

# Infectious Disease Epidemiology Theory and Practice

*Second Edition*

Kenrad E. Nelson  
Carolyn Masters Williams

---

# CONTENTS

---

<b>Contributors</b>	<b>xi</b>
<b>Acknowledgments</b>	<b>xiv</b>
<b>Preface</b>	<b>xv</b>
<b>PART I—METHODS IN INFECTIOUS DISEASE EPIDEMIOLOGY</b>	<b>1</b>
<b>CHAPTER 1 Early History of Infectious Disease: Epidemiology and Control of Infectious Diseases</b>	
<i>Kenrad E. Nelson and Carolyn F. Masters Williams</i>	<b>3</b>
Introduction	3
The Era of Plagues	4
Early Epidemiology	5
The Observation and Care of Patients	7
The Development of Statistics and Surveillance	9
The Discovery of Microorganisms	10
The Twentieth Century	15
What Lies Ahead	17
The Infectious Diseases Challenge	19
<b>CHAPTER 2 Epidemiology of Infectious Disease: General Principles</b>	
<i>Kenrad E. Nelson</i>	<b>25</b>
Introduction	25
The Classification of Infectious Diseases	26
Epidemiologic Characteristics of Infectious Diseases	37
Surveillance of Infectious Diseases	47
Temporal Trends of Infectious Diseases	48
Recent Trends in Infectious Disease Morbidity and Mortality in the United States	57
Recent Worldwide Trends in Infectious Disease Morbidity and Mortality	57

<b>CHAPTER 3 Study Design</b>	
<i>Carolyn F. Masters Williams and Kenrad E. Nelson</i>	<b>63</b>
Introduction	63
Goals of Epidemiologic Research	63
Choosing a Study Design	65
Some Specific Details of Analytic Study Designs	80
Special Issues	105
<b>CHAPTER 4 Surveillance</b>	
<i>Kenrad E. Nelson and Frangiscos Sifakis</i>	<b>119</b>
Introduction	119
History of Surveillance	120
Reportable Diseases	123
Guidelines for Evaluating a Surveillance System	124
Communication and Presentation of Data	127
Not Just Counting Cases	128
Surveillance as a Tool to Evaluate Vaccines	130
Surveillance as a Tool to Eradicate Disease	132
Specialized Surveillance Programs	134
Other Surveillance Data	140
Other Surveillance Issues	142
Conclusion	143
<b>CHAPTER 5 Outbreak Epidemiology</b>	
<i>Diane M. Dwyer and Carmela Groves</i>	<b>147</b>
Introduction	147
Surveillance and Outbreak Detection	148
Outbreak Investigation	154
Conclusion	177
<b>CHAPTER 6 Mathematical Modeling: The Dynamics of Infection</b>	
<i>Joan L. Aron</i>	<b>181</b>
Introduction	181
Basic Theory for SIR Model	184
Developing Applications	197
Conclusion and Prospects	206
<b>CHAPTER 7 Geographic Information Systems</b>	
<i>Gregory E. Glass</i>	<b>213</b>
Introduction	217
Application Examples	221
Remote Sensing and GIS	236
Data Analysis	237
Conclusion	238
<b>CHAPTER 8 Microbiology Tools for the Epidemiologist</b>	
<i>James Dick and Nikki M. Parrish</i>	<b>241</b>
Introduction	241
Taxonomy, Classification, and Structure of Infectious Agents	242

Viruses	243
Bacteria	246
Fungi	252
Medical Parasitology	256
Diagnostic Microbiology	266
Microscopy	267
Culture	269
Diagnostic Immunology	273
Molecular Diagnostics	277
<b>CHAPTER 9 Molecular Epidemiology and Infectious Diseases</b>	
<i>John S. Francis, Susan M. Harrington, Karen C. Carroll, and William R. Bishai</i>	<b>281</b>
Introduction	281
Application of Typing Techniques	282
Definitions and Background	283
Specific Techniques of Molecular Epidemiology	296
Conclusion	310
<b>CHAPTER 10 The Immune System and Host Defense Against Infections</b>	
<i>Joseph B. Margolick, Richard B. Markham, and Alan L. Scott</i>	<b>317</b>
Introduction	317
Recognition of Pathogens	320
After Antigen Binding: Immune Activation	326
Dealing with the Pathogen: Immune Effector Mechanisms	328
Cytokines of the Innate and Adaptive Immune Systems	333
Tolerance and the Regulation of the Immune Response	337
Selective Immune Deficiencies: Windows into the Normal Functioning of the Immune System	338
Conclusion	340
<b>CHAPTER 11 Vaccines: Past, Present, and Future</b>	
<i>Anita M. Loughlin and Steffanie A. Strathdee</i>	<b>345</b>
Introduction	345
Active versus Passive Immunization	346
Types of Vaccines	347
Immunization Schedules	355
Vaccine Development	357
Vaccine Efficacy and Vaccine Effectiveness	360
Epidemiologic Studies	361
Monitoring Adverse Events and Vaccine Safety	365
Direct Impact of Vaccination	368
The Role of Vaccines in Eradication of Specific Diseases	373
Barriers to Vaccine Implementation and Coverage	378

