

THOMSON

COURSE TECHNOLOGY

Guide to Programming with Python

Michael Dawson

CONTENTS

CHAPTER 1	GETTING STARTED: THE GAME OVER PROGRAM.....	1
	Examining the Game Over Program.....	2
	Introducing Python.....	3
	Python Is Easy to Use	3
	Python Is Powerful	3
	Python Is Object Oriented.....	4
	Python Is a “Glue” Language	4
	Python Runs Everywhere.....	4
	Python Has a Strong Community	4
	Python Is Free and Open Source.....	5
	Setting Up Python on Windows.....	5
	Installing Python on Windows	5
	Setting Up Python on Other Operating Systems.....	6
	Introducing the Python IDLE.....	7
	Programming in Interactive Mode	7
	Programming in Script Mode	10
	Back to the Game Over Program.....	12
	Using Comments	13
	Using Blank Lines	14
	Printing the String.....	14
	Waiting for the User.....	14
	Summary.....	15
	Review Questions.....	15
	Projects.....	16
CHAPTER 2	TYPES, VARIABLES, AND SIMPLE I/O: THE USELESS TRIVIA PROGRAM.....	17
	Introducing the Useless Trivia Program.....	18
	Using Quotes with Strings.....	18
	Introducing the Game Over 2.0 Program	18
	Using Quotes inside Strings	20
	Continuing a Statement on the Next Line	20

Creating Triple-Quoted Strings.....	21
Using Escape Sequences with Strings.....	22
Introducing the Fancy Credits Program	22
Sounding the System Bell	23
Moving Forward a Tab Stop	23
Printing a Backslash	23
Inserting a Newline	24
Inserting a Quote.....	24
Concatenating and Repeating Strings.....	25
Introducing the Silly Strings Program	25
Concatenating Strings	26
Suppressing a Newline.....	27
Repeating Strings	27
Working with Numbers.....	28
Introducing the Word Problems Program.....	28
Understanding Numeric Types.....	30
Using Mathematical Operators.....	30
Understanding Variables.....	32
Introducing the Greeter Program.....	32
Creating Variables.....	33
Using Variables	34
Naming Variables	34
Getting User Input.....	35
Introducing the Personal Greeter Program	35
Using the <code>raw_input()</code> Function.....	36
Using String Methods.....	37
Introducing the Quotation Manipulation Program	37
Creating New Strings with String Methods	38
Using the Right Types.....	40
Introducing the Trust Fund Buddy-Bad Program.....	41
Tracking Down Logical Errors.....	42
Converting Values.....	43
Introducing the Trust Fund Buddy-Good Program.....	43
Converting Strings to Integers.....	44
Using Augmented Assignment Operators	45
Printing Strings and Numbers Together.....	46
Back to the Useless Trivia Program.....	47
Creating the Initial Comments	47
Getting the User Input.....	47
Printing Lowercase and Uppercase Versions of <code>name</code>	48
Calculating <code>dog_years</code>	48
Calculating seconds	48
Printing <code>name</code> Five Times	49
Calculating <code>moon_weight</code> and <code>sun_weight</code>	49

Waiting for the User	49
Summary	49
Review Questions	50
Projects	51

CHAPTER 3	BRANCHING, while LOOPS, AND PROGRAM PLANNING: THE GUESS MY NUMBER GAME.....	53
	Introducing the Guess My Number Game.....	54
	Generating Random Numbers.....	54
	Introducing the Craps Roller Program	54
	Using the import Statement	55
	Accessing randrange()	56
	Using randrange()	56
	Using the if Structure.....	57
	Introducing the Password Program	57
	Examining the if Structure	58
	Creating Conditions	59
	Understanding Comparison Operators	59
	Using Indentation to Create Blocks.....	60
	Building Your Own if Structure.....	61
	Using the if-else Structure.....	61
	Introducing the Granted or Denied Program	61
	Examining the else Statement.....	62
	Using the if-elif-else Structure.....	63
	Introducing the Mood Computer Program	63
	Examining the if-elif-else Structure.....	65
	Creating while Loops.....	67
	Introducing the Three-Year-Old Simulator Program	67
	Examining the while Structure	68
	Initializing the Sentry Variable	69
	Checking the Sentry Variable	69
	Updating the Sentry Variable.....	70
	Avoiding Infinite Loops.....	70
	Introducing the Losing Battle Program	70
	Tracing the Program.....	72
	Creating Conditions That Can Become False	73
	Treating Values as Conditions.....	74
	Introducing the Maitre D' Program	74
	Interpreting Any Value as True or False	75
	Creating Intentional Infinite Loops.....	76
	Introducing the Finicky Counter Program.....	76
	Using the break Statement to Exit a Loop.....	77
	Using the continue Statement to Jump Back to the Top of a Loop.....	77

