

Corrosion of Aluminium

Christian Vargel

Contents

Foreword	vii
Foreword to the Original French Edition	ix
Introductory Remark	xi
Preface to the Original French Edition	xiii
Acknowledgements	xiv
Part A: Aluminium and Its Alloys	1
CHAPTER A.1	
THE ADVANTAGES OF ALUMINIUM	9
1.1. Lightness	9
1.2. Thermal Conductivity	11
1.3. Electrical Conductivity	12
1.4. Resistance to Corrosion	12
1.5. Suitability for Surface Treatments	13
1.6. The Diversity of Aluminium Alloys	13
1.7. The Diversity of Semi-Products	14
1.8. The Functionality of Castings and Extrusions	15
1.9. The Ease of Use	15
1.10. Recycling	15
References	16
CHAPTER A.2	
PHYSICAL PROPERTIES OF ALUMINIUM	19
CHAPTER A.3	
THE METALLURGY OF ALUMINIUM	23
3.1. Alloy Series	23
3.1.1. Alloying Elements	24
3.1.2. Additives	27
3.1.3. Impurities	28
3.2. Casting Alloys	28
3.2.1. Principal Casting Alloys	28
3.2.2. Alloy Compositions and Properties	29
3.2.3. Methods of Elaboration and Thermal Treatments	31
3.3. Wrought Alloys	32

3.3.1.	Strain-Hardenable Alloys	32
3.3.2.	Age-Hardenable Alloys	48
3.3.3.	Designation of Metallurgical Tempers	56
Reference		57
CHAPTER A.4		
THE MOST COMMON WROUGHT ALUMINIUM ALLOYS		
4.1.	The 1000 Series	61
4.2.	The 3000 Series	61
4.3.	The 5000 Series	62
4.4.	The 8000 Series	65
4.5.	The 2000 Series	65
4.5.1.	The Quenched and Naturally Aged Tempers T4 and T451	65
4.5.2.	The Artificially Aged Tempers T6 (T651) and T8 (T851)	66
4.6.	The 6000 Series	67
4.7.	The 7000 Series	68
4.7.1.	7000 Alloys Without Added Copper	68
4.7.2.	7000 Alloys with Added Copper	69
References		69
CHAPTER A.5		
SELECTION CRITERIA FOR ALUMINIUM ALLOYS		
5.1.	Selection Criteria	73
5.2.	Selecting an Alloy	74
5.2.1.	Selecting an Alloy Series	74
5.2.2.	Selecting a Metallurgical Temper	75
5.3.	Principal Applications of Aluminium and Its Alloys	75
Part B: The Corrosion of Aluminium		
CHAPTER B.1		
THE CORROSION OF ALUMINIUM		
1.1.	Short Historical Introduction	81
1.2.	The Electrochemical Basis of Metal Corrosion	82
1.2.1.	Elementary Electrochemical Reactions of Corrosion	83
1.2.2.	The Double Layer	85
1.3.	The Electrochemical Reactions in the Corrosion of Aluminium	86
1.4.	The Standard Potential of a Metal	88
1.4.1.	Determination of Potentials	88
1.4.2.	Values of Standard Electrode Potentials	90

1.5.	Dissolution Potentials	91
1.5.1.	Measurement of Dissolution Potentials	92
1.5.2.	Dissolution Potential Scales	93
1.5.3.	Dissolution Potential of Aluminium	95
1.6.	Electrochemical Equilibrium (Pourbaix) Diagrams	96
1.7.	The Electrochemical Behaviour of Aluminium	101
1.8.	Aluminium as a Passive Metal	101
1.8.1.	The Structure of the Natural Oxide Film	102
1.8.2.	Influence of Alloying Elements and Additives	105
1.8.3.	Allotropic Modifications	106
1.8.4.	Properties	106
1.8.5.	Passivity of Aluminium and pH Values	106
	References	108

