JOHN CHANNING

Safety

AT WORK

SEVENTH EDITION

B
H

Contents

Foreword	xvii
Preface to seventh edition	xix
Preface to first edition	xxi
List of contributors	xxiii
Part 1 Law	1
1.1 Explaining the law Brenda Watts	3
1.1.1 Introduction	3
1.1.2 The incident	3
1.1.3 Some possible actions arising from the incident	3
1.1.4 Legal issues of the incident	4
1.1.5 Criminal and civil law	4
1.1.6 Branches of law	5
1.1.7 Law and fact	7
1.1.8 The courts	7
1.1.9 Judicial precedent	17
1.1.10 Court procedure	18
1.1.11 Identity of court personnel	23
1.1.12 Employment Tribunals	25
1.1.13 European community courts (ECJ)	26
1.1.14 Human Rights Courts	28
1.1.15 Sources of English Law	29
1.1.16 Legislation	30
1.1.17 Safety legislation before the Health and Safety at Work etc. Act	36
1.1.18 Safety legislation today	37
1.1.19 Principles developed by the courts	40

1.2	Principal health and safety Acts	S. Simpson	48
1.2.1	The Health and Safety at Work etc. Act 1974		48
1.2.2	The Factories Act 1961		58
1.2.3	Fire precautions		58
1.2.4	The Mines and Quarries Acts 1954–71		58
1.2.5	The Environmental Protection Act 1990		58
1.2.6	The road traffic Acts 1972–91		59
1.2.7	The Public Health Act 1936		59
1.2.8	Petroleum (Consolidation) Act 1928		60
1.2.9	Activity Centres (Young Persons Safety) Act 1995		60
1.2.10	Crown premises		60
1.2.11	Subordinate legislation		61
1.3	Influences on health and safety	J. R. Ridley	64
1.3.1	Introduction		64
1.3.2	The Robens Report		64
1.3.3	Delegation of law-making powers		65
1.3.4	Legislative framework for health and safety		66
1.3.5	Self-regulation		67
1.3.6	Goal-setting legislation		68
1.3.7	European Union		69
1.3.8	European standards		72
1.3.9	Our social partners		74
1.3.10	Social expectations		74
1.3.11	Public expectations		75
1.3.12	Political influences		75
1.3.13	Roles in health and safety		76
1.3.14	Safety culture		77
1.3.15	Quality culture		77
1.3.16	No fault liability		78
1.3.17	Risk assessments		78
1.3.18	Risk aversion		79
1.3.19	Conclusion		80
1.4	Law of contract	R. W. Hodgkin	82
1.4.1	Contracts		82
1.4.2	Contracts of employment		85
1.4.3	Employment legislation		86
1.4.4	Law of sale		88
1.4.5	Specialised legislation affecting occupational safety advisers		90
1.5	Employment law	R. D. Miskin, updated by Sabahhit Ali	94
1.5.1	Introduction		94
1.5.2	Employment law		94
1.5.3	Discrimination		96
1.5.4	Disciplinary procedures		104
1.5.5	Dismissal		107
1.5.6	Summary		116

1.6 Consumer protection	R. G. Lawson	118
1.6.1	Fair conditions of contract	118
1.6.2	A fair quality of goods and services	126
1.6.3	Product safety	128
1.6.4	Product liability	134
1.6.5	Misleading advertising	136
1.6.6	Exclusion clauses	138
1.6.7	Distance selling	141
1.6.8	Stop now orders	141
1.6.9	Consumer redress	142
1.7 Insurance cover and compensation	A. West	145
1.7.1	Workmen's compensation and the State insurance scheme	145
1.7.2	Employer's liability insurance	148
1.7.3	Public Liability insurance	154
1.7.4	Investigation, negotiation and the quantum of damage	155
1.7.5	General	159
1.8 Civil liability	E. J. Skellett, updated by David Greenhalgh	160
1.8.1	Introduction	160
1.8.2	The common law and its development	160
1.8.3	The law of tort	161
1.8.4	Occupier's Liability Acts 1957 and 1984	165
1.8.5	Supply of goods	166
1.8.6	Employer's liability	167
1.8.7	Employer's Liability (Defective Equipment) Act 1969	170
1.8.8	Health and Safety at Work etc. Act 1974	170
1.8.9	Defences to a civil liability claim	170
1.8.10	Volenti non fit injuria	171
1.8.11	Limitation	172
1.8.12	Assessment of damages	172
1.8.13	Fatal accidents	174
1.8.14	'No fault' liability system	175
Part 2 The management of risk		177
2.1 An introduction to risk management	J. E. Channing	179
2.1.1	Introduction	179
2.1.2	The components of risk	181
2.1.3	Strategies to control risk	184
2.1.4	Risk management in the 21st century	188
2.2 Principles of the management of risk	L. Bamber	191
2.2.1	Principles of action necessary to prevent accidents	191
2.2.2	Definitions of hazard, risk and danger	192
2.2.3	Risk management	194
2.2.4	Loss control	197
2.2.5	Degrees of hazard	202

