

# AIR POLLUTION METEOROLOGY

Richard S. Scorer

Horwood Publishing Series in Environmental Science

# Table of Contents

<b>1. The meteorological scene .....</b>	1
1.1 Gases and clouds .....	1
1.2 Grit and dust.....	1
1.3 The Planck curve.....	3
1.4 The air temperature profile.....	5
1.5 The ozone layer.....	7
1.6 Stratospheric chemistry .....	8
1.7 Cloud trails.....	10
1.8 Stratospheric wave clouds.....	12
1.9 Global warming by carbon dioxide .....	13
1.10 Greenhouse gases .....	14
1.11 Climate change.....	16
1.12 Visual Observation.....	16
1.13 Trade wind convection.....	17
1.14 Stability, convection, lapse-rate .....	18
<b>2. Chimneys: purpose and design .....</b>	21
2.1 The concept of a plume .....	21
2.2 The two and a half times rule .....	23
2.3 Flagging .....	27
2.4 Strong winds.....	28
2.5 Stack oscillation in the wind .....	30
2.6 Thermal rise and effective stack height.....	31
2.7 The problem of several flues close together.....	34
2.8 The advantage of a multi-flue stack .....	36
2.9 Bifurcation of a buoyant plume.....	38
<b>3. Dispersal in theory and practice .....</b>	43
3.1 Inevitable inaccuracies .....	43
3.2 Models and legislation .....	44
3.3 Dispersal of a solitary plume: theory.....	47
3.4 Maximum ground level concentration (max GLC) .....	51
3.5 The mixing layer .....	54
3.6 The sub-cloud inversion .....	56
3.7 Non-dispersing plumes aloft .....	59
3.8 Non-dispersing plumes at the surface.....	61
3.9 Theoretical second maximum at the ground.....	62

## Table of Contents

3.10 Comment: the theoretical bent-over plume .....	63
3.11 The nature of actual turbulence .....	66
<b>4. Acid rain and development of gas washing.....</b>	<b>69</b>
4.1 Acid rain, and the health of fresh water fish.....	69
4.2 The Loch Fleet study.....	72
4.3 The concentration of acidity.....	72
4.4 The Battersea saga .....	73
4.5 Different features of the Bankside plume.....	78
4.6 Avoidance of cold effluent: flue gas desulphurisation (FGD).....	81
<b>5. Environmental costs and benefits: a matrix for comparison of sources.....</b>	<b>83</b>
5.1 The method .....	83
5.2 Matrix details .....	85
5.3 Numerical answers .....	88
5.4 Acid gases: acid rain .....	91
5.5 New problems: straw burning, background pollution.....	94
5.6 Blackening of surfaces: traffic exhaust.....	97
5.7 The PM <sub>10</sub> problem.....	101
5.8 The PM <sub>10</sub> problem turns medical, but what is its priority?.....	103
5.9 The Utah valley steel mill .....	104
<b>6. The Technical Dictionary .....</b>	<b>107</b>
Index of the Technical Dictionary .....	145
<b>References.....</b>	<b>147</b>
<b>Index.....</b>	<b>149</b>
