

Roland Wengenmayr,
Thomas Bührke (Eds.)

 WILEY-VCH

Renewable Energy

Sustainable Energy Concepts
for the future

With a preface by
Eicke Weber

Contents

Preface

Eicke R. Weber

Foreword

1 High-quality, First-hand Information

Roland Wengenmayr, Thomas Bührke

The Development

4 Renewable Energy Sources on the Rise

Harald Kohl

Wind Energy

14 A Tailwind for sustainable Technology

Martin Kühn

Hydroelectric Plants

22 Flowing Energy

Roland Wengenmayr

Concentrating Solar Power Plants

26 How the Sun gets into the Power Plant

Robert Pitz-Paal

Photovoltaics

34 Solar Cells – an Overview

Roland Wengenmayr

New Materials

42 Solar Cells from Ribbon Silicon

Giso Hahn

CIS Thin-film Solar Cells

50 Photovoltaic Cells on Glass

Nikolaus Meyer

Geothermal Power Generation

54 Energy from the Depths of the Earth

Ernst Huenges

Biofuels

61 Synthetic Fuels from the Biomass

Nicolaus Dahmen, Eckard Dinjus,
Edmund Henrich

- | | | | |
|----|---|-----|---|
| 67 | Biogas and Agro-biofuel
Does the Future Belong to Biogas?
Roland Wengenmayr | 96 | Fuel Cells
Taming the Flame
Manfred Waidhas, Harald Landes |
| 68 | Solar Updraft Tower Plants
Electric Power from Hot Air
Jörg Schlaich, Gerhard Weinrebe | 104 | Solar Air Conditioning
Cooling with the Heat of the Sun
Roland Wengenmayr |
| 76 | Wave-Motion Power Plants
Energy Reserves from the Oceans
Kai-Uwe Graw | 106 | Climate Engineering
A Super Climate in the Greenhouse
Roland Wengenmayr |
| 83 | Hydrogen as Energy Carrier
Is the Hydrogen Economy Around the Corner?
Gerd Eisenbeiß | 110 | Climate Engineering
An Exceptional Sustainability Concept
Christian Matt, Matthias Schuler |
| 89 | Seasonal Storage of Thermal Energy
Heat on Call
Silke Köhler, Frank Kabus, Ernst Huenges | 113 | Promoting Renewable Energy in Germany
How Political Will Changes a Country
Thomas Bührke |
| | | 114 | Subject Index |