<b>CHAPTER 12</b>	<b>Nutrition and Infection</b>	
	<i>Alice M. Tang, Ellen Smit, and Richard D. Semba</i>	<b>383</b>
	Introduction	383
	Effects of Infection on Nutritional Status	384
	Effects of Nutrition on Host Defense Mechanisms	384
	Malnutrition and Specific Infectious Diseases	385
	Micronutrients and Immunity to Infectious Diseases	387
	Assessment of Nutritional Status	391
	Conclusion	399
<b>CHAPTER 13</b>	<b>Emerging and New Infectious Diseases</b>	
	<i>Kenrad E. Nelson</i>	<b>407</b>
	Introduction	407
	Some Important HIV/AIDS-Related Infections	408
	Factors in the Emergence of Infectious Diseases	411
	Other Emerging Infectious Diseases	429
	Responses to the Threat of Emerging Infections	480
	Newly Discovered Pathogens	482
	Criteria for Causality	488
<b>CHAPTER 14</b>	<b>Nosocomial Infections</b>	
	<i>Rashid A. Chotani, Mary-Claire Roghmann, and Trish M. Perl</i>	<b>505</b>
	Introduction	505
	History	507
	Methods for Surveillance of Nosocomial Infections	509
	Risk Factors	517
	Etiology and Transmission	519
	Types of Infection	521
	Emerging and Re-Emerging Pathogens	534
	Methicillin-Resistant <i>S. aureus</i>	534
	SARS	536
	Control and Prevention Measures	537
	Conclusion	551
<b>PART II—AIRBORNE TRANSMISSION</b>		<b>575</b>
<b>CHAPTER 15</b>	<b>Epidemiology and Prevention of Influenza</b>	
	<i>Mark C. Steinhoff</i>	<b>577</b>
	Introduction	577
	Clinical Features of Influenza	577
	The Virus	578
	Nomenclature	580
	Mechanisms of Antigenic Variation	583
	Epizootic Infections and Evolutionary History	589
	Prevention Strategies and Treatment	589
	Preparing for the Pandemic [as of June, 2006]	594

<b>CHAPTER 16</b>	<b>Measles</b>	
	<i>William J. Moss and Martin O. Ota</i>	<b>601</b>
	Introduction	601
	Biological Characteristics of the Measles Virus	601
	Laboratory Diagnosis of Measles	608
	Disease Burden	608
	Epidemiologic Characteristics	610
	Measles Mortality	615
	Measles Vaccine	617
	Measles Control, Elimination and Eradication	621
<b>CHAPTER 17</b>	<b>Global Epidemiology of Meningococcal Infections</b>	
	<i>Mark C. Steinhoff</i>	<b>637</b>
	Introduction	637
	Summary	637
	The Organism	637
	Acquisition and Carriage	639
	Disease	639
	Treatment	639
	Risk Factors	640
	Epidemiology	641
	Meningococcal Belt	643
	Vaccines	644
	Vaccine Strategies	646
<b>CHAPTER 18</b>	<b>Tuberculosis</b>	
	<i>Jacqueline S. Coberly and Richard E. Chaisson</i>	<b>653</b>
	Introduction	653
	The Organism	654
	History	658
	Clinical Manifestations	660
	Diagnosis	660
	Therapy	665
	Epidemiology	667
	Bacillus Calmette-Guérin	683
	Tuberculosis Control Strategies	685
	Conclusion	689
<b>CHAPTER 19</b>	<b>The Epidemiology of Acute Respiratory Infections</b>	
	<i>Neil M.H. Graham, Kenrad E. Nelson, and Mark C. Steinhoff</i>	<b>699</b>
	Introduction	699
	Impact on Public Health	700
	Classification of Acute Respiratory Infections	705
	Pathogens Responsible for Acute Respiratory Infections	707
	Risk Factors	713

