

 WILEY

HYDRODYNAMICS AND WATER QUALITY

Modeling Rivers, Lakes, and Estuaries

ZHEN-GANG JI

INCLUDES
CD-ROM

Foreword	xiii
Preface	xv
Acknowledgments	xvii
1 Introduction	1
1.1 Overview	1
1.2 Understanding Surface Waters	4
1.3 Modeling of Surface Waters	7
1.4 About This Book	11
2 Hydrodynamics	13
2.1 Hydrodynamic Processes	14
2.1.1 Water Density	14
2.1.2 Conservation Laws	16
2.1.3 Advection and Dispersion	20
2.1.4 Mass Balance Equation	25
2.1.5 Atmospheric Forcings	27
2.1.6 Coriolis Force and Geostrophic Flow	32
2.2 Governing Equations	35
2.2.1 Basic Approximations	35
2.2.2 Equations in Cartesian Coordinates	38
2.2.3 Vertical Mixing and Turbulence Models	48
2.2.4 Equations in Curvilinear Coordinates	52
2.2.5 Initial Conditions and Boundary Conditions	58
2.3 Temperature	62
2.3.1 Heatflux Components	65
2.3.2 Temperature Formulations	73
2.4 Hydrodynamic Modeling	77
2.4.1 Hydrodynamic Parameters and Data Requirements	78
2.4.2 Case Study I: Lake Okeechobee	82
2.4.3 Case Study II: St. Lucie Estuary and Indian River Lagoon	98
	vii

3	Sediment Transport	113
3.1	Overview	113
3.1.1	Properties of Sediment	114
3.1.2	Problems Associated with Sediment	117
3.2	Sediment Processes	119
3.2.1	Particle Settling	120
3.2.2	Horizontal Transport of Sediment	122
3.2.3	Resuspension and Deposition	126
3.2.4	Equations for Sediment Transport	128
3.2.5	Turbidity and Secchi Depth	130
3.3	Cohesive Sediment	134
3.3.1	Vertical Profiles of Cohesive Sediment Concentrations	136
3.3.2	Flocculation	138
3.3.3	Settling of Cohesive Sediment	139
3.3.4	Deposition of Cohesive Sediment	143
3.3.5	Resuspension of Cohesive Sediment	145
3.4	Noncohesive Sediment	149
3.4.1	Shields Diagram	149
3.4.2	Settling and Equilibrium Concentration	152
3.4.3	Bed Load Transport	155
3.5	Sediment Bed	156
3.5.1	Characteristics of Sediment Bed	157
3.5.2	A Model for Sediment Bed	159
3.6	Wind Waves	162
3.6.1	Wave Processes	163
3.6.2	Wind Wave Characteristics	168
3.6.3	Wind Wave Models	170
3.6.4	Combined Flows of Wind Waves and Currents	172
3.6.5	Case Study: Wind Wave Modeling in Lake Okeechobee	174
3.7	Sediment Transport Modeling	179
3.7.1	Sediment Parameters and Data Requirements	180
3.7.2	Case Study I: Lake Okeechobee	182
3.7.3	Case Study II: Blackstone River	191
4	Pathogens and Toxics	201
4.1	Overview	201
4.2	Pathogens	203
4.2.1	Bacteria, Viruses, and Protozoa	204
4.2.2	Pathogen Indicators	206
4.2.3	Processes Affecting Pathogens	208
4.3	Toxic Substances	210
4.3.1	Toxic Organic Chemicals	213
4.3.2	Metals	214
4.3.3	Sorption and Desorption	216

4.4	Fate and Transport Processes	220
4.4.1	Mathematical Formulations	220
4.4.2	Processes Affecting Fate and Decay	223
4.5	Contaminant Modeling	229
4.5.1	Case Study I: St. Lucie Estuary and Indian River Lagoon	230
4.5.2	Case Study II: Rockford Lake	239
5	Water Quality and Eutrophication	247
5.1	Overview	248
5.1.1	Eutrophication	248
5.1.2	Algae	250
5.1.3	Nutrients	253
5.1.4	Dissolved Oxygen	261
5.1.5	Governing Equations for Water Quality Processes	262
5.2	Algae	274
5.2.1	Algal Biomass and Chlorophyll	275
5.2.2	Equations for Algal Processes	277
5.2.3	Algal Growth	279
5.2.4	Algal Reduction	285
5.2.5	Silica and Diatom	289
5.2.6	Periphyton	292
5.3	Organic Carbon	294
5.3.1	Decomposition of Organic Carbon	296
5.3.2	Equations for Organic Carbon	296
5.3.3	Heterotrophic Respiration and Dissolution	298
5.4	Phosphorus	299
5.4.1	Equations for Phosphorus State Variables	302
5.4.2	Phosphorus Processes	305
5.5	Nitrogen	308
5.5.1	Forms of Nitrogen	309
5.5.2	Equations for Nitrogen State Variables	311
5.5.3	Nitrogen Processes	317
5.6	Dissolved Oxygen	322
5.6.1	Biochemical Oxygen Demand	325
5.6.2	Processes and Equations of Dissolved Oxygen	328
5.6.3	Effects of Photosynthesis and Respiration	331
5.6.4	Reaeration	332
5.6.5	Chemical Oxygen Demand	336
5.7	Sediment Fluxes	336
5.7.1	Sediment Diagenesis Model	338
5.7.2	Depositional Fluxes	344
5.7.3	Diagenesis Fluxes	347
5.7.4	Sediment Fluxes	348
5.7.5	Silica	365
5.7.6	Coupling with Sediment Resuspension	366

