

VOICES FROM THE FOREST

Integrating Indigenous Knowledge into
Sustainable Upland Farming

MALCOLM CAIRNS, Editor

Contents

Foreword	xi
<i>Joachim Voss</i>	
Preface	xiii
Map of Case Studies	xvi

PART I: Introduction

1. Challenges for Research and Development on Improving Shifting Cultivation Systems	3
<i>Dennis P. Garrity</i>	
2. Working with and for Plants: Indigenous Fallow Management in Perspective	8
<i>Harold Brookfield</i>	
3. Conceptualizing Indigenous Approaches to Fallow Management: A Road Map to this Volume	16
<i>Malcolm Cairns</i>	

PART II: Retention or Promotion of Volunteer Species with Economic or Ecological Value

4. Relict Emergents in Swidden Fallows of the Lawa in Northern Thailand: Ecology and Economic Potential	37
<i>Dietrich Schmidt-Vogt</i>	
5. Successional Forest Development in Swidden Fallows of Different Ethnic Groups in Northern Thailand	54
<i>Chaleo Kanjunt</i>	
6. Kammu Fallow Management in Lao P.D.R., with Emphasis on Bamboo Use	65
<i>Damrong Tayanin</i>	
7. The Potential of Wild Vegetables as Permanent Crops or to Improve Fallows in Sarawak, Malaysia	73
<i>Ole Mertz</i>	
8. Commercialization of Fallow Species by Bidayuh Shifting Cultivators in Sarawak, Malaysia	87
<i>Paul Burgers</i>	
9. Wild Food Plants as Alternative Fallow Species in the Cordillera Region, the Philippines	96
<i>Fatima T. Tangan</i>	

10. Farmer-Developed Forage Management Strategies for Stabilization of Shifting Cultivation Systems	103
<i>Peter Horne</i>	
11. Managing <i>Imperata</i> Grasslands in Indonesia and Laos	113
<i>Lesley Potter and Justin Lee</i>	
12. Natural Forest Regeneration from an <i>Imperata</i> Fallow: The Case of Pakhasukjai	122
<i>Janet L. Durno, Tuenjai Deetes, and Juthamas Rajchprasit</i>	
13. When Shifting Cultivators Migrate to the Cities, How Can the Forest be Rehabilitated?	137
<i>Borpit Maneeratana and Peter Hoare</i>	

PART III: Shrub-based Accelerated Fallows

14. Fallow Improvement with <i>Chromolaena odorata</i> in Upland Rice Systems of Northern Laos	142
<i>Walter Roder, Soulasith Maniphone, Bounthanh Keoboulapha, and Keith Fahrney</i>	
15. Management of Fallows Based on <i>Austroepatorium inulaefolium</i> by Minangkabau Farmers in Sumatra, Indonesia	153
<i>Malcolm Cairns</i>	
16. <i>Piper aduncum</i> Fallows in the Lowlands of Papua New Guinea	185
<i>Alfred E. Hartemink</i>	
17. Management of <i>Tecoma stans</i> Fallows in Semi-arid Nusa Tenggara Timur, Indonesia	190
<i>Tony Djogo, Muhamad Juhan, Aholiah Aoetpah, and Ellen McCallie</i>	
18. Improved Fallows Using a Spiny Legume, <i>Mimosa invisa</i> Martius ex Colla, in Western Leyte, the Philippines	203
<i>Edwin A. Balbarino, David M. Bates, and Zosimo M. de la Rosa</i>	
19. Management of <i>Mimosa diplotricha</i> var. <i>inermis</i> as a Simultaneous Fallow in Northern Thailand	214
<i>Klaus Prinz and Somchai Ongprasert</i>	

PART IV: Herbaceous Legume Fallows

20. Growing Ya Zhou Hyacinth Beans in the Dry Season on Hainan Island, China	226
<i>Lin Weifu, Jiang Jusheng, Li Weiguo, Xie Guishui, and Wan Yuekun</i>	
21. Indigenous Fallow Management Based on <i>Flemingia vestita</i> in Northeast India	237
<i>P.S. Ramakrishnan</i>	
22. Benefits of <i>Phaseolus calcaratus</i> in Upland Farming in Northern Vietnam	248
<i>Nguyen Tuan Hao, Ha Van Huy, Huynh Duc Nhan, and Nguyen Thi Thanh Thuy</i>	
23. Viny Legumes as Accelerated Seasonal Fallows: Intensifying Shifting Cultivation in Northern Thailand	263
<i>Somchai Ongprasert and Klaus Prinz</i>	

