

Metal Ions in Biochemistry

P K BHATTACHARYA

Alpha
Science

Contents

<i>Preface</i>	vii
1. Structure of Cells and Introduction to Bioinorganic Chemistry	1
Biomolecules and their Metal Coordination Behaviour	2
Evidence of Presence of Metal Ions in Biochemical Systems	13
Occurrence of Metals and Nonmetals in Biological Systems	14
2. Thermodynamic and Kinetic Properties of Metal Complexes	16
Factors Affecting the Stability of the Complexes	18
Macrocyclic Ligand Complexes	26
Mixed-Ligand Complexes	27
Mechanism of Substitution Reactions in Complexes	34
Labile and Inert Complexes	42
Stereo Chemical Changes Involved in Substitution Reactions in Octahedral Complexes	44
Racemisation Reaction	47
Mechanism of Redox Reaction	51
Reactions on Coordinated Ligands	58
3. Alkali and Alkaline Earth Metal Ions in Biochemical Systems	66
Alkali Metal Ions	66
Calcium	70
Intracellular Calcium Binding Proteins	73
Role of Extracellular Calcium Binding Protein	76
Role of Magnesium	77
4. Zinc in Biochemical System	85
Peptidases	86
Alkaline Phosphatase	89
Carbonic Anhydrase	92
Alcohol Dehydrogenase	94
Aspartate Transcarbamylase	97
DNA and RNA Polymerases	97
Other Roles of Zinc	99

5. Iron in Biochemical Systems	102
Oxygenase Activity	103
Catalase and Peroxidase Activity	108
Electron Transfer Process	110
Transport of Oxygen	121
Synthetic O ₂ Carriers as Models	126
Iron Storage	131
Iron Transport	134
6. Copper in Biochemical Systems	138
Electron Transfer Proteins	138
Oxidase Activity	141
Monooxygenase Activity	145
Superoxide Dismutase Activity	150
(Oxygen Transport Copper Protein), Hemocyanin	153
Copper Transport	155
7. Cobalt in Vitamin B₁₂ in Biochemical System	158
Roles of Vitamin B ₁₂	161
8. Molybdenum in Nitrogen Fixation in Plants	165
Mechanism of Nitrogen Fixation	166
Structure of Nitrogenase	167
Mechanism of Nitrogen Reduction and Ammonia Formation	169
Other Forms of Nitrogenase	171
Other Pathways of Ammonia Formation	172
9. Magnesium and Manganese in Photosynthesis in Plants	174
Light Reaction	175
Dark Reaction	178
Model Studies of WOC and Photo Systems	179
Mechanism of Photo Decomposition of Water	180
10. Less Common Trace Metal Ions in Biochemical Systems	183
Role of Nickel	183
Role of Vanadium	188
Chromium	189
11. Metal Ion Toxicity in Biochemical Systems	190
Detoxification Mechanism	192
Effect of Deficiency and Excess of Essential Metal Ions	192
Toxicity due to Non Essential Metals	194
12. Metal Complexes in Therapeutics	198
Metal Salts and Metal Complexes as Drugs in Treatment of Metal Deficiency	198
Metal Salts and Metal Complexes as Drugs for Other Diseases	199
Chelating Ligands as Drugs	206
Suggested Reading	210
Index	214
