

Wilfried Linder

Digital Photogrammetry

A Practical Course

Second Edition

Springer

Contents

Preface 1st edition	V
Preface 2nd edition	VII
Contents	IX
1 Introduction	1
1.1 Basic idea and main task of photogrammetry	1
1.2 Why photogrammetry ?	3
1.3 Image sources: Analogue and digital cameras	4
1.4 Digital consumer cameras	6
1.5 Short history of photogrammetric evaluation methods	7
1.6 Geometric principles 1: Camera position, focal length	8
1.7 Geometric principles 2: Image orientation	11
1.8 Geometric principles 3: Relative camera positions (stereo)	13
1.9 Some definitions	15
1.10 Length and angle units	16
1.11 A typical workflow in photogrammetry	16
2 Included software and data	19
2.1 Hardware requirements, operating system	19
2.2 Image material	20
2.3 Overview of the software	20
2.4 Installation	21
2.5 Additional programmes, copyright, data	23

2.6	<i>General remarks</i>	23
2.7	<i>Software versions, support</i>	24
3	Scanning of photos	25
3.1	<i>Scanner types</i>	25
3.2	<i>Geometric resolution</i>	26
3.3	<i>Radiometric resolution</i>	27
3.4	<i>Some practical advice</i>	27
3.5	<i>Import of the scanned images</i>	29
4	Example 1: A single model	31
4.1	<i>Project definition</i>	31
4.2	<i>Orientation of the images</i>	33
4.2.1	Camera definition	33
4.2.2	Interior orientation	35
4.2.3	Brightness and contrast	37
4.2.4	Control points	38
4.2.5	Exterior orientation	41
4.2.6	Over-determination and error detection	45
4.3	<i>Model definition</i>	46
4.4	<i>Stereoscopic viewing</i>	49
4.5	<i>Measurement of object co-ordinates</i>	50
4.6	<i>Creation of DTMs via image matching</i>	53
4.6.1	Some theory	53
4.6.2	Practical tests	58
4.6.3	Additional manual measurements	61
4.6.4	Quality control	62
4.7	<i>Ortho images</i>	63
4.7.1	Some theory	64
4.7.2	Resampling methods	65
4.7.3	Practical tests	67
4.7.4	Creation and overlay of contours	68
4.7.5	Simple 3D data collection	70
5	Example 2: Aerial triangulation	73
5.1	<i>Aerial triangulation measurement (ATM)</i>	73
5.1.1	Common principles	73

5.1.2 Interior orientation	76
5.1.3 Manual measurement	76
5.1.4 Automatic measurement via image matching: Introduction	80
5.1.5 Co-ordinate input and measurement of ground control points	80
5.1.6 Strip definition	83
5.1.7 Measurement of strip connections.....	84
5.1.8 Automatic image co-ordinate measurement (AATM)	85
5.2 <i>Block adjustment with BLUH</i>	89
5.2.1 Introduction.....	89
5.2.2 Running the block adjustment.....	90
5.2.3 Discussion of the results	92
5.2.4 Additional analysis of the results	97
5.2.5 Block adjustment with other programmes: Example BINGO.....	102
5.3 <i>Mosaics of DTMs and ortho images</i>	103
5.3.1 Model definition.....	103
5.3.2 Creation of a DTM mosaic.....	103
5.3.3 Creation of an ortho image mosaic	104
5.3.4 Shaded relief	106
5.3.5 Contour lines overlay	106
5.3.6 3D view.....	107
5.3.7 3D view in real-time: Example for plug-ins.....	107
6 Example 3: Some special cases	109
6.1 <i>Scanning aerial photos with an A4 scanner</i>	109
6.2 <i>Interior orientation without camera parameters</i>	111
6.3 <i>Images from a digital camera</i>	112
6.3.1 The situation.....	112
6.3.2 Interior and exterior orientation	114
6.3.3 Geometric problems	115
6.3.4 DTM creation.....	117
6.3.5 Differential DTM	118
6.4 <i>An example of close-range photogrammetry</i>	119
6.4.1 The situation.....	119
6.4.2 Interior and exterior orientation	121
6.4.3 Model definition.....	125
6.4.4 DTM creation.....	125
6.4.5 Image sequences	127
6.4.6 Visualisation of wave movement	128
6.5 <i>Some remarks about lens distortion</i>	130
6.6 <i>A view into the future: Photogrammetry in 2020</i>	132
7 Programme description.....	135

