# INTERNAL COMBUSTION ENGINES

THIRD EDITION

**V GANESAN**

# Contents

<i>Foreword</i>	<i>xxiii</i>
<i>Preface to the Third Edition</i>	<i>xxv</i>
<i>Preface to the Second Edition</i>	<i>xxvi</i>
<i>Preface to the First Edition</i>	<i>xxvii</i>
<i>Nomenclature</i>	<i>xxix</i>
<b>1 Introduction</b>	<b>1</b>
1.1 Energy Conversion	1
1.1.1 Definition of 'Engine'	1
1.1.2 Definition of 'Heat Engine'	1
1.1.3 Classification and Some Basic Details of Heat Engines	1
1.1.4 External Combustion and Internal Combustion Engines	3
1.2 Basic Engine Components and Nomenclature	3
1.2.1 Engine Components	3
1.2.2 Nomenclature	5
1.3 The Working Principle of Engines	7
1.3.1 Four-Stroke Spark-Ignition Engine	7
1.3.2 Four-Stroke Compression-Ignition Engine	9
1.3.3 Comparison of SI and CI Engines	10
1.3.4 Two-Stroke Engine	11
1.3.5 Comparison of Four-Stroke and Two-Stroke Engines	13
1.4 Actual Engines	14
1.5 Classification of IC Engines	14
1.5.1 Cycle of Operation	16
1.5.2 Type of Fuel Used	16
1.5.3 Method of Charging	18
1.5.4 Type of Ignition	18
1.5.5 Type of Cooling	19
1.5.6 Cylinder Arrangements	19

1.6	Application of IC Engines	21
1.6.1	Two-Stroke Gasoline Engines	21
1.6.2	Two-Stroke Diesel Engines	22
1.6.3	Four-Stroke Gasoline Engines	22
1.6.4	Four-Stroke Diesel Engines	22
1.7	The First Law Analysis of Engine Cycle	23
1.8	Engine Performance Parameters	24
1.8.1	Indicated Thermal Efficiency ( $\eta_{ith}$ )	24
1.8.2	Brake Thermal Efficiency ( $\eta_{bth}$ )	25
1.8.3	Mechanical Efficiency ( $\eta_m$ )	25
1.8.4	Volumetric Efficiency ( $\eta_v$ )	25
1.8.5	Relative Efficiency or Efficiency Ratio ( $\eta_{rel}$ )	26
1.8.6	Mean Effective Pressure ( $p_m$ )	26
1.8.7	Mean Piston Speed ( $\bar{s}_p$ )	27
1.8.8	Specific Power Output ( $P_s$ )	27
1.8.9	Specific Fuel Consumption ( $sfc$ )	28
1.8.10	Inlet-Valve Mach Index ( $Z$ )	28
1.8.11	Fuel-Air ( $F/A$ ) or Air-Fuel Ratio ( $A/F$ )	29
1.8.12	Calorific Value ( $CV$ )	30
1.9	Design and Performance Data	30
	Worked out Examples	32
	Review Questions	39
	Exercise	41
	Multiple Choice Questions	45
<b>2</b>	<b>Review of Basic Principles</b>	<b>49</b>
2.1	Introduction	49
2.2	Basic and Derived Quantities	49
2.2.1	Length	50
2.2.2	Time	50
2.2.3	Mass and Weight	50
2.2.4	Gravitational Constant	50
2.2.5	Force	51
2.2.6	Pressure	51
2.2.7	Temperature	51
2.3	The Gas Laws	51
2.3.1	The Mole	52
2.3.2	Specific Volume and Density	52
2.3.3	Simplification of the Gas Laws	52
2.3.4	Mixture of Gases	53
2.4	Forms of Energy	53
2.4.1	Transfer of Energy	54

