

HANDBOOK OF

ADVANCED CERAMICS MACHINING

EDITED BY
IOAN D. MARINESCU

 CRC Press
Taylor & Francis Group

Contents

1. Ductile Grinding of Ceramics: Machine Tool and Process	1
<i>H. Eda</i>	
2. Ductile-Mode Ultra-Smoothness Grinding of Fine Ceramics with Coarse-Grain-Size Diamond Wheels	29
<i>H. Yasui</i>	
3. Mechanisms for Grinding of Ceramics	55
<i>S. Malkin and T.W. Hwang</i>	
4. Grinding of Ceramics with Attention to Strength and Depth of Grinding Damage	87
<i>J.E. Mayer Jr.</i>	
5. Highly Efficient and Ultraprecision Fabrication of Structural Ceramic Parts with the Application of Electrolytic In-Process Dressing Grinding	109
<i>B.P. Bandyopadhyay, H. Ohmori, and A. Makinouchi</i>	
6. Electrolytic In-Process Dressing Grinding of Ceramic Materials	147
<i>H. Ohmori and K. Katahira</i>	
7. High-Efficiency Belt Centerless Grinding of Ceramic Materials and Hardened Tool Steel	179
<i>G. Dontu, D. Wu, and I.D. Marinescu</i>	
8. AE Monitoring of the Lapping Process	193
<i>M. Pruteanu, R. Coman, and I.D. Marinescu</i>	
9. Effectiveness of ELID Grinding and Polishing	203
<i>C.E. Spanu and I.D. Marinescu</i>	
10. Mono- Versus Polycrystalline Diamond Lapping of Ceramics	247
<i>M. Pruteanu, I. Benea, and I.D. Marinescu</i>	

11. Double Fracture Model in Lapping of Ceramics	257
<i>I.D. Marinescu</i>	
12. Double Side Grinding of Advanced Ceramics with Diamond Wheels	263
<i>C.E. Spanu, I.D. Marinescu, and M. Hitchiner</i>	
13. Super Polishing of Magnetic Heads	283
<i>J. Ramírez-Salas and I.D. Marinescu</i>	
14. Laser-Assisted Grinding of Ceramics	293
<i>I.D. Marinescu, T.D. Howes and J. Webster</i>	
15. Tribological Properties of ELID-Grinding Wheel Based on In-Process Observation Using a CCD Microscope Tribosystem	301
<i>T. Kato, H. Ohmori, and I.D. Marinescu</i>	
16. Developments in Machining of Ceramic Materials	313
<i>E. Uhlmann, S.-E. Holl, Th. Ardel, and J. Laufer</i>	
17. Ultrasonic Machining of Ceramics	327
<i>G. Spur, E. Uhlmann, S.-E. Holl, and N.-A. Daus</i>	
Index	355
