

SKIN CANCER PREVENTION

Edited by

Ulrik Ringborg • Yvonne Brandberg

Eckhard W. Breitbart • Rudiger Greinert

Contents

Preface *iii*

Contributors *xiii*

1. Photobiology of Photocarcinogenesis	1
<i>David L. Mitchell and James E. Cleaver</i>	
Introduction—The Problem	1
Photochemistry of DNA in the Skin	4
DNA Damage and Skin Cancer	8
Mechanisms of Sunlight Mutagenesis	10
Biochemical Pathways of Carcinogenesis	12
Conclusions	15
References	16
2. Etiology of Nonmelanocytic Skin Cancer	21
<i>Cara L. Benjamin and Honnavara N. Ananthaswamy</i>	
Introduction	21
UV Damage to DNA	23
Epidemiological Evidence	24
Experimental Evidence	26
Molecular Evidence	28
Cellular and Molecular Mechanisms	34
Different Mechanisms for Different Tumor Types	36
Summary	37
References	37

- 3. Etiology and Modeling of Human Melanoma: Illuminating the Dark Pathways of a Deadly Disease** 49
Steven Kazianis and Meenhard Herlyn
 Introduction 49
 Modeling Melanoma 54
 Etiology 57
 Conclusions and Future Directions 66
 References 68
- 4. Vitamin D, Moderate Sun Exposure, and Health** 79
Michael F. Holick
 Evolutionary Perspective 79
 Human Historical Perspective 80
 Photoproduction of Vitamin D₃ in Human Skin 83
 Factors That Affect the Cutaneous
 Synthesis of Vitamin D₃ 84
 Major Sources of Vitamin D 87
 Endocrine, Metabolism, and Physiologic Function of
 Vitamin D on Calcium and Bone Health 88
 Consequences of Vitamin D Deficiency on Calcium
 Metabolism and Bone Health 88
 Autocrine Metabolism of Vitamin D and Its
 Physiologic Functions 90
 Consequences of Inadequate Sun Exposure and Living
 at Higher Latitudes on Health 91
 Adequate Intake Recommendations for Vitamin D and
 What You Really Need 92
 Prevention and Treatment of Vitamin D Deficiency 93
 Vitamin D Deficiency Pandemic 95
 Conclusion 95
 References 97
- 5. Ultraviolet Radiation Risks to the Eye** 107
David H. Sliney
 Introduction 107
 Effects from Environmental Exposure 108
 Guidelines for Human Exposure 114
 Conclusions 120
 References 121
 Appendix: Applying the UVR Exposure Limits 129

6. Histopathology Standards: Nonmelanoma Skin Cancer	131
<i>Nigel Kirkham</i>	
Introduction	131
Squamous Cell Carcinoma	132
Basal Cell Carcinoma	136
Conclusion	142
References	143
7. Pathology of Skin Cancer with Particular Reference to Melanoma	145
<i>David E. Elder</i>	
Introduction	145
Malignant Melanoma	146
Prognostic Attributes for Melanoma	152
Prognostic Models for Melanoma	154
Molecular Pathology of Melanocytic Tumors	155
References	156
8. Epidemiology of Nonmelanocytic Skin Cancer	163
<i>Richard P. Gallagher, Tim K. Lee, and Chris D. Bajdik</i>	
Introduction	163
Descriptive Epidemiology	164
Analytic Epidemiology: Host Susceptibility Factors	166
Analytic Epidemiology: UV Radiation Exposure	169
Other Factors	171
Summary	172
References	173
9. Epidemiology of Cutaneous Malignant Melanoma	179
<i>Johan Moan, Alina Carmen Porojnicu, and Arne Dahlback</i>	
Introduction	179
Arguments Against and for a Relationship Between Ultraviolet Radiation and Cutaneous Malignant Melanoma	180
Materials and Methods	181
Time Trends	182
Dependency on Living Standard	186
Latitude Gradients	187
Intermittent Exposure Hypothesis	190
Other Factors Relevant for Cutaneous Malignant Melanoma	192
Conclusions	196
References	197