2.4.2	Stored Energy	54
2.4.3	Potential Energy	54
2.4.4	Kinetic Energy	54
2.4.5	Internal Energy	54
2.5	First Law of Thermodynamics	55
2.6	Process	55
2.6.1	Non-flow Processes	56
2.7	Analysis of Non-flow Processes	56
2.7.1	Constant Volume or Isochoric Process	56
2.7.2	Constant Pressure or Isobaric Process	57
2.7.3	Constant Temperature or Isothermal Process	57
2.7.4	Reversible Adiabatic or Isentropic Process	58
2.7.5	Reversible Polytropic Process	59
2.7.6	Heat Transfer During Polytropic Process	60
2.8	Analysis of Flow Process	60
2.8.1	Flow Work	61
2.9	Work, Power and Efficiency	63
2.9.1	Work	63
2.9.2	Power	63
2.9.3	Efficiency	63
	Worked out Examples	64
	Review Questions	68
	Exercise	69
	Multiple Choice Questions	71
<b>3</b>	<b>Air-Standard Cycles and Their Analysis</b>	<b>75</b>
3.1	Introduction	75
3.2	The Carnot Cycle	76
3.3	The Stirling Cycle	79
3.4	The Ericsson Cycle	80
3.5	The Otto Cycle	80
3.5.1	Thermal Efficiency	81
3.5.2	Work Output	82
3.5.3	Mean Effective Pressure	83
3.6	The Diesel Cycle	84
3.6.1	Thermal Efficiency	85
3.6.2	Work Output	86
3.6.3	Mean Effective Pressure	86
3.7	The Dual Cycle	87
3.7.1	Thermal Efficiency	87
3.7.2	Work Output	89
3.7.3	Mean Effective Pressure	89

3.8	Comparison of the Otto, Diesel and Dual Cycles	89
3.8.1	Same Compression Ratio and Heat Addition	90
3.8.2	Same Compression Ratio and Heat Rejection	90
3.8.3	Same Peak Pressure, Peak Temperature and Heat Rejection	91
3.8.4	Same Maximum Pressure and Heat Input	92
3.8.5	Same Maximum Pressure and Work Output	93
3.9	The Lenoir Cycle	93
3.10	The Atkinson Cycle	94
3.11	The Brayton Cycle	96
	Worked out Examples	97
	Review Questions	133
	Exercise	135
	Multiple Choice Questions	139
<b>4</b>	<b>Fuel–Air Cycles and their Analysis</b>	<b>143</b>
4.1	Introduction	143
4.2	Fuel–Air Cycles and their Significance	143
4.3	Composition of Cylinder Gases	145
4.4	Variable Specific Heats	145
4.5	Dissociation	147
4.6	Effect of Number of Moles	150
4.7	Comparison of Air–Standard and Fuel–Air Cycles	150
4.8	Effect of Operating Variables	152
4.8.1	Compression Ratio	152
4.8.2	Fuel–Air Ratio	152
	Worked out Examples	158
	Review Questions	165
	Exercise	166
	Multiple Choice Questions	167
<b>5</b>	<b>Actual Cycles and their Analysis</b>	<b>169</b>
5.1	Introduction	169
5.2	Comparison of Air-Standard and Actual Cycles	169
5.3	Time Loss Factor	170
5.4	Heat Loss Factor	175
5.5	Exhaust Blowdown	177
5.5.1	Loss Due to Gas Exchange Processes	177
5.5.2	Volumetric Efficiency	177
5.6	Loss due to Rubbing Friction	181
5.7	Actual and Fuel-Air Cycles of CI Engines	181
	Review Questions	182
	Multiple Choice Questions	183

<b>6 Fuels</b>	<b>185</b>
6.1 Introduction	185
6.2 Fuels	185
6.2.1 Solid Fuels	185
6.2.2 Gaseous Fuels	186
6.2.3 Liquid Fuels	186
6.3 Chemical Structure of Petroleum	186
6.3.1 Paraffin Series	187
6.3.2 Olefin Series	188
6.3.3 Naphthene Series	188
6.3.4 Aromatic Series	189
6.4 Petroleum Refining Process	190
6.5 Important Qualities of Engine Fuels	192
6.5.1 SI Engine Fuels	192
6.5.2 CI Engine Fuels	195
6.6 Rating of Fuels	196
6.6.1 Rating of SI Engine Fuels	196
6.6.2 Rating of CI Engine Fuels	197
Review Questions	198
Multiple Choice Questions	199
<b>7 Alternate Fuels</b>	<b>201</b>
7.1 Introduction	201
7.2 Possible Alternatives	202
7.3 Solid Fuels	202
7.4 Liquid Fuels	204
7.4.1 Alcohol	204
7.4.2 Methanol	206
7.4.3 Ethanol	206
7.4.4 Alcohol for SI Engines	207
7.4.5 Reformulated Gasoline for SI Engine	207
7.4.6 Water-Gasoline Mixture for SI Engines	208
7.4.7 Alcohol for CI Engines	208
7.5 Surface-Ignition Alcohol CI Engine	209
7.6 Spark-Assisted Diesel	210
7.7 Gaseous Fuels	211
7.7.1 Hydrogen	211
7.8 Hydrogen Engines	212
7.8.1 Natural Gas	214
7.8.2 Advantages of Natural Gas	215
7.8.3 Disadvantages of Natural Gas	215
7.8.4 Compressed Natural Gas (CNG)	215