PART V: Dispersed Tree-based Fallows

24. The Role of <i>Leucaena</i> in Swidden Cropping and Livestock Production in Nusa Tenggara Timur, Indonesia	272
<i>Colin Piggin</i>	

25. Use of <i>Leucaena leucocephala</i> to Intensify Indigenous Fallow Rotations in Sulawesi, Indonesia	287
<i>Fahmuddin Agus</i>	
26. Upland Rice Response to <i>Leucaena leucocephala</i> Fallows on Mindoro, the Philippines	295
<i>Kenneth G. MacDicken</i>	
27. The Naalad Improved Fallow System in the Philippines and its Implications for Global Warming	301
<i>Rodel D. Lasco</i>	
28. Farmers' Use of <i>Sesbania grandiflora</i> to Intensify Swidden Agriculture in North Central Timor, Indonesia	306
<i>J.A.M. Kieft</i>	
29. <i>Alnus nepalensis</i> -Based Agroforestry Systems in Yunnan, Southwest China	326
<i>Guo Huijun, Xia Yongmei, and Christine Padoch</i>	
30. Shifting Forests in Northeast India: Management of <i>Alnus nepalensis</i> as an Improved Fallow in Nagaland	341
<i>Malcolm Cairns, Supong Keitzar, and T. Amenba Yaden</i>	
31. Managing the Species Composition of Fallows in Papua New Guinea by Planting Trees	379
<i>R. Michael Bourke</i>	
32. Multipurpose Trees as an Improved Fallow: An Economic Assessment	389
<i>Peter Grist, Ken Menz, and Rohan Nelson</i>	
33. Pruned-Tree Hedgerow Fallow Systems in Mindanao, the Philippines	403
<i>Peter D. Suson, Dennis P. Garrity, and Rodel D. Lasco</i>	

PART VI: Perennial–Annual Crop Rotations

34. Teak Production by Shifting Cultivators in Northern Lao P.D.R.	414
<i>Peter K. Hansen, Houmchitsavath Sodarak, and Sianouvong Savathvong</i>	
35. Fallow Management in the Borderlands of Southwest China: The Case of <i>Cunninghamia lanceolata</i>	425
<i>Nicholas Menzies and Nicholas Tapp</i>	
36. Indigenous Fallow Management with <i>Melia azedarach</i> Linn. in Northern Vietnam	435
<i>Tran Duc Vien</i>	
37. Cost-Benefit Analysis of a <i>Gmelina</i> Hedgerow Improved Fallow System in Northern Mindanao, the Philippines	444
<i>Damasa B. Magcale-Macandog, Canesio D. Predo, and Patrick M. Rocamora</i>	
38. Innovations in Swidden-Based Rattan Cultivation by Benuaq-Dayak Farmers in East Kalimantan, Indonesia	459
<i>Hideyuki Sasaki</i>	
39. Bamboo as a Fallow Crop on Timor Island, Nusa Tenggara Timur, Indonesia	471
<i>Abdullah Bamualim, Joko Triastono, Evert Hosang, Tony Basuki, and Simon P. Field</i>	

PART VII: Agroforests

40. Indigenous Management of Paper Mulberry in Swidden Rice Fields and Fallows in Northern Lao P.D.R.	475
<i>Keith Fahrney, Onechanh Boonnaphol, Bounthanh Keoboulapha, and Soulasith Maniphone</i>	