Understanding When to Use break and continue	78
Using Compound Conditions.....	78
Introducing the Exclusive Network Program	78
Understanding the not Logical Operator	81
Understanding the and Logical Operator	82
Understanding the or Logical Operator.....	83
Planning Your Programs.....	84
Creating Algorithms with Pseudocode.....	84
Applying Stepwise Refinement to Your Algorithms	85
Returning to the Guess My Number Game.....	85
Planning the Program.....	86
Creating the Initial Comment Block.....	87
Importing the random Module	87
Explaining the Game.....	87
Setting the Initial Values.....	87
Creating a Guessing Loop.....	88
Congratulating the Player	88
Waiting for the Player to Quit	88
Summary.....	88
Review Questions.....	89
Projects.....	90

CHAPTER 4 **for LOOPS, STRINGS, AND TUPLES: THE WORD JUMBLE GAME..... 93**

Introducing the Word Jumble Game.....	94
Using for Loops.....	94
Introducing the Loopy String Program	94
Understanding for Loops.....	95
Creating a for Loop	96
Counting with a for Loop.....	96
Introducing the Counter Program	96
Counting Forward	98
Counting by Fives	98
Counting Backwards	99
Using Sequence Operators and Functions with Strings.....	99
Introducing the Message Analyzer Program.....	99
Using the len() Function	100
Using the in Operator	101
Indexing Strings.....	101
Introducing the Random Access Program	102
Working with Positive Position Numbers	103
Working with Negative Position Numbers	104
Accessing a Random String Element	105

Understanding String Immutability.....	105
Building a New String.....	107
Introducing the No Vowels Program	107
Creating Constants	108
Creating New Strings from Existing Ones	109
Slicing Strings.....	110
Introducing the Pizza Slicer Program	110
Introducing None	112
Understanding Slicing	112
Creating Slices.....	113
Using Slicing Shorthand.....	114
Creating Tuples.....	114
Introducing the Hero's Inventory Program	115
Creating an Empty Tuple	116
Treating a Tuple as a Condition	116
Creating a Tuple with Elements.....	117
Printing a Tuple	117
Looping Through a Tuple's Elements	117
Using Tuples.....	118
Introducing the Hero's Inventory 2.0	118
Setting Up the Program	119
Using the len() Function with Tuples.....	119
Using the in Operator with Tuples	120
Indexing Tuples	120
Slicing Tuples	120
Understanding Tuple Immutability.....	121
Concatenating Tuples	121
Back to the Word Jumble Game.....	122
Setting Up the Program	122
Planning the Jumble Creation Section	123
Creating an Empty Jumble String.....	123
Setting Up the Loop	123
Generating a Random Position in word.....	124
Creating a New Version of jumble	124
Creating a New Version of word	124
Welcoming the Player	124
Getting the Player's Guess	125
Congratulating the Player	125
Ending the Game.....	125
Summary.....	125
Review Questions.....	126
Projects.....	127