7.8.5	Liquefied Petroleum Gas (LPG)	216
7.8.6	Advantages and Disadvantages of LPG	216
7.8.7	Future Scenario for LPG Vehicles	218
7.8.8	LPG (Propane) Fuel Feed System	218
7.9	Dual Fuel Operation	219
7.10	Other Possible Fuels	219
7.10.1	Biogas	220
7.10.2	Producer Gas	220
7.10.3	Blast Furnace Gas	220
7.10.4	Coke Oven Gas	221
7.10.5	Benzol	221
7.10.6	Acetone	221
7.10.7	Diethyl Ether	221
	Review Questions	221
	Multiple Choice Questions	222
<b>8</b>	<b>Carburetion</b>	<b>225</b>
8.1	Introduction	225
8.2	Definition of Carburetion	225
8.3	Factors Affecting Carburetion	225
8.4	Air-Fuel Mixtures	226
8.5	Mixture Requirements at Different Loads and Speeds	227
8.6	Automotive Engine Air-Fuel Mixture Requirements	228
8.6.1	Idling Range	228
8.6.2	Cruising Range	230
8.6.3	Power Range	230
8.7	Principle of Carburetion	231
8.8	The Simple Carburetor	232
8.9	Calculation of the Air-Fuel Ratio	234
8.9.1	Air-Fuel Ratio Neglecting Compressibility of Air	237
8.9.2	Air-Fuel Ratio Provided by a Simple Carburetor	237
8.9.3	Size of the Carburetor	238
8.10	Essential Parts of a Carburetor	238
8.10.1	The Fuel Strainer	238
8.10.2	The Float Chamber	238
8.10.3	The Main Metering and Idling System	239
8.10.4	The Choke and the Throttle	242
8.11	Compensating Devices	242
8.11.1	Air-bleed jet	244
8.11.2	Compensating Jet	244
8.11.3	Emulsion Tube	245
8.11.4	Back Suction Control Mechanism	245

8.11.5	Auxiliary Valve	245
8.11.6	Auxiliary Port	247
8.12	Additional Systems in Modern Carburetors	247
8.12.1	Anti-dieseling System	249
8.12.2	Richer Coasting System	250
8.12.3	Acceleration Pump System	250
8.12.4	Economizer or Power Enrichment System	251
8.13	Types of Carburetors	251
8.13.1	Constant Choke Carburetor	252
8.13.2	Constant Vacuum Carburetor	253
8.13.3	Multiple Venturi Carburetor	253
8.13.4	Advantages of a Multiple Venturi System	254
8.13.5	Multijet Carburetors	255
8.13.6	Multi-barrel Venturi Carburetor	255
8.14	Automobile Carburetors	256
8.14.1	Solex Carburetors	257
8.14.2	Carter Carburetor	259
8.14.3	S.U. Carburetor	261
8.15	Altitude Compensation	262
8.15.1	Altitude Compensation Devices	263
	Worked out Examples	264
	Review Questions	273
	Exercise	274
	Multiple Choice Questions	277
<b>9</b>	<b>Mechanical Injection Systems</b>	<b>281</b>
9.1	Introduction	281
9.2	Functional Requirements of an Injection System	281
9.3	Classification of Injection Systems	282
9.3.1	Air Injection System	282
9.3.2	Solid Injection System	283
9.3.3	Individual Pump and Nozzle System	284
9.3.4	Unit Injector System	284
9.3.5	Common Rail System	284
9.3.6	Distributor System	285
9.4	Fuel Feed Pump	286
9.5	Injection Pump	286
9.5.1	Jerk Type Pump	287
9.5.2	Distributor Type Pump	289
9.6	Injection Pump Governor	290
9.7	Mechanical Governor	291
9.8	Pneumatic Governor	292

