

METHODS IN MOLECULAR BIOLOGY™ 354

Plant-Pathogen Interactions

Methods and Protocols

Edited by

Pamela C. Ronald

 HUMANA PRESS

Contents

Preface	v
Contributors	ix
1 The Use of Protoplasts to Study Innate Immune Responses	1
<i>Ping He, Libo Shan, and Jen Sheen</i>	
2 Marker-Exchange Mutagenesis and Complementation Strategies for the Gram-Negative Bacteria <i>Xanthomonas oryzae</i> pv. <i>oryzae</i>	11
<i>Sang-Won Lee and Pamela C. Ronald</i>	
3 Whole-Genome Analysis to Identify Type III-Secreted Effectors	19
<i>Boris A. Vinatzer and Jean T. Greenberg</i>	
4 <i>In planta</i> Expression of Oomycete and Fungal Genes	35
<i>Thirumala-Devi Kanneganti, Edgar Huitema, and Sophien Kamoun</i>	
5 Use of Nipponbare BAC Clones for Physical Mapping of an <i>R</i> Gene Locus in Rice	45
<i>Jong-Seong Jeon and Pamela C. Ronald</i>	
6 <i>Agrobacterium</i> -Mediated Transformation to Create an Insertion Library in <i>Magnaporthe grisea</i>	57
<i>Sara L. Tucker and Marc J. Orbach</i>	
7 Identification of Components in Disease-Resistance Signaling in <i>Arabidopsis</i> by Map-Based Cloning	69
<i>Yuelin Zhang, Jane Glazebrook, and Xin Li</i>	
8 Yeast Two-Hybrid Approaches to Dissecting the Plant Defense Response	79
<i>Mawsheng Chern, Todd Richter, and Pamela C. Ronald</i>	
9 Use of Rolling-Circle Amplification for Large-Scale Yeast Two-Hybrid Analyses	85
<i>Xiaodong Ding, Yan Zhang, and Wen-Yuan Song</i>	
10 Preparative Denaturing Isoelectric Focusing for Enhancing Sensitivity of Proteomic Studies	99
<i>Antonio Serna-Sanz, Greg Rairdan, and Scott C. Peck</i>	
11 Use of Massively Parallel Signature Sequencing to Study Genes Expressed During the Plant Defense Response	105
<i>Blake C. Meyers, Christian D. Haudenschild, and Kalyan Vemaraju</i>	

12	Use of Microarray Analysis to Dissect the Plant Defense Response	121
	Jane Glazebrook	
13	Use of Robust-Long Serial Analysis of Gene Expression to Identify Novel Fungal and Plant Genes Involved in Host–Pathogen Interactions	131
	Malali Gowda, R. C. Venu, Yulin Jia, Eric Stahlberg, Vishal Pampanwar, Carol Soderlund, and Guo-Liang Wang	
14	Analysis of Gene Function in Rice Through Virus-Induced Gene Silencing	145
	Xin Shun Ding, C. Srinivasa Rao, and Richard S. Nelson	
15	Use of RNA Interference to Dissect Defense-Signaling Pathways in Rice	161
	Chuansheng Mei, Xiangjun Zhou, and Yinong Yang	
16	Virus-Induced Gene Silencing in Plant Roots	173
	Isgouhi Kaloshian	
17	Methods for Engineering Resistance to Plant Viruses	183
	Mysore R. Sudarshana, Gourgopal Roy, and Bryce W. Falk	
18	Development of Genetically Engineered Resistant Papaya for <i>papaya ringspot virus</i> in a Timely Manner: <i>A Comprehensive and Successful Approach</i>	197
	Savarni Tripathi, Jon Suzuki, and Dennis Gonsalves	
	Index	241
