

Hal F. Brinson
L. Catherine Brinson

Polymer Engineering Science and Viscoelasticity

An Introduction

 Springer

Table of Contents

1. Introduction	1
1.1. Historical Background.....	1
1.1.1. Relation between Polymer Science and Mechanics.....	6
1.1.2. Perspective and Scope of this Text	10
1.2. Review Questions	14
2. Stress and Strain Analysis and Measurement	15
2.1. Some Important and Useful Definitions.....	15
2.2. Elementary Definitions of Stress, Strain and Material Properties	17
2.3. Typical Stress-Strain Properties.....	23
2.4. Idealized Stress-Strain Diagrams.....	27
2.5. Mathematical Definitions of Stress, Strain and Material Characteristics.....	28
2.6. Principal Stresses	40
2.7. Deviatoric and Dilatational Components of Stress and Strain..	42
2.8. Failure (Rupture or Yield) Theories	46
2.9. Atomic Bonding Model for Theoretical Mechanical Properties.....	49
2.10. Review Questions	52
2.11. Problems	53
3. Characteristics, Applications and Properties of Polymers.....	55
3.1. General Classification and Types of Polymers	55
3.2. Typical Applications	61
3.3. Mechanical Properties of Polymers	66
3.3.1. Examples of Stress-Strain Behavior of Various Polymers	68
3.4. An Introduction to Polymer Viscoelastic Properties and Characterization	75
3.4.1. Relaxation and Creep Tests	75
3.4.2. Isochronous Modulus vs. Temperature Behavior	79
3.4.3. Isochronous Stress-Strain Behavior – Linearity.....	82
3.5. Phenomenological Mechanical Models.....	84
3.5.1. Differential Stress-Strain Relations and Solutions for a Maxwell Fluid.....	86
3.5.2. Differential Stress-Strain Relations and Solutions for a Kelvin Solid	91

3.5.3. Creep of a Three Parameter Solid and a Four Parameter Fluid.....	93
3.6. Review Questions	95
3.7. Problems	96
4. Polymerization and Classification	99
4.1. Polymer Bonding	99
4.2. Polymerization	103
4.3. Classification by Bonding Structure Between Chains and Morphology of Chains.....	108
4.4. Molecular Configurations	111
4.4.1. Isomers	111
4.4.2. Copolymers.....	114
4.4.3. Molecular Conformations.....	115
4.5. Random Walk Analysis of Chain End-to-End Distance	118
4.6. Morphology.....	122
4.7. Molecular Weight	131
4.8. Methods for the Measurement of Molecular Weight	139
4.9. Polymer Synthesis Methods.....	146
4.10. Spectrography	153
4.11. Review Questions	155
4.12. Problems.....	157
5. Differential Constitutive Equations	159
5.1. Methods for the Development of Differential Equations for Mechanical Models.....	160
5.2. A Note on Realistic Creep and Relaxation Testing.....	165
5.3. Generalized Maxwell and Kelvin Models.....	168
5.3.1. A Caution on the Use of Generalized Differential Equations	176
5.3.2. Description of Parameters for Various Elementary Mechanical Models	177
5.4. Alfrey's Correspondence Principle	180
5.5. Dynamic Properties - Steady State Oscillation Testing	181
5.5.1. Examples of Storage and Loss Moduli and Damping Ratios.....	191
5.5.2. Molecular Mechanisms Associated with Dynamic Properties	196
5.5.3. Other Instruments to Determine Dynamic Properties	198
5.6. Review Questions	199
5.7. Problems.....	199

6. Hereditary Integral Representations of Stress and Strain	201
6.1. Boltzman Superposition Principle	201
6.2. Linearity	208
6.3. Spectral Representation of Viscoelastic Materials	208
6.4. Interrelations Among Various Viscoelastic Properties	211
6.5. Review Questions	217
6.6. Problems	217
 7. Time and Temperature Behavior of Polymers	 221
7.1. Effect of Temperature on Viscoelastic Properties of Amorphous Polymers	222
7.2. Development of Time Temperature-Superposition-Principle (TTSP) Master Curves	225
7.2.1. Kinetic Theory of Polymers	228
7.2.2. WLF Equation for the Shift Factor	230
7.2.3. Mathematical Development of the TTSP	235
7.2.4. Potential Error for Lack of Vertical Shift	241
7.3. Exponential Series Representation of Master Curves	242
7.3.1. Numerical Approach to Prony Series Representation	245
7.3.2. Determination of the Relaxation Modulus from a Relaxation Spectrum	251
7.4. Constitutive Law with Effective Time	254
7.5. Molecular Mechanisms Associated with Viscoelastic Response	256
7.6. Entropy Effects and Rubber Elasticity	257
7.7. Physical and Chemical Aging	264
7.8. Review Questions	271
7.9. Problems	271