CHAPTER 5 LISTS AND DICTIONARIES: THE HANGMAN GAME 129

Introducing the Hangman Game.....	130
Using Lists.....	131
Introducing the Hero's Inventory 3.0 Program.....	131
Creating a List	132
Using the <code>len()</code> Function with Lists.....	133
Using the <code>in</code> Operator with Lists.....	133
Indexing Lists	133
Slicing Lists	133
Concatenating Lists	134
Understanding List Mutability	134
Assigning a New List Element by Index	134
Assigning a New List Slice	135
Deleting a List Element.....	135
Deleting a List Slice.....	136
Using List Methods.....	136
Introducing the High Scores Program	136
Setting Up the Program	137
Displaying the Menu	137
Exiting the Program	138
Displaying the Scores	138
Adding a Score	138
Removing a Score	139
Sorting the Scores	139
Reversing the Scores.....	140
Dealing with an Invalid Choice	140
Waiting for the User.....	140
Understanding When to Use Tuples Instead of Lists.....	141
Using Nested Sequences.....	141
Introducing the High Scores 2.0 Program	141
Creating Nested Sequences.....	142
Accessing Nested Elements.....	143
Unpacking a Sequence.....	144
Setting Up the Program	144
Displaying the Scores by Accessing Nested Tuples.....	145
Adding a Score by Appending a Nested Tuple.....	145
Dealing with an Invalid Choice	145
Waiting for the User.....	146
Understanding Shared References.....	146
Using Dictionaries.....	148
Introducing the Geek Translator Program.....	149
Creating Dictionaries	149
Accessing Dictionary Values.....	150
Setting Up the Program	152

Getting a Value	153
Adding a Key-Value Pair	153
Replacing a Key-Value Pair	154
Deleting a Key-Value Pair	155
Wrapping Up the Program	155
Understanding Dictionary Requirements	156
Back to the Hangman Game.....	156
Setting Up the Program	157
Creating Constants	157
Initializing the Variables.....	160
Creating the Main Loop	161
Getting the Player's Guess	161
Checking the Guess.....	162
Ending the Game.....	162
Summary.....	163
Review Questions.....	163
Projects.....	164

CHAPTER 6 **FUNCTIONS: THE TIC-TAC-TOE GAME..... 167**

Introducing the Tic-Tac-Toe Game.....	168
Creating Functions.....	169
Introducing the Instructions Program	169
Defining a Function	171
Documenting a Function	172
Calling a Programmer-Created Function	172
Understanding Abstraction	172
Using Parameters and Return Values.....	173
Introducing the Receive and Return Program	173
Receiving Information through Parameters.....	174
Returning Information through Return Values	175
Understanding Encapsulation	175
Receiving and Returning Values in the Same Function	176
Understanding Software Reuse	177
Using Keyword Arguments and Default Parameter Values.....	177
Introducing the Birthday Wishes Program	178
Using Positional Parameters and Positional Arguments.....	179
Using Positional Parameters and Keyword Arguments	179
Using Default Parameter Values	180
Using Global Variables and Constants.....	182
Understanding Scopes	182
Introducing the Global Reach Program	183
Reading a Global Variable from Inside a Function	184
Shadowing a Global Variable from Inside a Function.....	185

Changing a Global Variable from Inside a Function	185
Understanding When to Use Global Variables and Constants	186
Back to the Tic-Tac-Toe Game.....	186
Planning the Tic-Tac-Toe Game	186
Setting Up the Program	188
The <code>display_instruct()</code> Function.....	189
The <code>ask_yes_no()</code> Function.....	190
The <code>ask_number()</code> Function.....	190
The <code>pieces()</code> Function.....	191
The <code>new_board()</code> Function	191
The <code>display_board()</code> Function	191
The <code>legal_moves()</code> Function.....	192
The <code>winner()</code> Function.....	192
The <code>human_move()</code> Function.....	193
The <code>computer_move()</code> Function.....	194
The <code>next_turn()</code> Function.....	197
The <code>congrat_winner()</code> Function.....	197
The <code>main()</code> Function	198
Starting the Program.....	199
Summary.....	199
Review Questions.....	200
Projects.....	201

CHAPTER 7 **FILES AND EXCEPTIONS: THE TRIVIA CHALLENGE GAME..... 203**

Introducing the Trivia Challenge Game.....	204
Reading from Text Files.....	204
Introducing the Read It Program	204
Opening and Closing a Text File	207
Reading Characters from a Text File	208
Reading Characters from a Line	209
Reading All Lines into a List	210
Looping through a Text File	211
Writing to a Text File.....	211
Introducing the Write It Program	211
Writing Strings to a Text File.....	212
Writing a List of Strings to a Text File	213
Storing Complex Data in Files.....	214
Introducing the Pickle It Program.....	214
Pickling Data and Writing It to a File	215
Reading Data from a File and Unpickling It	216
Using a Shelf to Store Pickled Data	217
Using a Shelf to Retrieve Pickled Data.....	219