5.8	Submerged Aquatic Vegetation	368
5.8.1	Introduction	369
5.8.2	Equations for a SAV Model	371
5.8.3	Coupling with the Water Quality Model	378
5.9	Water Quality Modeling	385
5.9.1	Model Parameters and Data Requirements	387
5.9.2	Case Study I: Lake Okeechobee	390
5.9.3	Case Study II: St. Lucie Estuary and Indian River Lagoon	406
6	External Sources and TMDL	417
6.1	Point Sources and Nonpoint Sources	417
6.2	Atmospheric Deposition	420
6.3	Wetlands and Groundwater	424
6.3.1	Wetlands	424
6.3.2	Groundwater	427
6.4	Watershed Processes and TMDL Development	430
6.4.1	Watershed Processes	430
6.4.2	Total Maximum Daily Load (TMDL)	433
7	Mathematical Modeling and Statistical Analyses	437
7.1	Mathematical Models	437
7.1.1	Numerical Models	440
7.1.2	Model Selection	444
7.1.3	Spatial Resolution and Temporal Resolution	447
7.2	Statistical Analyses	449
7.2.1	Statistics for Model Performance Evaluation	450
7.2.2	Correlation and Regression	452
7.2.3	Spectral Analysis	454
7.2.4	Empirical Orthogonal Function (EOF)	457
7.2.5	EOF Case Study	460
7.3	Model Calibration and Verification	466
7.3.1	Model Calibration	467
7.3.2	Model Verification and Validation	470
7.3.3	Sensitivity Analysis	471
8	Rivers	473
8.1	Characteristics of Rivers	473
8.2	Hydrodynamic Processes in Rivers	477
8.2.1	River Flow and the Manning Equation	477
8.2.2	Advection and Dispersion in Rivers	481
8.2.3	Flow over Dams	482

8.3	Sediment and Water Quality Processes in Rivers	485
8.3.1	Sediment and Contaminants in Rivers	485
8.3.2	Impacts of River Flow on Water Quality	486
8.3.3	Eutrophication and Periphyton in Rivers	488
8.3.4	Dissolved Oxygen in Rivers	489
8.4	River Modeling	492
8.4.1	Case Study I: Blackstone River	493
8.4.2	Case Study II: Susquehanna River	503
9	Lakes and Reservoirs	509
9.1	Characteristics of Lakes and Reservoirs	509
9.1.1	Key Factors Controlling a Lake	510
9.1.2	Vertical Stratification	511
9.1.3	Biological Zones in Lakes	514
9.1.4	Characteristics of Reservoirs	515
9.1.5	Lake Pollution and Eutrophication	519
9.2	Hydrodynamic Processes	521
9.2.1	Inflow, Outflow, and Water Budget	522
9.2.2	Wind Forcing and Vertical Circulations	525
9.2.3	Seasonal Variations of Stratification	527
9.2.4	Gyres	530
9.2.5	Seiches	532
9.3	Sediment and Water Quality Processes in Lakes	538
9.3.1	Sediment Deposition in Reservoirs and Lakes	538
9.3.2	Algae and Nutrient Stratifications	540
9.3.3	Dissolved Oxygen Stratifications	543
9.3.4	Internal Cycling and Limiting Functions in Shallow Lakes	546
9.4	Lake Modeling	550
9.4.1	Case Study I: Lake Tenkiller	551
9.4.2	Case Study II: Lake Okeechobee	560
10	Estuaries and Coastal Waters	567
10.1	Introduction	567
10.2	Tidal Processes	572
10.2.1	Tides	572
10.2.2	Tidal Currents	576
10.2.3	Harmonic Analysis	580
10.3	Hydrodynamic Processes in Estuaries	584
10.3.1	Salinity	585
10.3.2	Estuarine Circulation	586
10.3.3	Stratifications of Estuaries	588
10.3.4	Flushing Time	593

10.4 Sediment and Water Quality Processes in Estuaries	600
10.4.1 Sediment Transport under Tidal Forcing	600
10.4.2 Flocculation of Cohesive Sediment and Sediment Trapping	601
10.4.3 Eutrophication in Estuaries	604
10.5 Estuarine and Coastal Modeling	607
10.5.1 Open Boundary Conditions	609
10.5.2 Case Study I: Morro Bay	613
10.5.3 Case Study II: St. Lucie Estuary and Indian River Lagoon	626
Appendix A: Environmental Fluid Dynamics Code	635
A1 Overview	635
A2 Hydrodynamics	636
A3 Sediment Transport	637
A4 Toxic Chemical Transport and Fate	637
A5 Water Quality and Eutrophication	637
A6 Numerical Schemes	638
A7 Documentation and Application Aids	639
Appendix B: Conversion Factors	641
Appendix C: Contents of Electronic Files	645
C1 Channel Model	646
C2 St. Lucie Estuary and Indian River Lagoon Model	646
C3 Lake Okeechobee Environmental Model	646
C4 Documentation and Utility Programs	647
Bibliography	649
Index	671