CHAPTER B.2

	TYPES OF CORROSION ON ALUMINIUM	113
2.1.	Uniform Corrosion	113
2.2.	Pitting Corrosion	113
2.2.1.	Initiation and Propagation of Corrosion Pits	115
2.2.2.	Rate of Pitting Corrosion	117
2.2.3.	Characterisation of Pitting Corrosion	118
2.2.4.	Sensitivity of Aluminium Alloys to Pitting Corrosion	121
2.3.	Transgranular and Intergranular (Intercrystalline) Corrosion	122
2.3.1.	Origins of Intercrystalline Corrosion	123
2.3.2.	Unalloyed Aluminium (Series 1000)	127
2.4.	Exfoliation Corrosion	127
2.5.	Stress Corrosion	128
2.5.1.	Mechanisms of Stress Corrosion	129
2.5.2.	Susceptibility of Aluminium Alloys	131
2.5.3.	Detection of Susceptibility to Stress Corrosion	132
2.6.	Filiform Corrosion	134
2.6.1.	Mechanisms of Filiform Corrosion	134
2.6.2.	Factors of Filiform Corrosion	136
2.7.	Water Line Corrosion	137
2.8.	Crevice Corrosion	138
2.9.	Cavitation	140
2.10.	Erosion	141
2.11.	Microbiological Corrosion	141
2.12.	Corrosion Products	142
	References	144

CHAPTER B.3

GALVANIC CORROSION	149
3.1. Aluminium and Galvanic Corrosion	149
3.2. Definition of Galvanic Corrosion	150
3.3. Form of Galvanic Corrosion	150
3.4. Principle of a Battery	151
3.5. Conditions of Galvanic Corrosion	153
3.5.1. Different Types of Metals	153
3.5.2. Presence of an Electrolyte	153
3.5.3. Electrical Continuity between the Metals	153
3.6. Galvanic Corrosion Parameters	154
3.6.1. The Nature of the Electrolyte	154
3.6.2. Polarisation Phenomena	154
3.6.3. The Surface Ratio between the Two Metals	155
3.6.4. The Distance	155
3.6.5. Temperature	155
3.7. Practical Aspects of Galvanic Corrosion	155
3.7.1. Submerged (or Embedded) Structures	156
3.7.2. Emerged Structures	156
3.8. The Influence of the type of Metal in Contact with Aluminium in Emerged Assemblies	157
3.8.1. Unalloyed Steel	157
3.8.2. Galvanised or Cadmium-Plated Steel	157
3.8.3. Stainless Steel	157
3.8.4. Copper and Copper Alloys	158
3.8.5. Mercury	158
3.8.6. Other Metals	158
3.8.7. Graphite and Graphitic Products (Seals, Grease, etc.)	159
3.8.8. Carbon Fibre Composites	159
3.9. Contact Between Aluminium Alloys	159
3.10. Predicting Galvanic Corrosion	160
3.10.1. Dissolution Potentials	160
3.10.2. Polarisation Curves	160
3.10.3. Manufacture of Assemblies and Salt Spray or Immersion Testing	161
3.10.4. Preparation of Assemblies and Testing in Natural Atmospheres	161
3.11. Prevention of Galvanic Corrosion	161
3.11.1. Insulation of the Two Metals Present	161
3.11.2. Painting of the Surfaces in Contact	162

3.11.3. Use of Aluminium Bolts	163
3.11.4. Neutralisation of Galvanic Coupling	163
References	164

CHAPTER B.4

TESTING METHODS	167
4.1. Types of Tests	167
4.1.1. Laboratory Testing	167
4.1.2. Testing in Outdoor Exposure Stations	168
4.1.3. Tests on Prototypes in Feed-back Loops	168
4.2. Goal of Corrosion Testing Methods	168
4.2.1. Routine Testing	168
4.2.2. Assessment of Compatibility	169
4.2.3. Performance of an Alloy in a Given Medium	169
4.2.4. Characterisation of New Products	170
4.2.5. Corrosion Mechanisms	170
4.3. Expression of Results	170
4.3.1. Qualitative Results	170
4.3.2. Quantitative Results	171
4.4. Standardisation of Corrosion Testing Methods	172
4.5. Electrochemical Test Methods	173
4.5.1. Tafel Slopes	173
4.5.2. Polarisation Resistance	177
4.5.3. Limits of Electrochemical Methods	177
References	181

