Carlson Plummer McGeary **Physical Geology Earth Revealed** Seventh Edition

McGRAW-HILL INTERNATIONAL EDITION

#### Preface xiii

# Introducing Geology, the Essentials of Plate Tectonics, and Other Important Concepts 2

Who Needs Geology? 4

Supplying Things We Need 4

Protecting the Environment 5

Avoiding Geologic Hazards 5

Understanding Our Surroundings 9

Earth Systems 10

An Overview of Physical Geology—Important Concepts 11

Internal Processes: How the Earth's Internal Heat Engine

Works 13

Earth's Interior 13

The Theory of Plate Tectonics 13

Divergent Boundaries 14

Convergent Boundaries 15

Transform Boundaries 19

Surficial Processes: The Earth's External Heat Engine 21

Geologic Time 24

SUMMARY 25

# Earth's Interior and Geophysical Properties 28

Introduction 30 Evidence from Seismic Waves 30 Earth's Internal Structure 33

The Crust 33

The Mantle 34

The Core 36

Isostasy 40

Gravity Measurements 42

Earth's Magnetic Field 44

Magnetic Reversals 44

Magnetic Anomalies 47

Heat within the Earth 48

Geothermal Gradient 48

Heat Flow 49

#### SUMMARY 50

# The Sea Floor 54

Origin of the Ocean 56

Methods of Studying the Sea Floor 56

Features of the Sea Floor 58

Continental Shelves and Continental Slopes 58...

Submarine Canyons 60

Turbidity Currents 61

Passive Continental Margins 62

The Continental Rise 63

Abyssal Plains 63

Active Continental Margins 64

Oceanic Trenches 64

The Mid-Oceanic Ridge 65

Geologic Activity on the Ridge 65

Biologic Activity on the Ridge 67

Fracture Zones 67

Seamounts, Guyots, and Aseismic Ridges 67

Reefs 69

Sediments of the Sea Floor 71

Oceanic Crust and Ophiolites 71

The Age of the Sea Floor 74

The Sea Floor and Plate Tectonics 74

SUMMARY 74

# Plate Tectonics 78

The Early Case for Continental Drift 81 Skepticism about Continental Drift 83

Paleomagnetism and the Revival of Continental Drift 84 Recent Evidence for Continental Drift 85 History of Continental Positions 86

Seafloor Spreading 86 Hess's Driving Force 86 Explanations 87

Plates and Plate Motion 88

How Do We Know that Plates Move? 88

Marine Magnetic Anomalies 88

Another Test: Fracture Zones and Transform Faults 91

Measuring Plate Motion Directly 92

Divergent Plate Boundaries 92

Transform Boundaries 97

Convergent Plate Boundaries '97
Ocean-Ocean Convergence 97
Ocean-Continent Convergence 99
Continent-Continent Convergence 100

The Motion of Plate Boundaries 103

Plate Size 103

The Attractiveness of Plate Tectonics 104

What Causes Plate Motions? 104 Mantle Plumes and Hot Spots 106

A Final Note 110

SUMMARY 110

## Mountain Belts and the Continental Crust 115

Introduction 116

Characteristics of Major Mountain Belts 119
Size and Alignment 119
Ages of Mountain Belts and Continents 119
Thickness and Characteristics of Rock Layers 120
Patterns of Folding and Faulting 121
Metamorphism and Plutonism 121
Normal Faulting 122

Thickness and Density of Rocks 123
Features of Active Mountain Ranges 124

Evolution of Mountain Belts 124 Orogenies and Plate Convergence 124 Post-Orogenic Uplift and Block-Faulting 129

The Growth of Continents 133
Displaced Terranes 133

SUMMARY 135

## Geologic Structures 138

Tectonic Forces at Work 140 Stress and Strain in the Earth's Lithosphere 140 How Do Rocks Behave When Stressed? 141

Structures as a Record of the Geologic Past 142 Geologic Maps and Field Methods 142

Folds 144

Geometry of Folds 145 Further Description of Folds 147

Fractures in Rock 149 Joints 149 Faults 151

SUMMARY 159

#### Earthquakes 162

Introduction 164
Causes of Earthquakes 166
Seismic Waves 167
Body Waves 167
Surface Waves 169

Locating and Measuring Earthquakes 169
Determining the Location of an Earthquake 169
Measuring the Size of an Earthquake 172
Location and Size of Earthquakes in the United States 175

Effects of Earthquakes 177 Tsunami 181

World Distribution of Earthquakes 184

First-Motion Studies of Earthquakes 184 Earthquakes and Plate Tectonics 184 Earthquakes at Plate Boundaries 186 Subduction Angle 189

Earthquake Prediction and Seismic Risk 189

SUMMARY 194

#### Time and Geology 198

The Key to the Past 200

Relative Time 201

Principles Used to Determine Relative Age 201 Unconformities 206 Correlation 208

The Standard Geologic Time Scale 211

Numerical Age 211

Isotopic Dating 212 Uses of Isotopic Dating 217

Combining Relative and Numerical Ages 218

Age of the Earth 219

Comprehending Geologic Time 220

SUMMARY 222

#### Atoms, Elements, and Minerals 226

Minerals 228

Introduction 228

Atoms and Elements 230

Ions and Crystalline Structures 231 The Silicon-Oxygen Tetrahedron 235 Nonsilicate Minerals 237