Handling Exceptions.....	219
Introducing the Handle It Program	220
Using a try Statement with an except Clause	220
Specifying an Exception Type	221
Handling Multiple Exception Types	222
Getting an Exception's Argument	223
Adding an else Clause.....	224
Back to the Trivia Challenge Game.....	224
Understanding the Data File Layout	224
The open_file() Function	226
The next_line() Function	227
The next_block() Function.....	227
The welcome() Function	228
Setting Up the Game	228
Asking a Question	228
Getting an Answer	229
Checking an Answer.....	229
Getting the Next Question.....	229
Ending the Game.....	229
Starting the main() Function	230
Summary.....	230
Review Questions.....	231
Projects.....	231

CHAPTER 8	SOFTWARE OBJECTS: THE CRITTER CARETAKER PROGRAM.....	233
	Introducing the Critter Caretaker Program.....	234
	Understanding Object-Oriented Basics.....	235
	Creating Classes, Methods, and Objects.....	236
	Introducing the Simple Critter Program	236
	Defining a Class	237
	Defining a Method	238
	Instantiating an Object.....	238
	Invoking a Method	238
	Using Constructors.....	239
	Introducing the Constructor Critter Program	239
	Creating a Constructor	240
	Creating Multiple Objects	240
	Using Attributes.....	241
	Introducing the Attribute Critter Program.....	241
	Initializing Attributes	242
	Accessing Attributes	243
	Printing an Object.....	244

Using Class Attributes and Static Methods.....	245
Introducing the Classy Critter Program.....	245
Creating a Class Attribute.....	247
Accessing a Class Attribute.....	247
Creating a Static Method.....	248
Invoking a Static Method	248
Understanding Object Encapsulation.....	249
Using Private Attributes and Private Methods.....	249
Introducing the Private Critter Program.....	249
Creating Private Attributes.....	250
Accessing Private Attributes.....	250
Creating Private Methods.....	252
Accessing Private Methods.....	252
Respecting an Object's Privacy	253
Understanding When to Implement Privacy.....	253
Understanding New-Style and Old-Style Classes.....	254
Controlling Attribute Access.....	254
Introducing the Property Critter	254
Using Get Methods.....	255
Using Set Methods.....	256
Using Properties.....	256
Back to the Critter Caretaker Program.....	258
The Critter Class	259
Creating the Critter	261
Creating a Menu System.....	261
Starting the Program.....	262
Summary.....	262
Review Questions.....	263
Projects.....	264

CHAPTER 9 **OBJECT-ORIENTED PROGRAMMING: THE BLACKJACK GAME..... 267**

Introducing the Blackjack Game.....	268
Sending and Receiving Messages	268
Introducing the Alien Blaster Program.....	269
Sending a Message	271
Receiving a Message.....	271
Combining Objects.....	271
Introducing the Playing Cards Program	271
Creating the Card Class	272
Creating the Hand Class	273
Using Card Objects.....	274
Combining Card Objects Using a Hand Object.....	274

Using Inheritance to Create New Classes.....	275
Extending a Class through Inheritance.....	276
Introducing the Playing Cards 2.0 Program.....	276
Creating a Base Class	277
Inheriting from a Base Class	278
Extending a Derived Class.....	279
Using the Derived Class	280
Altering the Behavior of Inherited Methods.....	282
Introducing the Playing Cards 3.0 Program.....	282
Creating a Base Class	283
Overriding Base Class Methods.....	283
Invoking Base Class Methods	284
Using the Derived Classes	286
Understanding Polymorphism	287
Creating Modules.....	287
Introducing the Simple Game Program.....	287
Writing Modules.....	288
Importing Modules.....	289
Using Imported Functions and Classes	290
Back to the Blackjack Game.....	291
The cards Module	291
Designing the Classes.....	293
Writing Pseudocode for the Game Loop	294
Importing the cards and games Modules	295
The BJ_Card Class	295
The BJ_Deck Class	296
The BJ_Hand Class	296
The BJ_Player Class	298
The BJ_Dealer Class	299
The BJ_Game Class	299
The main() Function	302
Summary.....	303
Review Questions.....	304
Projects.....	305

