Contents

Preface ix

Acknowledgements xi

- 1 Introduction: Software within the information society 1
 - 1.1 Problems with software 1
 - 1.2 The ubiquity of software 4
 - 1.3 A changing world 7
 - 1.4 Rationality and its limitations 9
 - 1.5 How this book will address this issue 15
 - Exercises 17

I The social and organisational context 19

- 2 Organisation and business context 21
 - 2.1 Modelling organisations 22
 - 2.2 Inside organisations 24
 - 2.3 New and evolving systems 29
 - 2.4 Return on investment 31
 - 2.5 Relationship between software and the organisation 35
 - 2.6 Knowledge management and learning organisations 38
 - 2.7 Change and learning 41
 - 2.8 Software enterprise learning 43
 - Exercises 48
- 3 Economic and social context 52
 - 3.1 Individual motivation to work 53
 - 3.2 Global views of motivation 57
 - 3.3 Human resource development 63
 - 3.4 Organisational motivation and market forces 65
 - 3.5 From market failure to the gratis economy 67
 - Exercises 72
- 4 Ethics, codes, and standards 75
 - 4.1 Introduction 75
 - 4.2 Ethics and morality 76

- 4.3 Self-regulation and voluntary codes 80
- 4.4 Standards 84
 - Exercises 91
- 5 Software and the law 94
 - 5.1 Why law is necessary 94
 - 5.2 Intellectual property rights 96
 - 5.3 Contracts 111
 - 5.4 Responsibilities to employees and the public 117
 - 5.5 External threats 122
 - Exercises 124
-  **Processes for acquiring and evolving software 127**
- 6 Software acquisition 129
 - 6.1 Finding software 129
 - 6.2 Legacy software 132
 - 6.3 Buying software off the shelf 136
 - 6.4 Obtaining 'free' software 142
 - 6.5 Acquiring software as a service 148
 - 6.6 Bespoke development, outsourcing and offshoring 151
 - 6.7 Software acquisition decisions 157
 - Exercises 160
- 7 Software activities 163
 - 7.1 Introduction 163
 - 7.2 Requirements elicitation 165
 - 7.3 Initial estimates of cost 170
 - 7.4 Requirements specification 171
 - 7.5 Cost–benefit estimation 173
 - 7.6 Architectural design 174
 - 7.7 Work breakdown and scheduling 176
 - 7.8 Detailed design 177
 - 7.9 Progress monitoring 178
 - 7.10 Coding and unit testing 179
 - 7.11 Integration testing 181
 - 7.12 System testing 182
 - 7.13 Acceptance and system release 183
 - 7.14 Maintenance and evolution 184
 - 7.15 Quality assurance 185
 - Exercises 187
- 8 Software processes 190
 - 8.1 Introduction 191
 - 8.2 Classic process models – sequential and incremental 193

- 8.3 Resolving uncertainties – iteration, evolution and participation 198
 - 8.4 Resolving uncertainties – formal methods 205
 - 8.5 Flexible about functions – timeboxing and rapid application development 205
 - 8.6 Design-driven processes 207
 - 8.7 Open Source methods 213
 - 8.8 Agile processes 215
 - Exercises 220
- 9 Maintaining and evolving software 223
- 9.1 Introduction 223
 - 9.2 Long-life software 225
 - 9.3 Software decay and death 229
 - 9.4 Software recovery and rejuvenation 236
 - 9.5 Maintainability and evolvability 242
 - 9.6 Management guidance 247
 - Exercises 255

Managing software processes 259

- 10 Managing resources 261
- 10.1 Introduction 262
 - 10.2 Setting up a project 264
 - 10.3 Setting project budgets and timescales 269
 - 10.4 Scheduling and controlling projects 285
 - 10.5 Managing the project in context 291
 - Exercises 300
- 11 Managing work-products and digital assets 303
- 11.1 Introduction 303
 - 11.2 Software configuration management 304
 - 11.3 Change control 318
 - 11.4 Configuration management tools 325
 - Exercises 332
- 12 Managing quality 335
- 12.1 Introduction 335
 - 12.2 Quality and what it means 337
 - 12.3 Quality frameworks 353
 - Exercises 364
- 13 Managing uncertainty and risk 366
- 13.1 Introduction 366
 - 13.2 Types of risks 367

- 13.3 Causes and consequences of failure 369
- 13.4 Software risk management 374
- 13.5 Risk identification 377
- 13.6 Risk mitigation 380
 - Exercises 384

- 14 Conclusion: The way forward 387**
 - 14.1 Beginning with problems 387
 - 14.2 Change is inevitable 389
 - 14.3 The controlling response 390
 - 14.4 Value from the human component 391
 - 14.5 Build on top of past great products 392
 - 14.6 Pervasiveness, mobility, and nomadic IT 392
 - 14.7 Going with the flow 393

- Appendix A: Modelling notations 395**
 - A.1 Modelling with diagrams 395
 - A.2 Data-flow modelling 396
 - A.3 Data modelling 402

- Appendix B: Measurement theory 406**

Glossary 409
