

The background of the cover is a blue-tinted photograph of a climbing carabiner and rope against a rock face. The carabiner is a D-shaped metal piece with a locking mechanism, and the rope is a thick, braided climbing rope. The rock face is textured and appears to be part of a climbing wall.

# Materials in sports equipment

# Contents

	<i>Preface</i>	xi
	<i>List of contributors</i>	xiii
1	<b>Introduction</b>	<b>1</b>
	M. JENKINS, UNIVERSITY OF BIRMINGHAM, UK	
1.1	Factors determining sports performance	1
1.2	Materials, processing and design in the pole vault	1
1.3	The relationship between materials technology and design – fencing masks	4
1.4	Overview of ‘materials in sport’	5
1.5	References	6
<b>Part I</b>	<b>General uses</b>	<b>7</b>
2	<b>Foam protection in sport</b>	<b>9</b>
	N.J. MILLS, UNIVERSITY OF BIRMINGHAM, UK	
2.1	Introduction	9
2.2	Static foam protection products	9
2.3	Soccer shin and ankle protectors	20
2.4	Rigid foam protection for sports wear – cycle helmets	30
2.5	Further sources of information	43
2.6	Summary	43
2.7	Acknowledgements	44
2.8	References	44
3	<b>Performance of sports surfaces</b>	<b>47</b>
	C. WALKER, UNIVERSITY OF STRATHCLYDE, SCOTLAND, UK	
3.1	Introduction	47
3.2	Why do we have a diversity of sports surfaces?	47

3.3	The measurement of surface performance	48
3.4	Sport-specific surfaces	52
3.5	Future developments	63
3.6	References	63
<b>4</b>	<b>Running shoe materials</b>	<b>65</b>
	N.J. MILLS, UNIVERSITY OF BIRMINGHAM, UK	
4.1	Introduction	65
4.2	Shoe construction	66
4.3	Running	77
4.4	Shoe foam stress analysis	80
4.5	Foam durability	90
4.6	Discussion	96
4.7	Future developments	97
4.8	Acknowledgements	97
4.9	References	97
<b>5</b>	<b>Balls and ballistics</b>	<b>100</b>
	J. MACARI PALLIS, CISLUNAR AEROSPACE, INC., USA AND R.D. MEHTA, SPORTS AERODYNAMICS CONSULTANT, USA	
5.1	Introduction	100
5.2	Basic aerodynamic principles	101
5.3	Cricket	102
5.4	Baseball	105
5.5	Tennis	107
5.6	Golf	110
5.7	Soccer/volleyball	113
5.8	Boomerang	115
5.9	Discus	119
5.10	Javelin	121
5.11	Future trends	123
5.12	References	124
<b>Part II</b>	<b>Particular sports</b>	<b>127</b>
<b>6</b>	<b>Materials in golf</b>	<b>129</b>
	M. STRANGWOOD, UNIVERSITY OF BIRMINGHAM, UK	
6.1	Introduction	129
6.2	Oversized golf drivers	130
6.3	Role of the face	133

6.4	Frequency spectrum testing A	136
6.5	Test variables	137
6.6	CoR–frequency relationship	143
6.7	Variability within a single club type	145
6.8	Head design criteria	146
6.9	Construction effects	153
6.10	Conclusions, further work and design trends	157
6.11	Acknowledgements	158
6.12	References	158
7	<b>Surface engineering in sport</b>	<b>160</b>
	H. DONG, UNIVERSITY OF BIRMINGHAM, UK	
7.1	Introduction	160
7.2	Surface properties and surface engineering	161
7.3	Surface coatings	165
7.4	Surface modification	173
7.5	Surface engineering case studies	183
7.6	Summary	192
7.7	Acknowledgements	192
7.8	References	193
8	<b>Materials and tennis strings</b>	<b>196</b>
	R. CROSS, UNIVERSITY OF SYDNEY, AUSTRALIA	
8.1	Introduction	196
8.2	String types	197
8.3	The function of strings in a racquet	197
8.4	Frame stiffness	199
8.5	Laboratory testing of tennis strings	200
8.6	Quasi-static stretch tests	201
8.7	Energy loss in a string	203
8.8	Perception of string properties	204
8.9	Measurements of tension loss and dynamic stiffness	205
8.10	Tension loss results	207
8.11	Impact dynamics	211
8.12	Coefficient of friction	214
8.13	Discussion	216
8.14	Oblique impacts on tennis strings	217
8.15	Conclusions	218
8.16	References	220
8.17	Further reading and other resources	220

<b>9</b>	<b>Materials and tennis rackets</b>	<b>222</b>
	H. LAMMER AND J. KOTZE, HEAD SPORT AG, AUSTRIA	
9.1	Introduction	222
9.2	Influence of materials on racket technology	222
9.3	Frame materials	229
9.4	Materials for accessories and special parts	237
9.5	Current manufacturing process	239
9.6	Design criteria	244
9.7	Future trends	247
9.8	References	247
<b>10</b>	<b>Materials in bicycles</b>	<b>249</b>
	J.M. MORGAN, UNIVERSITY OF BRISTOL, UK	
10.1	Introduction	249
10.2	Wooden bikes!	249
10.3	Material properties	251
10.4	Failure by fatigue	254
10.5	Bike failures – some case studies	256
10.6	Pedal cycle injury statistics	263
10.7	The exploding wheel rim (case 1)	267
10.8	The Consumer Protection Act	272
10.9	The exploding wheel rim (case 2)	273
10.10	Conclusions	276
10.11	References	277
<b>11</b>	<b>Materials in mountaineering</b>	<b>279</b>
	J.R. BLACKFORD, UNIVERSITY OF EDINBURGH, SCOTLAND, UK	
11.1	Introduction	279
11.2	Ropes	286
11.3	Harnesses and slings	292
11.4	Karabiners	297
11.5	Belay, descending and ascending devices	303
11.6	Rock protection	307
11.7	Ice climbing equipment	311
11.8	Helmets	316
11.9	Future trends	316
11.10	Sources of further information	318
11.11	Acknowledgements	324
11.12	References	324

<b>12</b>	<b>Materials in skiing</b>	<b>326</b>
	H. CASEY, LOS ALAMOS NATIONAL LABORATORY, USA	
12.1	Introduction	326
12.2	The impact of technology on the ski industry	327
12.3	Contribution from materials and manufacturing	330
12.4	Development of competitive and recreational skiing	335
12.5	Future trends	340
12.6	Acknowledgements	341
12.7	References and sources of further information	341
<b>13</b>	<b>Materials in cricket</b>	<b>342</b>
	A.J. SUBIC, RMIT UNIVERSITY, MELBOURNE, AUSTRALIA AND A.J. COOKE, COOKE ASSOCIATES, CAMBRIDGE, UK	
13.1	Introduction	342
13.2	Cricket balls	343
13.3	Cricket bats	353
13.4	Protective equipment in cricket	363
13.5	Conclusions	369
13.6	Future trends	370
13.7	Acknowledgements	372
13.8	References	372
<b>14</b>	<b>Materials in Paralympic sports</b>	<b>376</b>
	J. MACARI PALLIS, CISLUNAR AEROSPACE, INC., USA	
14.1	Introduction	376
14.2	Physical disabilities	377
14.3	Considerations and limitations in design and materials based on Paralympic sport regulations	381
14.4	Devices and materials used in Paralympic sports	381
14.5	Resources	395
14.6	Future trends	396
14.7	Acknowledgements	397
14.8	References	397
