## Basic principles of physics

|   |    |  |     |
|---|----|--|-----|
| Quantities and units  | 22 | Heat   | 66  |
| SI units  | 22 | Symbols and units                            | 66  |
| Legal units   | 23 | Enthalpy (heat content)                      | 66  |
| Systems of units not to be used                             | 23 | Heat transfer                                | 66  |
| Quantities and units  | 24 | Technical temperature measurement            | 68  |
| Conversion of units   | 29 | Thermodynamics                               | 69  |
| Basic equations used in mechanics                           | 39 | Change of state for gases                    | 69  |
| Symbols and units   | 39 | Electrical engineering                       | 70  |
| Rectilinear and rotary motion                               | 39 | Quantities and units                         | 70  |
| Laws of projectile motion                                   | 40 | Electromagnetic fields                       | 70  |
| Free fall   | 40 | Electric field                               | 71  |
| Moments of inertia  | 41 | Direct current (DC)                          | 72  |
| Transmission of force                                       | 42 | Direct-current circuits                      | 73  |
| Friction  | 42 | Alternating current (AC)                     | 75  |
| Vibrations and oscillations                                 | 44 | Alternating-current circuits                 | 75  |
| Symbols and units   | 44 | Three-phase current                          | 77  |
| Terms   | 44 | Magnetic field                               | 77  |
| Vibration reduction   | 46 | Ferromagnetic materials                      | 79  |
| Modal analysis  | 48 | The magnetic circuit                         | 80  |
| Optical technology  | 49 | Magnetic field and electric current          | 81  |
| Photometric quantities and units                            | 49 | Electric effects in metallic conductors      | 83  |
| Electromagnetic radiation                                   | 49 | Gas and plasma discharge                     | 85  |
| Geometrical optics  | 50 | Electronics                                  | 86  |
| Components  | 50 | Basic principles of semiconductor technology | 86  |
| Light sources   | 51 | Discrete semiconductor components            | 88  |
| Light and the physiology of vision                          | 52 | Monolithic integrated circuits               | 92  |
| Laser technology  | 53 | Film and hybrid circuits, MCM                | 97  |
| Optical fibers/waveguides                                   | 53 | Circuit-board technology, SMT                | 99  |
| Display elements  | 55 | Micromechanics                               | 100 |
| Acoustics   | 56 | Analog/digital conversion                    | 102 |
| Quantities and units  | 56 | Mechatronics                                 | 105 |
| General terminology   | 56 | Mechatronic systems and components           | 105 |
| Quantities for noise emission measurement                   | 57 | Development methods                          | 106 |
| Motor-vehicle noise measurements and limits                 | 58 | Outlook                                      | 108 |
| Measured quantities for noise immissions (noise protection) | 59 | Sensors                                      | 110 |
| Perceived sound levels                                      | 60 | Basic principles                             | 110 |
| Engineering acoustics                                       | 61 | Position sensors                             | 115 |
| Hydrostatics  | 62 | Speed/rpm sensors                            | 136 |
| Symbols and units   | 62 | Acceleration and vibration sensors           | 141 |
| Density and pressure  | 62 | Pressure sensors                             | 144 |
| Buoyancy  | 62 | Flowmeters                                   | 148 |
| Fluid mechanics   | 63 | Gas sensors, concentration sensors           | 151 |
| Symbols and units   | 63 | Temperature sensors                          | 154 |
| Basic principles  | 63 | Force and torque sensors                     | 157 |
| Continuity equation   | 64 | Optoelectronic sensors                       | 164 |
| Bernoulli equation  | 64 | Outlook                                      | 171 |
| Discharge from a pressure vessel                            | 64 | Actuators                                    | 172 |
| Resistance of bodies submerged in a fluid flow              | 65 | Function                                     | 172 |

|   |     |   |     |