CHAPTER 10 **GUI DEVELOPMENT: THE MAD LIB PROGRAM..... 307**

Introducing the Mad Lib Program.....	308
Examining a GUI.....	310
Understanding Event-Driven Programming.....	311
Using a Root Window.....	312
Introducing the Simple GUI Program.....	312
Importing the Tkinter Module	314
Creating a Root Window	314

Modifying a Root Window	314
Entering a Root Window's Event Loop	315
Using Labels.....	315
Introducing the Labeler Program	315
Setting Up the Program	315
Creating a Frame	316
Creating a Label	316
Entering the Root Window's Event Loop	316
Using Buttons.....	317
Introducing the Lazy Buttons Program.....	317
Setting Up the Program	317
Creating Buttons	318
Entering the Root Window's Event Loop.....	319
Creating a GUI Using a Class.....	319
Introducing the Lazy Buttons 2 Program	319
Importing the Tkinter Module.....	319
Defining the Application Class	320
Defining a Constructor Method	320
Defining a Method to Create the Widgets.....	320
Creating the Application Object.....	321
Binding Widgets and Event Handlers.....	321
Introducing the Click Counter Program.....	321
Setting Up the Program	322
Binding the Event Handler	322
Creating the Event Handler.....	323
Wrapping Up the Program	323
Using Text and Entry Widgets and the Grid Layout Manager.....	323
Introducing the Longevity Program.....	324
Setting Up the Program	325
Placing a Widget with the Grid Layout Manager	325
Creating an Entry Widget	326
Creating a Text Widget	327
Getting and Inserting Text with Text-Based Widgets.....	327
Wrapping Up the Program	329
Using Check Buttons.....	329
Introducing the Movie Chooser Program	329
Setting Up the Program	330
Allowing a Widget's Master to Be Its Only Reference	330
Creating Check Buttons.....	331
Getting the Status of a Check Button	332
Wrapping Up the Program	333
Using Radio Buttons.....	333
Introducing the Movie Chooser 2 Program.....	333
Setting Up the Program	334

Creating Radio Buttons.....	335
Getting a Value from a Group of Radio Buttons	336
Wrapping Up the Program	337
Back to the Mad Lib Program.....	337
Importing the Tkinter Module.....	337
The Application Class's Constructor Method	337
The Application Class's create_widgets() Method	338
The Application Class's tell_story() Method	340
The Main Part of the Program.....	341
Summary.....	341
Review Questions.....	342
Projects.....	343

CHAPTER 11 **GRAPHICS: THE PIZZA PANIC GAME..... 345**

Introducing the Pizza Panic Game.....	346
Introducing the pygame and livewires Packages.....	347
Creating a Graphics Window.....	348
Introducing the New Graphics Window Program.....	348
Importing the games Module	349
Initializing the Graphics Screen	350
Starting the Main Loop	350
Setting a Background Image.....	351
Introducing the Background Image Program	351
Loading an Image	352
Setting the Background	352
Understanding the Graphics Coordinate System.....	353
Displaying a Sprite.....	354
Introducing the Pizza Sprite Program.....	354
Loading an Image for a Sprite.....	356
Creating a Sprite.....	357
Adding a Sprite to the Screen	357
Displaying Text.....	359
Introducing the Big Score Program.....	359
Importing the color Module	360
Creating a Text Object.....	360
Adding a Text Object to the Screen	361
Displaying a Message.....	361
Introducing the You Won Program.....	361
Importing the color Module	363
Creating a Message Object	363
Using the Screen's Width and Height.....	364
Adding a Message Object to the Screen.....	364
Moving Sprites.....	364