CHAPTER B.5

PROTECTION AGAINST CORROSION	185
5.1. Boehmite Coatings	186
5.2. Chemical Conversion Treatments	187
5.2.1. Chromate Treatment	188
5.2.2. Chromate-Phosphate Treatment	188
5.2.3. Conversion Treatments other than Chromic	190
5.3. Anodising	190
5.3.1. Sulphuric Acid Anodising	191
5.3.2. Chromic Acid Anodising	193
5.3.3. Hard Anodising	193
5.3.4. Phosphoric Acid Anodising	193

5.4.	Paint and other Organic Coatings	193
5.5.	Cathodic Protection	194
5.5.1.	Cathodic Protection of Aluminium	194
5.5.2.	Set-up of Cathodic Protection of Aluminium	196
5.5.3.	Use of Cathodic Protection of Aluminium	196
5.6.	Cladding	197
5.7.	Zinc Coating	199
5.7.1.	Chemical Zinc Deposition	199
5.7.2.	Zinc Metallisation	200
5.8.	Inhibitors	200
5.8.1.	Mechanism of Inhibition	201
5.8.2.	Use of Inhibitors	202
5.8.3.	Choice of Inhibitors	203
	References	204

CHAPTER B.6

	THE CORROSION BEHAVIOUR OF ALUMINIUM ALLOYS	211
6.1.	Factors Related to the Environment	211
6.1.1.	The Nature of the Environment	212
6.1.2.	Concentration	212
6.1.3.	Oxygen Content	213
6.1.4.	pH Value	214
6.1.5.	Temperature	215
6.1.6.	Pressure	215
6.2.	Factors Related to the Metal	215
6.2.1.	Alloy Compositions	215
6.2.2.	Elaboration and Transformation Techniques	216
6.2.3.	Heat Treatments	216
6.2.4.	The Surface State	217
6.3.	Factors Related to Conditions of Use	217
6.3.1.	Joining Techniques	217
6.3.2.	Design Principles	218
6.3.3.	Contacts with other Metals and Materials	218
6.3.4.	Mechanical Stresses	218
6.3.5.	Maintenance	218
6.4.	The Corrosion Resistance of Aluminium Alloys	218
6.4.1.	Casting Alloys	220
6.4.2.	Wrought Alloys	220
	References	229

Part C: Atmospheric Corrosion of Aluminium	231
CHAPTER C.1	
ATMOSPHERIC CORROSION	235
1.1. The Nature of Atmospheric Corrosion	236
References	236
CHAPTER C.2	
THE PARAMETERS OF ATMOSPHERIC CORROSION	241
2.1. Relative Humidity	241
2.2. Rain	244
2.3. Fog	246
2.4. Condensation	246
2.5. Temperature	248
2.6. Gaseous Pollutants	248
2.6.1. Sulphur Dioxide (SO ₂)	249
2.6.2. Carbon Dioxide (CO ₂)	251
2.6.3. Hydrogen Sulphide (H ₂ S)	251
2.6.4. Ammonia (NH ₃)	252
2.6.5. Nitrogen Oxides (NO _x)	253
2.6.6. Volatile Organic Compounds	253
2.6.7. Chlorine (Cl ₂)	253
2.6.8. Chlorides (Cl ⁻)	254
2.7. Dust	254
2.8. Alternating Periods of Dampness and Dryness	256
References	257
CHAPTER C.3	
TYPES OF ATMOSPHERES	261
3.1. The Classic Typology	261
3.2. Standardised Typology	261
3.3. The Predictive Approach	264
References	266
CHAPTER C.4	
THE VARIOUS FORMS OF ATMOSPHERIC CORROSION	269
4.1. Pitting Corrosion	269
4.2. Galvanic Corrosion	269
4.3. Filiform Corrosion	272

4.4. Tarnishing Due to Water Staining	272
4.5. Water Staining Due to Storage of Semi-products	272
References	274

CHAPTER C.5

THE RESISTANCE OF ALUMINIUM TO ATMOSPHERIC CORROSION	277
5.1. The Dome of San Gioacchino Church, a 100-year-old Experience	277
5.2. Atmospheric Corrosion of Aluminium Over Time	278
5.3. Weathering Resistance of Wrought Alloys	281
5.4. Weathering of Casting Alloys	285
5.5. Weathering Resistance of Anodised Semi-products	286
5.5.1. The Nature of the Alloy	287
5.5.2. Anodising Conditions	287
5.5.3. Film Thickness	287
5.5.4. Maintenance	289
References	290

