

NUCLEAR DYNAMICS AT LOW AND MEDIUM ENERGIES AND NUCLEAR STRUCTURE

Editors
S. Bhattacharya • S. R. Banerjee

Narosa

Contents

<i>Preface</i>	v
Progress in Isospin Physics with Heavy Ion Reactions <i>Bao-An Li</i>	1
Physics from Intermediate Energy Heavy Ion Collisions <i>J.N. De and S. K. Samaddar</i>	39
Nuclear Fission and Its Dynamics <i>Alok Saxena</i>	95
Low Energy Nucleus Nucleus Collisions : General Features <i>Sailajananda Bhattacharya</i>	111
Microscopic Theory of Nuclear Structure at High Spins <i>Aswini Kumar Rath</i>	129
Nuclear Reactions in the Fermi Energy Domain-Experiments with Large Arrays <i>Abdelouahad Chbihi</i>	159
Experiments with Large Gamma Detector Arrays <i>Ranjan Bhowmik</i>	183
Some Concepts of Gamma Ray Spectroscopy <i>Maitreyee Saha Sarkar</i>	233
Physics with Neutron Arrays <i>Swapan K. Datta</i>	247
Interaction of Radiation with Matter <i>Vandana Nanal</i>	257
Techniques for Nuclear Radiation Detection <i>Chandana Bhattacharya</i>	267
Pulse Processing Techniques in Nuclear Experiments <i>Satyajit Saha</i>	283
Introduction to Error Analysis <i>Aradhana Srivastava</i>	295
Root: Data Analysis Environment in Nuclear Physics and High Energy Physics <i>Subhasis Chattopadhyay</i>	305
Simulation with Geant <i>Sudhee Ranjan Banerjee</i>	319
