
DESIGN OF WATER SUPPLY PIPE NETWORKS

PRABHATA K. SWAMEE
ASHOK K. SHARMA

CONTENTS

PREFACE xi

NOTATIONS xiii

1 Introduction 1

1.1. Background 1
1.2. System Configuration 2
1.3. Flow Hydraulics and Network Analysis 3
1.4. Cost Considerations 5
1.5. Design Considerations 5
1.6. Choice Between Pumping and Gravity Systems 6
1.7. Network Synthesis 6
1.7.1. Designing a Piecemeal Subsystem 7
1.7.2. Designing the System as a Whole 7
1.7.3. Dividing the Area into a Number of Optimal Zones for Design 7
1.8. Reorganization or Restrengthening of Existing Water Supply Systems 8
1.9. Transportation of Solids Through Pipelines 8
1.10. Scope of the Book 8
References 9

2 Basic Principles of Pipe Flow 11

2.1. Surface Resistance 13
2.2. Form Resistance 16
2.2.1. Pipe Bend 16
2.2.2. Elbows 17
2.2.3. Valves 17
2.2.4. Transitions 19
2.2.5. Pipe Junction 21
2.2.6. Pipe Entrance 22
2.2.7. Pipe Outlet 22
2.2.8. Overall Form Loss 23
2.2.9. Pipe Flow Under Siphon Action 23

2.3. Pipe Flow Problems 26
2.3.1. Nodal Head Problem 27
2.3.2. Discharge Problem 27
2.3.3. Diameter Problem 27
2.4. Equivalent Pipe 30
2.4.1. Pipes in Series 32
2.4.2. Pipes in Parallel 33
2.5. Resistance Equation for Slurry Flow 35
2.6. Resistance Equation for Capsule Transport 37
Exercises 41
References 41

3 Pipe Network Analysis 43

3.1. Water Demand Pattern 44
3.2. Head Loss in a Pipe Link 45
3.2.1. Head Loss in a Lumped Equivalent 45
3.2.2. Head Loss in a Distributed Equivalent 45
3.3. Analysis of Water Transmission Lines 46
3.4. Analysis of Distribution Mains 48
3.5. Pipe Network Geometry 50
3.6. Analysis of Branched Networks 50
3.7. Analysis of Looped Networks 51
3.7.1. Hardy Cross Method 52
3.7.2. Newton–Raphson Method 60
3.7.3. Linear Theory Method 64
3.8. Multi-Input Source Water Network Analysis 67
3.8.1. Pipe Link Data 68
3.8.2. Input Point Data 68
3.8.3. Loop Data 70
3.8.4. Node–Pipe Connectivity 70
3.8.5. Analysis 71
3.9. Flow Path Description 74
Exercises 76
References 77

4 Cost Considerations 79

4.1. Cost Functions 81
4.1.1. Source and Its Development 81
4.1.2. Pipelines 82
4.1.3. Service Reservoir 85
4.1.4. Cost of Residential Connection 86

4.1.5. Cost of Energy 87
4.1.6. Establishment Cost 87
4.2. Life-Cycle Costing 87
4.3. Unification of Costs 87
4.3.1. Capitalization Method 88
4.3.2. Annuity Method 89
4.3.3. Net Present Value or Present Value Method 90
4.4. Cost Function Parameters 91
4.5. Relative Cost Factor 92
4.6. Effect of Inflation 92
Exercises 95
References 95

5 General Principles of Network Synthesis 97

5.1. Constraints 98
5.1.1. Safety Constraints 99
5.1.2. System Constraints 100
5.2. Formulation of the Problem 100
5.3. Rounding Off of Design Variables 100
5.4. Essential Parameters for Network Sizing 101
5.4.1. Water Demand 101
5.4.2. Rate of Water Supply 102
5.4.3. Peak Factor 103
5.4.4. Minimum Pressure Requirements 105
5.4.5. Minimum Size of Distribution Main 105
5.4.6. Maximum Size of Water Distribution 105
5.4.7. Reliability Considerations 105
5.4.8. Design Period of Water Supply Systems 107
5.4.9. Water Supply Zones 108
5.4.10. Pipe Material and Class Selection 109
Exercises 109
References 109