2.2.6	Accident causation models	202
2.2.7	Accident prevention: legal, humanitarian and economic reasons for action	204
2.3	Risk management: organisation and administration for safety J. E. Channing	209
2.3.1	Introduction	209
2.3.2	Organisation structure models	210
2.3.3	Roles and responsibilities	213
2.3.4	Work groups	216
2.3.5	Organisational theory	218
2.3.6	Organisational techniques	220
2.3.7	Culture	224
2.3.8	Potential problems	225
2.3.9	The role of specialists in the organisation	228
2.3.10	Conclusion	229
2.4	Risk management: techniques and practices L. Bamber	230
2.4.1	Risk identification, assessment and control	230
2.4.2	Job safety analysis	236
2.4.3	System safety	241
2.4.4	Systems theory and design	243
2.4.5	System safety engineering	246
2.4.6	Fault tree analysis	247
2.4.7	Probabilistic risk assessments	248
2.4.8	Health and safety in design and planning	249
2.4.9	Quality, Environment, Safety and Health Management Systems (QUENSH)	251
2.4.10	Use of data on accidents	253
2.4.11	Maintenance systems and planned maintenance	254
2.4.12	Damage control	255
2.4.13	Cost-effectiveness of risk management	257
2.4.14	Performance evaluation and appraisal	260
2.4.15	Loss control profiling	263
2.5	The collection and use of accident and incident data Dr A. J. Boyle	267
2.5.1	Introduction	267
2.5.2	Types of accident and incident data	267
2.5.3	Collection of accident and incident data	271
2.5.4	Legal requirements to notify accidents and incidents	275
2.5.5	The use of accident and incident data	275
2.5.6	Epidemiological analysis	283
2.5.7	Accident investigation	285
2.5.8	Accident and incident data and risk assessment data	296
2.5.9	The use of computers	297
Appendix.	UK requirements for reporting accidents and incidents	302

2.6 Practical safety management: systems and techniques	
J. E. Channing	307
2.6.1 Introduction	307
2.6.2 Legal obligations	308
2.6.3 Generic safety management	309
2.6.4 Implementing a regulation within a safety management system	313
2.6.5 Safety management and housekeeping	319
2.6.6 Assessment techniques	321
2.6.7 Proprietary audit systems	326
2.6.8 Safety systems and incidents	327
2.6.9 Learning organisations	328
2.6.10 Safety management systems in small organisations	330
2.6.11 Limitations of safety systems	331
2.6.12 Conclusion	331
2.7 The individual and safety Andrew Hale	333
2.7.1 Introduction: What does this chapter try to do?	333
2.7.2 Individuals as controllers of danger	335
2.7.3 Behavioural science and the human information processor	340
2.7.4 Individual behaviour in the face of danger	355
2.7.5 Change	377
2.7.6 Conclusion	389
2.8 Risk management and behaviour modification	
J. E. Channing	393
2.8.1 Introduction	393
2.8.2 Behaviour modification for employees	395
2.8.3 Behaviour modification for managers and supervisors	406
2.8.4 Applying behaviour concepts to incident investigation	411
2.8.5 Behaviour concepts and the safety management system	412
2.8.6 Risk, behaviour, leadership and commitment	415
2.8.7 Behaviour modification processes: the hazards	416
2.8.8 Behaviour and safety culture	417
2.8.9 Conclusion	418
Part 3 Occupational health and hygiene	423
3.1 The structure and functions of the human body	
Dr T. Coates	425
3.1.1 Introduction	425
3.1.2 History	425
3.1.3 The functions of an occupational health department	427
3.1.4 Overseas developments	428
3.1.5 Risks to health at work	429
3.1.6 Occupational hygiene	429

