

VETERINARY MEDICINE

A textbook of the diseases of cattle,
horses, sheep, pigs, and goats

10th Edition

Otto M Radostits,
Clive C Gay,
Kenneth W Hinchcliff,
Peter D Constable

Table of Contents

List of tables	vii
List of illustrations	ix
List of contributors	x
Preface to Tenth Edition	xiii
Introduction	xv
How to use this book	xxi

PART ONE: GENERAL MEDICINE

1. Clinical examination and making a diagnosis3	Congenital defects of the alimentary tract280	11. Diseases of the urinary system . . .543
Clinical examination of the individual	Neoplasms of the alimentary tract . .281	Introduction543
animal3	Diseases of the peritoneum282	Principles of renal insufficiency . . .543
Making a diagnosis22	6. Diseases of the alimentary tract – II293	Clinical features of urinary tract disease545
Prognosis and therapeutic decision-making29	Diseases of the forestomach of ruminants293	Special examination of the urinary system548
Examination of the herd31	Special examination of the alimentary tract and abdomen of cattle301	Principles of treatment of urinary tract disease553
2. General systemic states39	Diseases of the rumen, reticulum and omasum311	Diseases of the kidney555
Hypothermia, hyperthermia, fever . .39	Diseases of the abomasum353	Diseases of the bladder, ureters and urethra561
Septicemia/viremia51	Diseases of the intestines of ruminants375	Congenital defects of the urinary tract571
Toxemia and endotoxemia53	7. Diseases of the liver and pancreas383	12. Diseases of the nervous system575
Hypovolemic, hemorrhagic, maldistributive and obstructive shock63	Diseases of the liver – introduction .383	Principles of nervous dysfunction . .576
Allergy and anaphylaxis69	Principles of hepatic dysfunction .383	Clinical manifestations of disease of the nervous system577
Edema72	Manifestations of liver and biliary disease384	Special examination of the nervous system583
Disturbances of free water, electrolytes and acid–base balance . .73	Special examination of the liver . .387	Principles of treatment of diseases of the nervous system594
Pain102	Principles of treatment in diseases of the liver391	Pathophysiological mechanisms of nervous system disease596
Stress107	Diffuse diseases of the liver391	Diffuse diseases of the brain596
Localized infections110	Focal diseases of the liver395	Focal diseases of the brain606
Disturbances of appetite, food intake and nutritional status112	Diseases of the pancreas396	Diseases of the meninges609
Weight loss or failure to gain weight (ill-thrift)115	8. Diseases of the cardiovascular system399	Toxic and metabolic encephalomyelopathies611
Physical exercise and associated disorders117	Principles of circulatory failure . .399	Psychoses or neuroses612
Diagnosis and care of recumbent adult horses120	Manifestations of circulatory failure401	Epilepsy613
Sudden or unexpected death124	Special examination of the cardiovascular system405	Diseases of the spinal cord613
3. Diseases of the newborn127	Arrhythmias413	Diseases of the peripheral nervous system618
Perinatal and postnatal diseases .127	Diseases of the heart421	Congenital defects of the central nervous system619
Congenital defects132	Diseases of the blood vessels . . .434	13. Diseases of the musculoskeletal system621
Physical and environmental causes of perinatal disease138	9. Diseases of the hemolymphatic and immune systems439	Principal manifestations of musculoskeletal disease621
Diseases of cloned offspring145	Abnormalities of plasma protein concentration439	Diseases of muscles626
Neonatal infection146	Hemorrhagic disease441	Diseases of bones632
Clinical assessment and care of critically ill newborns160	Disorders of red cell number or function450	Diseases of joints637
4. Practical antimicrobial therapeutics173	Disorders of white cells460	Congenital defects of muscles, bones and joints648
Principles of antimicrobial therapy .173	Lymphadenopathy (lymphadenitis) .464	14. Diseases of the skin, conjunctiva and external ear651
Practical usage of antimicrobial drugs177	Diseases of the spleen and thymus464	Principles of treatment of diseases of the skin653
5. Diseases of the alimentary tract – I189	Immune deficiency disorders (lowered resistance to infection)466	Diseases of the epidermis and dermis654
Principles of alimentary tract dysfunction189	Amyloidoses467	Diseases of the hair, wool, follicles, skin glands, horns and hooves661
Manifestations of alimentary tract dysfunction191	Porphyrias469	Diseases of the subcutis664
Special examination195	10. Diseases of the respiratory system471	Granulomatous lesions of the skin667
Principles of treatment in alimentary tract disease203	Principles of respiratory insufficiency471	Cutaneous neoplasms667
Diseases of the buccal cavity and associated organs205	Principal manifestations of respiratory insufficiency473	Congenital defects of the skin669
Diseases of the pharynx and esophagus209	Special examination of the respiratory system480	Congenital skin neoplasms669
Diseases of the nonruminant stomach and intestines215	Principles of treatment and control of respiratory tract disease493	Diseases of the conjunctiva670
	Diseases of the lungs498	Congenital defects of the eyelids and cornea670
	Diseases of the pleura and diaphragm519	Diseases of the external ear670
	Diseases of the upper respiratory tract530	15. Diseases of the mammary gland673
		Introduction673
		Bovine mastitis673
		Mastitis pathogens of cattle697