9.9 Fuel Injector	292
9.10 Nozzle	293
9.10.1 Types of Nozzle	295
9.10.2 Spray Formation	297
9.10.3 Quantity of Fuel and the Size of Nozzle Orifice	298
9.11 Injection in SI Engine	299
Worked out Examples	301
Review Questions	308
Exercise	309
Multiple Choice Questions	311
<b>10 Electronic Injection Systems</b>	<b>313</b>
10.1 Introduction	313
10.2 Why Gasoline Injection?	313
10.2.1 Types of Injection Systems	314
10.2.2 Components of Injection System	315
10.3 Electronic Fuel Injection System	317
10.3.1 Merits of EFI System	318
10.3.2 Demerits of EFI System	319
10.4 Multi-Point Fuel Injection (MPFI) System	319
10.4.1 Port Injection	319
10.4.2 Throttle Body Injection System	320
10.4.3 D-MPFI System	321
10.4.4 L-MPFI System	321
10.5 Functional Divisions of MPFI System	322
10.5.1 MPFI-Electronic Control System	322
10.5.2 MPFI-Fuel System	322
10.5.3 MPFI-Air Induction System	322
10.6 Electronic Control System	322
10.6.1 Electronic Control Unit (ECU)	324
10.6.2 Cold Start Injector	324
10.6.3 Air Valve	326
10.7 Injection Timing	326
10.8 Group Gasoline Injection System	327
10.9 Electronic Diesel Injection System	328
10.10 Electronic Diesel Injection Control	329
10.10.1 Electronically Controlled Unit Injectors	331
10.10.2 Electronically Controlled Injection Pumps (Inline and Distributor Type)	331
10.10.3 Common-Rail Fuel Injection System	333
Review Questions	336
Multiple Choice Questions	337

<b>11 Ignition</b>	<b>339</b>
11.1 Introduction	339
11.2 Energy Requirements for Ignition	339
11.3 The Spark Energy and Duration	340
11.4 Ignition System	340
11.5 Requirements of an Ignition System	341
11.6 Battery Ignition System	341
11.6.1 Battery	343
11.6.2 Ignition Switch	343
11.6.3 Ballast Resistor	343
11.6.4 Ignition Coil	344
11.6.5 Contact Breaker	345
11.6.6 Capacitor	346
11.6.7 Distributor	346
11.6.8 Spark Plug	347
11.7 Operation of a Battery Ignition System	349
11.8 Limitations	350
11.9 Dwell Angle	351
11.10 Advantage of a 12 V Ignition System	352
11.11 Magneto Ignition System	353
11.12 Modern Ignition Systems	355
11.12.1 Transistorized Coil Ignition (TCI) System	356
11.12.2 Capacitive Discharge Ignition (CDI) System	357
11.13 Firing Order	358
11.14 Ignition Timing and Engine Parameters	359
11.14.1 Engine Speed	360
11.14.2 Mixture Strength	360
11.14.3 Part Load Operation	360
11.14.4 Type of Fuel	362
11.15 Spark Advance Mechanism	362
11.15.1 Centrifugal Advance Mechanism	362
11.15.2 Vacuum Advance Mechanism	363
11.16 Ignition Timing and Exhaust Emissions	364
Review Questions	365
Multiple Choice Questions	366
<b>12 Combustion and Combustion Chambers</b>	<b>369</b>
12.1 Introduction	369
12.2 Homogeneous Mixture	369
12.3 Heterogeneous Mixture	370
12.4 Combustion in Spark-Ignition Engines	370
12.5 Stages of Combustion in SI Engines	371

