

Handbooks in TRANSPORT Volume 2

Handbook of
**LOGISTICS AND
SUPPLY-CHAIN
MANAGEMENT**

Edited by A.M. Brewer, K.J. Button and D.A. Hensher

PERGAMON

CONTENTS

Introduction to the series	v
<i>Chapter 1</i>	
Introduction	
ANN M. BREWER, KENNETH J. BUTTON and DAVID A. HENSHER	1
1. Introduction	1
2. How is the new economy different from the old view?	3
3. What is knowledge in the economy?	4
4. The Handbook	7
<i>Part 1. Globalization and International Perspectives</i>	9
<i>Chapter 2</i>	
Perspectives on Global Performance Issues	
TREVOR D. HEAVER	11
1. Introduction	11
2. Logistics service and performance measurement	12
2.1. The aspects of logistics in an economy	13
2.2. The multifaceted and intangible nature of logistics	14
3. Types of performance measure	14
3.1. The use of input and output data	15
3.2. The sources of data	16
3.3. The purposes of performance measurement	17
3.4. Benchmarking	18
4. Performance measurement at different levels	18
4.1. Performance measurement at the micro level	19
4.2. Performance at the macro level	20
5. Issues in the pursuit of good logistics performance	22
5.1. The roles of public policy in logistics	23
5.2. The roles of co-operation and rivalry among companies	25
5.3. Human resource capabilities and information technology	27
6. Conclusion	27
References	28

*Chapter 3***European Transport: Insights and Challenges**

CEBS RUIJGROK	29
1. Introduction	29
2. Trends in transport and logistics	31
2.1. Major European trends and their impact on logistics and transport	31
2.2. Logistics trends in Europe	35
3. Expectations and challenges	42
3.1. Enlargement of the European Union	42
3.2. Infrastructure, regional economies, and the environment	43
3.3. The implementation of EU policy	44
3.4. Development of markets	44
References	45

*Chapter 4***North America: Insights and Challenges**

THOMAS M. CORSI and SANDOR BOYSON	47
1. Evolving logistics best practices	47
2. North American supply chain leaders	50
2.1. Federal Express	50
2.2. Sun Microsystems	50
2.3. Cisco Systems	51
3. Major gaps between leaders and the rest of corporate America	52
4. Bridging the gap: diffusion of the net-centric supply chain	53
4.1. Greater use of third-party logistics for out-sourcing	54
4.2. Rise of the applications service providers	54
4.3. Advances in middleware	55
4.4. Electronic marketplaces/exchanges	56
5. A view to the future	57
References	58

*Chapter 5***International Logistics: A Continuous Search for Competitiveness**

HILDE MEERSMAN and EDDY VAN DE VOORDE	61
1. Introduction	61
2. International logistics: what's in a name?	66
3. Altered environmental factors	68
3.1. Globalization of the production process	68
3.2. Growing international trade	69
3.3. The emergence of supply chain management	71
3.4. Time-based competition (TBC)	71
3.5. Growing global e-commerce	72

4. Consequences for market players	73
5. Conclusion	76
References	76

Part 2. Supply Chain Management 79

Chapter 6

The Development of Thinking in Supply Chain and Logistics Management DARREN HALL and ALAN BRAITHWAITE	81
1. The significance of supply chain management	81
1.1. A matter of definition	82
1.2. The layout of this chapter	83
2. The precursor to supply chain management: functional excellence and its inadequacies	83
2.1. Operations research and manufacturing systems	84
2.2. Materials management	84
2.3. Quality	85
2.4. Purchasing and sourcing strategy	86
3. Leanness: the first supply chain agenda	87
3.1. Muda and supply chain management	87
3.2. Time compression	89
3.3. Push and pull supply chains	90
4. The structure of supply chains	92
4.1. Western and Japanese hierarchies	92
4.2. Network supply structures	94
5. Enlightenment at last, but what is next?	95
References	97

Chapter 7

The Supply Chain Management and Logistics Controversy DOUGLAS M. LAMBERT	99
1. Introduction	99
2. SCM versus logistics	100
3. The marketing perspective	101
4. A conceptual framework of supply chain management	103
4.1. Supply chain network structure	104
4.2. Identifying supply chain members	105
4.3. The structural dimensions of the network	106
5. Supply chain business processes	107
5.1. Customer relationship management process	108
5.2. Customer service management process	108

5.3. Demand management process	109
5.4. Customer order fulfillment process	109
5.5. Manufacturing flow management process	109
5.6. Procurement process	110
5.7. Product development and commercialization	110
5.8. Returns process	111
6. Types of business process links	111
6.1. Managed process links	112
6.2. Monitored process links	112
6.3. Not-managed process links	112
6.4. Non-member process links	112
7. Business process chains	114
8. The management components of supply chain management	116
9. Mapping the supply chain	119
10. Re-engineering improvement into the supply chain	120
11. Implementing integrated supply chain management	121
12. Conclusions	123
References	125

Chapter 8

The Concept of Value: Symbolic Artifact or Useful Tool?