Mastitis of cattle associated with common contagious pathogens . . .	697
Mastitis associated with teat skin opportunistic pathogens	708
Mastitis of cattle associated with common environmental pathogens	709
Mastitis of cattle associated with less common pathogens	724
Miscellaneous causes of bovine mastitis	726
Control of bovine mastitis	728
Miscellaneous abnormalities of the teats and udder	749
Mastitis-metritis-agalactia syndrome in sows	754
Mastitis of sheep	759
Mastitis of goats	761
Mastitis of mares	762

PART TWO: SPECIAL MEDICINE

16. Diseases associated with bacteria – I	765
Introduction to infectious disease	765
Diseases associated with <i>Streptococcus</i> species	768
Diseases associated with <i>Staphylococcus</i> species	783
Diseases associated with <i>Corynebacterium</i> , <i>Rhodococcus</i> , <i>Actinobaculum</i> and <i>Arcanobacterium</i> species	787
Diseases associated with <i>Listeria</i> species	805
Diseases associated with <i>Erysipelothrix rhusiopathiae</i> (insidiosus)	810
Diseases associated with <i>Bacillus</i> species	815
17. Diseases associated with bacteria – II	821
Diseases associated with Clostridium species	821
18. Diseases associated with bacteria – III	847
Diseases associated with <i>Escherichia coli</i>	847
<i>Escherichia coli</i> infections in weaned pigs	888
Diseases associated with <i>Salmonella</i> species	896
Diseases associated with <i>Pasteurella</i> species	921
Diseases associated with <i>Brucella</i> species	963
Diseases associated with <i>Moraxella</i> , <i>Histophilus</i> and <i>Haemophilus</i> species	994
19. Diseases associated with bacteria – IV	1007
Diseases associated with <i>Mycobacterium</i> spp.	1007
Diseases associated with <i>Actinomyces</i> , <i>Actinobacillus</i> , <i>Nocardia</i> and <i>Dermatophilus</i> spp.	1044
20. Diseases associated with bacteria – V	1061
Diseases associated with <i>Fusobacterium</i> and <i>Bacteroides</i> spp.	1061

Diseases associated with <i>Pseudomonas</i> and <i>Burkholderia</i> spp.	1081
Diseases associated with <i>Campylobacter</i> spp.	1085
Diseases associated with <i>Leptospira</i> <i>Borrelia</i> spp.	1094
Diseases associated with <i>Mycoplasma</i> spp.	1123
21. Disease associated with viruses and Chlamydia – I	1157
Viral diseases with manifestations attributable to involvement of the body as a whole	1157
Viral diseases characterized by alimentary tract signs	1223
22. Diseases associated with viruses and chlamydia – II	1307
Viral diseases characterized by respiratory signs	1307
Viral diseases characterized by nervous signs	1368
Viral diseases characterized by skin lesions	1418
Diseases associated with Chlamidiae	1433
23. Diseases associated with prions	1439
24. Diseases associated with Rickettsiales	1455
25. Diseases associated with algae and fungi	1471
Algal diseases	1471
Fungal diseases	1471
Dermatomycoses	1476
26. Diseases associated with protozoa	1483
Diseases associated with trypanosomes	1531
27. Diseases associated with helminth parasites	1541
Nematode diseases of the alimentary tract	1541
Nematode diseases of other organs	1564
Diseases associated with trematodes and cestodes	1576
28. Diseases associated with arthropod parasites	1585
Ked and louse infestations	1596
Tick infestations	1599
Miscellaneous flies, midges and mosquitoes	1603
Mite infestations	1606
29. Metabolic diseases	1613
Production diseases	1618
30. Diseases associated with nutritional deficiencies	1691
Deficiencies of energy and protein	1697
Diseases associated with deficiencies of mineral nutrients	1698
Disease associated with deficiencies of fat-soluble vitamins	1771
Diseases associated with deficiency of water-soluble vitamins	1778

31. Diseases associated with physical agents	1785
32. Diseases associated with inorganic and farm chemicals	1798
Diseases associated with inorganic poisons	1799
Diseases associated with farm chemicals	1830
Miscellaneous farm chemicals	1846
33. Diseases associated with toxins in plants, fungi, cyanobacteria, clavibacteria, insects and animals	1851
Diseases associated with major phytotoxins	1851
Poisoning by mycotoxins	1897
Poisoning by cyanophyte (cyanobacterial) toxins	1913
Poisoning by tunicamyluracils (corynetoxins)	1914
Diseases associated with zootoxins (animal bites and stings)	1915
34. Diseases associated with allergy	1921
35. Diseases associated with the inheritance of undesirable characteristics	1937
Diseases characterized by chromosomal anomalies	1939
Inherited defects of the body as a whole	1940
Inherited defects of the alimentary tract	1943
Inherited defects of the circulatory system	1944
Inherited defects of the urinary tract	1948
Inherited defects of the nervous system	1948
Inherited defects of the musculoskeletal system	1957
Inherited defects of the skin	1973
Miscellaneous inherited defects	1976
36. Specific diseases of uncertain etiology	1981
Diseases characterized by systemic involvement	1981
Diseases characterized by alimentary tract involvement	1988
Diseases characterized by respiratory tract involvement	1996
Diseases characterized by nervous system involvement	2004
Diseases characterized by involvement of the musculoskeletal system	2021
Diseases characterized by involvement of the skin	2035

APPENDICES

Conversion factors	2045
Reference laboratory values	2047
Drug doses – horses and ruminants	2051
Drug doses – pigs	2064
Index	2067
