tree Analysis 65
5.6.3 Probability Evaluation of Fault Trees 66
5.7 Pareto Analysis 67
5.8 Pontecorvo Method 68
5.9 Markov Method 69
5.10 Block Diagram Method 72
5.11 Problems 74
References 75

6 Human Error in Railways 77
6.1 Introduction 77
6.2 Facts, Figures, and Examples 77
6.3 Railway Personnel Error-prone Tasks and Typical Human Error Occurrence Areas in Railway Operation 78
6.3.1 Signal Passing 78
6.3.2 Train Speed 80
6.3.3 Signalling or Dispatching 80
6.4 Important Error Contributing Factors in Railways 80
6.5 Human Error Analysis Methods 81
6.5.1 Cause and Effect Diagram 82
6.5.2 Fault Tree Analysis 83

6.6 Analysis of Railway Accidents Due to Human Error 86
6.6.1 The Ladbroke Grove Accident 86
6.6.2 The Purley Accident 87
6.6.3 The Southall Accident 87
6.6.4 The Clapham Junction Accident 87
6.7 A Useful Checklist of Statements for Reducing the Occurrence of Human Error in Railways 88
6.8 Problems 89
References 89

7 **Human Error in Shipping** 91
7.1 Introduction 91
7.2 Facts, Figures, and Examples 91
7.3 Human Factors Issues Facing the Marine Industry 92
7.4 Risk Analysis Methods for Application in Marine Systems 94
7.5 Fault Tree Analysis of Oil Tanker Groundings 96
7.6 Safety Management Assessment System to Identify and Evaluate Human and Organizational Factors in Marine Systems 99
7.7 Reducing the Manning Impact on Shipping System Reliability 100
7.8 Problems 101
References 101

8 **Human Error in Road Transportation Systems** 105
8.1 Introduction 105
8.2 Facts and Figures 105
8.3 Operational Influences on Commercial Driver Performance 106
8.4 Types of Driver Errors, Ranking of Driver Errors, and Common Driver Errors 106
8.5 Methods for Performing Human Error Analysis in Road Transportation Systems 109
8.5.1 Fault Tree Analysis 109
8.5.2 Markov Method 112
8.6 Bus Accidents and Driver Error in Developing Countries 114
8.7 Problems 115
References 116

9 **Human Error in Aviation** 117
9.1 Introduction 117
9.2 Facts, Figures, and Examples 117
9.3 Organizational Factors in Commercial Aviation Accidents with Respect to Pilot Error 118
9.4 Factors Contributing to Flight Crew Decision Errors 119

9.5 Fatigue in Long-haul Operations 120
9.6 Reasons for Retaining Air Traffic Controllers, Effects of Automation on Controllers, and Factors for Controller-caused Airspace Incidents 121
9.7 Types of Pilot–Controller Communication Errors and Recommendations to Reduce Communication Errors 123
9.8 Methods for Performing Human Error Analysis in Aviation 124
9.8.1 Fault Tree Analysis 125
9.9 Examples and Study of Actual Airline Accidents due to Human Error 127
9.10 Accident Prevention Strategies 128
9.11 Problems 128
References 129

10 Human Error in Aircraft Maintenance 131
10.1 Introduction 131
10.2 Facts, Figures and Examples 131
10.3 Reasons for the Occurrence of Human Error in Maintenance 132
10.4 Major Categories of Human Errors in Aircraft Maintenance and Inspection Tasks, Classification of Human Error in Aircraft Maintenance and Their Occurrence Frequency, and Common Errors in Aircraft Maintenance 133
10.5 Methods for Performing Human Error Analysis in Aircraft Maintenance 135
10.5.1 Fault Tree Analysis 135
10.5.2 Markov Method 138
10.6 Case Studies of Human Error in Aviation Maintenance 140
10.6.1 British Airways BAC 1–11 Aircraft Accident 141
10.6.2 Continental Express Embraer Brasilia Accident 141
10.7 Useful Guidelines to Reduce Human Error in Aircraft Maintenance 141
10.8 Problems 143
References 143

11 Mathematical Models for Predicting Human Reliability and Error in Transportation Systems 145
11.1 Introduction 145
11.2 Models for Predicting Human Performance Reliability and Correctability Probability in Transportation Systems 145
11.2.1 Model I 146
11.2.2 Model II 147

11.3 Models for Predicting Human Performance Reliability Subject to Critical and Noncritical Human Errors, and Fluctuating Environment in Transportation Systems 149
11.3.1 Model I 149
11.3.2 Model II 152
11.4 Models for Performing Human Error Analysis in Transportation Systems 155
11.4.1 Model I 155
11.4.2 Model II 158
11.4.3 Model III 160
11.5 Problems 164
References 164

Appendix 165

Bibliography: Literature on Human Reliability and Error in Transportation Systems 165