ANN M. BREWER

127

1. Introduction	127
1.1. Defining value	127
1.2. Strategic value management	128
2. The industry view	129
2.1. Value chain	129
2.2. Value creation	130
2.3. Shareholder value	130
3. The resource-based view	131
3.1. Relationship value	131
4. Is value management simply symbolic artifact or useful tool?	136
5. Conclusion	137
References	138

Chapter 9

Intermodal Transportation

BRIAN SLACK

141

1. Introduction	141
2. Definitions	141
3. Origins of intermodal transport	142

4. The role of containerization in contemporary intermodal transportation	144
5. Implications of the container	147
5.1. Terminal activities are highly capitalized	147
5.2. Hubbing	147
5.3. Massive increase in site requirements for intermodal terminals	148
5.4. Scale economies in ships, railways, and planes	148
5.5. Restructuring of the container industry	148
6. Organizational challenges to intermodal transportation	149
6.1. Liability	150
6.2. Documentation	150
6.3. Intermodal intermediaries	150
6.4. Regulatory issues	151
6.5. Intermodal futures	152
References	154
 <i>Part 3. Logistics Management</i>	 155
 <i>Chapter 10</i>	
Integrated Logistics Strategies	
ALAN McKINNON	157
1. Introduction	157
2. A brief history of logistical integration	158
3. Strategy formulation	162
4. Corporate goals	162
5. Value enhancement	163
5.1. Product diversification	163
5.2. Development of higher value products	164
5.3. Improved service quality	164
6. Cost reduction	164
7. Logistical strategies	165
8. The role of freight transport with integrated logistics strategies	167
9. Conclusion	168
References	168
 <i>Chapter 11</i>	
Lean Logistics	
PETER HINES, DANIEL JONES and NICK RICH	171
1. Introduction	171
2. Problem definition	171
3. A new logic	173
4. A distribution example: Toyota parts supply system	176

4.1. Manufacturing: Stamping and chroming	177
4.2. Delivery	177
4.3. Ordering	178
4.4. Warehouse management	178
4.5. Dealers	179
4.6. Network structure	179
5. Targeting improvements within the lean enterprise	180
5.1. Process activity mapping	180
5.2. Supply chain response matrix	181
5.3. Production variety funnel	184
5.4. Quality filter mapping	185
5.5. Demand amplification mapping	187
5.6. Decision point analysis	188
5.7. Physical structure	189
5.8. Summary	190
6. A distribution case	190
7. Where do we go from here?	192
References	193

Chapter 12

Inventory Management	
DONALD WATERS	195
1. Introduction	195
2. Stocks and inventories	195
3. Objectives of inventory management	196
4. Scientific inventory control	198
5. Periodic review systems	199
6. Dependent demand inventory systems	201
7. Just-in-time operations	204
8. Systems with pull	205
9. Reducing stocks in the supply chain	206
10. Changes in aggregate stocks	208
11. Review	210
References	211

Chapter 13

Just-in-time	
SAMANTHA Y. TAYLOR	213
1. The just-in-time philosophy	213
2. Development of JIT	214
3. The aggregate effects of JIT and transportation	216
4. The logistics of transportation	218

5. JIT and the supply chain	219
6. Trends in the industry to improve transportation for JIT	221
7. Final remarks	223
References	224

Chapter 14

Warehousing: A Key Link in the Supply Chain	
KENNETH B. ACKERMAN and ANN M. BREWER	225
1. Introduction	225
2. The challenges of warehouse management	227
3. Warehousing quality	228
3.1. Vehicle turnaround time	229
3.2. Selecting stable stock	230
3.3. Identifying labor-intensive tasks	231
4. e-Commerce and warehousing	231
4.1. Constant growth in warehousing occupancy	232
4.2. e-Commerce and freight patterns	232
4.3. The new/old business of fulfillment	233
4.4. The residential delivery challenge	234
4.5. The nature of revolutions	235
4.6. The social impact	235
5. Conclusion	236
References	237

Chapter 15

Consolidation and Trans-shipment	
MICHEL BEUTHE and EKKI KREUTZBERGER	239
1. Introduction	239
2. Consolidation in logistical networks	239
3. The economics of trans-shipping and network organization	248
References	252