10. Descriptive Epidemiology of Skin Cancer	
Incidence and Mortality	203
<i>Mathieu Boniol, Jean-François Doré, Philippe Autier,</i>	
<i>Michel Smans, and Peter Boyle</i>	
Introduction	203
Cutaneous Melanoma	203
Incidence of Cutaneous Melanoma Worldwide	204
Survival from Cutaneous Melanoma	207
Mortality from Cutaneous Melanoma	207
Nonmelanoma Skin Cancer	210
Conclusion	216
References	219
11. Molecular Epidemiology of Skin Cancer	225
<i>Rajiv Kumar</i>	
Introduction	225
Sun Exposure and DNA Damage	226
UV Signature Mutations in Critical Genes	230
Genetic Determinants of Risk Modulation	232
Arsenic as a Skin Carcinogen	234
Conclusions	235
References	235
12. The Usefulness of Sunscreens	241
<i>Jean-François Doré, Mathieu Boniol,</i>	
<i>Marie-Christine Chignol, and Philippe Autier</i>	
Introduction	241
Nonmelanoma Skin Cancers	243
Melanoma	247
Sunscreen Use and Duration of Sun Exposure	263
Conclusion	271
References	273
13. Solaria	279
<i>Jean-Pierre Césarini</i>	
History	280
Technologies: How Is Artificial UV Produced?	281
Regulation	282
Consumer Use of Tanning Devices	285
Risks Linked to the Use of Solaria	286
Conclusions and Recommendations	288
References	290

14. Risk Groups for Skin Cancer and Aspects on Preventive Management	293
<i>Johan Hansson and Ulrik Ringborg</i>	
Introduction	293
High-Risk Groups for Cutaneous Melanoma	293
Phenotypic Characteristics	294
Previous Melanoma	296
Hereditary Factors	296
Management of Individuals with a High Risk of Cutaneous Malignant Melanoma	302
Nonmelanoma Skin Cancer	304
Immunosuppression and Elevated Risk for Nonmelanoma Skin Cancer	305
Conclusions	306
References	306
15. Behavioral Aspects of Prevention and Early Detection	315
<i>Richard Bränström</i>	
Introduction	315
Theories of Health Behavior and Health Behavior Change	316
Behaviors Related to Prevention and Early Detection	318
Skin Cancer Prevention Using Behavioral Profiles	327
Conclusions	331
References	332
16. Periods-of-Life Program: Continuous Primary Prevention of Skin Cancer in Certain Age Groups	339
<i>Rüdiger Greinert, B. Volkmer, S. Welz, and Eckhard W. Breitbart</i>	
Introduction	339
UV and Skin Cancer	340
Periods-of-Life Program	340
References	343
17. Aims of Primary Prevention of Skin Cancer	345
<i>Karen Glanz</i>	
Introduction	345
Target Outcomes for Primary Prevention	346
Population Targets and Settings for Primary Prevention	349
Broad Typology of Primary Prevention Strategies	350
International Considerations	352
Discussion	354
References	356

- 18. Screening for Melanoma** 359
Alan C. Geller
 Introduction 359
 Rationale and Definitions for Melanoma Screening 360
 Applications of Screening Definitions to Melanoma 360
 Theoretical Aspects of Melanoma Screening 361
 Defining Criteria for Successful Control Programs 362
 Screening Recommendations for Melanoma 362
 Identification of High-Risk Populations and Appropriate
 Venues for Screening and Education 363
 Current Venues in Melanoma Screening and Education 364
 Screening in the Primary Care Setting 366
 Strategies to Improve Melanoma
 Screening and Education 366
 References 371
- 19. Communicating the Incalculable** 377
Gunilla Jarlbro
 The Individual's Relationship to the Risk 378
 Media Impact on People's Assessment of Risk 379
 Can Communication Be Used to Heighten
 Subjective Risk Perception? 381
 I Suppose We Should Run an Ad Campaign? 382
 Considerations for the Future 386
 References 387
- 20. Sun Protection at School** 389
Cecilia Boldemann and Craig Sinclair
 Introduction 389
 Supportive Environment for Sun Protection
 in School Settings 390
 Structural Strategies for Behavioral Modification 391
 Synergies: Gains for Environmental Protection
 and Health 401
 Audits, Surveillance, and Monitoring of
 Policies and Behaviors 403
 Conclusion 403
 References 404
- 21. The UV Index in Practice** 407
Eva Rehfuss and Craig Sinclair
 Introduction 407
 Alerting People About UV Radiation 408
 Experiences from Around the World 410

Does the UV Index Influence Behavior? 412
Lessons Learned and Opportunities Ahead 414
References 417

22. Prevention of Malignant Melanoma:
Health Economics Aspects 421
Bengt Jönsson and Ulf Staginnus
Introduction 421
Primary Prevention 423
Secondary Prevention 424
Issues for Further Research 428
Conclusions 429
References 429

23. Screening for Melanoma 431
Frederick C. Beddingfield
Introduction 431
Incidence 432
Mortality and Survival 434
Distribution of Stages at Diagnosis 434
Etiology and Risk Factors 435
Public Health Initiatives and Screening 437
References 441

Index 445