6 Water Transmission Lines 111

6.1. Gravity Mains 112
6.2. Pumping Mains 114
6.2.1. Iterative Design Procedure 115
6.2.2. Explicit Design Procedure 116
6.3. Pumping in Stages 117
6.3.1. Long Pipeline on a Flat Topography 118
6.3.2. Pipeline on a Topography with Large Elevation Difference 122

6.4. Effect of Population Increase 126
6.5. Choice Between Gravity and Pumping Systems 128
6.5.1. Gravity Main Adoption Criterion 128
Exercises 130
References 131

7 Water Distribution Mains 133

7.1. Gravity-Sustained Distribution Mains 133
7.2. Pumped Distribution Mains 136
7.3. Exercises 139
References 140

8 Single-Input Source, Branched Systems 141

8.1. Gravity-Sustained, Branched System 143
8.1.1. Radial Systems 143
8.1.2. Branch Systems 144
8.2. Pumping, Branched Systems 150
8.2.1. Radial Systems 150
8.2.2. Branched, Pumping Systems 153
8.3. Pipe Material and Class Selection Methodology 159
Exercises 160
References 161

9 Single-Input Source, Looped Systems 163

9.1. Gravity-Sustained, Looped Systems 165
9.1.1. Continuous Diameter Approach 167
9.1.2. Discrete Diameter Approach 168
9.2. Pumping System 172
9.2.1. Continuous Diameter Approach 174
9.2.2. Discrete Diameter Approach 177
Exercises 179
Reference 180

10 Multi-Input Source, Branched Systems 181

10.1. Gravity-Sustained, Branched Systems 182
10.1.1. Continuous Diameter Approach 184
10.1.2. Discrete Diameter Approach 186
10.2. Pumping System 189
10.2.1. Continuous Diameter Approach 190
10.2.2. Discrete Diameter Approach 193

Exercises 195
References 196

11 Multi-Input Source, Looped Systems 197

11.1. Gravity-Sustained, Looped Systems 198
11.1.1. Continuous Diameter Approach 199
11.1.2. Discrete Diameter Approach 200
11.2. Pumping System 203
11.2.1. Continuous Diameter Approach 205
11.2.2. Discrete Diameter Approach 206
Exercises 211
Reference 212

12 Decomposition of a Large Water System and Optimal Zone Size 213

12.1. Decomposition of a Large, Multi-Input, Looped Network 214
12.1.1. Network Description 214
12.1.2. Preliminary Network Analysis 215
12.1.3. Flow Path of Pipes and Source Selection 215
12.1.4. Pipe Route Generation Connecting Input Point Sources 217
12.1.5. Weak Link Determination for a Route Clipping 221
12.1.6. Synthesis of Network 227
12.2. Optimal Water Supply Zone Size 228
12.2.1. Circular Zone 229
12.2.2. Strip Zone 235
Exercises 241
References 242

13 Reorganization of Water Distribution Systems 243

13.1. Parallel Networks 244
13.1.1. Parallel Gravity Mains 244
13.1.2. Parallel Pumping Mains 245
13.1.3. Parallel Pumping Distribution Mains 246
13.1.4. Parallel Pumping Radial System 247
13.2. Strengthening of Distribution System 248
13.2.1. Strengthening Discharge 248
13.2.2. Strengthening of a Pumping Main 250
13.2.3. Strengthening of a Distribution Main 252
13.2.4. Strengthening of Water Distribution Network 254
Exercises 258
Reference 258

14 Transportation of Solids Through Pipelines **259**

14.1. Slurry-Transporting Pipelines 260
14.1.1. Gravity-Sustained, Slurry-Transporting Mains 260
14.1.2. Pumping-Sustained, Slurry-Transporting Mains 262
14.2. Capsule-Transporting Pipelines 266
14.2.1. Gravity-Sustained, Capsule-Transporting Mains 267
14.2.2. Pumping-Sustained, Capsule-Transporting Mains 268
Exercises 273
References 273

Appendix 1 Linear Programming **275**

Problem Formulation 275
Simplex Algorithm 276

Appendix 2 Geometric Programming **281**

Appendix 3 Water Distribution Network Analysis Program **287**

Single-Input Water Distribution Network Analysis Program 287
Multi-Input Water Distribution Network Analysis Program 322

INDEX **347**
