INTERNATIONAL STUDENT EDITION

DUXBURY APPLIED SERIES

Modeling the Supply Chain

Second Edition

Jeremy F. Shapiro

Not for Sale in the United States

CONTENTS

PART I

INTRODUCTION TO SUPPLY CHAIN MANAGEMENT AND SUPPORTING INFORMATION TECHNOLOGIES 1

CHAPTER 1

Supply Chain Management, Integrated Planning, and Models 3

1.1 Fundamentals of Supply Chain Management 5

1.2 Overview of Supply Chain Models and Modeling Systems 10

1.3 Supply Chain Modeling Incorporates Concepts from Several Management Disciplines 12

1.4 Innovations in Information Technology Require and Support Supply Chain Modeling 23

1.5 Organizational Adaptation to Integrated Supply Chain Management and Modeling 24

Notes 25

References 26

CHAPTER 2

Information Technology 28

2.1 Enterprise Resource Planning Systems 30

2.2 E-Commerce 31

2.3 Radio-Frequency Identification 34

2.4 Comparison of Transactional and Analytical Information Technology 35

2.5 Hierarchy of Supply Chain Systems 39

2.6 Final Thoughts 52

Exercises 53

Notes 56

References 57

PART II
MODELS 59

CHAPTER 3
Fundamentals of Optimization Models: Linear Programming 61

3.1 Linear Programming Modeling Examples 62

3.2 Properties of Linear Programming Models 79

3.3 Interpreting an Optimal Linear Programming Solution 85

3.4 Multiple-Objective Optimization 94

3.5 Stochastic Programming 96

3.6 Final Thoughts 100

Exercises 101

Notes 106

References 107

Appendix 3A: The Simplex Method of Linear Programming 108

CHAPTER 4
Fundamentals of Optimization Models: Mixed-Integer Programming 117

4.1 Mixed-Integer Programming Modeling Vignettes 118

4.2 Distribution Center Location Models 124

4.3 Supply Chain Network Optimization Models 129

4.4 Designing and Implementing Optimization Modeling Systems for Strategic and Tactical Planning 141

4.5 Optimization Software 148

4.6 Final Thoughts 153

Exercises 154

Notes 159

References 159

Appendix 4A: The Branch-and-Bound Method for Mixed-Integer Programming 161

CHAPTER 5

Unified Optimization Methodology for Operational Planning Problems 169

5.1 Heuristic Methods for Combinatorial Optimization Problems 171

5.2 Overview of the Unified Optimization Methodology 180

5.3 Unified Optimization Methodology Applied to Vehicle Routing 189

5.4 Unified Optimization Methodology Applied to Production Scheduling 198

5.5 Final Thoughts 208

Exercises 210

Notes 213

References 215

Appendix 5A: A Recursive Method for Optimizing Routes 216

CHAPTER 6

Overview of Descriptive Models 220

6.1 Demand Forecasting 221

6.2 Simulation Models 233

6.3 Systems Dynamics Models 240

6.4 Activity-Based Costing 243

6.5 Metrics, Data Envelopment Analysis, and the Balanced Scorecard 245

6.6 Final Thoughts 251

Exercises 252

Notes 255

References 256

CHAPTER 7

Supply Chain Decision Databases 257

7.1 Data Aggregations 261

7.2 Facility Data 264

7.3 Transportation Network Data 268

7.4 Inventory Data 274

7.5 Supplier Data 275

7.6 Cost Data 278

7.7 Customer and Market Data 287

7.8 Systemwide and Policy Data 288

7.9 Model Output Data 289

7.10 Mapping and Other Graphical Displays of Data Inputs and Outputs 293

7.11 Connections Among Supply Chain Decision Databases 296

7.12 Final Thoughts 299

Exercises 301

Notes 303

References 304

PART III

APPLICATIONS 305

CHAPTER 8

Strategic and Tactical Supply Chain Planning 307

8.1 Resources and the Resource-Based View of the Firm 309

8.2 Strategic Analysis of Logistics Supply Chains 314

8.3 Two Logistics Strategy Applications 319

8.4 Strategic Analysis of Manufacturing Supply Chains 324

8.5 Two Manufacturing Strategy Applications 332

8.6 Manufacturing Postponement Strategies 339

8.7 Tactical Planning 343

8.8 Two Tactical Planning Applications 344

8.9 Stages of a Strategic Supply Chain Study 348

8.10 Final Thoughts 352

Exercises 353

Notes 356

References 357

CHAPTER 9

Operational Supply Chain Planning 359

9.1 Taxonomies of Operational Planning Problems 360

9.2 Modeling Systems for Operational Planning 370

9.3 Vehicle-Routing System for an E-Commerce Company 376

9.4 Production-Planning System for a Semiconductor Company 384

9.5 Dynamic Sourcing in a Reverse Logistics Company 390

9.6 Final Thoughts 395

Exercises 396

Notes 400

References 401

CHAPTER 10

Inventory Planning 403

10.1 Classical Inventory Models 406

10.2 Inventory Deployment Models for Strategic Supply Chain Design 413

10.3 Strategic Inventory Deployment Across a Retailing Distribution Network 419

10.4 Aggregate Inventory Models for Tactical Supply Chain Planning 423

10.5 Spare-Parts Inventory Management 425

10.6 Inventory Management in Manufacturing Supply Chains 429

10.7 Final Thoughts 437

Exercises 439

Notes 441

References 441

CHAPTER 11

Supply Chain Decision Making Under Uncertainty 443

11.1 Scenario Planning 444

11.2 Contingency Planning 446

11.3 Decision Trees 448

11.4 Stochastic Programming 452

11.5 Stochastic Programming Applications 461

11.6 Risk Management of Supply Chains 467

11.7 Final Thoughts 469

Exercises 470

Notes 473

References 473

PART IV
THE FUTURE 475

CHAPTER 12
Beyond Supply Chain Optimization to Enterprise Optimization 477

12.1 Overview of Enterprise Optimization Modeling 479

12.2 Integrating Supply Chain and Demand Management Decisions 481

12.3 Price- and Location-Sensitive Revenues 483

12.4 Integrating Supply Chain and Marketing Models for Consumer Products 487

12.5 Optimization Models for Competitive Analysis 503

12.6 Integrating Supply Chain and Demand Management Decisions with Corporate Financial Decisions 518

12.7 Optimization Models for Corporate Financial Planning 519

12.8 Financial Planning Issues Facing the Multinational Corporation 528

12.9 Financial Flows Model 532

12.10 Final Thoughts 540

Exercises 542

Notes 547

References 549

CHAPTER 13
Organizational Adaptation to Modeling Systems 551

13.1 How Organizations Make Decisions 553

13.2 Contested Issues About Organizational Decision Making 558

13.3 Achieving Supply Chain Competitive Advantage Through Information Technology 570

13.4 Incentive Contracts 579

13.5 Outlook for the Future of Supply Chain Modeling Systems and Their Applications 583

Exercises 588

Notes 593