Part D: Corrosion in Water 293

CHAPTER D.1

FRESHWATER	299
1.1. The Physical Chemistry of Water	299
1.2. The Analysis of Water	300
1.2.1. Inorganic Salts	300
1.2.2. Dissolved Gases	301
1.2.3. Matter in Suspension	301
1.2.4. Organic Matter, Soluble or in Suspension	301
1.2.5. pH	302
1.2.6. Electrical Conductivity	302
1.3. Typology of Waters	302
1.4. The Various Forms of Aluminium Corrosion in Natural Waters	304
1.4.1. Pitting Corrosion	304
1.4.2. Galvanic Corrosion	305
1.4.3. Other Forms of Corrosion	306
1.5. Blackening of Aluminium	306
1.6. The Action of Water on Aluminium	308
1.6.1. The Influence of Chloride Concentration	308
1.6.2. The Influence of Sulphate Concentration	309
1.6.3. Influence of Calcium Concentration	309

1.6.4.	Influence of Carbonate Concentration	309
1.6.5.	Influence of Freshwater Treatment	310
1.6.6.	Concentration of Metals Dissolved in Water	311
1.7.	The Influence of Temperature	314
1.7.1.	Reactions of Natural Oxide Films with Water	314
1.7.2.	Temperature and Forms of Corrosion	314
1.7.3.	Influence of Aluminium Composition	318
1.7.4.	Temperature Limits	318
1.8.	The Influence of Oxygen Dissolved in Water	318
1.9.	The Influence of pH	319
1.10.	The Influence of Water Movement and Flow Speed	320
1.11.	Predicting the Resistance of Aluminium in Freshwater	321
1.12.	Examples for the Use of Aluminium in Contact with Freshwater	322
1.12.1.	Irrigation and Conveyance of Water	322
1.12.2.	Central Heating	323
1.12.3.	Condensing Boilers	323
1.12.4.	Various Types of Equipment	324
1.13.	Distilled Water	325
	References	325
CHAPTER D.2		
BRACKISH WATERS AND WASTEWATER		331
2.1.	Brackish Waters	331
2.2.	Wastewater	331
	References	332
CHAPTER D.3		
SEAWATER		335
3.1.	Characteristics of Seawater	336
3.1.1.	Salinity	336
3.1.2.	Dissolved Oxygen	337
3.1.3.	Temperature	337
3.1.4.	pH	338
3.1.5.	Flow Speed	338
3.1.6.	Biological Activity	339
3.2.	Marine Environments	341
3.2.1.	Exposure to Marine Atmosphere	341
3.2.2.	Immersion in Surface Seawater	341
3.2.3.	Immersion in Deep Seawater	341

3.2.4.	Immersion in Deep Waters	341
3.3.	Forms of Corrosion in Seawater	342
3.3.1.	Pitting Corrosion	342
3.3.2.	Galvanic Corrosion	345
3.4.	Marine Applications of Aluminium	346
3.4.1.	Shipbuilding	346
3.4.2.	Coastal Equipment	346
3.4.3.	Desalination of Seawater	347
3.4.4.	Ocean Thermal Energy Conversion	348
	References	350

Part E: The Action of Inorganic Products 353

CHAPTER E.1

	OXIDES AND PEROXIDES	357
1.1.	Oxygen	357
1.2.	Ozone	358
1.3.	Metal Oxides	358
1.4.	Oxides of Copper CuO, Cu ₂ O, Silver Ag ₂ O, Mercury HgO and Lead PbO, Pb ₂ O	359
1.5.	Carbon Monoxide CO and Carbon Dioxide CO ₂	360
1.6.	Sulphur Dioxide SO ₂	361
1.6.1.	Liquid and Gaseous	361
1.6.2.	In Solution	361
1.7.	Sulphuric Anhydride SO ₃	362
1.8.	Nitrogen Oxides NO ₂ , N ₂ O ₄	362
1.9.	Peroxides	362
1.9.1.	Hydrogen Peroxide H ₂ O ₂	362
1.9.2.	Alkali Peroxides	364
1.10.	Oxychlorides	364
	References	365

CHAPTER E.2

	HYDROGEN, NITROGEN, AND NOBLE GASES	369
2.1.	Hydrogen H ₂	369
2.2.	Nitrogen	370
2.3.	Noble Gases: Argon Ar, Helium He, Krypton Kr, Neon Ne, and Xenon Xe	370
	Reference	371