Efficient Methods of Data Collection to Evaluate Respiratory Epidemiology Prevention	731 733
<b>PART III—DIARRHEAL DISEASES</b>	<b>757</b>
<b>CHAPTER 20 Diarrheal Diseases</b>	
<i>Robert E. Black and Claudio F. Lanata</i>	<b>759</b>
Introduction	759
General Epidemiology	760
Impact of Diarrhea	763
Microbial Etiologies	764
Specific Enteropathogens	769
Transmission Routes	773
Host Risk Factors	776
Immunity	777
Antimicrobial Resistance	777
Strategies for Control	778
<b>PART IV—BLOOD AND BODY FLUID AS A RESERVOIR OF INFECTIOUS DISEASES</b>	<b>787</b>
<b>CHAPTER 21 Human Immunodeficiency Virus Infections and the Acquired Immune Deficiency Syndrome</b>	
<i>Kenrad E. Nelson, Rohit Chitale, and David D. Celentano</i>	<b>789</b>
Introduction	789
HIV Natural History	793
AIDS-related Opportunistic Infections	796
Timing of AIDS-Related Opportunistic Infections	798
HIV Genotypes	802
Impact of Coinfections on HIV	805
Antiretroviral Therapy	811
Therapeutic Regimens to Treat HIV	813
Modes of Transmission and Risk Factors	815
Global Prevalence of HIV	833
Estimating HIV Incidence	852
Social and Cultural Factors	854
Condoms	855
Microbicides	857
Voluntary Counseling and Testing (VCT)	858
Preventing HIV Infections Through Behavioral Intervention	860
Drug Use	863
MSM	864
HIV Prevention Needs for HIV-infected Persons	864
The Search for and HIV/AIDS Vaccine	866
Addressing the AIDS Pandemic	867

**CHAPTER 22 Viral Hepatitis***Kenrad E. Nelson and David L. Thomas* **895**

Introduction	895
Hepatitis A Virus	899
Hepatitis B Virus	907
Delta Hepatitis	921
Hepatitis C Virus	923
Hepatitis E Virus	936
Other Viruses	939

**CHAPTER 23 Sexually Transmitted Diseases***Jonathan M. Zenilman* **963**

Introduction	963
Transmission Mode: The Definition of a Sexually Transmitted Disease	963
Sexual Context Affects Interventions	967
Behavioral Models	968
Gonorrhea	970
Chlamydia	973
Pelvic Inflammatory Disease	976
Syphilis	978
Chancroid	982
Genital Herpes Infection	983
Human Papillomavirus Infection	987
Vaginal Infections	991
Bacterial Vaginosis	993
Control of Sexually Transmitted Diseases as an HIV Prevention Intervention	995
Use of Epidemiologic Models To Guide Control Efforts	996
Interventions to Reduce the Risk of Sexual Exposure Through Promoting Condom Use	998
Core Groups and Targeting	999
Conclusion	1001

**PART V—VECTOR-BORNE AND PARASITE DISEASES** **1021****CHAPTER 24 Emerging Vector-Borne Diseases***Kenrad E. Nelson* **1023**

Introduction	1023
Arthropod-Borne Virus Infections	1024
Flaviviruses	1027
Dengue and Other Mosquito-Borne Infections	1027
West Nile Virus in North America	1031
Japanese Encephalitis Virus	1043
Yellow Fever	1045
Tick-Borne Encephalitis Virus	1048

Other Mosquito-Borne Encephalitis Viruses in North America	1049
Other Tick-Borne Infections	1054
<b>CHAPTER 25 Lyme Disease</b>	
<i>Diane E. Griffin</i>	<b>1063</b>
Introduction	1063
Historical Introduction	1063
Clinical Picture and Biological Information	1064
The Infectious Agent	1068
The Disease	1071
Diagnosis	1073
Treatment	1074
Epidemiology	1074
Exposure/Risk Factors	1077
Control Measures	1077
Vaccine	1079
Conclusion	1080
<b>CHAPTER 26 The Epidemiology and Control of Malaria</b>	
<i>Richard H. Morrow and William J. Moss</i>	<b>1087</b>
Background, History, and Public Health Importance	1087
The Biology of Malaria Parasites and Anopheline Vectors	1091
Pathogenesis in Individual Humans	1099
The Diversity of Falciparum Malaria Disease	1103
Human Activities and the Epidemiology of Malaria	1111
Diagnosis and Treatment	1113
Vaccines against Malaria	1119
Approaches to Control	1121
The Future	1127
<b>CHAPTER 27 Epidemiology of Helminth Infections</b>	
<i>Clive Shiff</i>	<b>1139</b>
Introduction	1139
Hookworm Parasites of Humans	1140
Schistosome Parasites in Humans	1144
Review of Other Geohelminths	1151
<b>Index</b>	<b>1159</b>