7.1 Some definitions.....	135
7.2 Basic functions.....	135
7.3 Aims and limits of the programme.....	136
7.4 Operating the programme.....	136
7.5 Buttons in the graphics windows.....	137
7.6 File handling.....	138
7.6.1 File > Select project.....	138
7.6.2 File > Define project.....	138
7.6.3 File > Edit project.....	139
7.6.4 File > Import raster.....	139
7.6.5 File > Import Rollei CDW.....	139
7.6.6 File > Combination.....	140
7.6.7 File > Reference list.....	140
7.6.8 File > Numerical file names.....	140
7.7 Pre programmes.....	141
7.7.1 Pre programmes > Camera definition > Analogue.....	141
7.7.2 Pre programmes > Camera definition > Digital.....	142
7.7.3 Pre programmes > Control point editor.....	143
7.7.4 Pre programmes > Strip definition.....	143
7.7.5 Pre programmes > Orientation > Measure > Interior orientation... 144	
7.7.6 Pre programmes > Orientation > Measure > Exterior orientation.. 146	
7.7.7 Pre programmes > Orientation > Measure > Pseudo camera def... 147	
7.7.8 Pre programmes > Orientation > Measure > LICAL.....	148
7.7.9 Pre programmes > Parameters of the exterior orient. > Manual 148	
7.7.10 Pre programmes > Parameters of the exterior orient. > Import.... 149	
7.7.11 Pre programmes > Parameters of the exterior orient. > BINGO.. 149	
7.7.12 Pre programmes > Select model.....	149
7.7.13 Pre programmes > Define model.....	149
7.8 Aerial triangulation measurement (ATM).....	152
7.8.1 ATM > Manual measurement.....	153
7.8.2 ATM > Editor ATM points.....	156
7.8.3 ATM > Calculate strip images.....	156
7.8.4 ATM > Measure connections.....	157
7.8.5 ATM > Automatic measurement (AATM).....	158
7.8.6 ATM > Import > IMATIE.....	159
7.8.7 ATM > Export > BLUH.....	160
7.8.8 ATM > Export > BINGO.....	160
7.8.9 ATM > Export > IMATIE.....	161
7.8.10 ATM > BLUH graphics.....	161
7.9 Processing.....	161
7.9.1 Processing > Mono measurement.....	161
7.9.2 Processing > Stereo measurement.....	162

7.9.3 Processing > Stereo correlation (matching)	164
7.9.4 Processing > DTM interpolation	167
7.9.5 Processing > Compare nominal - real	167
7.9.6 Processing > Ortho image	168
7.9.7 Processing > Image sequence	169
7.10 Display	170
7.10.1 Display raster image	170
7.10.2 Display text	171
7.11 Aerial triangulation with BLUH	172
7.11.1 Getting started	172
7.11.2 Pre processing	172
7.11.3 Pre processing > Import PIX	172
7.11.4 Block adjustment > Strategy	173
7.11.5 Block adjustment > The central BLUH modules	173
7.11.6 Block adjustment > All (batch)	174
7.11.7 Block adjustment > Export orientations	174
7.11.8 Post processing > Analysis (BLAN)	174
7.11.9 Post processing > Display graphics	174
7.11.10 Some more theory	174
Appendix	179
1. Codes	179
2. GCP positions for tutorial 2	179
3. Technical data of digital camera chips	198
References	199
Glossary	203
List of figures and formulas	207
1. Figures	207
2. Formulas	209
Index	211