CHAPTER E.3	
METALLOIDS AND HALIDES	375
3.1. Phosphorus P, Arsenic As, and Antimony Sb	375
3.2. Carbon C, Silicon Si, and Boron B	375
3.3. Sulphur S	376
3.3.1. Sulphur	376
3.3.2. Hydrogen Sulphide H ₂ S	376
3.4. Halogens	377
3.4.1. Fluorine F ₂	377
3.4.2. Chlorine Cl ₂	378
3.4.3. Bromine Br	379
3.4.4. Iodine I	379
3.5. Halogen Derivatives	379
3.5.1. Fluorinated Derivatives	379
3.5.2. Chlorinated Derivatives	380
3.5.3. Iodine Derivatives	380
3.6. Sulphides	380
3.6.1. Carbon Disulphide CS ₂	381
3.6.2. Sulphur Hexafluoride SF ₆	381
References	382

CHAPTER E.4	
INORGANIC BASES	385
4.1. Sodium Hydroxide NaOH	385
4.2. Potassium Hydroxide KOH	387
4.3. Lithium Hydroxide LiOH	387
4.4. Calcium Hydroxide Ca(OH) ₂	388
4.5. Barium Hydroxide Ba(OH) ₂ ·8H ₂ O	389
4.6. Ammonia NH ₃	389
4.7. Ammonia Water NH ₄ OH	390
4.8. Hydrazine N ₂ H ₄	392
4.9. Urea NH ₂ CONH ₂	392
References	393

CHAPTER E.5	
INORGANIC ACIDS	397
5.1. Hydracids	397
5.1.1. Hydrochloric Acid HCl	397
5.1.2. Hydrofluoric Acid HF	398

5.1.3.	Hydrobromic Acid HBr and Hydroiodic Acid HI	399
5.1.4.	Hydrocyanic Acid HCN	400
5.2.	Oxacids	400
5.2.1.	Perchloric Acid HClO ₄	400
5.2.2.	Chloric Acid HClO ₃	400
5.2.3.	Hypochloric Acid HOCl	400
5.2.4.	Sulphuric Acid H ₂ SO ₄	401
5.2.5.	Sulphamic Acid H ₂ NSO ₃ H	402
5.2.6.	Fluosulphonic Acid HFSO ₃ and Chlorosulphonic Acid HClSO ₃	403
5.2.7.	Hyposelenic Acid H ₂ SeO ₃ and Selenic Acid H ₂ SeO ₄	403
5.2.8.	Nitric Acid HNO ₃	404
5.2.9.	Nitrating Acid Mixtures	408
5.2.10.	Phosphoric Acid H ₃ PO ₄	411
5.2.11.	Fluorophosphoric Acids H ₂ FPO ₃ , HF ₂ PO ₂ , and HF ₆ PF	413
5.2.12.	Boric Acid H ₃ BO ₃	413
5.2.13.	Chromic Acid CrO ₃	413
References		414

CHAPTER E.6

INORGANIC SALTS

6.1.	Fluorides	419
6.1.1.	Uranium Hexafluoride UF ₆	420
6.1.2.	Fluorosilicates	420
6.1.3.	Fluoroborates	420
6.2.	Chlorides	421
6.2.1.	Sodium Chloride NaCl	421
6.2.2.	Potassium Chloride KCl	423
6.2.3.	Calcium Chloride CaCl ₂	423
6.2.4.	Other Chlorides	424
6.3.	Chlorates and Perchlorates	425
6.4.	Hypochlorites	426
6.5.	Bromides and Iodides	427
6.6.	Sulphates	428
6.6.1.	Ammonium Sulphate (NH ₄) ₂ SO ₄ , Sodium Sulphate Na ₂ SO ₄ ·10H ₂ O, and Potassium Sulphate K ₂ SO ₄	428
6.6.2.	Beryllium Sulphate BeSO ₄ , Magnesium Sulphate MgSO ₄ ·7H ₂ O, Calcium Sulphate CaSO ₄ ·2H ₂ O, Barium Sulphate BaSO ₄ , and Cadmium Sulphate CdSO ₄ ·15H ₂ O	428
6.6.3.	Aluminium Sulphate Al ₂ (SO ₄) ₃ ·18H ₂ O	429