Introducing the Moving Pizza Program	364
Setting a Sprite's Velocity Values	366
Dealing with Screen Boundaries	366
The Bouncing Pizza Program	366
Setting Up the Program	367
Deriving a New Class from Sprite	367
Overriding the update() Method	368
Wrapping Up the Program	368
Handling Mouse Input	369
Introducing the Moving Pan Program	369
Setting Up the Program	369
Reading Mouse X- and Y-Coordinates	370
Setting Mouse Pointer Visibility	371
Grabbing Input to the Graphics Window	371
Wrapping Up the Program	372
Detecting Collisions	372
Introducing the Slippery Pizza Program	372
Setting Up the Program	374
Detecting Collisions	374
Handling Collisions	374
Wrapping Up the Program	375
Back to the Pizza Panic Game	376
Setting Up the Program	376
The Pan Class	376
The Pizza Class	378
The Chef Class	380
The main() Function	382
Summary	383
Review Questions	384
Projects	384

CHAPTER 12

SOUND, ANIMATION, AND PROGRAM DEVELOPMENT: THE ASTROCRASH GAME..... 387

Introducing the Astrocrash Game	388
Reading the Keyboard	389
Introducing the Read Key Program	389
Setting Up the Program	390
Testing for Keystrokes	390
Wrapping Up the Program	392
Rotating a Sprite	392
Introducing the Rotate Sprite Program	392
Using a Sprite's angle Property	394
Creating an Animation	395

Introducing the Explosion Program	395
Examining the Explosion Images	395
Setting Up the Program	396
Creating a List of Image Files	396
Creating an Animation Object	397
Working with Sound and Music.....	398
Introducing the Sound and Music Program	398
Working with Sounds	398
Working with Music	401
Wrapping Up the Program	402
Planning the Astrocrash Game.....	403
Game Features.....	403
Game Classes	404
Game Assets	404
Creating Asteroids.....	404
The Astrocrash01 Program	404
Setting Up the Program	405
The Asteroid Class	405
The main() Function	407
Rotating the Ship.....	408
The Astrocrash02 Program	408
The Ship Class	408
Instantiating a Ship Object	409
Moving the Ship.....	409
The Astrocrash03 Program	409
Importing the math Module.....	410
Adding Ship Class Variable and Constant.....	410
Modifying Ship's update() Method	411
Firing Missiles.....	412
The Astrocrash04 Program	412
Modifying Ship's update() Method	412
The Missile Class	413
Controlling the Missile Fire Rate.....	416
The Astrocrash05 Program	416
Adding a Ship Class Constant.....	416
Creating Ship's Constructor Method.....	417
Modifying Ship's update() Method	417
Handling Collisions.....	417
The Astrocrash06 Program	418
Modifying Missile's update() Method	419
Adding Missile's die() Method.....	419
Modifying Ship's update() Method.....	419
Adding Ship's die() Method	419
Adding an Asteroid Class Constant	420

Adding Asteroid's die() Method	420
Adding Explosions.....	420
The Astrocrash07 Program	420
The Wrapper Class	421
The Collider Class	422
Modifying the Asteroid Class	423
Modifying the Ship Class	423
Modifying the Missile Class.....	424
The Explosion Class	424
Adding Levels, Scorekeeping, and Theme Music.....	425
The Astrocrash08 Program	425
Importing the color Module	426
The Game Class	426
Adding an Asteroid Class Variable and Constant	431
Modifying Asteroid's Constructor Method.....	431
Modifying Asteroid's die() Method.....	432
Adding a Ship Class Constant.....	432
Modifying Ship's Constructor Method.....	433
Modifying Ship's update() Method.....	433
Adding Ship's die() Method	433
The main() Function	434
Summary.....	434
Review Questions.....	435
Projects.....	436

APPENDIX A **livewires REFERENCE 439**

The livewires Package	440
games Classes	440
The Screen Class.....	440
The Sprite Class.....	442
The Text Class	444
The Message Class	445
The Animation Class	445
The Mouse Class	446
The Keyboard Class	447
The Music class.....	447
games Functions.....	448
games Constants.....	449
color Module Constants	451

INDEX 453
