Acknowledgment	xxxiii
Abstract	xxxv
 Part I Aero Engines and Gas Turbines	 1
Chapter 1 History and Classifications of Aero Engines	3
1.1 Prejet Engines—History	4
1.1.1 Early Activities in Egypt and China	4
1.1.2 Leonardo da Vinci	5
1.1.3 Branca's Stamping Mill	5
1.1.4 Newton's Steam Wagon	6
1.1.5 Barber's Gas Turbine	6
1.1.6 Miscellaneous Aero-Vehicles' Activities in the Eighteenth and Nineteenth Centuries	7
1.1.7 The Wright Brothers	8
1.1.8 Significant Events up to the 1940s	10
1.1.8.1 Aero-Vehicle Activities	10
1.1.8.2 Reciprocating Engines	12
1.2 Jet Engines	13
1.2.1 Jet Engine Inventors: Dr. Hans von Ohain and Sir Frank Whittle	13
1.2.1.1 Sir Frank Whittle (1907–1996)	13
1.2.1.2 Dr. Hans von Ohain (1911–1998)	14
1.2.2 Turbojet Engines	15
1.2.3 Turboprop and Turboshift Engines	18
1.2.4 Turbofan Engines	21
1.2.5 Propfan Engine	23
1.2.6 Pulsejet, Ramjet, and Scramjet Engines	24
1.2.6.1 Pulsejet Engine	24
1.2.6.2 Ramjet and Scramjet Engines	25
1.2.7 Industrial Gas Turbine Engines	27
1.3 Classifications of Aerospace Engines	28
1.4 Classification of Jet Engines	29
1.4.1 Ramjet	29
1.4.2 Pulsejet	30
1.4.3 Scramjet	31
1.4.4 Turboramjet	31
1.4.5 Turborocket	32

1.5	Classification of Gas Turbine Engines	32
1.5.1	Turbojet Engines.....	33
1.5.2	Turboprop	34
1.5.3	Turboshaft.....	35
1.5.4	Turbofan Engines	37
1.5.5	Propfan Engines	41
1.5.6	Advanced Ducted Fan	42
1.6	Industrial Gas Turbines	43
1.7	Non–Air-Breathing Engines.....	44
1.8	Future of Aircraft and Power Plant Industries	44
	Closure	52
	Problems	52
	References	54
Chapter 2	Performance Parameters of Jet Engines	57
2.1	Introduction	57
2.2	Thrust Force	57
2.3	Factors Affecting Thrust	67
2.3.1	Jet Nozzle	67
2.3.2	Air Speed	68
2.3.3	Mass Air Flow	68
2.3.4	Altitude	68
2.3.5	Ram Effect	69
2.4	Engine Performance Parameters	70
2.4.1	Propulsive Efficiency	70
2.4.2	Thermal Efficiency	75
2.4.3	Propeller Efficiency.....	76
2.4.4	Overall Efficiency	77
2.4.5	Takeoff Thrust	80
2.4.6	Specific Fuel Consumption	81
2.4.7	Aircraft Range	82
2.4.8	Range Factor.....	85
2.4.9	Endurance Factor	85
2.4.10	Specific Impulse	87
	Problems	91
	References	94
Chapter 3	Pulsejet and Ramjet Engines	97
3.1	Introduction	97
3.2	Pulsejet Engines.....	97
3.2.1	Introduction	97
3.2.2	Valved Pulsejet	98
3.2.3	Valveless Pulsejet.....	102
3.2.4	Pulse Detonation Engine	103
3.3	Ramjet Engines	106
3.3.1	Ideal Ramjet	107
3.3.2	Real Cycle	110
3.4	Case Study.....	129
3.5	Summary and Governing Equations for Shock Waves and Isentropic Flow	141
3.5.1	Summary	141
3.5.2	Normal Shock Wave Relations	141

3.5.3	Oblique Shock Wave Relations	142
3.5.4	Rayleigh-Flow Equations	142
3.5.5	Isentropic Relation	142
Problems		143
References		145
Chapter 4	Turbojet Engine	147
4.1	Introduction	147
4.2	Single Spool	149
4.2.1	Examples of Engines	149
4.2.2	Thermodynamic Analysis	150
4.2.3	Ideal Case	150
4.2.4	Actual Case	165
4.2.5	Comparison of Operative and Inoperative Afterburners	175
4.3	Two-Spool Engine	178
4.3.1	Nonafterburning Engine	179
4.3.1.1	Examples of Engines	179
4.3.1.2	Thermodynamic Analysis	180
4.3.3	Afterburning Engine	183
4.3.3.1	Examples of Two-Spool Afterburning Turbojet Engines	183
4.3.3.2	Thermodynamic Analysis	184
4.4	Statistical Analysis	188
4.5	Thrust Augmentation	189
4.5.1	Water Injection	189
4.5.2	Afterburning	190
4.5.3	Pressure Loss in Afterburning Engine	191
4.6	Supersonic Turbojet	195
4.7	Optimization of the Turbojet Cycle	198
Problems		209
References		213
Chapter 5	Turbofan Engines	215
5.1	Introduction	215
5.2	Forward Fan Unmixed Single-Spool Configuration	216
5.3	Forward Fan Unmixed Two-Spool Engines	221
5.3.1	The Fan and Low-Pressure Compressor on One Shaft	221
5.3.2	Fan Driven by the LPT and the Compressor Driven by the HPT	232
5.3.3	A Geared Fan Driven by the LPT and the Compressor Driven by the HPT	233
5.4	Forward Fan Unmixed Three-Spool Engine	235
5.5	Forward Fan Mixed-Flow Engine	242
5.5.1	Mixed-Flow Two-Spool Engine	242
5.6	Mixed Turbofan with Afterburner	255
5.6.1	Introduction	255
5.6.2	Ideal Cycle	256
5.6.3	Real Cycle	258
5.7	AFT Fan	258
5.8	V/STOL	261
5.8.1	Swiveling Nozzles	261
5.8.2	Switch-In Deflector System	266