6.6.4.	Zinc Sulphate $\text{ZnSO}_4 \cdot 7\text{H}_2\text{O}$	429
6.6.5.	Copper Sulphate $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$	429
6.6.6.	Other Sulphates	430
6.6.7.	Alums	430
6.7.	Sulphites and Hydrogen Sulphites	431
6.8.	Sodium Thiosulphate $\text{Na}_2\text{S}_2\text{O}_3 \cdot 5\text{H}_2\text{O}$	431
6.9.	Sulphides	431
6.10.	Persulphates	432
6.11.	Nitrates	432
6.11.1.	Ammonium Nitrate NH_4NO_3 , Potassium Nitrate KNO_3 , and Sodium Nitrate NaNO_3	433
6.11.2.	Aluminium Nitrate $\text{Al}(\text{NO}_3)_3$	434
6.11.3.	Other Nitrates	434
6.12.	Nitrites	434
6.13.	Phosphates	435
6.14.	Arsenates and Arsenites	436
6.15.	Carbonates	437
6.15.1.	Ammonium Carbonate $(\text{NH}_4)\text{HCO}_3$, Potassium Carbonate K_2CO_3 , and Sodium Carbonate Na_2CO_3	437
6.15.2.	Other Carbonates	437
6.16.	Silicates and Metasilicates	438
6.17.	Borates, Perborates and Tetraborates	438
6.18.	Cyanides, Cyanates and Thiocyanates	439
6.18.1.	Cyanides	439
6.18.2.	Thiocyanates	439
6.18.3.	Ferrocyanides	439
6.19.	Chromates and Dichromates	439
6.20.	Permanganates	440
6.21.	Carbamates and Sulphamates	440
	References	440

Part F: The Action of Organic Products 443

CHAPTER F.1

HYDROCARBONS	447
1.1. Alkanes	447
1.2. Alkenes	448
1.3. Alkynes	449
1.4. Arenes or Aromatic Hydrocarbons	449

1.5. Terphenyls	450
1.6. Cyclic, Non-Benzenic Hydrocarbons	450
1.7. Fuel for Engines	451
1.8. Petroleum Industry	452
1.9. Drilling Sludge	453
References	453

CHAPTER F.2

HALOGEN DERIVATIVES	457
2.1. Derivatives of Acyclic Hydrocarbons	458
2.1.1. Chlorinated Derivatives	458
2.1.2. Bromine Derivatives	463
2.1.3. Iodine Derivatives	464
2.1.4. Fluorine Derivatives	464
2.2. Derivatives of Aromatic Hydrocarbons	465
2.3. Halogen Derivatives of Acids and Phenols	467
2.3.1. Acyl Halides	467
2.3.2. Halides of Phenols	468
2.3.3. Other Halogenides	468
References	469

CHAPTER F.3

ALCOHOLS, ETHERS, THIOLS AND PHENOLS	473
3.1. The Action of Boiling Alcohols and Dehydrated Phenols on Aluminium	474
3.2. Acyclic Saturated Alcohols	474
3.2.1. Methyl Alcohol CH_3OH	474
3.2.2. Ethyl Alcohol $\text{C}_2\text{H}_5\text{OH}$	475
3.2.3. Higher Alcohols	476
3.3. Acyclic Unsaturated Alcohols	476
3.4. Aromatic Alcohols	477
3.5. Other Alcohols	477
3.6. Polyalcohols	478
3.7. Ethers	480
3.7.1. Acyclic Ethers	480
3.7.2. Vinyl Ethers and Cellulose Ethers	481
3.7.3. Glycol Ethers	481
3.7.4. Aromatic Ethers	482
3.8. Thiols and Their Derivatives	483

