Carbon Finance

The Financial Implications of Climate Change

Sonia Labatt and Rodney R. White
authors of *Environmental Finance*

Guest author Martin Whittaker, Director, MissionPoint Capital Partners
Foreword by Graham Cooper, Publisher, *Environmental Finance* magazine

Contents

Foreword	iii
About the Authors	xiii
Acknowledgments	xv
List of Acronyms	xvii
CHAPTER 1	
Introduction	1
Introduction	1
The Changing Climate	3
The Scientific Context of Climate Change	5
The Political Context of Climate Change	8
Corporate Climate Risk	11
Regulatory Risk	11
Physical Risks	13
Business Risks	14
Climate Policies	15
Mitigation Policies	15
Adaptation Measures	19
Role of the Financial Services Sector	21
Conclusion	23
CHAPTER 2	
The Energy Chain	27
Introduction	27
The Energy Chain and the Value Chain	28
Carbon Policies	32
Policy Approaches	32
The Broader Policy Context	33
National and Local Self-Sufficiency	33
Impacts of Different Users and Uses on Climate Change	34
Users: Business, Households, and Government	34

Uses: Manufacturing, Transportation, Heating, Water, and Solid Waste	34
Sources of Energy: Fossil Fuels	36
Coal	36
Oil	37
Gas	38
Sources of Energy: Nuclear Energy	39
Sources of Energy: Hydroelectric Power	41
Sources of Energy: Renewables	42
Traditional Biomass	44
Wind Energy	44
Solar Energy	46
Tidal Energy and Wave Energy	47
Modern Biomass and Biofuels	48
Geothermal Energy	50
Key Issues	50
A Hydrogen Economy Based on Fuel Cells?	51
Carbon Sequestration	52
Unintended Discharges	53
Financing the Transformation of the Energy Chain: The Role of Venture Capital	53
Conclusion	55

CHAPTER 3

Regulated and Energy-Intensive Sectors	57
Introduction	57
Power Industry	57
Integrated Oil and Gas Industry	65
Government Mandates	65
Physical Capital	66
Restricted Access to Oil and Gas Reserves	66
The Coming Age of Gas, and Beyond	68
Global Concerns Regarding Energy Security	70
Transportation	71
Automotive Industry	72
Factors Affecting Auto Manufacturers' Carbon Profile	76
Aviation	80
Cement	82
Competitive Implications of Climate Risk in Regulated and Energy-Intensive Sectors	84
Conclusion	87

CHAPTER 4		
The Physical Impacts of Climate Change on the Evolution of Carbon Finance		88
Introduction		89
Physical Impacts on Unregulated Sectors		90
Water Supply and Treatment		90
Agriculture		92
Forestry		94
Fisheries		96
Real Property and Production Facilities		96
Transportation		97
Tourism		97
Municipalities		98
The Built Environment		100
Physical Impacts on Carbon-Regulated Sectors		103
Electric Power		103
Oil and Gas Producers		104
Financial Services		105
Banking		105
Investment		106
Insurance		106
Conclusion		108
CHAPTER 5		
Institutional Investors and Climate Change		111
Introduction		111
Institutional Investors: Size and Global Reach		112
Environmental Reporting		112
Corporations		112
Institutional Investors		113
Corporate Environmental Reporting		113
New Era of Fiduciary Responsibility for Institutional Investors		116
Investment Decision Making		117
Active Engagement		118
Shareholder Resolutions and Proxy Voting		120
Mutual Funds		122
New Momentum in the Corporate World		125
Barriers to the Financial Consideration of Climate Change		127
Institutional Investors and Climate Change		130

Institutional Investors' Group on Climate Change (IIGCC)	131
Carbon Disclosure Project (CDP)	131
The Equator Principles	134
Investor Network on Climate Risk (INCR)	135
Conclusion	135
CHAPTER 6	
Emissions Trading In Theory and Practice	137
Introduction	137
How Carbon Is Traded Now	140
The Kyoto Protocol	140
The Chicago Climate Exchange	143
The European Union Emission Trading Scheme	143
The Price of Carbon in the EU ETS	148
Countries outside Europe with Kyoto Caps	150
Carbon Markets in the United States and Australia	151
Setting up the Clean Development Mechanism and Joint Implementation	153
The Role of Carbon Funds, Carbon Brokers, and Exchanges	156
Key Issues	159
Verification—Protocols for Measuring Emission Reductions	159
Controlling the Sale of "Hot Air"	160
The Quality and Price of Carbon Credits	161
Enforcing Compliance	161
Integrating the Various Trading Platforms	162
The CDM Bottleneck	162
Extending the Time Horizon beyond 2012	163
Extending Carbon Caps to Uncapped Parties	163
The Carbon Offset Market	164
The Role of Insurance in Emissions Trading	165
Issues for Dispute Resolution	166
Conclusion	166
CHAPTER 7	
Climate Change and Environmental Security: Individuals, Communities, Nations	169
Introduction	169
Direct Effect of Extreme Weather Events	170

Health Effects of Climate Change	173
Direct Effects of Temperature Extremes: Heat Waves and Cold Spells	174
Indirect Effects of Climate Change: Vector-Borne Infectious Diseases	175
Polar Regions	179
Climate Systems and National Sovereignty	181
The Gulf Stream and the Thermohaline Current	181
The El Niño/Southern Oscillation (ENSO)	183
Conclusion	185
CHAPTER 8	
Adapting to Adverse and Severe Weather	187
Introduction	187
Adverse Weather: The Role of Weather Derivatives	188
Weather Derivative Instruments	191
Examples of Weather Derivative Contracts	192
Current Status of Weather Markets	193
Constraints on the Weather Derivatives Market	196
Severe Weather: The Role of Catastrophe Bonds	198
The Structure of a Catastrophe Bond	199
Catastrophe Bonds and Carbon Finance	200
Conclusion	201
CHAPTER 9	
Key Players in the Carbon Markets	
by Martin Whittaker, guest author	205
Introduction	205
Basic Elements of the Market	206
EU ETS Trading	206
Clean Development Mechanism (CDM) and Joint Implementation (JI) Projects	207
Intermediaries, Speculators, and Professional Services	208
Key Private-Sector Players	210
Compliance Participants	210
Commercial Banks	210
Carbon Funds	211
Speculative Investors	211
Project Developers and Aggregators, Consultants	213
Equity Research	213
Carbon Brokers	215

Exchanges	216
Credit Rating Agencies	217
Insurers	217
Key Players from the Public Sector	218
National Governments	218
National Business Associations	219
Multilateral Banks	219
Information Services	220
Professional Services	221
Accounting	221
Legal	221
New Horizons for the Carbon Market	222
Carbon as an Asset Class	222
Mainstreaming into Project Finance	222
Conclusion	223
CHAPTER 10	
Carbon Finance: Present Status and Future Prospects	225
Introduction	225
Trading Volumes in Carbon and Weather Markets	227
Carbon Markets	227
Weather Derivatives	228
What Can Be Traded Where? (and What Cannot?)	229
Price Discovery	230
The Evolution of Products for Carbon Finance	231
Litigation over Responsibility for Climate Change	232
Is Carbon Finance Likely to Help Us Avert Dangerous Levels of Climate Change?	234
Carbon Finance within the Broader Field of Environmental Finance	235
Conclusion	237
Endnotes	241
Web Sites	245
References	247
Index	263