Chapter 16

Logistics Out-sourcing	
MICHAEL BROWNE and JULIAN ALLEN	253
1. Introduction	253
2. Deciding whether to out-source activities	253
3. Growth in out-sourcing in recent years	256
4. Logistics out-sourcing	256
5. Trends in out-sourcing of logistics activities	257
6. Advantages of logistics out-sourcing	259
7. Disadvantages of logistics out-sourcing	260

8. Supply chain developments related to out-sourcing	262
8.1. Rationalizing the vendor network	262
8.2. Contractual agreements between logistics providers and their customers	262
8.3. The role of quality	263
9. Success factors in logistics out-sourcing	264
10. Future trends in logistics out-sourcing	266
References	267
 <i>Part 4. Customer Service</i>	 269
 <i>Chapter 17</i>	
Services Marketing	
ROHIT VERMA	271
1. Introduction	271
2. Services environment	273
2.1. Technological innovations	273
2.2. Global competition, regulatory changes, and increased privatization	273
2.3. Franchising and service supply chains	274
2.4. Changing social trends	274
2.5. Summary	274
3. Understanding service delivery systems	275
3.1. Customer contact	276
3.2. Tangibility	277
3.3. Customization	277
3.4. Recipients of service process	277
3.5. Nature of the relationship with customers	278
3.6. Nature of demand and supply	278
3.7. Mode of service delivery	279
3.8. Type of service processes	279
3.9. Summary	279
4. Major themes in services marketing	280
4.1. Customer satisfaction and loyalty	280
4.2. Service quality	283
4.3. New service design and development	285
4.4. Operational and human issues in services marketing	287
5. Concluding remarks	289
References	289
 <i>Chapter 18</i>	
Understanding and Predicting Customer Choices	
HARMEN OPPEWAL and HARRY TIMMERMANS	293
1. Introduction	293

2. Customer behavior explained: The consumer behavior paradigm	295
3. The prediction of customer choices from utility maximization	298
3.1. Discrete-choice models	299
3.2. Choice sets	302
3.3. Choice constraints	303
3.4. Group decision-making	304
4. Computational process models to describe and predict choice behavior	304
5. Summary and discussion	307
References	309
 <i>Part 5. Logistics Performance Measurement</i>	 311
 <i>Chapter 19</i>	
Costing Theory and Processes	
WAYNE K. TALLEY	313
1. Introduction	313
2. Costing transport service in theory	314
2.1. Resource function	314
2.2. Production function	315
2.3. Cost function	316
2.4. Allocating shared costs	317
3. Costing transport service in practice	319
3.1. Individual-carrier costing processes	319
3.2. Multicarrier costing processes	322
References	323
 <i>Chapter 20</i>	
Benchmarking and Performance Measurement: The Role in Quality Management	
DAVID GILLEN	325
1. Introduction	325
2. Total quality management and competitive strategy	326
3. Benchmarking and performance measures	328
3.1. Benchmarking	328
3.2. Performance measures	330
4. Linking performance measures, enablers, and strategy	331
5. Implementing benchmarking and performance measurement	335
6. Summary	336
References	337

*Chapter 21***Green Logistics**

JEAN-PAUL RODRIGUE, BRIAN SLACK and CLAUDE COMTOIS	339
1. Introduction	339
2. Development and application of green logistics	340
3. The green paradoxes of logistics in transport systems	341
3.1. Costs	342
3.2. Time and speed	344
3.3. Reliability	345
3.4. Warehousing	345
3.5. e-Commerce	345
4. Discussion and evaluation	346
5. Blueprint for green logistics	349
References	350

Part 6. Organizational Logistics **351***Chapter 22***Organizational Logistics: Definition, Components, and Approaches**

ANN M. BREWER	353
1. Introduction	353
2. Definition	355
3. Components of organizational logistics	356
3.1. Core competence	356
3.2. Inter-organizational relationships	358
3.3. Work design	360
3.4. Organizational learning	361
4. An approach to organizational logistics	362
5. Conclusion	363
References	364

*Chapter 23***Public Policy and Logistics**

MARTIN DRESNER and CURTIS M. GRIMM	365
1. Introduction	365
2. Case studies	366
2.1. Public policies regarding regulation and competitive access in the U.S. railroad industry	366
2.2. European public policies	370
2.3. Privatization of port operations in Latin America	372
3. Conclusion	374
References	375

Part 7. Comparative Industry Approaches 377

Chapter 24

Retail Logistics	
JOHN FERNIE	379
1. Introduction	379
2. Supply chain concepts	379
3. Efficient consumer response (ECR)	381
4. Differences in logistics “culture” in international markets	384
5. The internationalization of logistics practice	388
6. The future	389
References	390