3.9. Phenols	484
3.9.1. Phenol C_6H_5OH	485
3.9.2. Other Common Phenols	486
References	486
CHAPTER F.4	
AMINES	491
4.1. Acyclic Amines	492
4.2. Alcohol Amines	493
4.3. Aromatic Amines	496
4.4. Derivatives of Aromatic Amines	497
4.5. Aminophenols	498
4.6. Amino Acids	498
References	499
CHAPTER F.5	
ALDEHYDES AND KETONES	503
5.1. Aliphatic Aldehydes	503
5.1.1. Formaldehyde	504
5.1.2. Other Acyclic Aldehydes	504
5.2. Cyclic Aldehydes	505
5.3. Aromatic Aldehydes	506
5.4. Ketones	506
5.4.1. Aliphatic Ketones	507
5.4.2. Cyclic Ketones	508
5.4.3. Aromatic Ketones	508
References	509
CHAPTER F.6	
CARBOXYLIC ACIDS AND THEIR DERIVATIVES	513
6.1. Acyclic Hydrocarbon Acids	514
6.1.1. Saturated Hydrocarbon Acids	514
6.1.2. Ethylenic Monoacides	520
6.1.3. Monoacid Alcohols	521
6.1.4. Saturated Diacids	522
6.1.5. Unsaturated Diacids	522
6.1.6. Polyacids	522
6.1.7. Aromatic Acids	523
6.1.8. Various Acids	523
6.2. Acid Anhydrides	524

6.3. Salts of Organic Acids	526
6.4. Esters	530
6.5. Amides	538
6.6. Nitriles and Nitrous Derivatives	539
References	540
CHAPTER F.7	
OTHER ORGANIC PRODUCTS	545
7.1. Alkaloids and Heterocyclic Compounds	545
7.2. Glucides	546
Reference	546
Part G: The Effect of Other Environments	547
CHAPTER G.1	
CORROSION IN SOIL	551
1.1. Types of Soil	551
1.1.1. Constituents of Soil	551
1.1.2. Physical Chemistry of Soil	552
1.2. The Influence of the Nature of Soil on the Corrosion Behaviour of Aluminium	552
1.3. Form of Aluminium Corrosion in Soils	554
1.4. Aluminium Corrosion Resistance in Soils	554
1.5. Protection Against Corrosion in Soil	555
References	555
CHAPTER G.2	
THE EFFECT OF STRAY CURRENTS AND ALTERNATING CURRENT	559
2.1. Stray Currents	559
2.2. Alternating Currents	559
References	562
CHAPTER G.3	
FERTILISERS AND HERBICIDES	565
3.1. Fertilisers	565
3.1.1. Solid Fertilisers	566
3.1.2. Liquid Fertilisers	566
3.1.3. Aluminium Applications	566
3.2. Plant-Care Products	567
References	567

CHAPTER G.4	
CONSTRUCTION MATERIALS	571
4.1. The Effect of Concrete	571
4.1.1. Influence of Chlorides	571
4.1.2. Contact with Steel	572
4.1.3. The Action of Stray Currents	573
4.2. The Effect of Plaster	573
4.3. The Effect of Wood	574
4.4. The Effect of Polymers	575
References	576
CHAPTER G.5	
FOOD INDUSTRY	579
5.1. Aluminium and Health	579
5.1.1. Uptake of Aluminium	579
5.1.2. The Harmlessness of Aluminium	580
5.2. Food Compatibility of Aluminium: European Standardisation	581
5.2.1. Unalloyed Aluminium	582
5.2.2. Alloyed Aluminium	582
5.3. Applications of Aluminium in Contact with Foodstuffs	583
5.4. The Resistance of Aluminium in Contact with Foodstuffs	584
References	585
CHAPTER G.6	
CLEANING OF ALUMINIUM	589
6.1. Cleaning of Metallic Surfaces	589
6.2. The Choice of Cleaning Products	590
6.3. Compatibility with Aluminium	590
6.4. Cleaning Materials Used with Food	591
6.5. Cleaning Anodised Surfaces	592
6.6. Sand Blasting	592
6.7. Cleaning by Projection of Ice or Carbonic Ice	592
References	593
CHAPTER G.7	
BEHAVIOUR IN FIRE	597
7.1. Fire Resistance	597
7.1.1. Linear Expansion Coefficient, Thermal Conductivity and Mass Thermal Capacity	597
7.1.2. Young's Modulus and Yield Strength	597

7.2. Reaction to Fire	599
7.3. The Classification of Aluminium Alloys	601
References	601
PRODUCTS THAT MAY BE DANGEROUS IN CONTACT WITH ALUMINIUM	603
General References	607
Glossary	609
Index	617