3.1.7	First aid at work	431
3.1.8	Basic human anatomy and physiology	432
3.1.9	Cancer and other problems of cell growth	447
3.1.10	The body's defence mechanisms	448
3.1.11	Factors determining the effect of substances in the body	449
3.1.12	The assessment of risk to health	449
3.2	Occupational diseases Dr A. R. L. Clark	451
3.2.1	Introduction	451
3.2.2	Toxicology	451
3.2.3	Diseases of the skin	455
3.2.4	Diseases of the respiratory system	458
3.2.5	Diseases from metals	463
3.2.6	Pesticides	468
3.2.7	Solvents	468
3.2.8	Gassing	473
3.2.9	Oxygen deficiency	475
3.2.10	Occupational cancer	476
3.2.11	Physical agents	478
3.2.12	Ionising radiations	479
3.2.13	Noise-induced hearing loss	482
3.2.14	Working in heat	485
3.2.15	Work related upper limb disorders (WRULD)	485
3.2.16	Diseases due to micro-organisms	486
3.2.17	Psycho-social disorders	489
3.2.18	Target organs	490
3.3	Occupational hygiene Dr C. Hartley	494
3.3.1	Recognition	494
3.3.2	Evaluation	494
3.3.3	Control measures	514
3.3.4	Summary	522
3.4	Radiation Dr A. D. Wrixon and updated by Peter Shaw and Dr M. Maslanyj	524
3.4.1	Introduction	524
3.4.2	Structure of matter	524
3.4.3	Radioactivity	525
3.4.4	Ionising radiation	525
3.4.5	Biological effects of ionising radiation	526
3.4.6	Quantities and units	527
3.4.7	Basic principles of radiological protection	528
3.4.8	Legal requirements	532
3.4.9	Health Protection Agency	536
3.4.10	Incidents and emergencies	536
3.4.11	Non-ionising radiation	537
3.5	Noise and vibration R. W. Smith and updated by Terry Bramer	542
3.5.1	What is sound?	542
3.5.2	Other terms commonly found in acoustics	545

3.5.3	Transmission of sound	548
3.5.4	The sound level meter	549
3.5.5	The ear	550
3.5.6	The equivalent noise level	552
3.5.7	Community noise levels	553
3.5.8	Work area noise levels	554
3.5.9	Noise control techniques	555
3.5.10	Vibration	564
3.5.11	Summary	565
3.6	Workplace pollution, heat and ventilation F. S. Gill	567
3.6.1	Methods of assessment of workplace air pollution	568
3.6.2	Measurement of the thermal environment	571
3.6.3	Standards for workplace environments	572
3.6.4	Ventilation control of a workplace environment	574
3.6.5	Assessment of performance of ventilation systems	576
3.7	Lighting E. G. Hooper and updated by Jonathan David	581
3.7.1	Introduction	581
3.7.2	The eye	581
3.7.3	Eye conditions	582
3.7.4	Definitions	583
3.7.5	Types of lighting	585
3.7.6	Illuminances	586
3.7.7	Factors affecting the quality of lighting	588
3.7.8	Emergency lighting	591
3.7.9	Recycling and dangerous substances	592
3.7.10	Use of light measuring instruments	592
3.8	Applied ergonomics J. R. Ridley	594
3.8.1	Introduction	594
3.8.2	Physiology	596
3.8.3	Working environment	609
3.8.4	Manual handling	615
3.8.5	Repetitive actions	616
3.8.6	Plant design	617
3.8.7	Controls and indicators	617
3.8.8	Noise and vibrations	620
3.8.9	Stress	621
3.8.10	Display screen equipment (DSE)	622
3.8.11	Signs and signals	623
3.8.12	The written word	624
3.8.13	Coda	624
Part 4	Workplace safety	627
4.1	Science in engineering safety J. R. Ridley	629
4.1.1	Introduction	629
4.1.2	Structure of matter	629

4.1.3	Properties of chemicals	631
4.1.4	Physical properties	635
4.1.5	Energy and work	641
4.1.6	Mechanics	642
4.1.7	Strength of materials	643
4.1.8	Modes of failure	645
4.1.9	Testing	645
4.1.10	Hydraulics	646
4.1.11	Summary	647
4.2	Fire precautions Ray Chalklen	649
4.2.1	Introduction	649
4.2.2	Basic fire technology	649
4.2.3	Fire hazards and their control	652
4.2.4	Fire alarms and detectors	656
4.2.5	Classification of fires	663
4.2.6	Portable fire-fighting equipment	665
4.2.7	Fixed fire-fighting equipment	672
4.2.8	Fire safety signs	680
4.2.9	Means of escape in case of fire	680
4.2.10	Fire engineering	684
4.2.11	Fire protection measures	685
4.2.12	Legal requirements	689
4.2.13	Fire risk assessment	694
4.2.14	Access and facilities for the fire brigade	697
4.2.15	Fire terminology	698
4.3	Safe use of machinery J. R. Ridley	704
4.3.1	Introduction	704
4.3.2	Strategy for selecting safeguards	711
4.3.3	Safeguarding techniques	714
4.3.4	Powered trucks	725
4.3.5	Lifting equipment	728
4.3.6	Pressure systems	736
4.3.7	Coda	740
4.4	Electricity E. G. Hooper and revised by Chris Buck	743
4.4.1	Alternating and direct currents	743
4.4.2	Electricity supply	744
4.4.3	Statutory requirements	746
4.4.4	Voltage levels	747
4.4.5	Electrical accidents	748
4.4.6	The basic electrical circuit	748
4.4.7	Dangers from electricity	749
4.4.8	Protective means	752
4.4.9	Competence	755
4.4.10	Permits-to-work	756
4.4.11	Static electricity	758
4.4.12	Use of electricity in adverse or hazardous environments	759