5.9	Performance Analysis	273
	Summary	294
	Problems	297
	References	305
Chapter 6	Turboprop, Turboshift, and Propfan Engines	307
6.1	Introduction to Turboprop Engines	307
6.2	Classification of Turboprop Engines	310
6.3	Thermodynamic Analysis of Turboprop Engines.....	312
6.3.1	Single-Spool Turboprop	312
6.3.2	Two-Spool Turboprop	316
6.4	Analogy with Turbofan Engines	319
6.5	Equivalent Engine Power	320
6.5.1	Static Condition	320
6.5.2	Flight Operation	320
6.6	Fuel Consumption	320
6.7	Turboprop Installation	321
6.8	Performance Analysis	329
6.9	Comparison of Turbojet, Turbofan, and Turboprop Engines	330
6.10	Turboshift Engines	333
6.11	Power Generated by Turboshift Engines	334
6.11.1	Single-Spool Turboshift	334
6.11.2	Double-Spool Turboshift	335
6.12	Examples for Turboshift Engines	336
6.13	Propfan Engines	337
	Summary of Turboprop Relations	340
	Problems	340
	References	344
Chapter 7	High-Speed Supersonic and Hypersonic Engines	345
7.1	Introduction	345
7.2	Supersonic Aircraft and Programs	345
7.2.1	Anglo-French Activities	346
7.2.2	Russian Activities	347
7.2.3	U.S. Activities	347
7.3	Future of Commercial Supersonic Technology	349
7.4	Technology Challenges of the Future Flight	350
7.5	High-Speed Supersonic and Hypersonic Propulsion	350
7.5.1	Introduction	350
7.5.2	Hybrid Cycle Engine	351
7.6	Turboramjet Engine	352
7.7	Wraparound Turboramjet	352
7.7.1	Operation as a Turbojet Engine	352
7.7.2	Operation as a Ramjet Engine	355
7.8	Over/Under Turboramjet	356
7.8.1	Turbojet Mode	358
7.8.2	Dual Mode	358
7.8.3	Ramjet Mode	358
7.9	Turboramjet Performance	358
7.9.1	Turbojet Mode	358

7.9.2	Ramjet Mode	359
7.9.3	Dual Mode	359
7.10	Case Study.....	360
7.11	Examples for Turboramjet Engines	365
7.12	Hypersonic Flight	367
7.12.1	History of Hypersonic Vehicles.....	367
7.12.2	Hypersonic Commercial Transport	369
7.12.3	Military Applications	370
7.13	Scramjet Engines.....	370
7.13.1	Introduction	370
7.13.2	Thermodynamics	372
7.14	Intake of a Scramjet Engine	372
7.15	Combustion Chamber.....	373
7.16	Nozzle	376
7.17	Performance Parameters	376
	Problems	380
	References	383

Chapter 8 Industrial Gas Turbines 385

8.1	Introduction	385
8.2	Categories of Gas Turbines	386
8.3	Types of Industrial Gas Turbines.....	387
8.4	Single-Shaft Engine.....	388
8.4.1	Single Compressor and Turbine	389
8.4.1.1	Ideal Cycle.....	389
8.4.1.2	Real Cycle	392
8.4.2	Regeneration	395
8.4.3	Reheat.....	398
8.4.4	Intercooling	399
8.4.5	Combined Intercooling, Regeneration, and Reheat	401
8.5	Double-Shaft Engine.....	406
8.5.1	Free Power Turbine.....	406
8.5.2	Two Discrete Shafts (Spools)	408
8.6	Three Spool	415
8.7	Combined Gas Turbine	422
8.8	Marine Applications	423
8.8.1	Additional Components for Marine Applications	424
8.8.2	Examples for Marine Gas Turbines.....	426
8.9	Offshore Gas Turbines.....	427
8.10	Micro Gas Turbines (μ -Gas Turbines).....	428
8.10.1	Microturbines versus Typical Gas Turbines.....	429
8.10.2	Design Challenges.....	429
8.10.3	Applications	430
	Problems	431
	References	433

Part II Component Design..... 435

Chapter 9 Power Plant Installation and Intakes 437

9.1	Introduction	437
9.2	Power Plant Installation	437
