FUEL CELLS AND HYDROGEN ENERGY

Modeling Solid Oxide Fuel Cells

Methods, Procedures and Techniques

CD-ROM

INCLUDED

Springer

Table of Contents

Preface	ix
Acknowledgements	xi
List of Symbols	xiii
Part 1. Modeling Principles	
1. SOFC in Brief <i>T. Malkow</i>	3
2. Thermodynamics of Fuel Cells <i>W. Winkler and P. Nehter</i>	13
3. Mathematical Models: A General Overview <i>S. Ubertini and R. Bove</i>	51
Part 2. Single Cell, Stack and System Models	
4. CFD-Based Results for Planar and Micro-Tubular Single Cell Designs <i>L. Andreassi, S. Ubertini, R. Bove and N.M. Sammes</i>	97
5. From a Single Cell to a Stack Modeling <i>I.B. Celik and S.R. Pakalapati</i>	123
6. IP-SOFC Model <i>S. Grosso, L. Repetto and P. Costamagna</i>	183
7. Tubular Cells and Stacks <i>V. Verda and C. Ciano</i>	207

- | | |
|--|-----|
| 8. Modeling of Combined SOFC and Turbine Power Systems | 239 |
| <i>E.A. Liese, M.L. Ferrari, J. VanOsdol, D. Tucker and R.S. Gemmen</i> | |
| 9. Dynamic Modeling of Fuel Cells | 269 |
| <i>R.S. Gemmen</i> | |
| 10. Integrated Numerical Modeling of SOFCs: Mechanical Properties
and Stress Analyses | 323 |
| <i>H. Yakabe</i> | |
