Exploring Water Resources

GIS Investigations for the Earth Sciences, ArcGIS[®] Edition

Michelle K. Hall | C. Scott Walker | Anne K. Huth

Larry P. Kendall | Jeff S. Jenness

Table of contents

Introduction

Getting started	iii
Software needed	iii
What you need to know	iii
Using ArcMap	iv
The ArcMap user interface	v
Basic operations	v
Troubleshooting and support options	vi
Working with large numbers	vii
Estimating percent area	viii
Philosophy & design	ix
Philosophy	ix
Instructional Design: The 5-E Learning Cycle	x
Learning science with GIS	x
ArcMap QuickReference Sheet	xi

Investigations

Unit 1 — Where in the World?	1
Warm-up 1.1 — Global water sources	3
Investigation 1.2 — Measuring global water	7
Reading 1.3 — Utilizing global water reservoirs	15
Investigation 1.4 — What if the ice sheets melted?	19
Wrap-up 1.5 — Comparing major reservoirs	29
Unit 2 — The Renewable Resource	33
Warm-up 2.1 — Too little, too much	35
Investigation 2.2 — Global precipitation patterns	49
Reading 2.3 — Moving air and water	57
Investigation 2.4 — U.S. precipitation patterns	65
Investigation 2.5 — Surface water flow	79
Wrap-up 2.6 — The local water picture	85

Unit 3 — Using Water	91
Warm-up 3.1 — Water in your world	93
Investigation 3.2 — Water for many uses	95
Reading 3.3 — Water at work	107
Investigation 3.4 — Feeding a nation	113
Wrap-up 3.5 — Meeting the challenge	121
Unit 4 — Water for a Desert City	123
Warm-up 4.1 — Living in a desert	125
Investigation 4.2 — Water in the balance	129
Reading 4.3 — The Tucson Basin aquifer	141
Investigation 4.4 — Groundwater issues	145
Investigation 4.5 — Conserving water	151
Wrap-up 4.6 — The voice of conservation	159
