### Part I Propagation

---

|                                                                                             |     |
|---------------------------------------------------------------------------------------------|-----|
| <b>Waves in shallow water, with emphasis on the tsunami of 2004</b>                         |     |
| <i>Harvey Segur</i> .....                                                                   | 3   |
| <b>Integrable Nonlinear Wave Equations and Possible Connections to Tsunami Dynamics</b>     |     |
| <i>M. Lakshmanan</i> .....                                                                  | 31  |
| <b>Solitary waves propagating over variable topography</b>                                  |     |
| <i>Roger Grimshaw</i> .....                                                                 | 51  |
| <b>Water waves generated by a moving bottom</b>                                             |     |
| <i>Denys Dutykh, Frédéric Dias</i> .....                                                    | 65  |
| <b>Tsunami surge in a river: a hydraulic jump in an inhomogeneous channel</b>               |     |
| <i>Jean-Guy Caputo, Y. A. Stepanyants</i> .....                                             | 97  |
| <b>On the modelling of huge water waves called rogue waves</b>                              |     |
| <i>Christian Kharif</i> .....                                                               | 113 |
| <b>Numerical Verification of the Hasselmann equation</b>                                    |     |
| <i>Alexander O. Korotkevich, Andrei N. Pushkarev, Don Resio, Vladimir E. Zakharov</i> ..... | 135 |

---

### Part II Source & Run up

---

|                                                                              |     |
|------------------------------------------------------------------------------|-----|
| <b>Runup of nonlinear asymmetric waves on a plane beach</b>                  |     |
| <i>Irina Didenkulova, Efim Pelinovsky, Tarmo Soomere, Narcisse Zahibo</i> .. | 175 |

**Tsunami Runup in Lagrangian Description**

*Koji Fujima* ..... 191

**Analytical and numerical models for tsunami run-up**

*Per A. Madsen, David R. Fuhrman* ..... 209

**Large waves caused by oceanic impacts of meteorites**

*Robert Weiss, Kai Wünnemann* ..... 237

**Retracing the tsunami rays**

*R. Shankar* ..... 263

**Modeling and visualization of tsunamis: Mediterranean examples**

*Ahmat C. Yalciner, Effim Pelinovsky, A. Zaitsev,, A. Kurkin, C. Ozer, H. Karakus, G. Ozyurt* ..... 273

**Characterization of Potential Tsunamigenic Earthquake Source Zones in the Indian Ocean**

*N. Purnachandra Rao* ..... 285

**Index** ..... 313