12.6	Flame Front Propagation	372
12.7	Factors Influencing the Flame Speed	374
12.8	Rate of Pressure Rise	376
12.9	Abnormal Combustion	377
12.10	The Phenomenon of Knock in SI Engines	377
12.10.1	Knock Limited Parameters	379
12.11	Effect of Engine Variables on Knock	380
12.11.1	Density Factors	380
12.11.2	Time Factors	381
12.11.3	Composition Factors	382
12.12	Combustion Chambers for SI Engines	383
12.12.1	Smooth Engine Operation	383
12.12.2	High Power Output and Thermal Efficiency	385
12.13	Combustion in Compression-Ignition Engines	387
12.14	Stages of Combustion in CI Engines	389
12.14.1	Ignition Delay Period	390
12.14.2	Period of Rapid Combustion	391
12.14.3	Period of Controlled Combustion	392
12.14.4	Period of After-Burning	392
12.15	Factors Affecting the Delay Period	392
12.15.1	Compression Ratio	393
12.15.2	Engine Speed	394
12.15.3	Output	395
12.15.4	Atomization and Duration of Injection	395
12.15.5	Injection Timing	395
12.15.6	Quality of Fuel	396
12.15.7	Intake Temperature	396
12.15.8	Intake Pressure	396
12.16	The Phenomenon of Knock in CI Engines	396
12.17	Comparison of Knock in SI and CI Engines	398
12.18	Combustion Chambers for CI Engines	401
12.18.1	Direct-Injection Chambers	402
12.18.2	Indirect-Injection Chambers	403
	Review Questions	407
	Multiple Choice Questions	407
<b>13</b>	<b>Engine Friction and Lubrication</b>	<b>411</b>
13.1	Introduction	411
13.1.1	Direct Frictional Losses	411
13.1.2	Pumping Loss	412

13.1.3	Power Loss to Drive Components to Charge and Scavenge	412
13.1.4	Power Loss to Drive the Auxiliaries	412
13.2	Mechanical Efficiency	412
13.3	Mechanical Friction	413
13.3.1	Fluid-film or Hydrodynamic Friction	413
13.3.2	Partial-film Friction	413
13.3.3	Rolling Friction	413
13.3.4	Dry Friction	414
13.3.5	Journal Bearing Friction	414
13.3.6	Friction due to Piston Motion	414
13.4	Blowby Losses	415
13.5	Pumping Loss	415
13.5.1	Exhaust Blowdown Loss	415
13.5.2	Exhaust Stroke Loss	416
13.5.3	Intake Stroke Loss	417
13.6	Factors Affecting Mechanical Friction	417
13.6.1	Engine Design	417
13.6.2	Engine Speed	417
13.6.3	Engine Load	417
13.6.4	Cooling Water Temperature	418
13.6.5	Oil Viscosity	418
13.7	Lubrication	418
13.7.1	Function of Lubrication	418
13.7.2	Mechanism of Lubrication	419
13.7.3	Elastohydrodynamic Lubrication	422
13.7.4	Journal Bearing Lubrication	422
13.7.5	Stable Lubrication	425
13.8	Lubrication of Engine Components	425
13.8.1	Piston	426
13.8.2	Crankshaft Bearings	427
13.8.3	Crankpin Bearings	427
13.8.4	Wristpin Bearing	428
13.9	Lubrication System	428
13.9.1	Mist Lubrication System	430
13.9.2	Wet Sump Lubrication System	431
13.9.3	Dry Sump Lubrication System	434
13.10	Crankcase Ventilation	434
13.11	Properties of Lubricants	437
13.11.1	Viscosity	438
13.11.2	Flash and Fire Points	438
13.11.3	Cloud and Pour Points	438

13.11.4 Oiliness or Film Strength	439
13.11.5 Corrosiveness	439
13.11.6 Detergency	439
13.11.7 Stability	439
13.11.8 Foaming	439
13.12 Additives for Lubricants	440
13.12.1 Anti-oxidants and Anticorrosive Agents	440
13.12.2 Detergent-Dispersant	440
13.12.3 Extreme Pressure Additives	441
13.12.4 Pour Point Depressors	441
13.12.5 Viscosity Index Improvers	441
13.12.6 Oiliness and Film Strength Agents	441
13.12.7 Antifoam Agents	441
Review Questions	442
Multiple Choice Questions	442
<b>14 Heat Rejection and Cooling</b>	<b>445</b>
14.1 Introduction	445
14.2 Variation of Gas Temperature	446
14.3 Piston Temperature Distribution	446
14.4 Cylinder Temperature Distribution	447
14.5 Heat Transfer	447
14.6 Theory of Engine Heat Transfer	450
14.7 Parameters Affecting Engine Heat Transfer	451
14.7.1 Fuel-Air Ratio	452
14.7.2 Compression Ratio	452
14.7.3 Spark Advance	452
14.7.4 Preignition and Knocking	452
14.7.5 Engine Output	452
14.7.6 Cylinder Wall Temperature	452
14.8 Power Required to Cool the Engine	453
14.9 Need for Cooling System	453
14.10 Characteristics of an Efficient Cooling System	454
14.11 Types of Cooling Systems	454
14.12 Liquid Cooled Systems	454
14.12.1 Direct or Non-return System	455
14.12.2 Thermosyphon System	456
14.12.3 Forced Circulation Cooling System	456
14.12.4 Evaporative Cooling System	460
14.12.5 Pressure Cooling System	461
14.13 Air-Cooled System	463
14.13.1 Cooling Fins	463

