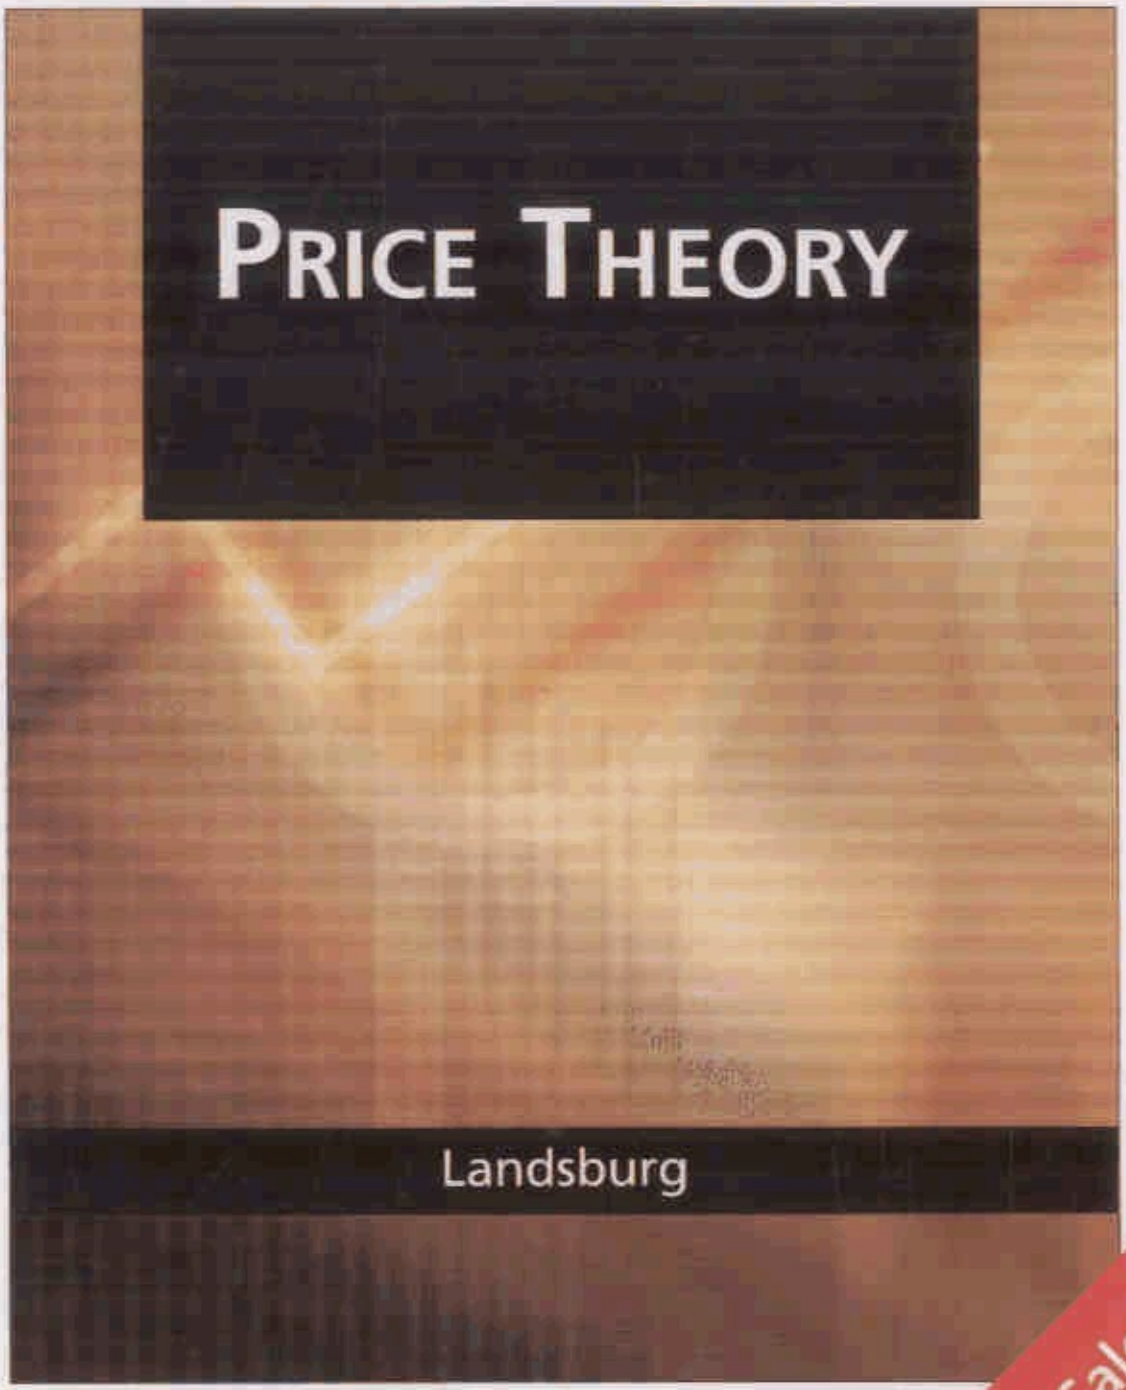
INTERNATIONAL STUDENT EDITION



Not for Sale in the United States

Preface v

1 SUPPLY, DEMAND, AND EQUILIBRIUM 1

1.1 Demand 1

Demand versus Quantity Demanded 1 / Demand Curves 2 / Changes in Demand 4 / Market Demand 6 / The Shape of the Demand Curve 7 / The Wide Scope of Economics 10

1.2 Supply 10

Supply versus Quantity Supplied 11

1.3 Equilibrium 13

The Equilibrium Point 14 / Changes in the Equilibrium Point 15

Summary 23
Review Questions 25
Numerical Exercises 25
Problem Set 25

2 PRICES, COSTS, AND THE GAINS FROM TRADE 31

2.1 Prices 31

Absolute versus Relative Prices 32 / Some Applications 34

2.2 Costs, Efficiency, and the Gains from Trade 35

Costs and Efficiency 35 / Specialization and the Gains from Trade 38 / Why People Trade 39

Summary 42
Review Questions 42
Numerical Exercises 43
Problem Set 43

3 THE BEHAVIOR OF CONSUMERS 45

3.1 Tastes 45

Indifference Curves 46 / Marginal Values 49 / More on Indifference Curves 53

3.2 The Budget Line and the Consumer's Choice 54

The Budget Line 54 / The Consumer's Choice 56

3.3 Applications of Indifference Curves 60

Standards of Living 60 / What's the Best Way to Be Taxed? 64

Summary 66
Review Questions 67
Numerical Exercises 68

Problem Set 68
Appendix to Chapter 3 73
Cardinal Utility 73 / The consumer's Optimum 75

4 CONSUMERS IN THE MARKETPLACE 77
4.1 Changes in Income 78
Changes in Income and Changes in the Budget Line 78 / Changes in Income and Changes in the Optimum Point 79 / The Engel Curve 81
4.2 Changes in Price 82
Changes in Price and Changes in the Budget Line 82 / Changes in Price and Changes in the Optimum Point 83 / The Demand Curve 85
4.3 Income and Substitution Effects 87
Two Effects of a Price Increase 87 / Why Demand Curves Slope Downward 91 / The Compensated Demand Curve 95
4.4 Elasticities 96
