

Panoramic Photography

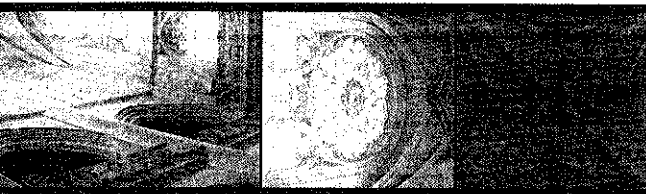

FROM COMPOSITION
AND EXPOSURE TO
FINAL EXHIBITION

Arnold Frick

TRANSLATED BY ALAN GREENE

Contents

Preface.....	VIII
--------------	------

Chapter One: Solutions and Formats.....	3
--	---

A Variety of Approaches	5
-------------------------------	---

The Panoramic Image.....	6
Angle of View.....	6
Different Aspect Ratios.....	6
Format Size.....	8
Influence on Image Detail.....	8
Influence on Depth of Field.....	9
Hyperfocal Distance.....	11

Chapter Two: Framing and Composition.....	13
--	----

Framing	15
Viewfinder	15
Flatback Cameras	16
Swing-Lens and Rotational Cameras	18
Photographic Assemblage.....	20

Composition	22
Rule of Thirds	23
Placing the Horizon Line.....	24
Shifting the Lens	25
Symmetry	27
Composing with the Sun	29
Composing at Night	32
Noting Location	35

Chapter Three: Flatback Cameras and Picture-Taking.....	39
---	----

Conventional Cameras.....	41
Throwaway, APS, and Compact Cameras.....	41
35 mm and Digital Cameras.....	42
Medium-Format Cameras	43
Large-Format Cameras.....	44

Specialty Cameras.....	44
24 mm × 65 mm Cameras	44
6 × 12 Cameras.....	46
6 × 17 Cameras	48

Accessories	49
Camera Bag	49
Tripod	49

Level	51
Light Meters	51
Filters	52
Lens Filters	52
Conventional Filters	53
Other Accessories	53

Taking the Picture.....	55
Framing	56
Light Metering and Exposure	58

Chapter Four: Picture-Taking with Swing-Lens and Rotational Cameras.....	61
---	----

How Do Swing-Lens and Rotational Cameras Work?	64
When the Lens Rotates	64
When the Camera Rotates	66

Camera Types.....	66
Swing-Lens Cameras.....	67
Rotational Cameras	70
Digital Cameras	72

Accessories	73
Level	73
Filters	74
Light Meters	76
Taking the Picture.....	78
Hand-held or Tripod?	78
Framing Options.....	78
Depth of Field and Hyperfocal Distance.....	79
Light Metering and Exposure	80
Spot-Meter Reading	82
Placing the Light.....	82
Dodging.....	83
Movements	83
Starts and Stops	83
Changing Exposure Times	85
 Chapter Five: Joined Panoramas	 87
The Principle.....	89
Steps in the Joining Method	90
Photo Equipment	90
Camera.....	90
Tripod and Level.....	91
Panoramic Tripod Head	91
Hand-Held Light Meters	93
Accessories.....	94
Prior to Taking the Picture	95
Framing Decisions	95
Entrance Pupil.....	99
Definition	99
Finding the Entrance Pupil	101
Importance of the Entrance Pupil	102

Light Metering	103
Color Temperature	103
Determining Exposure	104
Localized Metering – Differences in Contrast	105
Taking the Picture	105
Rotation.....	106
Exposure Correction	106
 Chapter Six: Photographic Assemblage.....	 109
Preparing the Photographs.....	111
Light Level	111
White-Balance.....	112
Optical Distortions	112
Image Size and Format	114
Retouching Tools.....	115
Stitching	115
The Principle.....	116
Tiled Connections.....	116
Orthoscopic Connections	117
Creative Connections.....	117
Software Programs	119
Joining with the Realvis Stitcher	120
First Step: Distortions	122
Second Step: Joining	122
Third Step: The Result	123
Joining with the Panavue ImageAssembler.....	124
First Step: Lens Wizard	124
Second Step: Series Assemblage	125
Creating a QTVR Sequence	126

Chapter Seven: After the Exposure	129
Traditional or Digital Prints?.....	131
Traditional Prints	131
Digital Prints	133
Presentation of Panoramic Photographs.....	136
Distribution of Images on the Internet.....	136
Books and Display Cases	140
Exhibits.....	141
Slide Projection	141
Archival Storage of Originals.....	142
Negatives	142
Color Transparency Film	142
Storing Digital Files	143
 Appendix A: Resources	144
Directory of Photographers	144
Sources of Supplies.....	148
Bibliography	150
 Appendix B: Photographic Credits	 152
Index.....	154