Variations in Mineral Structures and Compositions 238

The Physical Properties of Minerals 241

Color 241

Streak 241

Luster 241

Hardness 242

External Crystal Form 243

Cleavage 245

Fracture 247 Specific Gravity 247 Special Properties 248 Chemical Tests 249

The Many Conditions of Mineral Formation 249

SUMMARY 251

#### Volcanism and Extrusive Rocks 254

Pyroclastic Debris and Lava Flows 256

Living with Volcanoes 256

Supernatural Beliefs 256

The Growth of an Island 259

Geothermal Energy 259

Effect on Climate 259

Volcanic Catastrophes 259

Eruptive Violence and Physical Characteristics of Lava 262

Extrusive Rocks and Gases 263

Scientific Investigation of Volcanism 263

Gases 263

Extrusive Rocks 264

Composition 264

Extrusive Textures 265

Types of Volcanoes 267

Shield Volcanoes 268

Cinder Cones 271

Composite Volcanoes 271

Volcanic Domes 275

Lava Floods 276

Submarine Eruptions 280

Pillow Basalts 280

SUMMARY 282

#### Igneous Rocks, Intrusive Activity, and the Origin of Igneous Rocks 286

The Rock Cycle 288 A Plate Tectonic Example 289 Igneous Rocks 290

Igneous Rock Textures 291 Identification of Igneous Rocks 291 Varieties of Granite 294 Chemistry of Igneous Rocks 294

Intrusive Bodies 297

Shallow Intrusive Structures 297 Intrusives that Crystallize at Depth 298

Abundance and Distribution of Plutonic Rocks 299

How Magma Forms 300

Heat for Melting Rock 301 Factors that Control Melting Temperatures 301

How Magmas of Different Compositions Evolve 302
Sequence of Crystallization and Melting 302
Differentiation 304
Partial Melting 304
Assimilation 305
Mixing of Magmas 305

Explaining Igneous Activity by Plate Tectonics 305
Igneous Processes at Divergent Boundaries 305
Intraplate Igneous Activity 306
Igneous Processes at Convergent Boundaries 307

#### SUMMARY 311

#### Weathering and Soil 314

Weathering, Erosion, and Transportation, 316

Weathering and Earth Systems 316

Solar System 316

Atmosphere 316

Hydrosphere 317

Biosphere 317

How Weathering Alters Rocks 317

Effects of Weathering 318

Mechanical Weathering 319

Pressure Release 319

Frost Action 319

Other Processes 320

Chemical Weathering 321

Role of Oxygen 322

Role of Acids 322

Solution Weathering 323

Chemical Weathering of Feldspar 324

Chemical Weathering of Other Minerals 325

Weathering Products 326

Factors Affecting Weathering 326

Soil 327

Soil Horizons 327 Soil Classification 329 Residual and Transported Soils 329 Soils, Parent Material, Time, and Slope 331 Organic Activity 331 Soils and Climate 331 Buried Soils 333

