|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Preface                                                                                                                                                   | v   |
| Part One: Polarizabilities and Hyperpolarizabilities of<br>Dendritic Systems .....                                                                        | 1   |
| <i>Masayoshi Nakano and Kizashi Yamaguchi</i>                                                                                                             |     |
| Part Two: Molecules in Intense Laser Fields: Nonlinear<br>Multiphoton Spectroscopy and Near-Femtosecond<br>To Sub-Femtosecond (Attosecond) Dynamics ..... | 147 |
| <i>André D. Bandrauk and Hirohiko Kono</i>                                                                                                                |     |
| Part Three: Ultrafast Dynamics and non-Markovian<br>Processes in Four-Photon Spectroscopy .....                                                           | 215 |
| <i>B. D. Fainberg</i>                                                                                                                                     |     |
