Glossary xi

1 Supporting research and researchers: some perspectives 1

Introduction 1

Context 2

Let us tell you some stories . . . 4

How this book is organized 9

2 Current challenges for libraries and research support 11

Introduction 11

Scholarly communication 11

The language of scholarship 20

Academic freedom, funding and research ethics 23

Copyright and plagiarism 25

Freedom of information 27

RLN, the British Library and national libraries 30

E-science 32

Conclusion 33

3 Defining research and researchers 35

Introduction 35

What is research? 35

History of the PhD 38

Training and skills of research students 40

The Roberts Review, the postdoctoral student and CRS 44

Research selectivity 48

Research and teaching 52

Third strand activities 56

Research issues and what they mean for libraries 58

Conclusion 59

4 Collection management 61

Introduction 61

Researchers' use of libraries and information 62

Reports, programmes and networks: the strategic background 65

Case studies in collection management 70

What is a collection? 75

Key components of a collection 76

Collection management in practice 81

Conclusion 86

5 The researcher's toolkit: resources 89

Introduction 89

Influences on resource use 89

Learning styles, habits and attitudes 90

Resources 92

Conclusion 120

Further reading 120

6 Services to facilitate research 123

Introduction 123

Keeping in touch with the research community 124

What does the research community want from the library? 126

Examples of surveys 127

Services and support: some specific considerations 133

Conclusion 151

7 The information-literate researcher 153

Introduction 153

Starting to teach 153

Researchers' training needs 154

Information literacy: key areas of knowledge 156

Motivation 158

Andragogy: a brief introduction 159

Training and development opportunities 160

Communities of practice 181

Conclusion 182

8 Facing the future: key challenges 185

Introduction 185

The research information environment of the future 186

Competition and collaboration: research in universities 188

Scholarly communication, open access and intellectual property 189

The research library of the future: some themes 190

Conclusion 204

9 Key principles for supporting research 207

Introduction 207

Laws, values and principles 208

Principles of library support for researchers 210

Conclusion 223

VI PROVIDING EFFECTIVE LIBRARY SERVICES FOR RESEARCH