Income Elasticity of Demand 96 / Price Elasticity of Demand 98
Summary 102
Review Questions 103
Numerical Exercises 104
Problem Set 105

5 THE BEHAVIOR OF FIRMS 113
5.1 Weighing Costs and Benefits 114
A Farmer's Problem 114 / The Equimarginal Principle 119
5.2 Firms in the Marketplace 120
Revenue 120 / Costs 123
Summary 129
Review Questions 130
Numerical Exercises 131
Problem Set 132

6 PRODUCTION AND COSTS 135
6.1 Production and Costs in the Short Run 135
The Total, Marginal, and Average Products of Labor 136 / Costs in the Short Run 139
6.2 Production and Costs in the Long Run 145
Isoquants 145 / Choosing a Production Process 149 / The Long-Run Cost Curves 154 / Returns to Scale and the Shape of the Long-Run Cost Curves 156
6.3 Relations Between the Short Run and the Long Run 158
From Isoquants to Short-Run Total Cost 158 / From Isoquants to Long-Run Total Cost 159 / Short-Run Total Cost versus Long-Run Total Cost 159 / A Multitude of Short Runs 159 / Short-Run Average Cost versus Long-Run Average Cost 160

Summary 163
Review Questions 164
Numerical Exercises 165
Problem Set 165

7 COMPETITION 169

7.1 The Competitive Firm 169
Revenue 171 / The Firm's Supply Decision 172 / Shutdowns 176 / The Elasticity of Supply 178

7.2 The Competitive Industry in the Short Run 178
Defining the Short Run 178 / The Competitive Industry's Short-Run Supply Curve 179 / Supply, Demand, and Equilibrium 180 / Competitive Equilibrium 181 / The Industry's Costs 183

7.3 The Competitive Firm in the Long Run 184
Long-Run Marginal Costs and Supply 184
Profit and the Exit Decision 186

7.4 The Competitive Industry in the Long Run 190
Constant Cost Industries 190 / The Industry's Long-Run Supply Curve 190 / The Zero-Profit Condition 191 / Equilibrium 192 / Application: The Government as a Supplier 195 / Some Lessons Learned 195 /