Chapter 25

City Logistics and Freight Transport	
RUSSELL G. THOMPSON and EIICHI TANIGUCHI	393
1. Introduction	393
2. Key stakeholders	393
3. City logistics	394
3.1. Residents	396
3.2. Shippers and receivers	397
3.3. Carriers	398
3.4. Government	399
3.5. Case studies	401
References	404

Chapter 26

Manufacturing Logistics	
TONY WHITEING	407
1. Introduction	407
2. Manufacturing in the demand responsive supply chain	408
2.1. Just-in-time manufacturing	409
3. The tools of the trade	410
3.1. Materials requirements planning	410
3.2. Manufacturing resource planning	410
3.3. The relationship between JIT and MRP/MRP II	412
3.4. Distribution requirements planning	413
3.5. Enterprise resource planning	413
3.6. Advanced planning and scheduling systems	414
4. The way ahead	415
References	417

Chapter 27

Maritime Logistics
 MARY R. BROOKS and GRAHAM FRASER 419

1. Introduction 419
2. Possible carrier roles in supply chain management 420
3. Drivers of change 422
4. Risks to be managed 424
5. The implementation of the chosen strategy 426
6. Carrier logistics strategy in a developed country to emerging country trade 427
7. The future of maritime logistics 429

References 430

Chapter 28

Air-freight Logistics
 AISLING J. REYNOLDS-FEIGHAN 431

1. Introduction 431
2. Air-freight industry organization 432
3. Air-freight pricing 435
4. Recent trends in air freight 436
5. Constraints and future prospects 438

References 439

Chapter 29

Bulk Commodity Logistics
 KEITH TRACE 441

1. Introduction 441
2. General principles of bulk commodity logistics 443
 - 2.1. Economies of scale 443
 - 2.2. Handling costs 444
 - 2.3. Integration of the stages in a supply chain 444
 - 2.4. Reducing stocks 444
3. Land transport 445
4. Sea transport 447
 - 4.1. Dry cargo trades 448
 - 4.2. Tanker trades 450
5. Case study: Pilbara iron ore 451

References 454

Chapter 30

Express Delivery
 DIETER SAGE 455

1. Introduction 455

2. Definition of express delivery	456
3. Organization of the CEP services system	458
3.1. Transportation modes	458
3.2. Transported goods	459
3.3. Networks – direct delivery versus re-routing	459
3.4. Communications and information technology	462
4. The market for CEP services	463
5. The future of CEP services	463
5.1. Impediments to CEP services	465
6. Outlook	465
References	466

Part 8. Research and Development 467

Chapter 31

Hazardous Goods	
KATHLEEN L. HANCOCK	469
1. Introduction	469
2. Regulations	469
3. Logistics for hazardous materials transport	471
3.1. Risk assessment	472
3.2. Routing	473
3.3. Routing and scheduling	475
4. Risk management	476
5. Technology	477
References	478

Chapter 32

Dynamics and Spatial Patterns of Intermodal Freight Transport Networks	
HUGO PRIEMUS and ROB KONINGS	481
1. Introduction	481
2. Basic patterns of transport flows: The transformation of the production chain into the transport chain	483
3. Driving forces for changing patterns of goods flow chains: Starting-points for development of intermodal transport networks	486
4. Basic requirements of intermodal transport networks	488
5. Some typical patterns of European intermodal network developments	490
6. Tools for matching intermodal transport networks to patterns of goods flows	495

7. Conclusions	496
References	498

Chapter 33

Supply Chain Statistics	
MICHAEL S. BRONZINI	501
1. Introduction	501
2. Current state of knowledge	501
3. Private firms: Supply chain performance	503
3.1. Shippers	503
3.2. Carriers	505
4. Public sector performance	506
4.1. System infrastructure	507
4.2. System usage	507
4.3. Military supply chains	509
5. Data needs	509
References	510

Chapter 34

New Technologies in Logistics Management	
ROGER R. STOUGH	513
1. Introduction	513
2. The logistics industry	514
3. Base technologies impacting logistics management	514
4. The internet and e-commerce	516
5. Intelligent transportation systems	518
6. Summary and conclusions	519
References	520

Chapter 35

Freight and Logistics Modeling	
GLEN D'ESTE	521
1. Introduction	521
2. The role of modeling	521
3. Approaches to modeling logistics systems	523
3.1. Optimization	523
3.2. Simulation	526
3.3. Network modeling	528
3.4. Other approaches	529
4. Designing and using logistics models	532
5. Concluding remarks	534
References	534
