# DESIGN AND DEVELOPMENT RESEARCH

---

---

Rita C. Richey • James D. Klein

# Contents

List of Tables	xiii
List of Figures	xiv
Preface	xv
Acknowledgments	xix

<b>1</b>	<b>An Overview of Design and Development Research</b>	<b>1</b>
	The Need for Design and Development Research	2
	<i>Design and Development as a Science • The Design and Development Knowledge Base and Its Foundations • Design and Development Research and the Advancement of the Field</i>	
	The Scope of Design and Development Research	7
	<i>Research on Product and Tool Design and Development • Research on Design and Development Models • The Outcomes of Product and Tool Research and Model Research • The Unique Role of Design and Development Research</i>	
	Looking Ahead	14
<b>2</b>	<b>Identifying Design and Development Research Problems</b>	<b>15</b>
	Guidelines for Selecting a Research Problem	15

Sources of Design and Development Research Problems	16
<i>Problems from the Workplace • Problems Related to Emerging Technology • Problems Related to Design and Development Theory</i>	
Using the Literature to Identify and Refine a Research Problem	25
<i>The Role of Literature in Problem Identification • Sources for a Literature Review in Design and Development</i>	
Focusing the Design and Development Research Problem	29
<i>Transforming Research Problems into Research Questions • Determining the Parameters of the Study</i>	
Looking Ahead	32
A Checklist for Identifying and Focusing the Problem of a Design and Development Study 33	
<b>3 Design and Development Research Methodology</b>	<b>35</b>
The Nature of Research Design	36
<i>Establishing Validity • Facilitating Notions of Causality • Facilitating Generalization and Interpretation • Anticipating and Avoiding Problems • Components of a Research Design</i>	
The Characteristics of Design and Development Research Methodology	39
<i>Commonly Used Design and Development Research Methods and Strategies • Mixed and Multiple Methods Research</i>	
Matching Research Methods and Questions	42
<i>Classifying Design and Development Research Goals • Matching Research Purposes and Methods</i>	
Looking Ahead	45
A Checklist for Matching Design and Development Research Questions and Methods 46	

<b>4</b>	<b>Product and Tool Research: Methods and Strategies</b>	<b>47</b>
	Strategies of Product Development Research	48
	<i>A Representative Mixed Methods Case Study</i> • <i>A Representative Multiple Qualitative Methods Study</i>	
	Strategies of Program Development Research	
	<i>A Representative Program Evaluation Study</i>	
	Strategies for Research on Design and Development Phases	52
	<i>A Representative Mixed Methods Study of Formative Evaluation</i> • <i>A Representative Multiple Quantitative Methods Study of Integrated Evaluation</i>	
	Strategies for Research on Tool Development and Use	54
	<i>A Representative Tool Development Case Study</i> • <i>A Representative Tool Use Study</i>	
	A Summary of Product and Tool Research Designs	57
	Unique Product and Tool Research Design Concerns	61
	<i>Researcher-Participant Dual Roles</i> • <i>Research in a Natural Work Environment</i>	
	Looking Ahead	63
	A Checklist for Addressing Common Concerns of Product and Tool Research Design	64
<b>5</b>	<b>Model Research: Methods and Strategies</b>	<b>65</b>
	Strategies of Model Development Research	66
	<i>A Representative Multiple Qualitative Methods Study</i> • <i>A Representative Mixed Methods Study</i>	
	Strategies of Model Validation Research	67
	<i>A Representative Expert Review Study</i> • <i>A Representative Usability Documentation Study</i> • <i>A Representative Investigation of Component Variables</i> • <i>A Representative Field-Evaluation Study</i> • <i>A Representative Controlled Testing Study</i>	

Strategies of Model Use Research 72

- A Representative Expertise Study Using Think-Aloud Strategies* •
- A Representative Designer Decision-Making Study Using In-Depth Interviews* •
- A Representative Qualitative Study of Conditions Impacting Model Use*

A Summary of Model Research Designs 75

Unique Model Research Design Concerns 78

- Working with Recall Data* •
- Research in Multiple Natural Work Environments* •
- Distinguishing Participant Characteristics*

Looking Ahead 81

A Checklist for Addressing Common Concerns of Model Research Design 82

## **6 Selecting Participants and Settings 83**

Selecting the Setting of the Study 84

- Types of Settings and Their Characteristics* •
- Matching Settings to Research Questions* •
- Practical Issues in Setting Selection*

Selecting the Participants of the Study 87

- Types of Participants* •
- Sampling Participants*

Participant and Setting Solutions from the Design and Development Literature 90

- Participants and Settings in Product and Tool Research* •
- Participants and Settings in Model Research*

Ethical Consideration for the Protection of Participants 94

- Getting Approval to Conduct Research* •
- Obtaining Informed Consent* •
- Avoiding Coercion* •
- Maintaining Confidentiality and Ensuring Anonymity*

Looking Ahead 96

A Checklist for Selecting Participants and Settings in a Design and Development Study 97

## **7 Collecting Design and Development Research Data 99**

Critical Design and Development Research Data 100

*Profile Data • Context Data • In-Progress Project Data • Try-Out Data*

Data Collection Instruments 106

*Work Logs • Surveys and Questionnaires • Interview Protocols • Observation Guides*

Technology-Based Data Collection Strategies 117

*Web-Based Data Collection • Software-Based Data Collection • Laboratory-Based Data Collection*

Data Collection Issues 123

*Ensuring Data Integrity • Establishing Appropriate Data Sets*

Looking Ahead 125

A Checklist for Collecting Data in a Design and Development Study 126

## **8 Interpreting Design and Development Findings 127**

The Contributions of Design and Development Research 127

*Expanding the Design and Development Knowledge Base • Creating the Foundations for Design and Development Theory • Creating the Foundations for Future Research*

Interpreting Product and Tool Research Findings 132

*Lessons Learned about Product and Tool Design and Development Processes • Lessons Learned about Product and Tool Use*

Interpreting Model Research Findings 135

*Understanding Model Development Findings • Understanding Model Validation Findings • Understanding Model Use Findings*

Interpretation Issues 139

*Generalizations and Project-Specific Data • The Impact of Organizational Concerns*

Looking Ahead	142
A Checklist for Interpreting Findings of Design and Development Research	143
<b>9 The Status and Future of Design and Development Research</b>	<b>145</b>
The Expansion of Design and Development Research	146
<i>Alternative Approaches to Design and Development Research</i>	•
<i>New Opportunities for Design and Development Research</i>	
Conditions that Facilitate Design and Development Research	151
<i>Dissatisfaction with Existing Research Orientations</i>	•
<i>Knowledge of the Innovation</i>	•
<i>Availability of Resources</i>	
Conclusions	153
Glossary of Terms	155
References	161
Author Index	173
Subject Index	177