7.5 Relaxing the Assumptions 196
The Break-Even Price 197 / Constant-Cost Industries 198 / Increasing-Cost Industries 198 / Decreasing-Cost Industries 199 / Equilibrium 201

7.6 Applications 202
Removing a Rent Control 202 / A Tax on Motel Rooms 203 / Tipping the Busboy 205

7.7 Using the Competitive Model 206

Summary 208
Review Questions 209
Numerical Exercises 210
Problem Set 214

8 WELFARE ECONOMICS AND THE GAINS FROM TRADE 219

8.1 Measuring the Gains from Trade 220
Consumers' and Producers' Surplus 220

8.2 The Efficiency Criterion 230
Consumers' Surplus and the Efficiency Criterion 230 / Understanding Deadweight Loss 234 / Other Normative Criteria 237

8.3 Examples and Applications 238
Subsidies 238 / Price Ceilings 242 / Tariffs 244 / Theories of Value 249

8.4 General Equilibrium and the Invisible Hand 252
The Fundamental Theorem of Welfare Economics 252 / An Edgeworth Box Economy 254 / General Equilibrium with Production 258

Summary 262
Review Questions 263
Problem Set 264
Appendix to Chapter 8: Normative Criteria 271

9 KNOWLEDGE AND INFORMATION 279

9.1 The Informational Content of Prices 279
Prices and Information 279 / The Costs of Misallocation 285

9.2 Financial Markets 293
Efficient Markets for Financial Securities 293 / The Fall of the NASDAQ: 2000 295

9.3 Topics in the Economics of Information 296
Signaling: Should Colleges Be Outlawed? 296 / Adverse Selection and the Market for Lemons 299 / Moral Hazard 301 / Principal–Agent Problems 302 / A Theory of Unemployment 305

Summary 307
Review Questions 308
Problem Set 308

10 MONOPOLY 313

10.1 Price and Output under Monopoly 314
Monopoly Pricing 314 / Elasticity and Marginal Revenue 314 / Measuring Monopoly Power 317 / Welfare 319 / Monopoly and Public Policy 320

10.2 Sources of Monopoly Power 325
Natural Monopoly 325 / Patents 327 / Resource Monopolies 328 / Economies of Scope 328 / Legal Barriers to Entry 328

10.3 Price Discrimination 329
First-Degree Price Discrimination 331 / Third-Degree Price Discrimination 331 / Two-Part Tariffs 342

Summary 345
Review Questions 346
Numerical Exercises 347
Problem Set 348

11 MARKET POWER, COLLUSION, AND OLIGOPOLY 355

11.1 Acquiring Market Power 356
Mergers 356 / Horizontal Integration 356 / Vertical Integration 359 / Predatory Pricing 361 / Resale Price Maintenance 364

11.2 Collusion and the Prisoner's Dilemma: An Introduction to Game Theory 368 / Game Theory and the Prisoner's Dilemma 369 / The Prisoner's Dilemma and the Breakdown of Cartels 372

11.3 Regulation 376
Examples of Regulation 376 / What Can Regulators Regulate? 381 / Creative Response and Unexpected Consequences 381 / Positive Theories of Regulation 383

11.4 Oligopoly 384
Contestable Markets 384 / Oligopoly with a Fixed Number of Firms 386

11.5 Monopolistic Competition and Product Differentiation 389
Monopolistic Competition 389 / The Economics of Location 391

Summary 392
Review Questions 393
Numerical Exercises 393
Problem Set 395

12 THE THEORY OF GAMES 399

12.1 Game Matrices 399
Pigs in a Box 399 / The Prisoner's Dilemma Revisited 401 / Pigs in a Box Revisited 403 / The Copycat Game 405 / Nash Equilibrium as a Solution Concept 406 / Mixed Strategies 407 / Pareto Optima 408 / Pareto Optima versus Nash Equilibria 410

12.2 Sequential Games 411
An Oligopoly Problem 411

Summary 413
Problem Set 414

13 EXTERNAL COSTS AND BENEFITS 417

13.1 Costs Imposed on Others 417
The Doctor and the Confectioner 417 / The Incompleteness of Pigou's Analysis 421

13.2 The Coase Theorem 421
The Doctor and the Confectioner Revisited 422 / Alternative Solutions 422 / The Coase Theorem: A Summary 426 / The Coase Theorem with Many Firms 427 / External Benefits 430 / Income Effects and the Coase Theorem 431

13.3 Transactions Costs 433
Trains, Sparks, and Crops 434 / The Reciprocal Nature of the Problem 435 / Sources of Transactions Costs 437