14.13.2 Baffles	465
14.14 Comparison of Liquid and Air-Cooling Systems	465
14.14.1 Advantages of Liquid-Cooling System	465
14.14.2 Limitations	466
14.14.3 Advantages of Air-Cooling System	466
14.14.4 Limitations	467
Review Questions	467
Multiple Choice Questions	468
<b>15 Engine Emissions and Their Control</b>	<b>471</b>
15.1 Introduction	471
15.2 Air Pollution due to IC Engines	472
15.3 Euro I and Euro II Norms	472
15.4 Engine Emissions	473
15.4.1 Exhaust Emissions	473
15.5 Hydrocarbons (HC)	475
15.6 Hydrocarbon Emission	475
15.6.1 Incomplete Combustion	476
15.6.2 Crevice Volumes and Flow in Crevices	477
15.6.3 Leakage Past the Exhaust Valve	478
15.6.4 Valve Overlap	478
15.6.5 Deposits on Walls	478
15.6.6 Oil on Combustion Chamber Walls	479
15.7 Hydrocarbon Emission from Two-Stroke Engines	479
15.8 Hydrocarbon Emission from CI Engines	480
15.9 Carbon Monoxide (CO) Emission	481
15.10 Oxides Of Nitrogen (NO <sub>x</sub> )	482
15.10.1 Photochemical Smog	483
15.11 Particulates	485
15.12 Other Emissions	486
15.12.1 Aldehydes	486
15.12.2 Sulphur	486
15.12.3 Lead	487
15.12.4 Phosphorus	488
15.13 Emission Control Methods	488
15.13.1 Thermal Converters	488
15.14 Catalytic Converters	489
15.14.1 Sulphur	493
15.14.2 Cold Start-Ups	493
15.15 CI engines	495
15.15.1 Particulate Traps	495
15.15.2 Modern Diesel Engines	496

15.16	Reducing Emissions by Chemical Methods	497
15.16.1	Ammonia Injection Systems	497

<b>17 Performance Parameters and Characteristics</b>	<b>559</b>
17.1 Introduction	559
17.2 Engine Power	560
17.2.1 Indicated Mean Effective Pressure ( $p_{im}$ )	560
17.2.2 Indicated Power ( $ip$ )	562
17.2.3 Brake Power ( $bp$ )	562
17.2.4 Brake Mean Effective Pressure ( $p_{bm}$ )	564
17.3 Engine Efficiencies	565
17.3.1 Air-Standard Efficiency	566
17.3.2 Indicated and Brake Thermal Efficiencies	566
17.3.3 Mechanical Efficiency	566
17.3.4 Relative Efficiency	566
17.3.5 Volumetric Efficiency	567
17.3.6 Scavenging Efficiency	567
17.3.7 Charge Efficiency	567
17.3.8 Combustion Efficiency	568
17.4 Engine Performance Characteristics	568
17.5 Variables Affecting Performance Characteristics	571
17.5.1 Combustion Rate and Spark Timing	571
17.5.2 Air-Fuel Ratio	572
17.5.3 Compression Ratio	572
17.5.4 Engine Speed	572
17.5.5 Mass of Inducted Charge	572
17.5.6 Heat Losses	572

17.6	Methods of Improving Engine Performance	573
17.7	Heat Balance	573
17.8	Performance Maps	576
17.8.1	SI Engines	576
17.8.2	CI Engines	578
17.9	Analytical Method of Performance Estimation	579
