

Characterization and Analysis of Polymers

CONTENTS

INTRODUCTION

Characterization of Polymers	1
Test Methods	31

COMPOSITION, MOLAR MASS AND MOLAR MASS DISTRIBUTION

Molecular Weight Determination	65
Infrared Spectroscopy	89
Nuclear Magnetic Resonance	109
Mass Spectrometry	187
Laser Light Scattering	211
Chromatography, Size Exclusion	230
Chromatography, HPLC	252

STRUCTURE AND MORPHOLOGY

Morphology	267
Surface Analysis	297
Fractography	330
Nondestructive Testing	357
X-ray Microscopy	378
Atomic Force Microscopy	419
Scanning Force Microscopy	460
Neutron Scattering	507
Vibrational Spectroscopy	530
Microscopy	600

MOLECULAR ORGANIZATION AND DYNAMICS

Dynamic Mechanical Analysis	649
Rheological Measurements	676
Crystallinity Determination	752
Micromechanical Properties	771
Thermal Analysis of Polymers	805
Dielectric Relaxation	881
Electron Spin Resonance	895

INDEX	933