13.4 The Law and Economics 441
The Law of Torts 441 / A Positive Theory of the Common Law 444 / Normative Theories of the Common Law 446 / Optimal Systems of Law 446

Summary 447
Review Questions 448
Problem Set 448

14 COMMON PROPERTY AND PUBLIC GOODS 455

14.1 The Tragedy of the Commons 455
The Springfield Aquarium 455 / It Can Pay to Be Different 460 / Common Property 461

14.2 Public Goods 463
Some Market Failures 464 / The Provision of Public Goods 465 / The Role of Government 466 / Schemes for Eliciting Information 467 / Reaching the Efficient Outcome 468 /

Summary 469
Review Questions 469
Numerical Exercises 470
Problem Set 470

15 THE DEMAND FOR FACTORS OF PRODUCTION 475

15.1 The Firm's Demand for Factors in the Short Run 475
The Marginal Revenue Product of Labor 475 / The Algebra of Profit Maximization 477 / The Effect of Plant Size 480

15.2 The Firm's Demand for Factors in the Long Run 481
Constructing the Long-Run Labor Demand Curve 481 / Substitution and Scale Effects 483 / Relationships between the Short Run and the Long Run 486

15.3 The Industry's Demand Curve for Factors of Production 487
Monopsony 488

15.4 The Distribution of Income 489
Factor Shares and Rents 490 / Producers' Surplus 492

Summary 494
Review Questions 495
Numerical Exercises 496
Problem Set 497

16 THE MARKET FOR LABOR 499

16.1 Individual Labor Supply 499
Consumption versus Leisure 499 / Changes in the Budget Line 501 / The Worker's Supply of Labor 505 / International Difference in Labor Supply 506

16.2 Labor Market Equilibrium 508
Changes in Nonlabor Income 508 / Changes in Productivity 509

16.3 Differences in Wages 512
Human Capital 512 / Compensating Differentials 514 / Access to Capital 514

16.4 Discrimination 516
Theories of Discrimination 516 / Wage Differences Due to Worker Preferences 517 / Human Capital Inheritance 518

Summary 518
Review Questions 519
Problem Set 520

17 ALLOCATING GOODS OVER TIME 523

17.1 Bonds and Interest Rates 523

Relative Prices, Interest Rates, and Present Values 524 / Bonds Denominated in Dollars 527 / Default Risk 528

17.2 Applications 529

Valuing a Productive Asset 530 / Valuing Durable Commodities: Is Art a Good Investment? 531 / Should You Pay with Cash or Credit? 532 / Government Debt 533 / Planned Obsolescence 534 / Artists' Royalties 535 / Old Taxes Are Fair Taxes 536 / The Pricing of Exhaustible Resources 537

17.3 The Market for Current Consumption 538

The Consumer's Choice 538 / The Demand for Current Consumption 541 / Equilibrium and the Representative Agent 543 / Changes in Equilibrium 546

17.4 Production and Investment 551

The Demand for Capital 552 / The Supply of Current Consumption 553 / Equilibrium 554

Summary 555
Review Questions 556
Problem Set 556

18 RISK AND UNCERTAINTY 563

18.1 Attitudes Toward Risk 563

Characterizing Baskets 565 / Opportunities 566 / Preferences and the Consumer's Optimum 568 / Gambling at Favorable Odds 573 / Risk and Society 573

18.2 The Market for Insurance 576

Imperfect Information 576 / Uninsurable Risks 578

18.3 Futures Markets 578

Speculation 579

18.4 Markets for Risky Assets 581

Portfolios 582 / The Geometry of Portfolios 584 / The Investor's Choice 586 / Constructing a Market Portfolio 589

18.5 Rational Expectations 590

A Market with Uncertain Demand 590 / Why Economists Make Wrong Predictions 592

Summary 595
Review Questions 597
Problem Set 597

19 WHAT IS ECONOMICS? 601

19.1 The Nature of Economic Analysis 601

Stages of Economic Analysis 601 / The Value of Economic Analysis 604

19.2 The Rationality Assumption 605
The Role of Assumptions in Science 605 / All We Really Need: No Unexploited Profit Opportunities 605

19.3 What Is an Economic Explanation? 609
Celebrity Endorsements 609 / The Size of Shopping Carts 610 / Why Is There Mandatory Retirement? 611 / Why Rock Concerts Sell Out 612 / 99¢ Pricing 612 / Rationality Revisited 613

19.4 The Scope of Economic Analysis 614
Laboratory Animals as Rational Agents 614

Problem Set 618

APPENDIX A: CALCULUS SUPPLEMENT 621

APPENDIX B: ANSWERS TO EXERCISES 649

APPENDIX C: ANSWERS TO PROBLEM SETS 661

GLOSSARY 677

INDEX 685