41. The Complex Agroforests of the Iban in West Kalimantan and their Possible Role in Fallow Management and Forest Regeneration	490
<i>Reed L. Wadley</i>	
42. Does Tree Diversity Affect Soil Fertility? Findings from Fallow Systems in West Kalimantan	502
<i>Deborah Lawrence, Dwi Astiani, Marlina Syhazaman-Karwur, and Isabella Fiorentino</i>	
43. Forest Management and Classification of Fallows by Bidayuh Farmers in West Kalimantan	515
<i>Wil de Jong</i>	
44. Indigenous Fallow Management on Yap Island	521
<i>Marjorie V. Cushing Falanruw and Francis Ruegorong</i>	
45. The Damar Agroforests of Krui, Indonesia: Justice for Forest Farmers	528
<i>Geneviève Michon, Hubert de Foresta, Ahmad Kusworo, and Patrice Levang</i>	
46. Upland Fallow Management with <i>Styrax tonkinensis</i> for Benzoin Production in Northern Lao P.D.R.	564
<i>Manfred Fischer, Sianouvong Savathvong, and Khongsak Pinyopusarerk</i>	
47. The Lemo System of Lacquer Agroforestry in Yunnan, China	571
<i>Long Chun-Lin</i>	
48. From Shifting Cultivation to Sustainable Jungle Rubber: A History of Innovations in Indonesia	577
<i>Eric Penot</i>	
49. Rubber Plantations as an Alternative to Shifting Cultivation in Yunnan, China	600
<i>Guangxia Cao and Lianmin Zhang</i>	
50. Ma Kwaen: A Jungle Spice Used in Swidden Intensification in Northern Thailand	614
<i>Peter Hoare, Borpit Maneeratana, and Wichai Songwadhana</i>	
51. <i>Alnus</i> -Cardamom Agroforestry: Its Potential for Stabilizing Shifting Cultivation in the Eastern Himalayas	620
<i>Rita Sharma</i>	
52. The Sagui Gru System: Karen Fallow Management Practices to Intensify Land Use in Western Thailand	627
<i>Payong Srithong</i>	
53. Sandiu Farmers' Improvement of Fallows on Barren Hills in Northern Vietnam	632
<i>Ta Long</i>	

PART VIII: Across Systems and Typologies

54. Strategies of Asian Shifting Cultivators in the Intensification Process	640
<i>Dev Nathan, P.V. Ramesh, and Phrang Roy</i>	
55. Rebuilding Soil Properties during the Fallow: Indigenous Innovations in the Highlands of Vietnam	652
<i>Hoang Xuan Ty</i>	
56. Rattan and Tea-Based Intensification of Shifting Cultivation by Hani Farmers in Southwestern China	664
<i>Xu Jianchu</i>	
57. Indigenous Fallow Management Systems in Selected Areas of the Cordillera, the Philippines	673
<i>Florence M. Daguitan and Matthew Tauli</i>	

58. Management Systems in Occidental Mindoro, the Philippines	679
<i>Michael Robotham</i>	
59. Changes and Innovations in the Management of Shifting Cultivation Land in Bhutan	692
<i>T. Dukpa, P. Wangchuk, Rinchen, K. Wangdi, and W. Roder</i>	
60. Swidden Agriculture in the Highlands of Papua New Guinea	700
<i>Bire Bino</i>	
61. The Problems of Shifting Cultivation in the Central Highlands of Vietnam	705
<i>Phan Quoc Sung and Tran Trung Dung</i>	
62. Some Indigenous Experiences in Intensification of Shifting Cultivation in Vietnam	712
<i>Tu Quang Hien</i>	

PART IX: Themes: Property Rights, Markets, and Institutions

63. Productive Management of Swidden Fallows: Market Forces and Institutional Factors in Isabela, the Philippines	719
<i>Paulo N. Pasicolan</i>	
64. The Feasibility of Rattan Cultivation within Shifting Cultivation Systems: The Role of Policy and Market Institutions	729
<i>Brian M. Belcher</i>	
65. The Role of Land Tenure in the Development of Cinnamon Agroforestry in Kerinci, Sumatra	743
<i>S. Suyanto, Thomas Tomich, and Keiichi Otsuka</i>	
66. Effects of Land Allocation on Shifting Cultivators in Vietnam	754
<i>Dinh Van Quang</i>	
67. Managed Fallow Systems in the Changing Environment of Central Sumatra, Indonesia	761
<i>Silvia Werner</i>	
68. Community-Based Natural Resource Management in Northern Thailand	769
<i>Thawatchai Rattanasorn and Oliver Puginier</i>	

PART X: Conclusions

69. Observations on the Role of Improved Fallow Management in Swidden Agricultural Systems	780
<i>A. Terry Rambo</i>	
Botanical Index	803
Ethnic Group Index	811
Subject Index	813