#### SUMMARY 333

#### Mass Wasting 336

Introduction to Mass Wasting 338

Classification of Mass Wasting 339

Rate of Movement 339

Type of Material 339

Type of Movement 339

Controlling Factors in Mass Wasting 342

Gravity 342

Water 343

Triggering Mechanisms 344

Common Types of Mass Wasting 344

Creep 344

Flow 346

Rockfalls and Rockslides 350

Underwater Landslides 353

Preventing Landslides 354

Preventing Mass Wasting of Soil 354

Preventing Rockfalls and Rockslides on Highways 356

#### SUMMARY 358

#### Sediment and Sedimentary Rocks 360

Sediment 363

Transportation 363 Deposition 364

Preservation 365

Lithification 365

Types of Sedimentary Rocks 367

Detrital Rocks 367

Breccia and Conglomerate 367

Sandstone 369

The Fine-Grained Rocks 370

Chemical Sedimentary Rocks 371

Carbonate Rocks 371

Chert 375

Evaporites 375

Organic Sedimentary Rocks 376

Coal 376

The Origin of Oil and Gas 376

Sedimentary Structures 377

Fossils 381

Formations 382

Interpretation of Sedimentary Rocks 383

Source Area 383

Environment of Deposition 385

Plate Tectonics and Sedimentary Rocks 387

SUMMARY 389

# Metamorphism, Metamorphic Rocks, and Hydrothermal Rocks 392

Introduction 394

Factors Controlling the Characteristics of Metamorphic Rocks 395

Composition of the Parent Rock 396

Temperature 396

Pressure 397

Fluids 398

Time 399

Classification of Metamorphic Rocks 399

Nonfoliated Rocks 399

Foliated Rocks 401

Types of Metamorphism 403

Contact Metamorphism 403

Regional Metamorphism 403

Plate Tectonics and Metamorphism 407

Foliation and Plate Tectonics 407

Pressure-Temperature Regimes 407

Hydrothermal Processes 409

Hydrothermal Activity at Divergent Plate Boundaries 410

Water at Convergent Boundaries 411

Metasomatism 411

Hydrothermal Rocks and Minerals 412

#### SUMMARY 414

# Streams and Floods 416

Earth Systems—The Hydrologic Cycle 418

Running Water 419

Drainage Basins 420

Drainage Patterns 420

Factors Affecting Stream Erosion and Deposition 421

Velocity 421

Gradient 423

Channel Shape and Roughness 423

Discharge 423

Stream Erosion 424

Stream Transportation of Sediment 425

Stream Deposition 427

Bars 427

Braided Streams 430

Meandering Streams and Point Bars 430

Flood Plains 431

Deltas 433

Alluvial Fans 435

Flooding 436

Urban Flooding 436

Flash Floods 436

Controlling Floods 440

The Great Flood of 1993 440

Stream Valley Development 443

Downcutting and Base Level 443

The Concept of a Graded Stream 444

Lateral Erosion 445

Headward Erosion 445

Stream Terraces 445

Incised Meanders 447

SUMMARY 449

### Ground Water 452

Introduction 454
Porosity and Permeability 454
The Water Table 455
The Movement of Ground Water 456
Aquifers 458
Wells 459
Springs and Streams 460
Contamination of Ground Water 463
Balancing Withdrawal and Recharge 467
Effects of Groundwater Action 467
Caves, Sinkholes, and Karst Topography 467
Other Effects 470
Hot Water Underground 471

Geothermal Energy 472

SUMMARY 473

# Deserts and Wind Action 476

Distribution of Deserts 478

Some Characteristics of Deserts 479

Desert Features in the Southwestern United States 482

Wind Action 486

Wind Erosion and Transportation 486

Wind Deposition 488

SUMMARY 495

#### Glaciers and Glaciation 498

Introduction 500

Glaciers—Where They Are, How They Form and Move 501
Distribution of Glaciers 501
Types of Glaciers 501
Formation and Growth of Glaciers 501
Movement of Valley Glaciers 504
Movement of Ice Sheets 506

Glacial Erosion 508

Erosional Landscapes Associated with Alpine Glaciation 509 Erosional Landscapes Associated with Continental Glaciation 514

Glacial Deposition 514 Moraines 515

Moraines 515
Outwash 518
Glacial Lakes and Varves 519

The Theory of Glacial Ages 519
Direct Effects of Past Glaciation in North America 521
Indirect Effects of Past Glaciation 523
Evidence for Older Glaciation 526

SUMMARY 527

#### Waves, Beaches, and Coasts 530

100000

Introduction 532 Water Waves 532 Surf 533

Near-Shore Circulation 534 Wave Refraction 534 Longshore Currents 534 Rip Currents 534 Beaches 536

Longshore Drift of Sediment 537 Human Interference with Sand Drift 538 Sources of Sand on Beaches 540

Coasts and Coastal Features 540
Erosional Coasts 540
Depositional Coasts 542
Drowned Coasts 543
Uplifted Coasts 544
The Biosphere and Coasts 545

#### SUMMARY 548

Geologic Resources 550

Introduction 552

Energy Resources 552

Coal 553

Petroleum and Natural Gas 556

Coal Bed Methane 562

Heavy Crude and Oil Sands 562

Oil Shale 564

Uranium 565

Geothermal Power 566

Renewable Energy Sources 568

Metallic Resources 569

Ores Formed by Igneous Processes 569

Ores Formed by Surface Processes 571

Mining 572

Some Important Metals 573

Nonmetallic Resources 576

Construction Materials 576

Fertilizers and Evaporites 577

Other Nonmetallics 577

The Human Perspective 578

SUMMARY 579

Earth's Companions 582

The Earth in Space 584

The Sun 584

The Solar System 585

The Milky Way and the Universe 586

Origin of the Planets 588

The Solar Nebula 588

Formation of the Planets 590

Formation of Moons 590

Final Stages of Planet Formation 590

Formation of Atmospheres 590

Other Planetary Systems 591

Portraits of the Planets 591

Our Moon 592

Description of the Moon 592

Structure of the Moon 595

Origin and History of the Moon 595

Mercury 595

Venus 598

Mars 600

Why Are the Terrestrial Planets So Different? 605

Jupiter 606

Saturn 609

Uranus 610

Neptune 610

Pluto 611

Minor Objects of the Solar System 612

Meteors and Meteorites 612

Meteorites 612

Asteroids 613

Comets 613

Giant Impacts 615

Giant Meteor Impacts 615

SUMMARY 616

Appendix A Identification of Minerals A-1

Appendix B Identification of Rocks A-5

Appendix C The Elements Most Significant to Geology A-8

Appendix D Periodic Table of Elements A-9

Appendix E Selected Conversion Factors A-10

Appendix F Rock Symbols A-11

Appendix G Commonly Used Prefixes, Suffices, and Roots A-12

Glossary G-1

Index I-1