4.4.13	Electrical equipment in flammable atmospheres	760
4.4.14	Portable tools	762
4.4.15	Residual current devices	763
4.4.16	Maintenance	764
4.4.17	Conclusion	764
4.5	Statutory examination of plant and equipment	
	J. McMullen and updated by Cameron Sinclair	767
4.5.1	Introduction	767
4.5.2	Legislation	768
4.5.3	Pressure systems	768
4.5.4	Lifting equipment	774
4.5.5	Power presses and press brakes	779
4.5.6	Local exhaust ventilation	781
4.5.7	Electrical equipment and installations	783
4.5.8	Other considerations	785
4.5.9	Conclusion	787
4.6	Safety on construction sites R. Hudson	792
4.6.1	Construction accidents	792
4.6.2	Safe working in the industry	793
4.6.3	Construction site hazards	797
4.6.4	Access	808
4.6.5	Lifting and Equipment Operations	810
4.6.6	Welfare facilities	815
4.6.7	Other relevant legislation	816
4.7	Managing chemicals safely John Adamson	821
4.7.1	Introduction	821
4.7.2	Chemical data	821
4.7.3	Source of information	822
4.7.4	Risk assessments	823
4.7.5	Minimising the risk	827
4.7.6	Legislative requirements	831
4.7.7	Storage of substances	837
4.7.8	Transport	841
4.7.9	Plant and process design	843
4.7.10	Further safety studies	851
4.7.11	Plant modifications	852
4.7.12	Safe systems of work	852
4.7.13	Laboratories	854
4.7.14	Emergency procedures	857
4.7.15	REACH	857
4.7.16	Conclusions	858
Part 5	The environment	861
5.1	The environment: issues, concepts and strategies	
	J. E. Channing	863
5.1.1	Introduction	863
5.1.2	Environmental predictions	864

5.1.3	Sustainable development	865
5.1.4	Environmental hazards	867
5.1.5	Evaluating environmental risks	870
5.1.6	Environmental control strategies	874
5.1.7	Conclusion	876
5.2	Environmental management systems J. E. Channing	878
5.2.1	Introduction	878
5.2.2	Establishing an environmental management system	880
5.2.3	Additional EMAS requirements	889
5.2.4	Conclusions	889
5.3	Waste management Samantha Moss	891
5.3.1	Introduction	891
5.3.2	Waste authorities	892
5.3.3	National waste strategies	893
5.3.4	Defining waste	895
5.3.5	The waste hierarchy	897
5.3.6	Waste management in practice	897
5.3.7	Waste minimisation	913
5.3.8	Other waste management legislation	922
5.3.9	The cost of failure to manage waste effectively	924
5.3.10	Conclusion	925
5.4	Chemicals and the environment J. L. Adamson	928
5.4.1	Introduction	928
5.4.2	Chemical data	928
5.4.3	Risk reduction	929
5.4.4	The Environmental Protection Act 1990 (EPA)	929
5.4.5	Minimising environmental harm	933
5.4.6	Air pollution: control measures and abatement techniques	936
5.4.7	Monitoring atmospheric pollution	938
5.4.8	Control of water pollution	941
5.4.9	Groundwater pollution	942
5.4.10	Waste disposal and duty of care	944
5.4.11	Reuse or recycling of industrial waste	952
5.4.12	Environmental management systems	953
5.4.13	Conclusion	955
5.5	The environment at large G. N. Batts	956
5.5.1	Introduction	956
5.5.2	Environmental issues	957
5.5.3	The environment and the media	963
5.5.4	The global impact of environmental issues	963
5.5.5	Ethical investing and green procurement	964
5.5.6	Increasing environmental legislation, controls and public reporting	966
5.5.7	End-of-pipe control	966

	Contents	xv
5.5.8 Polluter pays		967
5.5.9 Producer or shared responsibility		968
5.5.10 Environmental management system (EMS) and sustainable development		969
5.5.11 Corporate social responsibility		971
Appendix 1 The Institution of Occupational Safety and Health		977
Appendix 2 Reading for the NEBOSH level 6 Diploma examination		978
Appendix 3 List of abbreviations		980
Appendix 4 Organisations providing safety information		986
Appendix 5 List of Statutes, Regulations and Orders		988
Appendix 6 List of Cases		994
Index		999
